THINKING BATTERIES? TALK TO TAUBER!

PACKAGED POWER . . .

We've built our reputation on quality products, professional workmanship and flexible design and production capabilities. We can fabricate to your specification or assist you in a custom design for your application. Assemblies are available in rechargeable or primary types such as Sealed Lead-Acid, Nickel Cadmium, Lithium, Alkaline and others. Applications range from on-board memory backup, medical instruments, communication and video, to portable tools, oceanographic equipment and computer UPS systems.

Call or write for our Facilities Brochure/Design Guide.

Eveready® wants you to know

how to choose the right battery for the right job, at the right price

GENERAL PURPOSE

EVEREADY
Lantern Battery
EVEREADY
C
9

OUR "GOOD" BATTERY FOR OCCASIONAL GENERAL PURPOSE USE

- Our lowest price battery family
- Variety of shapes and sizes
- Provides from 1.5 Volts to 510 Volts
- Good shelf life
- Voltage drops gradually with use

APPLICATIONS

Low to moderate current in occasional use. Radios, flashlights, lanterns, small lighted toys and novelties, high voltage electronic photoflash, barricade flashers, lighting and alarm systems, electric fence controllers, laboratory instruments, telephone amplifiers, marine depth finders, smoke detectors (but only when recommended by manufacturer), pagers, electronic games, calculators, remote control transmitters.

SUPER HEAVY DUTY BATTERIES

EVEREADY
SUPER HEAVY DUTY
lantern battery

PREMIUM POWER
AT POPULAR PRICES

- Variety of shapes and sizes
- Provides 1.5 Volts, 6 Volts, or 9 Volts
- Good shelf life
- "Better" voltage maintenance under load than General Purpose Batteries
- "Better" low temperature characteristics than General Purpose Batteries
- Excellent leakage resistance

APPLICATIONS

Moderate to heavy current or regular use. Flashlights, lanterns, fluorescent lanterns, Halogen lanterns, calculators, radios, portable tape recorders and players, motor driven devices, communication equipment, electronic games, remote control transmitters.

"ENERGIZER"® CYLINDRICAL ALKALINE

OUR "BEST," LONGEST LASTING
ALL PURPOSE POWER SOURCE

- "Best" shelf life—outlasts General Purpose and Super Heavy Duty
- "Best" voltage maintenance under load
- "Best" low temperature characteristics
- Variety of shapes and sizes
- Provides 1.5 Volts, 3 Volts, 4.5 Volts, 6 Volts and 9 Volts

APPLICATIONS

Heavy current or continuous use. Electronic photoflash, movie cameras, still cameras and motor drives, motor toys, portable tape recorders and players, calculators, smoke detectors, shavers, television sets, portable communication systems, motor driven devices, medical instruments, signal lights, electronic games.

"Eveready," "Energizer," "Air Cell," are trademarks of

UNION CARBIDE CORPORATION

BATTERY PRODUCTS DIVISION
Old Ridgebury Road, Danbury, CT 06817

Sales Offices: Norcross-GA, Itasca-IL, Middleburg Heights-OH, Dallas, Saddle Brook-NJ, San Francisco

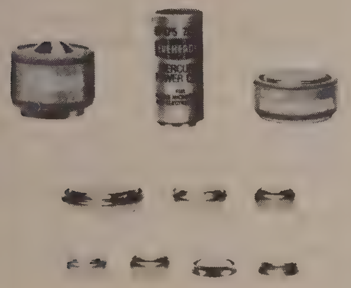
Union Carbide Corporation provides a consulting service of experienced battery engineers as an aid to manufacturers in need of special battery designs. For help with your specific battery problems, call (203) 794-7548 or write Battery Engineering Dept. No. 18 in Danbury (address shown on this page).

Recommend the right EVEREADY® battery for the right job

"EVEREADY"® BATTERY SYSTEMS AND THEIR PROMINENT FEATURES

...FROM THE MANUFACTURER OF THE MOST COMPLETE DRY BATTERY LINE IN THE WORLD

MINIATURE
(Silver Oxide, Mercuric Oxide, MnO_2)



HIGH ENERGY DENSITY MINIATURE POWER SOURCE

- Variety of shapes and sizes
- Provides 1.35 Volts to 12.6 Volts
- Outstanding shelf life
- "Good" voltage maintenance under load
- "Good" low temperature characteristic
- Exceptional salting resistance

APPLICATIONS

Miniature battery powered electronic equipment. LCD, LED, or Analog electronic watches or clocks, hearing aids, calculators, cameras, electronic thermometers, miniature radios, medical instruments, wireless microphones, paging devices, test instruments, electronic games, musical greeting cards and novelty items.

NICKEL-CADMIUM RECHARGEABLE
(High Rate and Fast Charge Types)

RECHARGEABLE POWER SOURCE

- Variety of shapes and sizes
- Standard voltages 1.2 Volts to 7.2 Volts
- Custom batteries available
- Good high and low temperature performance
- High rate discharge
- Long cycle life
- Fast Charge types available
- Consumer cells and chargers available

APPLICATIONS

Rechargeable devices, standby power and replacement cells for high usage devices. Portable tools and appliances, electronic photoflash, calculators, tape recorders, and dictating equipment, toys, R/C models, standby power, alarm systems, professional communication recording equipment, personal pagers and cordless phones.

LITHIUM

LITHIUM 3.6V
L-1002
EVEREADY
Lithium
ENERGIZER

HIGH ENERGY DENSITY, LONG LIFE POWER SOURCE

- Miniature provides 1.5 Volts or 3 Volts
- Cylindrical provides 3 to 7.2 Volts
- Outstanding shelf life
- Exceptional salting resistance
- Good low and high temperature use and storage performance

MINIATURE BATTERY APPLICATIONS

Long life, low drain electronic equipment. Quartz watches, Analog or LCD watches, calculators, cameras, microprocessor memory back-up.

CYLINDRICAL BATTERY APPLICATIONS

Long life, moderate drain electronic equipment. Hearing aids, cameras, microprocessor memory back-up.

VARTA Batteries—High quality

Button batteries

Nickel Cadmium. Rechargeable.

The unique Nickel-Cadmium button battery. Varta Nickel Cadmium button batteries have advantages unique to their construction: for equivalent power they take less room, require a lower charging rate and hold their charge longer than conventional Nickel Cadmium batteries. Available in single cells and stack formats for instruments, portable tools, cameras, recorders, standby power, toys, alarm systems and other industrial electronic applications.

Also available: cylindrical Nickel Cadmium batteries of industrial quality which provide higher discharge rates, better temperature performance and better reliability under mechanical stress.

Silver Oxide. High capacity, constant voltage throughout service life, leakage resistant, long shelf life. Low and high drain cells for electric and electronic watches with analog, LED, LCD and backlit displays. Also suitable for cameras, calculators and other electronic circuits.

Mercury Oxide. Low and moderate drain cells for electric/electronic watches with analog displays, and hearing aid applications. Also suitable for cameras, calculators, microphones, and other miniature electronic devices.

Lithium. High energy density and extremely long shelf life, excellent voltage stability over wide temperature ranges. For use in various electronic applications.

Standard dry cells

Zinc Carbon. Standard long life batteries for general use. For occasional low current demands in flashlights, portable recorders, radios, toys and other common uses.

Zinc Chloride. High performance. For moderate to heavy current demands in flashlights, radios, recorders, toys, small motor applications, cameras and other uses requiring more voltage under load than Zinc Carbon batteries deliver.

Alkaline Manganese. Superior voltage under load, extra long shelf life. For continuous heavy current demands in portable recorders, movie cameras, signal lights, electronic games and motorized applications. Highest voltage under heavy loads.

Varta was established in 1887, and is world renowned for its research and development of stored energy sources. Varta manufactures batteries and battery products EXCLUSIVELY.

YUASA MAINTENANCE-FREE SEALED LEAD ACID BATTERIES

FEATURES

- These compact and efficient power sources are especially designed for long life, rugged durability, and dependable service.
- Yuasa's unique suspended electrolyte and new venting systems give you the freedom to mount these batteries in any position without fear of leakage or loss of capacity.
- Unparalleled life expectancy in both float and cyclic applications.
- Available for immediate delivery from our warehouse.

COMMON SPECIFICATIONS

Operating temperature ranges

Charge: −20°C to 50°C (5°F to 122°F)

Discharge: −40°C to 50°C (−40°F to 122°F)

Storage: −40°C to 60°C (−40°F to 140°F)

Life expectancy

Standby use: 4 to 5 years

Cyclic use: 250 to 1200 cycles

Sealed construction

Can be operated, charged or stored in any position.

CHARGING METHODS

Constant Voltage Charging at 25°C
Standby use:

Maximum charging current .... 25% of rated capacity

Charging voltage** .... 2.25 to 2.30 volts per cell

Cyclic use:

Maximum charging current .... 25% of rated capacity

Charging voltage** .... 2.43 to 2.50 volts per cell

** When using a constant voltage, current limited charging system in the temperature range of 5° to 40°C (41° to 104°F), temperature compensation is not necessarily needed. Temperature compensation when required is -4mv/°C/cell.

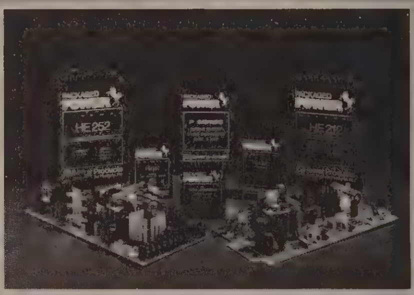
PACKAGED POWER

THE POWER TO DO IT ALL

Nobody gives you more in DC power sources. More models, more technologies, more packaging, more performance. Nobody has more ways to power today's electronics world than Computer Products, Inc.

We're the fastest growing supplier of power conversion products worldwide, with one of the broadest, most comprehensive lines in the business. We deliver power for almost any requirement:

■ AC/DC and DC/DC ■ Linears and Switchers ■ Standards and Specials ■ Encapsulated, Metal-Cased and Open-Frame ■ VDE, CSA, and UL Designs ■ 1 Watt to 500 Watts.



And with every unit we deliver comes confidence. The kind of confidence you can only get from field-proven reliability and a demonstrated commitment to customer support. We have the resources to serve the largest volume OEM's—from Apple to Zilog—and the interest to serve the smallest.

We're Computer Products, Inc., the pros in Packaged Power.

And we have everything it takes to power you through the 80's ... and beyond.

MILITARY – INDUSTRIAL

Power Supply Modules

When reliability is imperative.

For Mil Spec and critical industrial applications where reliability is the prime consideration, Abbott Power Supplies have been the predominant choice for over 24 years. This enduring acceptance has been earned through sound design, dependable components, meticulous workmanship, exhaustive quality control and proven performance in the field under severe operating conditions. Whatever your demanding requirements, you will find the correct Abbott Power Supply module in the next 15 pages.

686 models are listed on the next 15 pages

MILITARY POWER SUPPLIES

FUNCTION	DESCRIPTION	MODEL	PAGE
AC to DC			
60/400 Hz to 5-28 VDC	High density single/ dual outputs	Model LV	3•1442
50-60 Hz to 5-28 VDC	High efficiency low EMI switcher	Model M	3•1443
400 Hz to 5-100 VDC	High performance single and dual outputs	Model W, WW	3•1445
400 Hz to 5-28 VDC	High density 3ϕ single/dual output	Model WL, WWL	3•1446
DC to DC			
20-32 VDC to 5-28 VDC	High efficiency switcher, single output	Model BA	3•1447
20-32 VDC to 5-50 VDC	High efficiency switcher single and dual outputs	Model BN, BBN	3•1448
20-32 VDC to 5-50 VDC	High performance single and dual outputs	Model C, CC	3•1449
24-30 VDC to 5-500 VDC	High reliability linear	Model B	3•1450
DC to AC			
22-32 VDC to 400-1600 Hz	Sine Wave Inverter	Model S	3•1451

MILITARY POWER SUPPLIES

60/400 Hz to 5-28 VDC

MODEL
LV

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105 to 125 VRMS.

EFFICIENCY: Typical efficiency 35% for 5V, 65% for 28V.

LINE REGULATION: 0.05% (±1 VC for LLV model).

LOAD REGULATION: 0.10%.

PARD (NOISE & RIPPLE): 1 mVRMS, 5 mV ptp.

INPUT FREQUENCY RANGE: 55 to 65/380 to 420 Hz. Units may be operated down to 47 Hz with 20% derating.

OUTPUT ADJUSTMENT RANGE: ±5% of nominal at output terminals.

INSULATION VOLTAGE: 500 VDC input to case, input to output and output to case.

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative output may be grounded.

TEMPERATURE RANGE: Operating: −20°C to +71°C, −40°C to +85°C optional (please consult your nearest Abbott Sales Office for details). Storage temperatures: −55°C to +85°C.

TEMPERATURE EFFECT COEFFICIENT: 0.01% per degree Celsius over entire range.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling. Unit meets MIL-S-901 (5 ft. hammer drop). Copies of certified test reports are available upon request.

ADJUSTMENT RANGE: Unit is equipped with an internal potentiometer. An external adjustment potentiometer is available. Please consult your nearest Abbott Sales Office.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

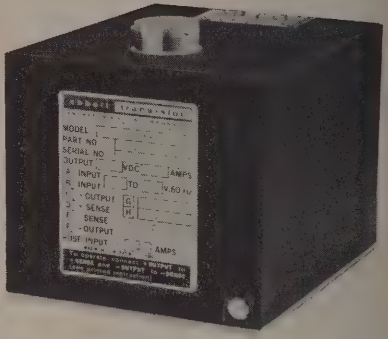
INPUT TRANSIENT PROTECTION: 143.8 VRMS, for 0.3 seconds.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The regulator circuit action compensates for a DC voltage drop up to 0.3 volts in the load leads.

LOAD TRANSIENT: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current.

ELECTROMAGNETIC INTERFERENCE: Meets MIL-STD-461A, methods CE01 and CE03 for conducted emissions.

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of +50°C baseplate temperature, maximum rated output power for LV5DE20-1 was calculated to be 69,987 hrs. for ground benign environment and 10,384 hrs, for naval sheltered environment. MTBF for LLV12DE0.5-1 was calculated to be 186,947 hrs. for a ground benign environment and 30,081 for naval sheltered environment. With Enhanced Reliability Option (ER) MTBF for LV5DE20-1 (ER) was calculated to be 236,033 hrs. for ground benign environment and 35,585 hrs. for naval sheltered environment. For LLV12DE0.5-1 (ER) MTBF was calculated to be 330,349 hrs. for ground benign environment and 50,682 hrs. for a naval sheltered environment.



FEATURES

- Up to 65% efficiency
- Low Output Ripple, 5 mV peak-to-peak
- 0.1% Regulation
- High Density
- Single and Dual Outputs

SINGLE OUTPUT: LV SERIES

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Weight (Lbs.)	Model Number
4.75 to 5.25	2.4	9A	3.1	LV5DE2.4
	6.0	11C	5.8	LV5DE6

	0.9	12K	4.8	LLV15DE0.9
	1.5	13D	6.6	LLV15DE1.5

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character after the character "E" in the model number. (EXAMPLE: LV5DE6 to LV5DEL5)

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the LV series (as shown in picture). Please consult your nearest Abbott Sales Office for details.

WIDER OPERATING TEMPERATURE RANGE: (T Option) −40°C to +85°C operating temperature range available. Please consult your nearest Abbott Sales Office for details.

OVER TEMPERATURE PROTECTION: (OT Option) Removes input power when conduction surfaces exceed safe limits. Please consult your nearest Abbott Sales Office for details.

OVERVOLTAGE PROTECTION: (-1 Option) An internal crowbar type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point. Unit input power must be recycled to restore unit. To specify this feature, please add a "-1" after the last number in the model number. (EXAMPLE: LV5DE6 to LV5DE6-1)

WIDER INPUT VOLTAGE RANGE: (H Option) Available at a voltage range 210 to 250 VAC. Please consult your nearest Abbott Sales Office for details.

ENHANCED RELIABILITY: (ER OPTION) This option provides increased reliability by using a higher level of military grade components. This feature allows the power supply to meet customer-specific requirements as to "Hi-Rel" components.

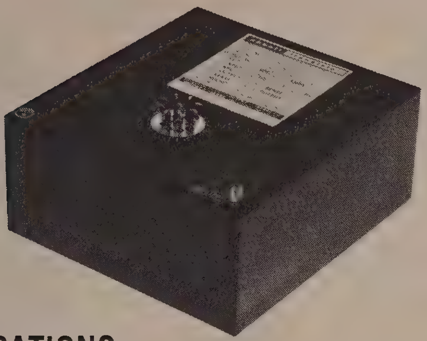
MILITARY POWER SUPPLIES

Switching Power Supplies

MODEL
M



103.5-126.5 VAC to 4.7-29.7 VDC 47 to 440 Hz. 1 Ø

- Tight line and load regulation.
- Wide temperature range.
- High reliability.
- Encapsulated and hermetically sealed. Meets MIL-STD-810C and MIL-S-901.
- Low EMI. Meets MIL-STD-461A, (Radiated C.E. and C.S. specs) with F option.
- High efficiency. 75% to 81% typical.
- Internal OVP available.
- Remote programming optional.
- TTL compatibility available.

SPECIFICATIONS

INPUT VOLTAGE: 103.5 to 126.5 Vac, (Vrms) single phase, 47 to 440 Hz. Wide input option is available.

INPUT TRANSIENT PROTECTION: Unit will withstand 143.8 Vac for 0.3 seconds in accordance with MIL-STD-1399.

INRUSH CURENT:

MAXIMUM:	(M-50)	16 times the peak input current at low line, full load output, and nominal output voltage, with source impedance of no less than 0.25 ohm.
	(M-100)	8 times the peak input current at low line, full load output, and nominal output voltage, with source impedance of no less than 0.25 ohm.
TYPICAL:	(M-50)	8 times the peak input current under the same conditions.
	(M-100)	4 times the peak input current under the same conditions.

EFFICIENCY: Minimum 65% @ FL, 25°C baseplate temperature and nominal output. Typical efficiency is 75-81% under same conditions.

LINE REGULATION: Within 0.2% or 25mV, whichever is greater for input change of 103.5 to 126.5 Vac, (Vrms) with load constant.

LOAD REGULATION: Within 0.2% or 25mV, whichever is greater for load change of NL to FL with line constant.

RIPPLE & NOISE: 30mVrms, 100mV, whichever is greater for load change of NL to FL with line constant.

LOAD TRANSIENT RECOVERY TIME: Output Voltage returns to regulation limits within 3 msec after a 50% change in load current. Maximum over/under shoot is less than 0.4 Vdc or 3% of the output voltage, whichever is greater.

BROWNOUT HOLDUP-TIME: 15 msec. minimum at low line and maximum output current, 30 msec. typical at nominal line and maximum output current.

OPERATING TEMPERATURE RANGE: 0°C to 71°C. Wider temperature range is available.

STORAGE TEMPERATURE: −55°C to +85°C.

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum.

ISOLATION: 500 Vdc input to output and input to case. 100 Vdc output to case.

INSULATION RESISTANCE: 50 megohms minimum between input and output, input to case, and output to case when measured at 50 Vdc (Input pins tied together, Output pins tied together).

POLARITY: Input and outputs are isolated, either positive or negative side may be grounded.

OUTPUT VOLTAGE ADJUSTMENT: Output continuously adjustable between the limits shown by means of an externally accessible adjustment potentiometer.

ADJUSTMENT RESOLUTION:	NOMINAL OUTPUT VOLTAGE	RESOLUTION
	5, 12, 15 Vdc units	35 milivolts
	24, 28 Vdc units	60 milivolts

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "Sensing" leads. The resulting circuit action compensates for a dc voltage drop up to 0.3 volts in the load leads.

OUTPUT IMPEDANCE: dc to 1 KHz; .03 R_L* or 0.5 ohm, whichever is greater. 1 KHz to 10 KHz: 0.5 R_L or 0.1 ohm, whichever is greater. 10 KHz to .100 KHz: 0.7 R_L to 0.3 ohm, whichever is greater. *Rate loaded.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. Unit automatically recovers to normal when short circuit is removed.

ENVIRONMENT: Unit is hermetically sealed to meet MIL-STD-810C. Unit meets MIL-S-901 (5 foot hammer drop). Certified test reports are available.

EMI: Units meet MIL-STD-461A, CEO1, CEO3 with optional filter.

JUNCTION TEMPERATURE: Maximum Junction Temperature of the power transistors is 85°C. Complies with NAVMAT NOTE 3080.

ABBOTT TRANSISTOR LABORATORIES, INC.
Power Supply Div. Western Offices: 5200 W. Jefferson Blvd., Los Angeles, CA 90016 (213) 936-8185. Telex: 69-1398

MILITARY POWER SUPPLIES

Switching Power Supplies

MODEL M

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "I", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number. EXAMPLE: M100DL-5A, M50DL-5A

OVER-VOLTAGE PROTECTION: (-1 Option) An internal non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set point. Unit input power must be recycled to restore output. To specify this feature, please add a "-1" after the "A" in the model number. EXAMPLE: M100DT-5A-1, M50D-5A-1

WIDER OPERATING TEMPERATURE RANGE: (T Option) −20°C to +71°C peak to peak output ripple spec increases to 200mV. To specify this option, please add a "T" to the character preceding the dash of the model number. EXAMPLE: M100DT-5A, M50DT-5A

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the M Series. Please consult your nearest Abbott Sales Office for details.

WIDER INPUT VOLTAGE RANGE: (H Option) The standard input voltage range of the "M" line is 103.5 to 126.5 Vac. For the wider input voltage range of 90-126.5 Vac; output current is derated by 20%. To specify this feature, please add an "H" to the character preceding the first dash in the model number. EXAMPLE: M100DH-5A, M50DH-5A

REMOTE PROGRAM OPTION: (R Option) Units can be modified so that their output voltage can be adjusted from a remote location. This is accomplished by adding an additional pin to the header on the unit. To specify this option, please add an "R" after the character preceding the first dash of the model number. EXAMPLE: M100DR-5A, M50DR-5A

EMI FILTER: (F option) An internal EMI filter is available to reduce conducted interference on the input leads. With these filters the model M's will comply with MIL-STD-461A notice 3, CE01 and CE03 on the input leads. The addition of this filter alters the isolation of the input to case to 200 Vdc. To specify this feature, please add an "F" after the "D" in the model number. EXAMPLE: M100DF-5A, M50DF-5A

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using higher levels of Mil. grade components. This feature allows the power supply to meet customer specific requirements as to "Hi Rel" components, environmental testing and extended Thermal Cycling. Please consult your nearest Abbott Sales Office for details.

SPECIAL ENCAPSULATION: (E Option) All of our hermetically sealed power modules are encapsulated to meet or exceed the shock, acceleration, and vibration requirements of MIL-STD-810C. Special encapsulation to enable these modules to withstand higher shock levels of 60g's, acceleration levels of 50g's, and vibration levels of 30g's, is available. To specify this feature, please add an "E" after the character preceding the first dash in the model number. EXAMPLE: M100DE-5A, M50DE-5A

RELIABILITY

RELIABILITY: MTBF for the Standard version calculated per MIL-HDBK-217D (50°C baseplate temperature, maximum operating input voltage, and maximum rated output power) is shown below.

Model Number	Baseline Temp.	Environment	MTBF
M50D-5A-1 (STD)	50°C	Ground Benign	100,659 hrs.
M50D-5A-1 (STD)	50°C	Naval Sheltered	16,819 hrs.
M100D-5A-1 (STD)	50°C	Ground Benign	71,126 hrs.
M100D-5A-1 (STD)	50°C	Naval Sheltered	11,214 hrs.

ENHANCED RELIABILITY: Abbott offers a higher MTBF unit, as shown below. (see optional features)

Model Number	Baseplate Temp.	Environment	MTBF
M50D-5A-1 (ER)	50°C	Ground Benign	187,251 hrs.
M50D-5A-1 (ER)	50°C	Naval Sheltered	29,261 hrs.
M100D-5A-1 (ER)	50°C	Ground Benign	119,095 hrs.
M100D-5A-1 (ER)	50°C	Naval Sheltered	18,350 hrs.

MILITARY POWER SUPPLIES

400 Hz to 5-27 VDC

MODEL W and WW

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105 to 125 VRMS

INPUT FREQUENCY RANGE: 380 to 420 Hertz, 1 phase

INPUT POWER: Per MIL-STD-704A for category B equipment

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 105 to 125 VRMS with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 25 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 750 vdc input to output and input to case • 200 vdc output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 vdc.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

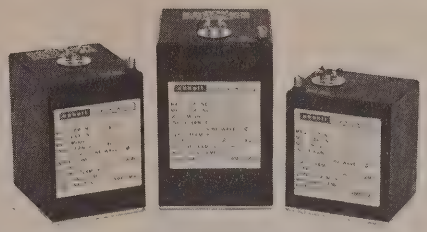
ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A Figure 3, Limit 1 (180 VAC for 0.1 seconds)

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

ELECTROMAGNETIC INTERFERENCE: Built to meet the requirements of MIL-STD-461 for generation of and susceptibility to radiated and conducted interference



High Performance

- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Tight line and load regulation.
- High reliability. Up to 214,600 hrs. MTBF per MIL-HDBK-217C.
- Compact. Power density up to 2 watts per cu. in.
- Low EMI.

RELIABILITY: MTBF per MIL-HDBK-217C up to 214.600 Hrs.

OVER-VOLTAGE PROTECTION*: An internal, non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.

abbott
MILITARY POWER SUPPLIES

400 Hz to 5-28 VDC

MODEL WL AND WWL

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105-125 VRMS 3ϕ delta.

INPUT FREQUENCY RANGE: 380-420 Hz.

INPUT TRANSIENT PROTECTION: 180 VRMS for 0.1 seconds per MIL-STD-704, Figure 3, Limit 1.

LINE REGULATION: 0.1% or 20 mV, whichever is greater.

ELECTROMAGNETIC INTERFERENCES: Meets MIL-STD-461A, methods CE and CS for conducted emissions.

TURN-ON/TURN-OFF OVERSHOOT: 0.2% or 20 mV, whichever is greater.

LOAD REGULATION: 0.1% or 20 mV, whichever is greater. For load change of no load to full load.

RIPPLE: 0.02% or 5 mVRMS (whichever is greater) 25 mV peak-to-peak.

TRACKING ACCURACY: (WWL models only) The negative output will track the positive output to within 100 mV for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment.

POLARITY: Outputs are isolated. Either positive or negative may be grounded.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The regulator circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current for units outputting 10A or less.

ISOLATION VOLTAGE: 750 VDC between input and output, input and case, and 200 VDC between output and case.

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

TEMPERATURE RANGE: −55°C to +80°C baseplate temperature. 80% rated power at −55°C to +100°C. Storage: −65°C to +125°C.

RELIABILITY: MTBF per MIL-HBK-217D under operating conditions of 50°C baseplate temperature, maximum rated output power for standard model was calculated to be 164,406 hrs. for ground benign environment and 25,633 hrs. for air inhabited transport. With Enhanced Reliability Option (ER) MTBF was calculated to be 883,580 hrs. for ground benign environment and 94,956 hrs. for air inhabited transport.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling.

EFFICIENCY: Typical 55%.

SINGLE OUTPUT: WL SERIES

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Model Number
4.8 to 5.8	20	12M	WL5.3D-20
5.8 to 6.8	20	12M	WL6.3D-20
11 to 13	10	11S	WL12D-10
11 to 13	20	12N	WL12D-20

10J	3	5¼	2½	2.50	4.75	1½	¼	2⅛	2.38	—	1½

TOLERANCE: Fractions = ±¹⁄₃₂, Decimals = .015, ±.050
MATERIAL: Base — Aluminum 6061-T6, Case — Steel

OPTIONS

OVERVOLTAGE PROTECTION: (−1 Option) An internal crowbar-type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point, to 10% or 2V above maximum rated output. To specify option, add "−1" to model number.

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using a higher level of military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components. Please consult your nearest Abbott Sales Office for details.

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1" and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number.

3ϕ WYE: (−3 Option) This input voltage is also available as an option. To specify, add "−3" to the end of the model number.

PIN DESIGNATIONS:

	Single Output	Dual Output		Single Output	Dual Output		Single Output	Dual Output
1	AC Input	AC Input	4	+ Output	+ Output	7	− Sense	− Output
2	AC Input	AC Input	5	+ Sense	+ Sense	8	Case Gnd	− Sense
3	AC Input	AC Input	6	− Output	Com Output	9	Not Used	Case Gnd

MILITARY POWER SUPPLIES

28 VDC to 5-28 VDC

MODEL BA

SPECIFICATIONS

INPUT VOLTAGE: 24-30 VDC (20-32 VDC with option)

EFFICIENCY: Typical efficiency 55-75% for 5V units, 65-85% for 12, 15, and 18V units.

IN RUSH CURRENT: Less than 8 times the peak input current at low line, full out load and nominal output voltage.

LINE REGULATION: 0.1% (or 20 mV whichever is greater)

LOAD REGULATION: 0.1% (or 20 mV whichever is greater).

PARD (NOISE & RIPPLE): 100 mV peak-to-peak, 20 mVRMS from +25°C to +100°C; 130 mV peak-to-peak, 40 mVRMS from −55°C to +25°C.

ADJUSTMENT RANGE: Output is continuously adjustable between the limits shown by means of externally accessible adjustment potentiometer.

RESOLUTION:	Nominal Output Voltage	Resolution
	5, 12, 15	35 mV
	24, 28	60 mV

INSULATION VOLTAGE: 100 VDC between input and output, and input and case; 50 VDC between output and case.

INSULATION RESISTANCE: 50 megohms between input and output, input and case when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating −55°C to +100°C baseplate temperature. Derated maximum output current linearly above +85°C baseplate temperature to 80% of full load rating at +100°C baseplate temperature. Storage: −65°C to +125°C.

TEMPERATURE EFFECT (COEFFICIENT): Less than 0.01% per degree Celsius.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. Unit automatically recovers to normal when fault is removed.

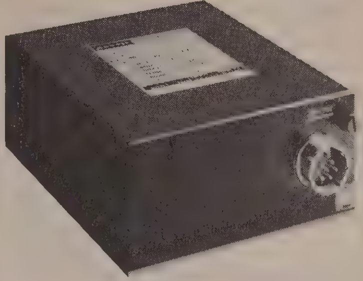
INPUT TRANSIENT PROTECTION: Unit will shut off at input voltage of 37V. Maximum voltage is 80V for one second.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing leads." The resulting circuit action compensates for a DC voltage drop up to 0.3V in the load leads.

LOAD TRANSIENT RESPONSE: Output voltage returns to regulation limits within 2 milliseconds after 50% step change in load current. Maximum overshoot is less than 0.8V.

ELECTROMAGNETIC INTERFERENCE: Meets MIL-STD-461A, Methods CE01 and CE03 for conducting emissions (available with "F" option).

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of +50°C baseplate temperature, maximum rated output power for BA100D-5A-1 was calculated to be 139,899 hrs. for a ground benign environment and 16,866 hrs. for an air inhabited transport environment. With Enhanced Reliability Option (ER) MTBF was calculated to be 378,759 hrs. for ground benign environment and 51,131 hrs. for air inhabited transport environment.



FEATURES

- Up to 85% efficiency
- Meets MIL-STD-810C
- Wide DC input range available (20-32 VDC)
- Tight Regulation within 0.1%

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Weight (Lbs.)	Model Number
4.7 to 5.3	20.0	12F	4.7	BA100D-5A
11.25 to 12.75	8.33	12F	4.7	BA100D-12A
14.1 to 15.9	6.67	12F	4.7	BA100D-15A
22.5 to 25.5	4.17	12F	4.7	BA100D-24A
26.3 to 29.7	3.57	12F	4.7	BA100D-28A

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number. (EXAMPLE: BA100D-5A to BA100DL-5A)

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the BA series (as shown in picture). Please consult your nearest Abbott Sales Office for details.

EMI FILTER: (F Option) An internal EMI filter is available to reduce conducted interference on the input leads. With these filters the Model BA will comply with MIL-STD-461A Notice 3, CE01 and CE03 on the input leads. To specify this feature, please add an "F" after "D" in the model number. (EXAMPLE: BA100D-5A to BA100DF-5A)

REMOTE PROGRAM OPTION: (R Option) Units can be modified so that their output voltage can be adjusted from a remote location. This is accomplished by adding an additional pin to the header on the unit. To specify this option, please add an "R" after this character "D" in the model number. (EXAMPLE: BA100D-5A to BA100DR-5A).

OVERVOLTAGE PROTECTION: (-1 Option) An internal non-crowbar type OVP, power supply turns off when output voltage exceeds set point (available as option by adding "-1" to model number)

WIDER INPUT VOLTAGE RANGE: (H Option) The standard model BA operates from an input voltage range of 24 to 30 VDC. The units can be modified to operate from 20 to 32 VDC. To have this feature included add an "H" after the "D" in the model number and specify the desired input voltage range in parentheses after the entire model number. (EXAMPLE: BA100D-5A to BA100DH-5A (20-26))

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using higher levels of military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components, environmental testing and extended Thermal Cycling. Please consult your nearest Abbott Sales Office for details.

SPECIAL ENCAPSULATION: (E Option) All of our hermetically sealed power modules are encapsulated to meet or exceed the shock, acceleration and vibration requirements of MIL-STD-810C. Special encapsulation to enable these modules to withstand higher shock levels of 60g's, acceleration levels of 50g's and vibration levels of 30g's is available. To specify this feature, please add an "E" after the character "D" in the model number. (EXAMPLE: BA100D-5A to BA100DE-5A)

MILITARY POWER SUPPLIES

20-32 VDC to 5-50 VDC

MODEL
BN
and BBN

SPECIFICATIONS

INPUT VOLTAGE RANGE: 20 to 32 VDC

EFFICIENCY: Typical efficiency ranges from 50 to 70%.

INRUSH CURRENT: Less than 8 times normal steady-state full load input current

LINE REGULATION: Within 0.5% for input change of 20 to 32 VDC

LOAD REGULATION: Within 0.5%. For load change of no load to full load

PARD (RIPPLE & NOISE): 100 mv peak-to-peak, 25 mv rms from 25°C to +100°C: 130 mv peak-to-peak, 40 mv rms from −55°C to +25°C. Measured at power module terminals with measurement system noise bandwidth of 25 MHz

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Wider output ranges are available by restricting the input voltage range. Consult the factory for further information

ADJUSTMENT RESOLUTION:

Nominal Output Voltage	Resolution
5-10 VDC	37 mv
12-18 VDC	49 mv
24-31 VDC	75 mv

ISOLATION VOLTAGE: 100 VDC between input & output and input & case; 50 VDC between output & case

INSULATION RESISTANCE: 50 megohms minimum between input & output, input & case and output & case when measured at 50 VDC

POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating; −55°C to +100°C baseplate temperature. Derate maximum output current linearly above 85°C baseplate temperature to 80% of full load rating at 100°C baseplate temperature. Storage; −65°C to +125°C

TEMPERATURE EFFECT (COEFFICIENT): 0.03% per degree Celsius

ENVIRONMENT: Hermetically sealed and encapsulated to meet the environmental requirements to MIL-STD-810C and MIL-E-5400P, Class 2 including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against overloads (greater than 150% rated load) and short circuits of any duration. The output automatically restores to normal when the fault is removed

INPUT TRANSIENT PROTECTION: Each unit is completely protected against the transients of MIL-STD-704, Category B, (80 VDC for 0.1 sec) having rise times greater than 100 microseconds. Unit will turn off and resume operation when the input returns to normal

OVERVOLTAGE PROTECTION: Internal OVP is available as an optional feature and is indicated by adding "—1" to the model number (i.e.: BN25D-5A-1 indicates that OVP has been included.) The overvoltage threshold is factory set to approximately 2 V or 10% (whichever is greater) above the nominal output voltage. The OVP circuitry has a built-in delay of approximately 500 microseconds to minimize 'nuisance' tripping

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit can monitor the voltage directly at the load by using extra "sense" leads. The resulting circuit action will compensate for a DC voltage drop of up to 0.3 volts in the load leads

LOAD TRANSIENT RESPONSE: Output voltage returns to regulation limits within 2 ms after a 50% step change in load current. Maximum overshoot is less than 0.8 V

* See page 3•1451 for size charts.

High Efficiency

- Operating temperature range: −55°C to +100°C operation.
- Up to 70% efficiency.
- Small size.
- High reliability. MTBF: 112,000 hrs. per MIL-HDBK-217C.
- Short Circuit Protection.

TURN-ON/TURN-OFF OVERSHOOT: No overshoot during turn-on into loads greater than half load. For loads less than half load, turn-on overshoot is less than 0.8 V for 25 ms. No turn-off overshoot under any conditions

ELECTROMAGNETIC INTERFERENCE: Designed to meet the requirements of MIL-STD-461A for generation of conducted and radiated interference. Test report on a typical model is available.

RELIABILITY: MTBF per MIL-HDBK-217C up to 112,000 hrs.

DUAL OUTPUT

±11.4 to ±12.6	1.04 2.08	10F 11J	2.2 2.9	BBN25D-12A BBN50D-12A
±14.25 to ±15.75	0.83 1.67	10F 11J	2.2 2.9	BBN25D-15A BBN50D-15A

Dual Output Units: 1) The output current listed is for each output.
2) The negative output is "semiregulated" and will meet regulation specifications only when operated into a balanced load from ½ load to full load.
3) The negative output will typically be within 4% of the positive output voltage for load imbalances up to 3:1 in magnitude, provided outputs have a minimum of 30% full load.

abbott
MILITARY POWER SUPPLIES

28 VDC to 5-37 VDC

MODEL
C
and CC

SPECIFICATIONS

INPUT VOLTAGE RANGE: 24 to 30 VDC. Other input ranges available

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 24 to 30 VDC with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 50 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 200 volts DC between input and output, input and case, and output and case

INSULATION RESISTANCE: 50 megohms minimum at 50 volts DC between input and output, input and case, and output and case

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base
Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A, Fig. 9, Limt 1 (80 VDC for 0.1 sec.).

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

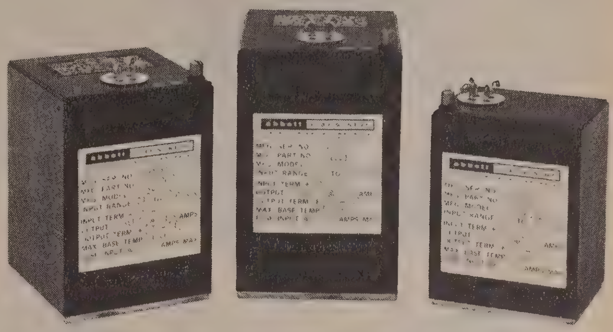
RELIABILITY: MTBF per MIL-HDBK-217C up to 277,200 hrs.

ELECTROMAGNETIC INTERFERENCE: Units meet EMI requirements of MIL-STD 461 conducted and radiated (F option).

OVER-VOLTAGE PROTECTION*: An internal, non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.



High Performance

- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Compact. Power density up to 2 watts per cu. in.
- High reliability. Up to 277,200 hrs. MTBF per MIL-HDBK-217C.
- Low EMI. To MIL-STD-461.
- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- 0.1% Line and Load regulation.
- TTL compatibility available.
- Internal OVP optional.

MILITARY POWER SUPPLIES

28 VDC to 500 VDC

MODEL B

SPECIFICATIONS

Input Voltage Range
24 to 30 volts DC Other ranges available

Line Regulation
Within 0.4% for input 24 to 30 VDC*

Combined Line and Load Regulation
Within 3.0% for input 24 to 30 VDC and from ½ load to full load on Model B's
Within 5.0% for input 24 to 30 VDC and from ½ load to full load on Model BL's

Ripple
0.5 RMS — Model B's
1.0% RMS — Model BL's

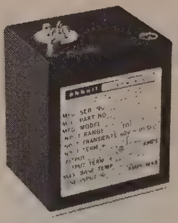
Voltage Adjustment Range
12% by screwdriver adjustment

Input Transient Protection
In accordance with MIL-STD-704A, Fig. 9, Limit 1, (80 VDC for 0.1 sec.)

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal). Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-STD-810C and MIL-E-5400P, Class 2

Output Voltage and Current
See specific models listed
(Outputs and inputs are isolated)

Reliability: MTBF per MIL-HDBK-217C up to 626,400 hrs.



High Reliability

- Operating temperature range −54°C to +100°C.
- Small size.
- High reliability. Up to 626,400 hrs. MTBF per MIL-HDBK-217C.
- Encapsulated and hermetically sealed. Meets MIL-STD-810C and MIL-E-5400P, Class 2.

MILITARY POWER SUPPLIES

28 VDC to 25-122 VAC

MODEL S

SPECIFICATIONS

Input Voltage Range: 24 to 30 volts DC. Other input ranges are available.
Load Regulation: ±1.0% from ½ to full load.
Frequency Stability: ±1.0%
Voltage Adjustment Range: 12% by screwdriver adjustment.
Reliability: Up to 340,600 Hrs. MTBF per MIL-HDBK-217C.
Input Transient Protection: In accordance with MIL-STD-704A, Limit 1, Fig. 9 (80 volts for 0.1 seconds).
Environment: +212°F max. at mtg. base using adequate heat sink. −65°F min. at mounting base. Encapsulated to meet the environmental requirements of MIL-STD 810C and MIL-E 5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

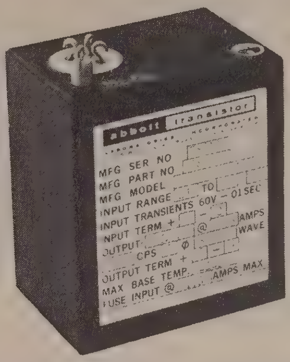
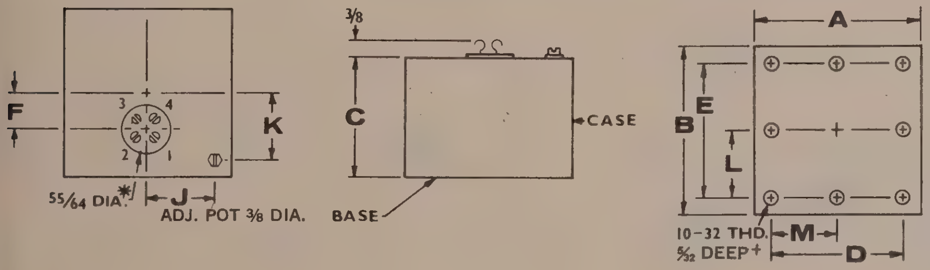
Output frequencies up to 1600 Hz are listed in our catalog as standard models. Contact our nearest office for your free copy.



Sine Wave — 1 Ø 400 to 1600 Hz

- Operating temperature range: −54°C to +100°C.
- High reliability. Up to 340,600 hrs. MTBF per MIL-HDBK-217C.
- Encapsulated and hermetically sealed per MIL-STD-810C and MIL-E-5400P.

CASE DIMENSIONS FOR ABBOTT MODELS W, WW, BN, BBN, C, CC, B AND S



* Models CC and WW use special 8 pin header.
Size of special headers is 1¹⁄₁₆ dia. by ⁹⁄₁₆ high.
† 6-32 Thd, ³⁄₁₆ deep on case size 1B.
** Model BN uses special terminals on A x C face.

INDUSTRIAL POWER SUPPLIES

AC to DC Single & Multiple Output Switchers

MODELS ZB ZBT ZBQ

SPECIFICATIONS

AC INPUT RANGE: 90 to 132 and 180 to 265 VRMS, 47 to 440 Hz, single phase. Dual input selectable.

EFFICIENCY: 75% typical on single output models, 65% typical on others.

LINE REGULATION: 0.12% for full input change on singles, 0.2% on multiples.

LOAD REGULATION: 0.2% for main outputs, 1% on other outputs.

RIPPLE: 50 mV typical on single output models (100 mV max) 200 mV max on other outputs.

STABILITY: Output voltages changes less than ±.05% for 24 hours following an initial warmup period.

TEMPERATURE RANGE: Operating: 0°C to +80°C 100% rated power at 75°C conduction cooling. Storage: −25°C to +85°C. Units may be operated with convection cooling, operating temperature: −20°C to +80°C at extra cost. Consult factory for cooling curves.

TEMPERATURE COEFFICIENT: 0.01% per degree centigrade typical, 0.03% per degree centigrade maximum.

OUTPUT VOLTAGE ADJUSTMENT: Voltages are continuously adjustable ±5% by means of an externally accessible screwdriver adjustment potentiometer.

ISOLATION VOLTAGE: 1000 VDC input to output and input to case, 500 VDC output to case. (2750 VDC optional at additional cost)

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 VDC.

LOAD TRANSIENT RESPONSE: On regulated outputs, recovery to within 1% of nominal within 0.5 msecs for 50% load change. On semi-regulated outputs, recovery occurs within 1.5 msecs.

LOAD TRANSIENT OVERSHOOT: Maximum voltage deviation: 5% from nominal voltage set point.

HOLD-UP TIME: 20 milliseconds minimum on single output units, 16 milliseconds on multiple output units.

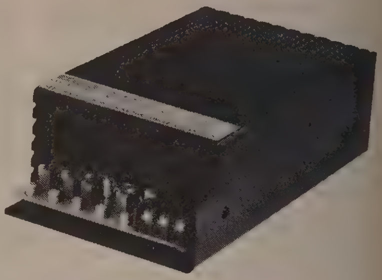
SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal when the short is removed.

OVER VOLTAGE PROTECTION: Standard. Non Crowbar OVP.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.3 volts in the load leads. Remote off-on available at no extra charge.

INPUT POWER PROTECTION: Internal fuse standard on single output units, external fuse recommended on multiple output units.

WEIGHT: 2 lbs., (0.9 Kgs.)



FEATURES

- High power density, up to 2 watts per cu. in.
- High reliability, MTBF of 135,540 hrs. per MIL-HDBK-217D.
- High efficiency. Up to 80%. 65% minimum.
- Dual input 90 to 132 and 180 to 265 VRMS standard.
- Conduction or convection cooled.
- 100% power at 80°C with conduction cooling.
- Meets FCC 20780 Class A for EMI emissions.
- UL Recognition applied for on selected models.
- 2-year warranty.

INDUSTRIAL POWER SUPPLIES

41-52 VDC to 5, ±12, ±15 VDC
115-240, 1 Ø & 3 Ø to 5, ±12, ±15 VDC

MODELS
DA
DC

SPECIFICATIONS

INPUT: Models DA50, DA100, DA200: 103.5 to 126.5 VRMS 1ϕ or 3 ϕ wye, 207 to 253 VRMS 1ϕ or 3 ϕ delta 47-500 Hz
Model DA500: 103.5 to 126.5 VRMS 1ϕ 47-500 Hz
Model DE500: 207 to 253 VRMS 1 ϕ 47-500 Hz
Model DC50, DC100, DC150: 41 VDC to 52 VDC

EFFICIENCY: Minimum efficiency at full load is 60%. Typical efficiency ranges from 63% to 80% depending on output voltage and power

LINE REGULATION: Less than 0.5% over full input range.

LOAD REGULATION: Less than 0.5% from no load to full load.

CROSS REGULATION — DUAL UNITS: The negative output is semi-regulated and will meet regulation only when operated into balanced loads. In this case, negative output will track the positive output typically to within 1%. When operating into unbalanced loads, the negative output will typically be within 5% at load imbalances up to 3:1 in magnitude.

RIPPLE AND NOISE: Less than 100 mV peak to peak (measured with a scope having a 25 MHz bandwidth).

TEMPERATURE RANGE: 0°C to +71°C ambient operating temperature.

THERMAL PROTECTION: Power shutdown if temperature exceeds safe operating limits.

TEMPERATURE COEFFICIENT: 0.01% per degree centigrade typical; 0.03% per degree maximum.

OUTPUT VOLTAGE ADJUSTMENT: Output is factory set to within 1% of nominal voltage. Remote voltage adjustment programming is available as an option. Outputs may be adjusted ±6%.

ISOLATION: Voltage — 500 VDC input to case, input to output; 100 VDC output to case. Resistance — 50 megohms @ 50 VDC input to case, input to output, output to case.

SHORT CIRCUIT PROTECTION: Complete protection from short circuits of any duration. Automatic recovery when short is removed.

OVERVOLTAGE PROTECTION: Standard on all units. Set at 6.2 ±0.5 VDC on 5V units. 14 ±1 VDC on 12V units and 17 ±1 VDC on 15V units.

REMOTE ERROR SENSING: Sensing terminals are provided to compensate for up to 0.5 VDC drop in the load leads. Open sense lead protection is also provided.

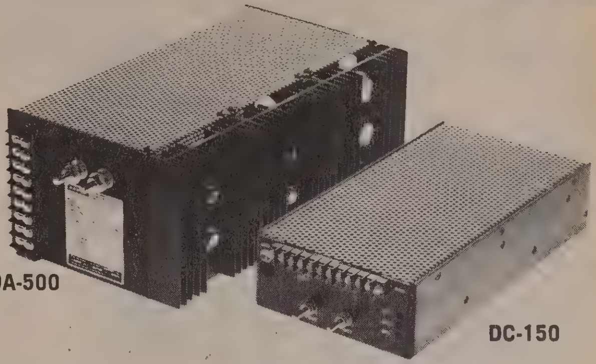
SWITCHING FREQUENCY: 20 KHz typical.

LOAD TRANSIENT RESPONSE: Output returns to regulation band within 1.0 mS after a 50% step change in load current.

TURN-ON/TRANSIENT OVERSHOOT: Maximum output voltage overshoot is less than 0.8V under all conditions.

HOLDUP TIME: Typically 20 mS at full load and nominal line voltage.

PARALLEL OPTION: Terminals are provided for Master/Slave paralleling of up to 5 units of models DA50, DA100, DA200, DC50, DC100, DC150.



50 to 500 watts

- Universal inputs: 115 VAC or 240 VAC single or three phase, 48 VDC.
- High efficiency, up to 80%.
- Low operating temperature: −20°C.
- 2 year warranty.

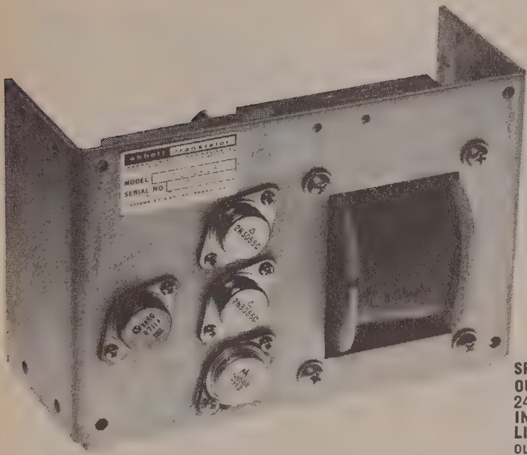
abbott
INDUSTRIAL POWER SUPPLIES

60 Hz to DC Power Modules

MODELS
NL,
RN



MODEL NL

SINGLE, DUAL AND TRIPLE OUTPUTS
5 to 28 VDC, ±12 and ±15 VDC

- Low cost.
- Operating temperature full current 0°C to +50°C, derated 40% at 71°C.
- 2 year warranty.

SPECIFICATIONS

OUTPUTS: Single output models: 5 through 28 VDC, 15 to 168 watts. Dual output models: ±12 and ±15, 24 to 80 watts. Triple output models 5, ±12 and 5, ±15, 22 watts to 105 watts

INPUT: 105-125, 210-250 VRMS, 47-440 Hz

LINE REGULATION: 0.02% for 10% input change single output, 0.1% for 10% input change multiple output

LOAD REGULATION: 0.1% for no load to full load change with line constant single output, 0.2% for no load to full load change with line constant multiple output

RIPPLE: 1.0 mv RMS maximum, 1.5 mv peak-to-peak typical. 5 mv peak-to-peak maximum

LOAD TRANSIENT RECOVERY TIME: 50 μSec typical after a 50% step change in load current

SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal in approximately 5 mSec after removal of the short

REVERSE VOLTAGE PROTECTION: Provided on output and on pass element

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra sensing leads. The resulting circuit action compensates for a DC voltage drop of up to 0.5 VDC in the load leads. Open sense lead protection is built in. Not included on units in case size "A".

STABILITY: Typically, ±0.05% for 24 hours after warm-up (single output), and ±0.3% for 24 hours after warm-up (dual and triple output).

TEMPERATURE: Operating: 0°C to +50°C, derated to 40% at +71°C. Storage: −40°C to +85°C

TEMPERATURE COEFFICIENT: ±0.04% per degree Celsius maximum, ±0.002% per degree Celsius typical

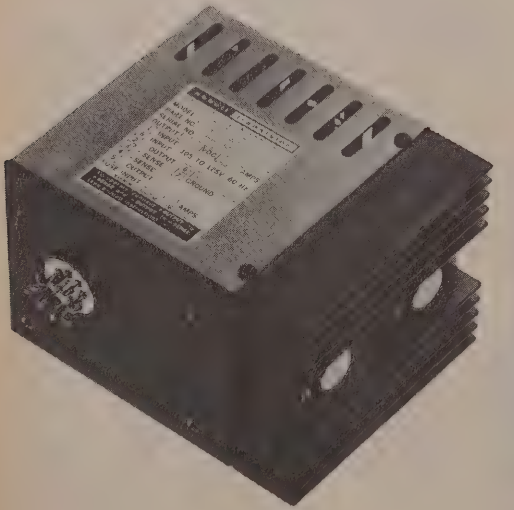
EFFICIENCY: Typically 45% to 60%

OVERVOLTAGE PROTECTION: Additional circuitry will reduce the output voltage to approximately 1 VDC within 25 μSec typ. If the output voltage rises to 10% or 2 VDC (whichever is greater) above nominal. Available as an optional feature by adding "-1" to the model number

For dimensions, see our catalog or call factory.

MODEL RN

HIGH QUALITY LINEAR POWER SUPPLY
SINGLE OUTPUT: 5 to 30 VDC, 1.5 to 150 WATTS
DUAL OUTPUT: ±12, ±15, 28 to 150 WATTS



- 2 year warranty.
- Full power at 71°C operating temperature.
- High reliability.

SPECIFICATIONS

OUTPUT: Single output models 5 through 30 VDC, 1.5 to 150 watts. Dual output models ±12, ±15, 28 to 150 watts

INPUT: 105-125, 210-250 VRMS 50-420 Hz

LINE REGULATION: 0.1% or 10 mv (whichever is greater) for input change of 105-125 VRMS

LOAD REGULATION: 0.1% or 10 mv (whichever is greater) for change from no load to full load

RIPPLE: 0.02% or 5 mv RMS (whichever is greater)

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer

ADJUSTMENT RESOLUTION: 30 mv max.

ISOLATION VOLTAGE: 300 VDC between output terminals and chassis ground

INSULATION RESISTANCE: 50 megohms between output terminals and chassis ground when measured at 50 VDC

POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded

TEMPERATURE: Operating: −4°F (−20°C) to +160°F (+71°C) without derating, forced air, or heat-sinking. Storage: −40°F (−40°C) to +185°F (+85°C)

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius

ALTITUDE: 10,000 feet above sea level

LOAD TRANSIENT RECOVERY TIME: Output voltage typically returns to regulation limits within 75 microseconds after a 50% step change in load current

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads

TURN ON/TURN OFF OVERSHOOT: The output voltage overshoot during "turn on" or "turn off" typically will not exceed 0.1% of the output voltage, or 20 mv, (whichever is greater)

MOUNTING: Threaded inserts are provided for mounting of cases

For dimensions, see our catalog or call factory.

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

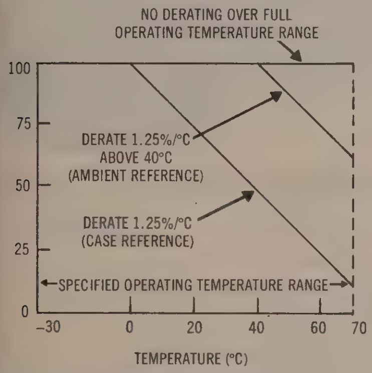

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

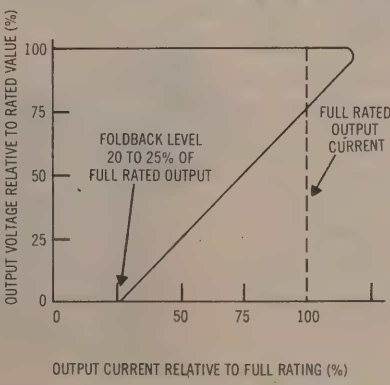

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

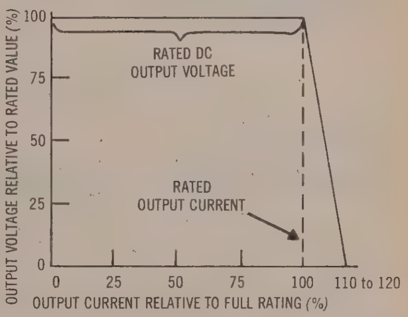

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

acdc electronics

EMERSON®

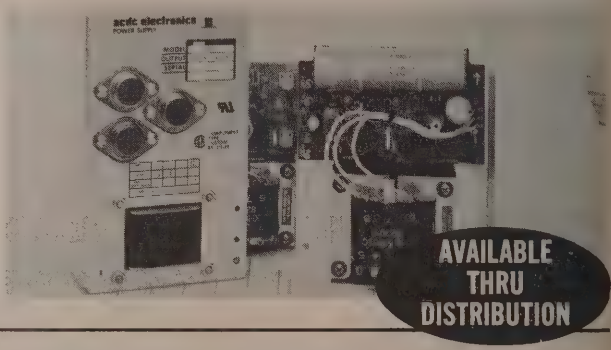
For over thirty years, ACDC Electronics, a division of Emerson Electric Company, has manufactured Linear and Switching Power Supplies for quality conscious Data Processing, Communications, Industrial, Scientific, and Medical Equipment manufacturers. With over 200,000 square feet of manufacturing space, ACDC is now the second largest manufacturer of catalog power supplies in the United States and offers the broadest product line in the industry. All ACDC Power Supplies are UL recognized and CSA certified. Also, we offer the most comprehensive installation and operation manuals in the industry.

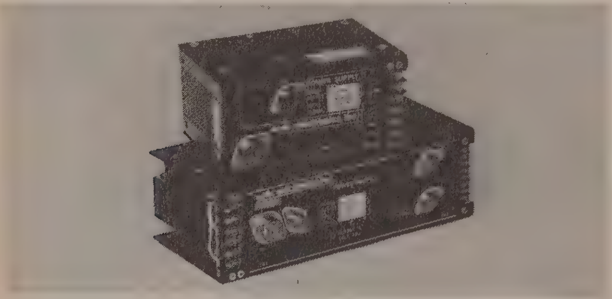
acdc electronics

LINEARS

ECV/ETV UNIVERSAL SERIES

- Open-frame construction • Cermet pots
- 15W-150W output range • 2 year warranty
- Single, dual and triple output models available
- O.V.P. standard on all 5V models
- World-wide voltage taps for 100/117/220/230/240 VAC
- Plug compatible, interchangeable with competitive models





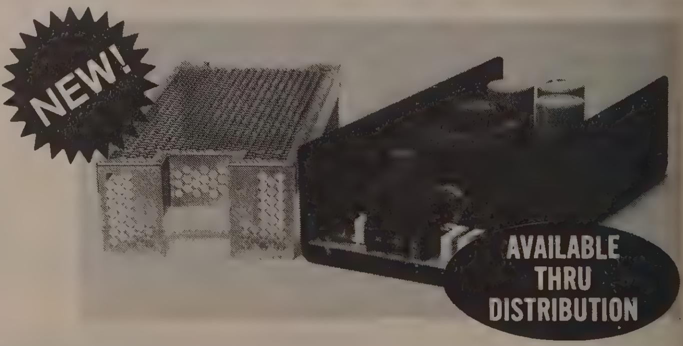
OEM/TR SERIES

- Modular construction, fully enclosed chassis
- Output current to 35A
- Single, dual and triple outputs available
- Universal input voltages
- Over 90 standard models available
- Superior thermal design
- Optional steel covers
- 5 year warranty

SWITCHERS

RH SERIES

- Open-frame Mosfet switcher (100 kHz)
- 100 watt model available now, 50 watt model 1st qtr. '85
- Single output
- Compact size, fits anywhere. (8" x 4.0" x 2.2")
- Designed to meet IEC 380
- 115/230 VAC selectable
- Fully protected; O.L., O.V.P., over temp.
- EMI filtering
- 2 year warranty



401 JONES ROAD, OCEANSIDE, CA 92054 U.S.A. • 619/757-1880 TELEX: 350227

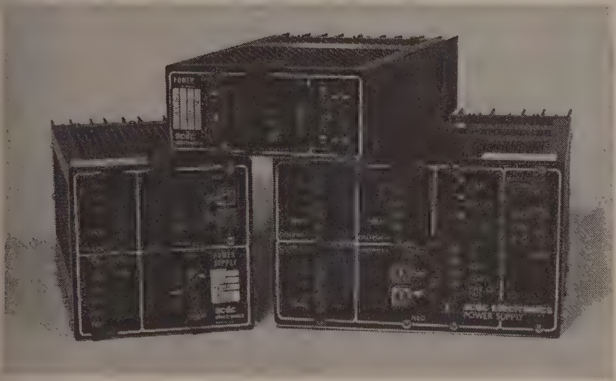
acdc electronics

EMERSON®

RM SERIES, “ULTRA FRAME™”

- Open-frame construction
- 80W-220W output range
- Triple and quad output models available
- Field selectable 115/230 VAC operation
- Unique proportional switching drive circuit
- Floating, independent outputs are adjustable
- 100% computer tested-data sheet with every unit
- 2 year warranty

AVAILABLE THRU DISTRIBUTION



RS/RT/RQ SERIES

- Unique sub-modular construction
- 50W-300W output range
- Single, thru quad output models available
- Inhibit, remote sense, margining, O.V.P., O.T. all standard
- Complies with FCC docket 20780, part 15, class A
- 100% computer tested — data sheet with every unit
- Wide range of options
- DC inputs available. Consult factory
- 5 year warranty

RSF SERIES

- Exclusive sub-modular construction
- Complete 500 watt family
- Industry standard 5″ x 8″ profile
- Field selectable 115/230 VAC operation
- One thru five output models available
- Complies with IEC 380
- Wide range of standard options
- 2 year warranty

RE SERIES

- Unique sub-modular construction
- 750W-1000W output range
- Dual thru quad output models available
- Industry standard 5″ x 8″ profile
- Field selectable 115/230 or 208 VAC operation
- Fan cooled
- Wide selection of standard options
- 2 year warranty

401 JONES ROAD, OCEANSIDE, CA 92054 U.S.A. • 619/757-1880 TELEX: 350227

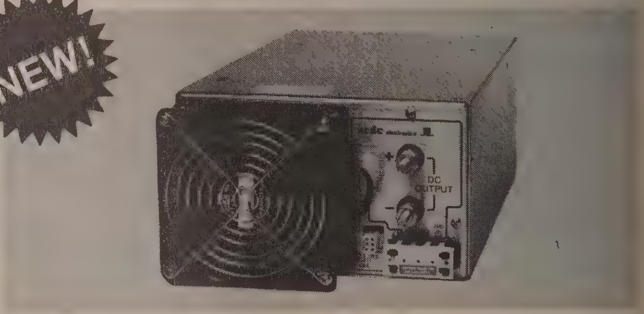
acdc electronics

EMERSON®

JF151, JF101

NEW!

- High power, fan cooled "slot" supply
- 1500 watts available now, 1000 watts 1st qtr. '85
- Single output • Industry standard 5″ x 8″ profile
- The most contemporary power circuitry on the market
- Designed to meet IEC 380
- Plug compatible for multiple sourcing
- Fully protected: O.L., O.V.P., over temp.
- Wide input range (brown-out proof)
- 18 month warranty



POWER SUPPLY TEST INSTRUMENTATION

EL300/LOAD MODULE

- Dissipates up to 300W
- 4.5 VDC to 60 VDC — up to 60A
- 150 watt capacity with no external power
- Can operate in parallel • Wide range of accessories
- Optional carrying case or retma rack configuration available
- Comprehensive operation manual outlining calibration, troule-shooting, etc. • 1 year warranty

EL301/CONTROL MODULE

- Digital amp meter • Monitors up to 6 load modules
- Provides testing down to 1.8 VDC
- Allows external programming
- Permits transient load applications
- Wide range of accessories
- Optional carrying case or retma rack configuration available
- Comprehensive operation manual outlining calibration, troubleshooting, etc. • 1 year warranty

EL750B DYNAMIC LOAD

- Dissipates up to 750W • 1.8 VDC to 55 VDC — up to 150A
- Static or dynamic testing
- Constant current or constant resistance modes
- Built-in square wave generator 120 Hz or 1 kHz operation
- Programmable with an externally applied, variable DC voltage
- Parallel operation for greater flexibility
- Meter shunt for calibration or digital read-out
- Front panel fault detectors • Size: 9″ x 6″ x 17.3″, 24 pounds
- Available in retma rack configuration • 1 year warranty

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

MINIATURIZED REGULATED SINGLE OUTPUT

ALL MODELS U.L. RECOGNIZED

Conserve space with mini-modules as small as 2.3″ x 1.8″ x 1.0″. Models with outputs ranging from 1 to 75 volts, and from 30 ma to 2.5 amps are available. All feature excellent regulation and ripple parameters, and are short circuit protected.

Rugged encapsulated construction and generously derated components insure years of reliable operation. Mini-modules are also available with multiple outputs—see pages 4 and 5.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Trim Adjustment: Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Output is floating. Either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. (Model 5E150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

High voltage displays such as NIXIE* indicators may be powered with the Model NX-25A or NX-50. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

*Registered trademark of Burroughs Corp.

Placement of a mini-module on a printed circuit assembly eliminates the need for an outboard power supply, as well as all the associated wiring, connectors and hardware. Layout and construction are simplified, equipment size can be reduced, and system reliability is improved. The assembly shown is used in a control system manufactured by JB Systems Inc.

MODEL
DUAL OUTPUT REGULATED
POWER SUPPLY

MINIATURIZED REGULATED MULTIPLE OUTPUT

ALL MODELS U.L. RECOGNIZED

These dual and triple output mini-modules are compact and convenient sources of the voltages required to power operational amplifiers and related circuits. They may be mounted directly on printed circuit board assemblies, simplifying system layout and minimizing the connectors and wiring required.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Compact, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Setting: Each output is factory preset to ±2% (1 to 9 volt outputs) or ±1% (10 to 28 volt outputs) of the nominal output voltage. Outputs of Case Size END modules, except those marked (*), may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Single output sections may be used in either polarity. Dual output sections, marked (*), are provided with a plus/common/minus output connection configuration.

Ambient Operating Temperature: −20 to +71°C. No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 28 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
13 oz. (Case size END.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

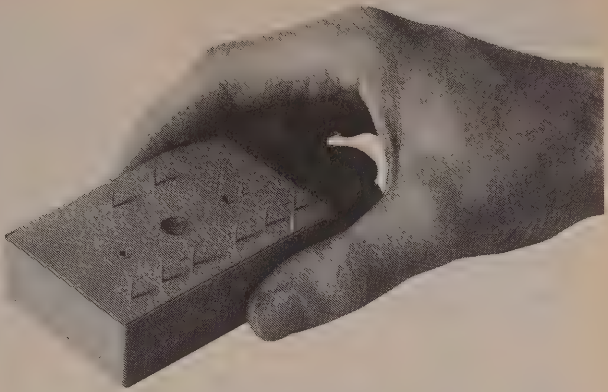
TOLL FREE NO.: (800) 523-9478 • 3-DAY SHIPMENT GUARANTEED

Complete system assemblies only 1¾-inches high. Mini-modules permit exceptional flexibility in the design of rack-mounting assemblies built on standard 19-inch panels as small as 1¾-inches high.



Dual output modules have isolated outputs; triples provide two balanced and tracking voltages in a three-terminal configuration, plus an isolated third output for logic, control circuits, etc.

HOW TO ORDER:

Any two of the sections listed below, or two of the same section, can be combined into a multiple-output module. The complete model number is the combination of the two section numbers selected. Note that some sections provide two outputs; combination with a single output section results in a triple-output module.

Example: The combination of sections 6E20D and 15E10D is the Model 6E20D-15E10D. Always assign the lower voltage section first. For pricing purposes, add the costs of the sections selected. Example: The price of the Model 6E20D-15E10D is $52.00 plus $45.00, or $97.00 total.

MINIATURIZED REGULATED Terminal Strip Connections

ALL MODELS U.L. RECOGNIZED

Although small in size, these mini-modules offer high performance at modest prices. All models, with series regulated outputs ranging from 1 to 75 volts and as high as 2.5 amps, may be mounted in an area only 3.5″ x 2.5″. Dual output models are available with the ratings commonly required for driving op amps and other balanced loads. Terminal strip input/output connections eliminate all need for sockets or soldering. Short circuit protection, encapsulated construction, and conservative design assure long term reliability.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See tables.

Output Voltage Trim Adjustment: Outputs factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Single output models may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Either positive or negative terminal of a single output module may be grounded. Dual output modules have a positive/common/negative output terminal configuration.

Ambient Operating Temperature: −20 to +71°C. (Model 5EB150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

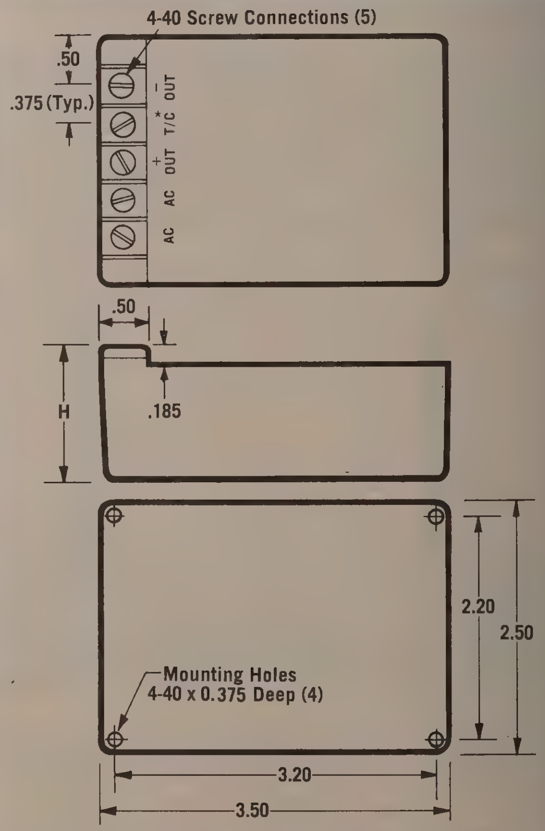
Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

High voltage displays such as NIXIE* indicators may be powered with the Model NX-25B or NX-50B. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

*Registered trademark of Burroughs Corp.



*TRIM on single output modules; COMMON on duals

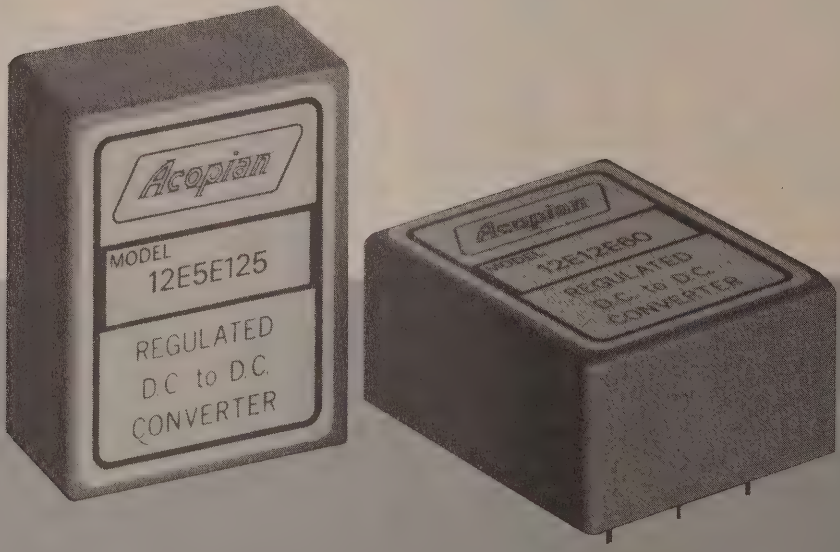
MINIATURIZED DC-DC CONVERTERS



These versatile DC/DC converters are ideally suited for powering a wide variety of analog and digital circuitry, such as op amps, logic and microprocessors. All have been designed to provide high performance and long-term reliability in combination with small size and high efficiency. They may be mounted directly on a printed circuit board for OEM applications, or installed in a socket for developmental and small quantity requirements.

Efficiency is in the order of 65%, and is maintained down to low levels of output current. Provision for trimming the single output models permits setting the voltage to an accuracy of better than 1%, when required. Input reflected ripple is reduced to less than 1% by means of a standard built-in pi filter, and electrostatic shielding on all six sides minimizes radiated energy. High input/output isolation permits separation of the output from the dc input bus to minimize circuit interaction due to ground loops, and the use of inputs (and the outputs of single output models) in either polarity.

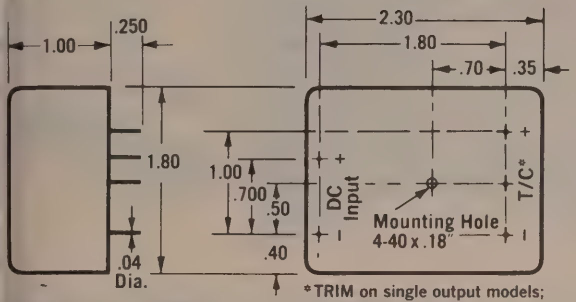
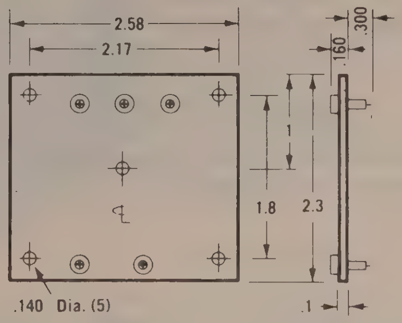
DIMENSIONS



Case Size ESC-10; Weight: 5 oz.

*TRIM on single output models; COMMON on duals.



MODEL ES-1 SOCKET

SPECIFICATIONS

Input Voltage: Nominal voltage ±10%

Input Reflected Ripple: 1% E_{in} (max.)

Output Regulation:
Line: ±.02%
Load: ±.05%

Output Ripple: 1 mv rms, 50 mv P-P (25 MHz BW)

Output Voltage Tolerance: Output(s) factory preset within ±1% of nominal. Single output models may be trimmed to the nominal rating with an external trim resistor.

Polarity: The output of single output models may be connected in either polarity. Dual output models have a positive/common/negative output terminal configuration.

Transient Response (NL-FL): 50 microseconds

Output Protection: Electronic current limiting with automatic recovery.

Input/Output Isolation:
Voltage: 500 Vdc
Resistance: 100 megohms
Capacitance: 100 pF

Switching Frequency: 20 kHz minimum

Temperature Coefficient: .02%/°C

Ambient Operating Temperature: −20 to +71°C

Storage Temperature: −40 to +85°C

Humidity: 20% to 80% R.H. (non-condensing)

Mounting: May be mounted on printed circuit board or in socket (Order Model ES-1. Price, $5.00)

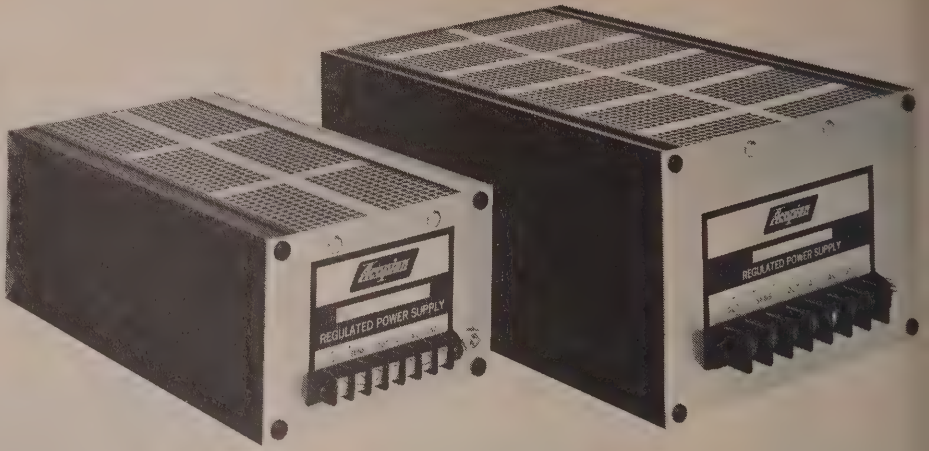
SERIES A REGULATED PREMIUM PERFORMANCE

SERIES B REGULATED LOWEST COST

U.L. RECOGNIZED



Acopian
REGULATED POWER SUPPLY
Acopian
REGULATED POWER SUPPLY

A broad selection of power supplies offering unusually high performance – many models have regulation of ±0.005%. Electronic current limiting and provision for remote voltage sensing are standard features; overvoltage protection is available as a built-in option. Rugged extruded aluminum cases include threaded mounting holes on bottom, back, and side, permitting mounting in any position.

SERIES A PREMIUM PERFORMANCE POWER SUPPLIES

STANDARD FEATURES

- Provision for remote sensing and/or external out-
- put adjustment
- Short circuit proof with automatic recovery (electronic current limiting)
- Can be mounted on any of three surfaces (case sizes H8, H11 and H16, two surfaces)
- Convection cooled – no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series A supplies have model numbers beginning with the letter A.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load line are compensated, is a standard feature.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

Response Time: Less than 20 microseconds.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number, and increase standard price as follows:

For all case sizes except H16:
Nominal output voltages from 3 to 28 V. $25.00
30 to 70 V. 35.00
Case size H16 (all voltages) 75.00

REGULATED POWER SUPPLY
OUT OUT AC AC GND
Acopian
REGULATED POWER SUPPLY
OUT SENS OUT AC AC GND

These low-cost supplies provide the same high reliability as the Series A, and without sacrificing the basic features necessary for most applications. Many models have regulation of ±0.1% or better. All components are generously derated to insure a long and trouble-free life. And they use the same rugged construction as the Series A line. Overvoltage protection and other options are available.

SERIES B LOW-COST POWER SUPPLIES

STANDARD FEATURES

- Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts
- May be mounted on any of three surfaces
- Convection cooled—no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series B supplies have model numbers beginning with the letter B.

Remote Voltage Adjustment/Sensing: Available as an option. See below.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: 0 to +71°C.
Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load lines are compensated, is available on all models. (This option also permits the use of an externally located potentiometer to adjust output voltage.) To order, add prefix "R" to the model number. No increase in price.

NARROW PROFILE REGULATED

ALL MODELS U.L. RECOGNIZED

Where only a narrow mounting space is available, Acopian narrow profile power supplies fit when many others cannot. Choose from Series A (high performance) and Series B (lower priced) models with output ratings up to 150 volts, up to 3.5 amps.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See table. Series A supplies have model numbers beginning with the letter A; Series B, with the letter B.

Remote Voltage Adjustment/Sensing: Standard in Series A, not available in Series B.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: Series A, −20 to +71°C; Series B, 0 to 71°C.

Storage Temperature: −55 to +85°C.

Short Circuit and Overload Protection: Series A, electronic current limiting with automatic recovery; Series B, fused—delivers current surges without damage.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 V. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price.

Power supplies with the broad adjustment capability required for analog instrumentation and circuitry, electronic system development; basic research, and similar applications.

For applications requiring a constant current or adjustable current limiting, a power supply with a true constant current characteristic, such as those with model numbers beginning with the letter P, should be used.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Regulation, Ripple (constant voltage operation):
Line Regulation: ±0.005% or 2 mv, whichever is greater.
Load Regulation: ±0.005% or 2 mv, whichever is greater.
Ripple: 0.25 mv rms.

Regulation, Ripple (constant current operation):
Line Regulation: ±0.1%.
Load Regulation: ±0.2%.
Ripple: 0.1% rms.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, to compensate voltage drops in output wiring, is a standard feature.

Remote Voltage Programming: The output voltage of all models may be controlled by means of external resistance connected in series with the −S lead.

Voltage Programming Coefficient: See table. Calibration tolerance, ±2%.

For applications where the capability for external adjustment of output voltage is necessary, but a guaranteed programming coefficient tolerance is not required, these power supplies may be ordered with the programming coefficient uncalibrated. To order, change the letter "X" in the model number to the letter "T", and subtract $15.00 from the standard price.

Current Limiting: Models with fixed current limiting have a foldback-type characteristic with automatic recovery. All others have current limiting with a constant-voltage/constant-current crossover characteristic.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature Range: −20 to +71°C.
Storage Temperature Range: −55 to +85°C.

OPTIONS

Remote Current Limiting Adjustment: All models having numbers beginning with the letter P have a built in (front panel) current limit control. Provision for control of the current limit setting by adjustment of an external resistance is available as an option. To order, add the prefix letter "E" to the model number, and add $10.00 to the standard price.

The current limit setting is inversely related to resistance. Use a 200 ohm ½ W potentiometer.

Overvoltage Protection: An internally mounted overvoltage protection circuit, fixed set approximately 20% above the maximum output voltage rating of the supply, is available on all models with maximum outputs of 60 volts or less. To order, add prefix "V" to the model number, and increase standard price as follows:

For all case sizes except H16:

0-6V through 0-18V models	$25.00
0-30V through 0-60V models	35.00
Case size H16 (all voltages)	75.00

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to model number and $25.00 to price.

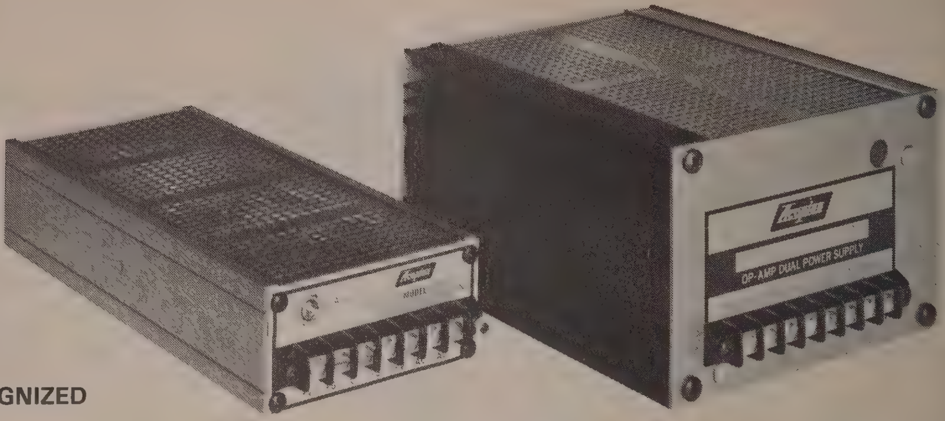
DUAL OUTPUT For Op Amps.



ALL MODELS U.L. RECOGNIZED

Series D dual output power supplies are a convenient source of the tracking voltages required for powering operational amplifiers and related circuits. Their positive/common/negative output terminal configuration minimizes system wiring. Provision for remote sensing permits compensation of load line effects. Although moderately priced, they are sturdily constructed and conservatively rated.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Voltages: Tracking within 1%.
Output Currents:
Output Voltage Adjustment Ranges:
} See tables. Outputs are short circuit protected.

Load Regulation: ±0.1%.

Line Regulation: ±0.1%.

Ripple: 1.5 mv RMS.

Polarity: Positive output, common, and negative output.

Remote Voltage Sensing: Standard.

Ambient Operating Temperature: −10 to +71°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: A built-in preset overvoltage protection circuit is available on all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price.

ALL MODELS U.L. RECOGNIZED

Acopian general purpose duals furnish two completely independent outputs, either identical or different, in less space and at less cost than two equivalent single output supplies. Thousands of output voltage/current rating combinations are available. Mounting and system wiring are simplified. Quality components, generously derated, insure long-term reliability.

HOW TO ORDER: Select two sections from one of the three tables on pages 20 and 21. The complete model number is the combination of the two sections selected. Example: The combination of section 5GT20D and section 8GT50D is Model 5GT20D-8GT50D. Always assign the lower voltage section first. For pricing purposes, add the cost of the individual sections selected.

SPECIFICATIONS

Input Voltage: 105—125 VAC, 50—400 Hz, single phase.

Output Specifications: See pages 20 and 21. No derating required through ambient temperature range of — 10 to + 71°C.

Short Circuit Protection: Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

Ambient Operating Temperature: — 10 to + 71°C.

Storage Temperature: —55 to + 85°C.

Dimensions and Weight: Case size G5D.

OPTIONS

Overvoltage Protection: Separate preset overvoltage protection circuit for each output. To order, add prefix "V" to model number. When both outputs are in the range of 3 to 28V, add $20.00 to the standard price. An additional $5.00/output charge applies for outputs from 30 to 70V. Not available for other voltages.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $25.00 to the standard price.

MODEL
FUSE
DUAL OUTPUT POWER SUPPLY
SECTION 1
SECTION 2
AC
AC
GND

Dual isolated output power supplies may be connected to provide any desired arrangement of positive and negative output voltages. Each voltage is independently adjustable. No derating is required up to +60°C. A separate overvoltage protector on each output is available as a built-in option.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: No derating required through ambient temperature range.

Polarity: Outputs are floating. Each may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +60°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: Two separate, preset overvoltage protection circuits, one for each output. To order, add prefix "V" to model number and add $20.00 to the standard price.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $25.00 to the standard price.

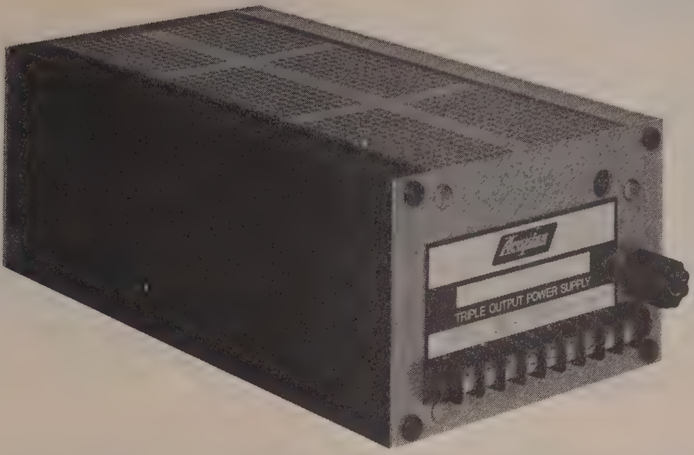
TRIPLE OUTPUT

For Microprocessors

Isolated Outputs



Acopian
TRIPLE OUTPUT POWER SUPPLY

Triple isolated output power supplies provide the features and characteristics of three supplies in one compact, easy-to-use package. They are available in the voltage combinations most frequently required for driving microprocessors and associated circuitry.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: No derating required through ambient temperature range of −10 to +60°C.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +60°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection:

On Output 1 only: Add prefix "V" to model number and add $10.00 to the standard price.

Separate overvoltage protection circuit on each output: Add prefix "3V" to model number and add $25.00 to the standard price.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $25.00 to the standard price.

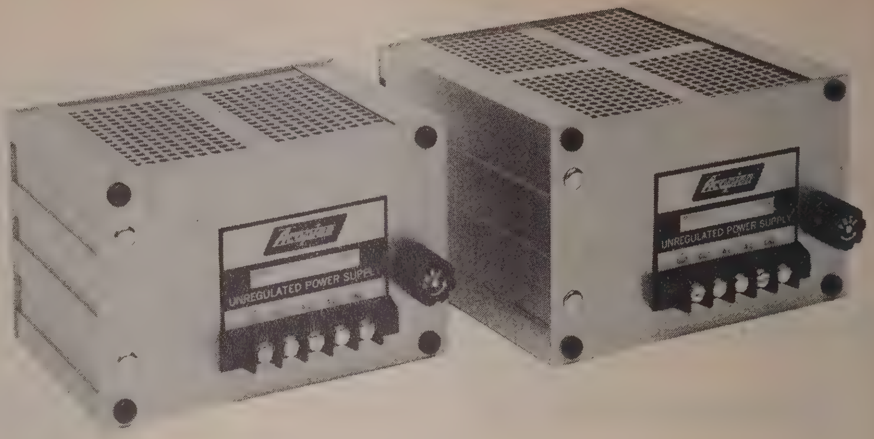
SERIES U UNREGULATED



Acopian
UNREGULATED POWER SUPPLY

U.L. RECOGNIZED

Low-cost DC power suitable for driving loads such as lamps, relays, and small motors is provided by Series U unregulated power supplies. All components are generously derated, insuring a long and trouble-free life; built-in fusing prevents damage due to prolonged overloading or short circuits. Mechanically similar to the regulated supplies shown on pages 10 and 11, they are housed in extruded aluminum cases which can be mounted in any position.

STANDARD FEATURES

- Silicon rectifiers
- Capacitive filtering
- Fused input
- May be used in series or parallel
- No derating or heat sinking required
- Completely serviceable

SPECIFICATIONS

Input Voltage: 0–125 VAC, 50–400 Hz, single phase.

Output Voltage:
Output Current: } See table
Ripple:

Load Regulation: Nominal output voltage is based on 115 VAC input, with approximately 50% of rated output current being drawn.

Line Regulation: With fixed load, output voltage change is proportional to input voltage change.

Output Voltage Adjustment: An adjustable autotransformer (not included) may be used to adjust output voltage by varying the AC input voltage to the supply.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +65°C. No derating required.

Storage Temperature: −55 to +85°C.

Optional 230 Volt Input
Provision for inputs of 0—250 VAC, 50—400 Hz, replacing the standard 0—125 VAC input voltage range, is available on all models except those having an output current rating of 20 ma. To order, add the suffix "-230" to the model number, and $25.00 to the standard price.

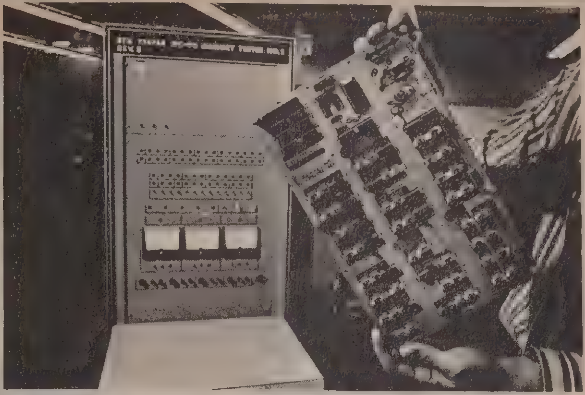
The cross-sectional dimensions of Series U power supplies permit efficient rear mounting on either 3½″ or 5¼″ rack assemblies. Threaded holes on three surfaces permit mounting in any position.



Hamilton Standard uses Acopian power supplies in a memory tester which checks jet engine control. The equipment performs tests on the PROM (Programmable Read Only Memory) board which supplies information to the jet fuel control's processor.

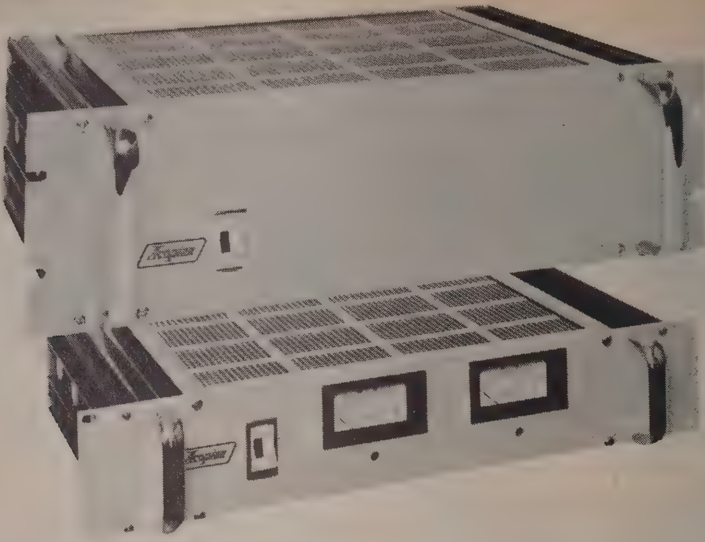
RACK MOUNTING
GENERAL PURPOSE

Shipped in 9 Days

ALL MODELS U.L. RECOGNIZED



Acopian rack-mounting power supplies feature excellent regulation and ripple specifications in 92 models with outputs up to 60 volts and 60 amps. Metering and overvoltage protection are available as options. These power supplies are constructed in sturdy extruded aluminum assemblies designed expressly for mounting in standard 19″ wide RETMA cabinet racks. The front panels are finished in light gray enamel; sides are black; the remaining casework is finished in gold alodyne.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Remote Voltage Sensing: Provision for sensing the output voltage across the load is a standard feature.

Output Voltage/Current:
Line Regulation:
Load Regulation:
Ripple:
Output Voltage Adjustment Range:
See tables

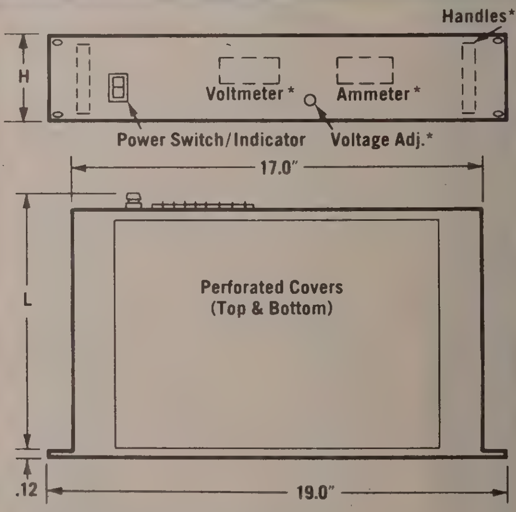
Polarity—Single Output Models: Output is floating; either positive or negative terminal may be grounded or floated up to 300V above ground.

Polarity—Dual Output Models: Positive output, common, negative output.

Storage Temperature: −55 to +85°C.

Ambient Operating Temperature—
Single Output Models: −20 to +55°C.
Dual Output Models: −10 to +55°C.

Short Circuit and Overload Protection: Electronic current limiting with automatic recovery.

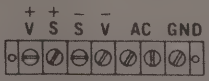


*Optional (Option positions shown are for single output models.)

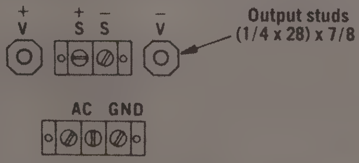
Size	H	L	Approx. Weight
3P11	3½	11.0	22 lb.
3P17	3½	17.0	38 lb.
5P12	5¼	12.0	28 lb.
5P17	5¼	17.0	53 lb.

CONNECTIONS: Single Output Models

Case Sizes 3P11 and 5P12



Case Sizes 3P17 and 5P17



CONNECTIONS: Dual Output Models

*or 2 mv, whichever is greater.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models. To order, add prefix "V" to the model number, and increase standard price as follows:

For case size 3P11:
Nominal output voltages from 3 to 28 V. $25.00
30 to 70 V. 35.00
Case sizes 3P17, 5P12 & 5P17 (all voltages) 75.00

Front Panel Voltage Adjustment: Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $10.00 to price.

Voltmeter: Add suffix "F" to model number and $30.00 to price.

Ammeter: Add suffix "A" to model number and $30.00 to price.

230 Volt Input: Add suffix "-230" to model number and $40.00 to price.

Handles: Add suffix "H" to model number and $20.00 to price.

EXAMPLE: The Model 5PT20 equipped with all options is designated as the Model V5PT20AFHP-230. (List suffix letters in alphabetical sequence.)

DUAL OUTPUT

± 15	.5	9	7.2	.1	.1	1.5	575	PD15-900	5P12

OPTIONS

Voltmeters: One for each output. Add suffix "F" to model number and $60.00 to price. "A" and "F" options cannot be combined in one power supply.

Ammeters: One for each output. Add suffix "A" to model number and $60.00 to price. "A" and "F" options cannot be combined in one power supply.

Voltmeter and Ammeter: Each with switch for selecting output to be monitored. Add suffix "G" to model number and $100.00 to price.

Overvoltage Protection: An internally installed and preset overvoltage protector is available for all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and $30.00 to the price of models in case size 3P11; $50.00 to the price of models in case size 5P12.

Handles: Add suffix "H" to model number and $20.00 to price.

Front Panel Voltage Adjustment: Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $10.00 to price.

230 Volt Input: Add suffix "-230" to model number and $40.00 to price.

RACK MOUNTING PROGRAMMABLE

Shipped in 9 Days

ALL MODELS U.L. RECOGNIZED

Similar to the rack mounting power supplies listed on pages 26 and 27, but with broadened output voltage ranges. All models may be programmed through their voltage ranges by means of external resistance. Models with adjustable current limiting have a constant-voltage / constant-current crossover characteristic, and so may be used as constant current sources.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Regulation, Ripple (constant voltage operation):

Line Regulation: ±0.005% or 2 mv, whichever is greater.

Load Regulation: ±0.005% or 2 mv, whichever is greater.

Ripple: 0.25 mv rms.

Regulation, Ripple (constant current operation):

Line Regulation: ±0.1% or 2 ma.

Load Regulation: ±0.2% or 5 ma.

Ripple: 0.1% rms.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, to compensate voltage drops in output wiring, is a standard feature.

Remote Voltage Programming: The output voltage of all models may be controlled by means of external resistance connected in series with the −S lead.

Voltage Programming Coefficient: See table. Calibration tolerance, ±2%.

For applications where the capability for external adjustment of output voltage is necessary, but a guaranteed programming coefficient tolerance is not required, these power supplies may be ordered with the programming coefficient uncalibrated. To order, change the letter "X" in the model number to the letter "T", and subtract $15.00 from the standard price.

Current Limiting/Programming: Models with fixed current limiting have a foldback-type characteristic with automatic recovery. All others have current limiting with a constant-voltage/constant-current crossover characteristic.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Controls: Coarse and fine voltage adjustments, and the current limit adjustment, are located at the rear of the assembly.

Ambient Operating Temperature Range: −20 to +71°C.

Storage Temperature Range: −55 to +85°C.

Input/Output Connections: Barrier strip terminals at the rear (#5 screws for case size 3P11, #8 screws for case size 5P12).

OPTIONS

Remote Current Limit Adjustment: All models having numbers beginning with the letter P have a built in current limit control. Provision for control of the current limit setting by adjustment of an external resistance is available as an option. To order, add the prefix letter "E" to the model number, and add $20.00 to the standard price.

The current limit setting is inversely related to resistance. Use a 200 ohm ½ W potentiometer.

Overvoltage Protection: An internally installed and preset overvoltage protector is available for all models. To order, add the prefix "V" to the model number and $25.00 to the price of models with output voltage ranges of 0-6 and 0-15V, add $35.00 to the price of other models.

Ammeter: Add suffix "A" to model number and $30.00 to price.

Voltmeter: Add suffix "F" to model number and $30.00 to price.

Handles: Add suffix "H" to model number and $20.00 to price.

230 Volt Input: Add suffix "-230" to model number and $40.00 to price.

Front Panel Controls: For voltage controls (coarse and fine) mounted on the front panel, instead of the standard screwdriver-slot adjustments at the rear, add suffix "P" to the model number and $20.00 to price. For a current limit control mounted on the front panel, add suffix "Y" to the model number and $10.00 to price.

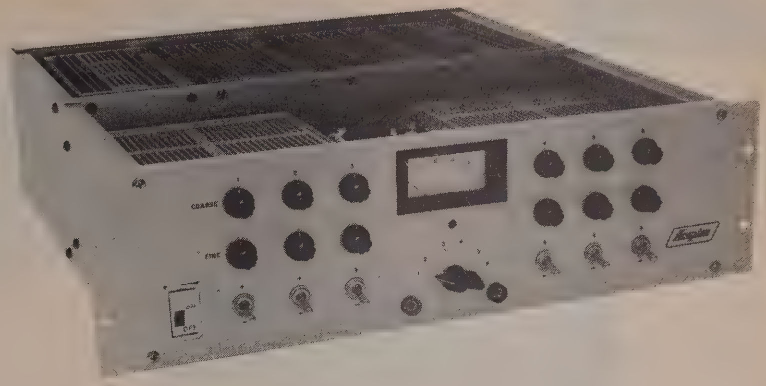
MULTIPLE-OUTPUT POWER SUPPLY SYSTEMS

Shipped in 9 Days



Now you can fill your requirements for completely wired multiple-output rack-mounting power supply systems, without any need to search through a catalog and prepare time-consuming mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, simply call Acopian and specify the output voltages and currents that you require.

Each system is designed and constructed to provide an optimum mechanical and wiring configuration for the complement of power modules necessary to deliver the outputs specified. Acopian production expertise assures shipment of each system, completely wired and 100% tested, within 9 days after your order is received.

Ordering an Acopian power system is this easy: List the DC outputs that you require. (Or, select the power modules that you wish to be included.) Note the system features which you consider necessary. Then, call Acopian toll-free at (800) 523-9478 and ask for the POWER SYSTEM DEPARTMENT.

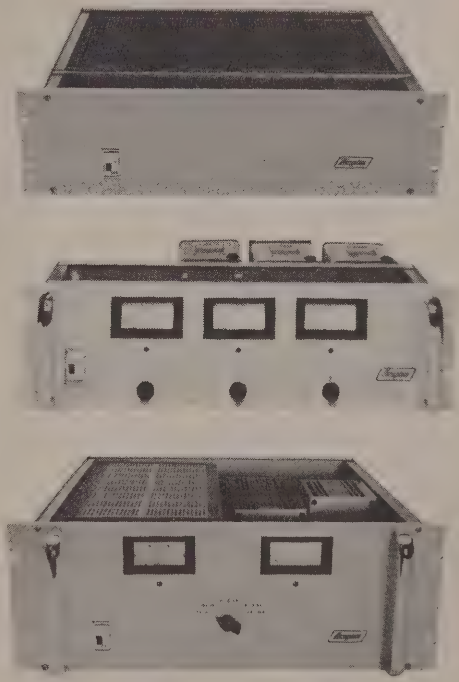
An Acopian Applications Engineer will answer—on the phone—any questions which you may have. A distinctive system model number will be assigned, and a firm price will be quoted. Your completely-wired power supply system will be shipped within 9 days.

System Description

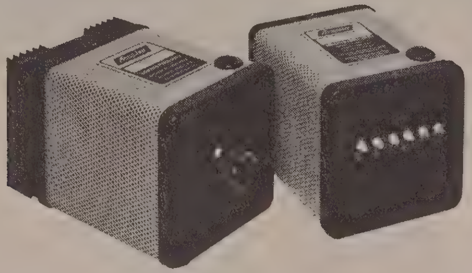
Any of the power modules listed in this catalog can be included in a power system. Commonly required features such as voltmeters, ammeters, front panel controls, handles, and chassis slides can also be provided. The rack assembly will be designed and wired in a manner optimum for the complement of modules and operating features to be included.

Each assembly is constructed from ⅛-inch thick aluminum extrusions. The front panel is finished in oven baked light gray enamel. The rear portion is finished in gold alodyne. Input and output connections are on a screw terminal strip at the rear.

TYPICAL BUILT-TO-ORDER POWER SUPPLY SYSTEMS



SINGLE OUTPUT REGULATED PLUG-IN



An Acopian plug-in power module can be installed in a matter of seconds. Simply plug it into an octal socket. You don't even have to screw it down (although threaded holes are provided) unless it is to be mounted in other than a vertical position, or will be subjected to shock or vibration.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Polarity: Output floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient operating temperature: −10 to +65°C. No derating required.

MIL Tested/Increased Temperature Range: Contact factory for specific information.

Storage Temperature: −55 to +85°C.

Installation: Plugs into standard octal socket. Mounting holes (6-32) provided at each corner for installation in any position.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the octal-type plug. To order, add suffix "L" to model number and $10.00 to price.

Remote Output Adjustment: All models have a local voltage adjustment. When provision for remote (external) adjustment is also desired, add prefix "E" to model number. No increase in price.

Remote Sensing: Provision for remote sensing of the output voltage to compensate for drops in the load lines can be furnished at an additional charge of $10.00 per unit. Add prefix "R" to model number when ordering. "R" power supplies have a local voltage adjustment and provision for remote (external) output adjustment.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $25.00 to price.

Standard models are available for any voltage from 1 to 200. For information on those not listed, contact factory.

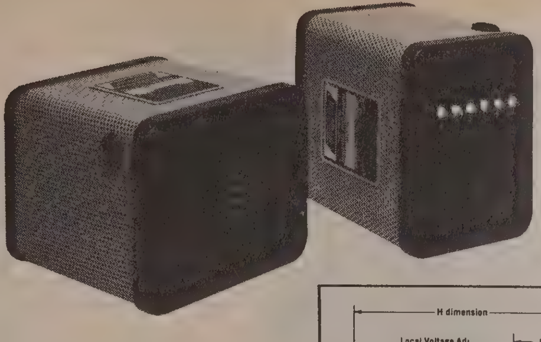
DUAL OUTPUT REGULATED PLUG-IN



Space-saving Acopian duals combine two electrically independent DC outputs in a single case. Either identical or different outputs may be selected. And with a choice of more than 300 output ratings, over 10,000 combinations can be supplied . . . each with Acopian's usual 3-day shipment guarantee.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Adjustment Range: ±1 volt.

Polarity: Outputs are floating. Each section may be independently connected to provide any combination of positive and negative outputs.

Short Circuit Protection: Delivers current surges without damage — to protect against prolonged overloads and shorts, use of an input fuse is recommended.

Ambient operating temperature: −10 to +65°C. No derating required.

MIL Tested/Increased Temperature Range: Contact factory for specific information.

Storage Temperature: −55 to +85°C.

HOW TO ORDER

Select the two sections desired. The complete model number is the combination of the two sections selected. Example: The combination of section 6J20D and section 12L40D is Model 6J20D-12L40D. Always assign the lower voltage section first. Where the indicated case sizes for the two sections differ, the larger case size applies.

For pricing purposes, add the cost of the individual sections selected.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the 11-pin plug. To order, add suffix "L" to model number and $10.00 to price.

Remote Output Adjustment: All models have local voltage adjustments. When provision for remote (external) adjustments is also desired, add prefix "E" to model number.

Remote Sensing: Provision for remote sensing of the output voltages, to compensate for drops in the load lines, can be furnished at an additional charge of $20.00 per unit. Add prefix "R" to model number when ordering.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $25.00 to price.

Standard models are available for any voltages from 1 to 150, and with current ratings to 1 amp. For information on those not listed, contact factory.

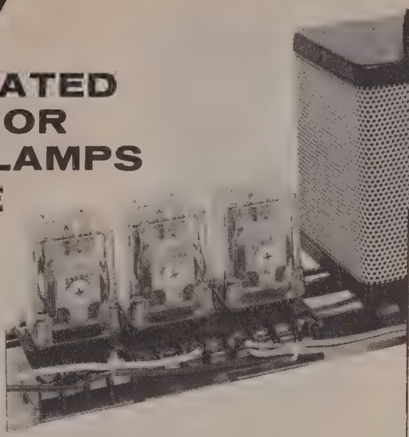
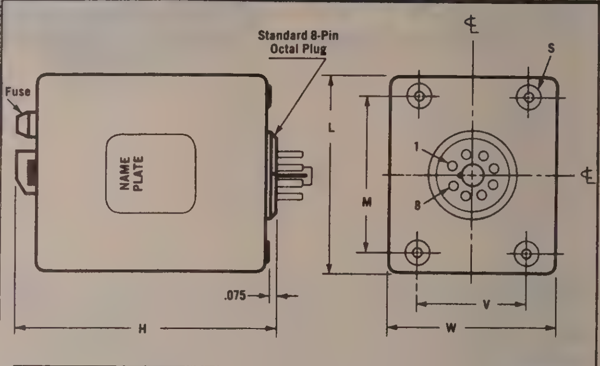
UNREGULATED PLUG-IN FOR RELAYS, LAMPS AND NIXIE TUBES



These low-cost, yet highly reliable unregulated power supplies have been specially designed to power DC relays, lamps and NIXIE tubes. Each has husky silicon rectifiers and a fused input to insure long and trouble-free operation. Installation consists of simply plugging the unit into a standard octal socket.



Size	L	W	H	M	V	S	Approx. Weight
G	3.40	3.28	5.0	2.625	2.625	Four 6–32 x ¼" deep mounting holes	2lb 8oz
K	4.15	3.33	5.2	2.750	2.562	Four 6–32 x ¼" deep mounting holes	2lb 14oz
Q	4.15	3.33	7.0	2.750	2.562	Four 10–32 x ½" long mounting studs	7lb

SPECIFICATIONS

Input Voltage: 0-125 VAC, 50-400 Hz, single phase.

Output Voltage:
Output Current: See table.
Ripple:

Load Regulation: Nominal voltage is based on 115 VAC input with approximately one-half load. At no load, the output voltage will increase by approximately 10%. At full load, the output voltage will be reduced by approximately 10%.

Line Regulation: Output voltage change due to input voltage change is directly proportional to the change in input.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +65°C. No derating required.

Storage Temperature: −55 to 85°+.

Installation: Plugs into standard octal socket.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the octal plug. To order, add suffix "L" to model number and add $10.00 to price. Example: Model 24U100 becomes 24U100L.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "-230" to model number and $25.00 to price.

Acopian

HIGH ISOLATION REGULATED PLUG-IN

For applications where high isolation in a regulated power supply is required, such as in powering strain gage and other transducer bridge circuits, Acopian offers models with ratings from 5 to 36 volts and 0.050 to 0.200 amperes. All models feature input-output isolation of 10,000 megohms minimum to ground in parallel with 100 pF maximum. To install, simply plug into a standard octal socket. No other mounting is normally required, but threaded holes are provided in the base for fastening the module in other than a vertical position, or to secure it against shock or vibration. Both slot (narrow adjustment about a nominal voltage) and wide voltage adjustment models are available.

SPECIFICATIONS

Isolation: 10,000 megohms to ground (min) in parallel with 100 pF (typical).

Leakage Current: 10 uA (typical).

Input-Output Coupling: 50 pF (typical).

Input Voltage: 105-125 VAC, 50-60 Hz, single phase.

Output Voltage:
Output Current:
Voltage Adjustment:
Ripple:
} See table.

Load Regulation: ±0.05%

Line Regulation: ±0.05%

Polarity: Output floating; either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. No derating required.

Storage Temperature: −55 to +85°C.

Installation: Plugs into standard octal socket. Mounting holes (6-32) provided at each corner for installation in any position.

Weight: 1 lb 8 oz

OPTIONS

Remote Output Adjustment: All standard models are provided with local voltage adjustment. For remote (external) adjustment, add prefix "E" to model number. Example: Model 15X10 will be E15X10. No increase in price.

Solder Terminals: All Acopian plug-in power supplies are also available with solder terminals in place of an octal-type plug. To order, add suffix "L" to model number and $10.00 to price. Example: Model 12X20 becomes Model 12X20L.

LABORATORY BENCHTOP

Single, dual and triple output

These benchtop power supplies provide all the performance and operating features necessary in a laboratory instrument. A wide choice of single and multiple output models offer optimum combinations of the operating features and output ratings that are most often needed.

They are also "human engineered" for convenience and ease of use. Two meters provide for the simultaneous monitoring of voltage and current on single output supplies, or a combination of two output voltages or currents on dual and triple output models. When more than one is required, they may be stacked to conserve bench space. Interlocking design prevents the upper units from slipping off.

Coarse and fine voltage controls permit setting outputs to a high degree of resolution, and adjustable current limiting prevents the load from drawing a higher current than intended. Many models provide constant voltage/constant current crossover, and may be used to deliver a regulated current to a varying impedance load. Some also include adjustable overvoltage protection.

The rugged casework is attractively finished in black and gold. "Five way" output binding posts and a retracting handle contribute to user convenience.

SPECIFICATIONS:

Input Voltage: 105-125 Vac, 50-400 Hz, single phase.

Output Ratings: See table.

Regulation, Ripple (constant voltage operation):

Line Regulation: ±0.01% or 2 mv, whichever is greater.

Load Regulation: ±0.01% or 2 mv, whichever is greater.

Ripple: 0.25 mv rms.

(Model KT7-20, ±10-20 V outputs only: Line regulation, ±0.05%; load regulation, ±0.05%; ripple, 1.0 mv rms.)

Regulation, Ripple (constant current operation):

Line Regulation: 2.0 ma (Model K7S500, 6.0 ma).

Load Regulation: 10.0 ma.

Ripple: 1.0 ma rms (Model K7S500, 2.0 ma rms).

Output Current Control: Outputs marked ACL are short circuit and overload protected by means of a continuously adjustable rolloff type current limiting circuit.

Outputs marked CV/CC deliver constant voltages with increasing load until the current limiting point (continuously adjustable) is reached, beyond which voltage decreases as required to maintain a constant current. In addition to providing short circuit and overload protection, this feature permits the supply to be used as a current regulated power source.

Temperature Coefficient: 0.015%/° C.

Stability: Over an eight-hour period, following a 30 minute warmup.

Constant voltage operation: 0.1%.

Constant current operation: 15 ma.

0-32	0.6	CV/CC	199	K32S60	K10
0-50	0.35	CV/CC	199	K50S35	K10

DUAL OUTPUT MODELS

OUTPUT VOLTAGE RANGES	CURRENT PER OUTPUT, AMPS.	CURRENT CONTROL	PRICE	MODEL	CASE SIZE
0-20/0-20	0.25	ACL	$199	K20D25	DK9
0-20/0-20	0.5	ACL	265	K20D50	DK10

TRIPLE OUTPUT MODEL

OUTPUT VOLTAGE RANGE	CURRENT PER OUTPUT, AMPS.	CURRENT CONTROL	PRICE	MODEL	CASE SIZE
0-7 ±10-20 (tracking)	2.0 0.5	CV/CC Fixed	$325	KT7-20	TK10

Temperature Range:
Operating: 0 to +50° C.
Storage: −40 to +85° C.

Protection:
Input: Line fuse.
Overload: Adjustable electronic current limiting.
Overvoltage: "Crowbar" circuit, continuously adjustable down to 3 volts, protects load by effectively short circuiting output when "crowbar" trip point setting is exceeded. (Models K7S200, K7S500 and KT7-20 only.)

Transient Response Time: Less than 50 μsec, for a step change in input from 105 to 125 Vac, or in output current from no load to full rated output current.

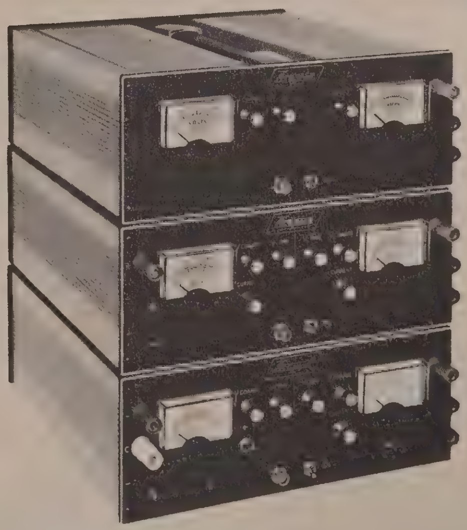
Output Impedance (constant voltage operation):
Less than 0.03 ohms from dc to 1 kHz.
Less than 0.5 ohms from 1 kHz to 100 kHz.

Meters: Two, each accurate to 2% of full scale. On multiple output models, selector switches permit monitoring every output voltage and current.

Controls:
Power switch
Output voltage, coarse and fine adjustments
Output current limit
Overvoltage protection trip point (Models K7S200, K7S500 and KT7-20 only)
Meter switches (multiple output models only)

Construction: Gold-finished extruded aluminum top and sides. Bottom, perforated aluminum panel. Front and rear panels, molded black phenolic. Retracting handle. Input power cord, 3-wire UL approved. Output connections, "five way" binding posts.

Case Size	Dimensions (overall) H x W x D (inches)	Approx. Weight
K9 DK9	3.3 x 8.5 x 10.9	4 lb 1 oz 4 lb 6 oz
K10 DK10 TK10	3.3 x 8.5 x 11.3	5 lb 5 lb 6 oz 7 lb 6 oz
K11	3.3 x 8.5 x 12.2	7 lb 8 oz



Stackable Case Design permits using more than one supply without requiring more bench area.

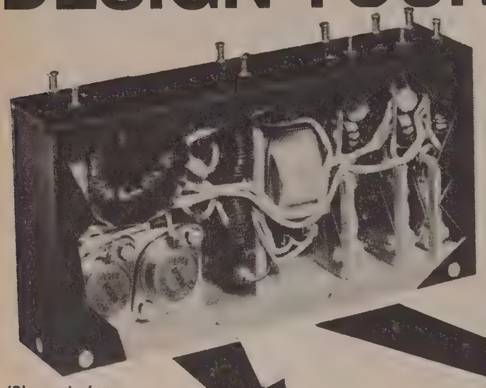
ARNOLD MAGNETICS

AC-DC/DC-DC MODULAR MINIATURIZED SWITCHING POWER SUPPLIES

DESIGN YOUR OWN POWER SUPPLY



(Shown before encapsulation)

FROM OFF-THE-SHELF MODULES!

Miniature Packages to 400 Watts Output

You select from over 120 Standard Sub-Modules to design your own "Tailor-Made" Switching Power Supply. Why wait many months for a "custom" supply and still risk the failure of an unproven circuit or thermal design?

- MIL-Spec or Industrial
- 50% to 75% smaller than other switchers
- Delivery in 8-12 weeks ARO
- From 1 to 10 DC Outputs — DC Input AC or DC Inputs
- Power Density to 5.33 Watts/cubic inch
- Encapsulated for Reliability: MIL-STD-810C, MIL-E-5400, MIL-E-16400

1. SELECT OUTPUT REGULATORS

(All outputs adjustable ±5% from nominal voltage. Outputs are isolated and can be connected in positive or negative polarity.)

Specify Nominal VDC Output	Output Current (maximum)	Model	Regulator Length (Inches)	Worst Case Efficiency
From 2.0 to 3.9	1.0	ARS**	0.6	30%

	0.2	ARK	1.2	75%
From 201 to 250	0.05	ARB	0.6	75%
	0.10	ARK	1.2	75%
From 251 to 300	0.05	ARB	0.6	75%
	0.1	ARK	1.2	75%

* Higher currents also available.

2. SELECT INPUT DRIVER

(Use "E options" for ranges not shown)

AC INPUT

Input Voltage Range	Model	Output Power Rating (Watts)	Driver Length (Inches)
115 ±12 VAC 47-500 Hz	TL	100	4.2
	TH	200	4.8
	TV	300	8.1
	TW	400	9.6
115 ±12 VAC 340-500 Hz	BL*	100	4.5

DC INPUT

Input Voltage Range	Model	Output Power Rating (Watts)	Driver Length (Inches)
28 VDC (24-30 VDC)	NL	100	2.4
	NH	200	3.0
	NV	300	5.4
48 ±4 VDC	JL	100	2.4
	JH	200	2.4
	JV	300	Consult Factory
125 ±10 VDC (100-150 VDC using "E" option)	KL	100	2.4
	KH	200	2.4
	KV	300	Consult Factory

* Cannot be used with ARF, ARM or ARP Regulators.

3. SELECT OPTIONS

(Contact Factory for prices)

Option Letter	Description	Option Letter	Description
V	Output Overvoltage Protection	TS	Over-Temperature Shutdown
T	Extended Temperature Operation	SYN*	External Synchronization
E	Extended Input Voltage Range	LC*	TTL On/Off Control
TP	Input Transient Protection	D*	Power-Down Signal
R	Remote Sense	S*	Output Sequencing
A	Remote Voltage Adjustment	LP*	Programmable Outputs

* Minimum Order of 10 units or Small-Lot Charge for these Options.
** For ARS Regulator, do not exceed agreed upon output current rating.

CASE SELECTION

Arnold Magnetics Power Supplies are designed to be cooled by heat conduction through the mounting baseplate.
Provide **Safe Thermal Margins** in the selection of the Power Supply Case:

Please see next page for: OPERATING, ENVIRONMENTAL and MECHANICAL SPECIFICATIONS

A. Select a case size that will accommodate the sum of all the Regulators, Options and Driver Module, then...

TOTAL MODULE LENGTH ______INCHES ≤ CASE______CONTAINING ______INCHES

B. Assure that the "Watts Dissipated through Baseplate" does not exceed **6.25 watts/square inch** for standard +71°C designs or **4.17 watts/square inch** for optional +85°C designs (calculations are made under worst-case conditions).

POWER REQ'D FROM DRIVER		DRIVER EFFICIENCY		TOTAL INPUT POWER		TOTAL OUTPUT POWER		POWER DISSIPATION		BASEPLATE AREA (from Table)		WATTS DISSIPATED THROUGH BASEPLATE
WATTS	÷	95% **90% for DC**	=	WATTS	−	WATTS	=	WATTS	÷	______IN²	=	______ WATTS/BASEPLATE IN² (Not to exceed 6.25 watts)

C. Contact factory for assignment of final model number. (For example TV-3018 This Model Number includes all voltage and current levels, options and package size information.

TV-3 018)
Driver No. of Outputs Master List No.

THERMAL INTERFACE

Because Arnold Magnetics Power Supplies are cooled by conduction, always use thermal compound during installation. To assure reliability the thermal interface must be designed to maintain specified Baseplate Temperature under worst-case conditions. (See Note B above to determine power to be dissipated.) Heat transfer via forced air or natural convection will be minimal.

Please consult the Factory to discuss heat-sinking considerations.

LINE REGULATION (for ±10% input change): 0.2% of E out +10 mV.
LOAD REGULATION (½ to full load change): 0.2% of E out +10 mV.
TEMPERATURE COEFFICIENT: 0.02%/°C.

• RIPPLE/NOISE

ARA, ARC, ARB, ARK
0.1% of E out +10 mV RMS.

ARS
0.25% of E out +10 mV RMS.
23 mV RMS max. for outputs from 2-4 VDC.

ARF, ARM, ARP
0.5% of E out +10 mV RMS.
35 mV RMS max. for outputs from 2-4 VDC.

- **Operating Temperature** (Baseplate): −10°C to +71°C (optional −55°C to +85°C).
- **Storage Temperature:** −65°C to +100°C.
- **Short Circuit Protection:** All outputs are short circuit protected and feature foldback current limiting.
- **Output Adjustment Range:** All outputs are adjustable over a plus or minus 5% range minimum.
- **Input Voltage Surge Protection** (AC Input Units): 140 VAC. Unit will turn off if surge exceeds 140 VAC. (See TP option).
- **Semiconductor Junction Temperature:** Maximum of 120°C at operating baseplate temperature of +71°C or optional +85°C.
- **Isolation:** The inputs, case and outputs are isolated (floating) from each other. Isolation test voltage is the greater of 50 VDC or 1.3 X E out.

ENVIRONMENTAL SPECIFICATIONS

(Test Reports Available)

- **Temperature Range:** Operating Temperature: −10°C to +71°C Baseplate Temperature. Optional −55°C to +85°C range. Non-Operating Storage Temperature: −65°C to +100°C.
- **High Temperature:** Per MIL-STD-810, Method 501, Procedure II.
- **Low Temperature:** Per MIL-STD-810, Method 502, Procedure I.
- **Temperature-Altitude:** Per MIL-STD-810, Method 504, Procedure I; the following details apply: −10°C to +71°C (and −55°C to +85°C) at Altitude: Sea level to 70,000 ft.
- **Humidity:** Per MIL-STD-810, Method 507, Procedure I.
- **Acceleration:** Per MIL-STD-810, Method 513, Procedure I and II, at a test level of 14 G.
- **Vibration:** Per MIL-STD-810, Method 514, Procedure I, at a test level of 15 G.
- **Shock:** Per MIL-STD-810, Method 516, Procedures I, II, III, V, and VI at a test level of 40 G.

MIL-STD 461A

Noise/Ripple Considerations

Qualification to the provisions of MIL-STD 461A is a system level concern. Arnold Magnetics Power Supplies have been included in many systems that have received MIL-STD 461A approval without additional filtering. Other systems may require moderate filtering external to the power supply to pass all provisions of the MIL-STD 461A tests.

For example, a single two-pole filter has been used with over 140 different Arnold models to achieve MIL-STD 461A system approvals. We can recommend a variety of filters and installation techniques that can assist in MIL-STD 461A approval.

Because of the more stringent AC input voltage line leakage specifications of MIL-STD 461B, please consult us on applications affected by that specification.

ARNOLD MAGNETICS

IN-HOUSE TEST PROGRAM AT ARNOLD MAGNETICS
—Stress Testing Proves Reliability

"Readiness and Reliability to defend our Nation . . ."

Traditional MTBF Predictions for Power Supply Reliability can be quite misleading. The key to accurate MTBF Prediction is analysis under stress.

Beginning in March of 1978, Arnold's "Life-Time Analytic Stress Tests" (LAST) have been continually performed on our products to provide this necessary dimension of performance verification.

Some Switching Power Supplies have been shown to exhibit poor reliability when subjected to rapid load changes or when input power is cycled on and off. Many users of switching supplies have been disappointed by failures in field application after accepting calculated MTBF estimates.

Arnold's "Life-Time Analytic Stress Tests" (LAST) are designed to eliminate the disparity between calculated and actual operation. The LAST Test Program includes the continuous Input Power cycling to a Power Supply under a series of operating conditions:

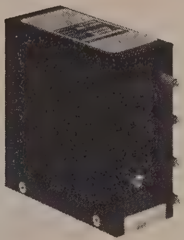
- Full Load, Half Load, and No Load conditions on All Outputs
- Multiple Short Circuits on Outputs
- Highly Reactive Loads on Outputs
- Input Power Over-Voltage and Under-Voltage
- Elevated Temperature Operation

During tests like these, the most extreme operating conditions are simulated. The tests are conducted 24 hours per day, 365 days per year. Designs must pass 1,000,000 On/Off Cycles without failure before they are introduced to our Customer. Arnold tests for reliability to assure that hardware is always in a state of readiness.

Arnold Magnetics' "Gold-Line" of High Reliability Switching Power Supplies have emerged from these stressful tests. Certain Design Improvements have been implemented that could not have been defined by paper analysis.

Arnold Magnetics' "GOLD-LINE" Switching Power Supplies . . . PROVEN RELIABILITY

HIGH VOLTAGE POWER SUPPLIES



PHU & SHU SERIES

- **Select any voltage from 2 VDC to 5,000 VDC**
- **Miniature designs with extreme reliability**
- **Meets MIL-STD 810C, MIL-E 5400, MIL-E 16400**

OPERATING SPECIFICATIONS

Line Regulation (±10% line change): 0.3% of E out maximum
Load Regulation (½ load to full load): 2.0% of E out maximum
Output Voltage Adjustment: ±5% minimum
Output Isolation: 3 X output voltage (1 kV minimum, 5 kV maximum)
Operating Baseplate Temperature: −10°C to +71°C
Storage Temperature: −65°C to +100°C
Package Size: Dimensions shown above apply to all models.

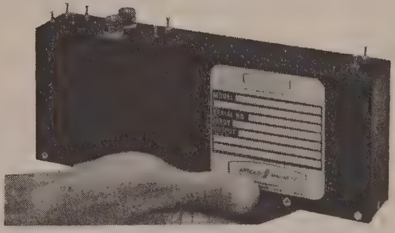
TV-1036:
ULTRA-MINIATURE SWITCHER

- **5 Volts/40 Amps!!**
- **4 Watts per Cubic Inch!!**

ARNOLD MAGNETICS introduces Model **TV-1036**, a new standard of high-density switching power. Providing 5 VDC at 40 amps from an AC source, the Model **TV-1036** performs to these specifications:



4.0 Watts per Cubic Inch Package measures 8.85″ x 1.57″ x 3.57″
Input Voltage: 103-127 VAC, 47-500 Hz
Output Voltage: 5 VDC at 40 amps. (**Triple Output** — Model **TV-3018** — also available: 5 VDC/35 amps, ±15 VDC @ 1 amp.)
Efficiency: 71%; remains constant over input voltage range
M.T.B.F.: 70,000 Hours @ 45°C Ground Base per MIL-HDBK217
Line Regulation: .1% (Line Variation ±10%)
Load Regulation: .1% +10 MV Full Load to No Load
Remote Sensing: Within .05%. Terminals are provided which correct for Load Lead Drop of up to .25 VDC. Load is protected if sensing leads are opened.
Ripple and Noise: .25% +10 MV RMS
100 MV P-P @ 10 MHZ bandwidth
150 MV P-P @ 100 MHZ bandwidth
Overvoltage Protection: Set at 120% of nominal output voltage
Semiconductor Junction Temperature: Maximum of 100°C at Operating Baseplate Temperature of +71°C
Transient Response: Output voltage returns to within 1% in less than 1.5 millisec during change from Full Load to 25% Load or No Load to Full Load. Maximum transient excursion for 25% load change: 500 millivolts.
Temperature Coefficient: 0.01% per °C
Carry Over Time: 15 milliseconds at nominal line with full load
Input Voltage Surge Protection: 145 VAC. Unit will turn off if surge exceeds 145 VAC
Thermal Protection: Internal Thermostat shuts off output during over-temperature condition. Automatic reset to normal operation when internal temperature is within safe limits.
Inrush Current Limiting: 35 amps maximum
Turn on and Turn Off Transient: No overshoot or undershoot outside of regulation band
Operating Temperature Range: −10 to +71°C Baseplate without derating
Input, Case and Outputs are isolated (floating) from each other.

ASTRON POWER SUPPLIES

• HEAVY DUTY • HIGH QUALITY • RUGGED • RELIABLE •

RS and VS SERIES

SPECIAL FEATURES

- SOLID STATE ELECTRONICALLY REGULATED
- FOLD-BACK CURRENT LIMITING Protects Power Supply from excessive current & continuous shorted output.
- CROWBAR OVER VOLTAGE PROTECTION on all Models except RS-4A.
- MAINTAIN REGULATION & LOW RIPPLE at low line input Voltage.
- HEAVY DUTY HEAT SINK • CHASSIS MOUNT FUSE
- THREE CONDUCTOR POWER CORD
- ONE YEAR WARRANTY • MADE IN U.S.A.

PERFORMANCE SPECIFICATIONS

- INPUT VOLTAGE: 105 - 125 VAC
- OUTPUT VOLTAGE: 13.8 VDC ± 0.05 volts (Internally Adjustable: 11-15 VDC)
- RIPPLE: Less than 5mv peak to peak (full load & low line)

Input: 90-130 VAC/47 to 63 Hz
Operating Temperature: 0° to +50°C
Transient Response: 500 microseconds for 50% load change typical.
Protection: Overcurrent and short circuit protected, 5V overvoltage crowbar, automatic resetting from overcurrent.
EMI: Meets FCC Docket 20780 Class B.
Enclosure: High impact resistant molded lexan plastic.
Weight: 19 oz.
Hold-up Time: 16 MS min at 117 VAC
Storage Temperature: −55°C to +85°C
UL: Listed
Warranty: 1 year
Short Circuit Protection: Indefinite at 50°C
Relative Humidity: 5% to 80% non-condensing

External transformers, battery chargers, linear and switching power supplies provide several advantages over conventional built in power sources as listed below:

FEATURES

- Wall plug-in and desktop styles
- Single and multiple output models available
- Built to UL standards
- Impact resistant Lexan 141-701 thermoplastic enclosure
- AC blades zinc plated solid brass with tapered tip
- Available with input and/or output cord(s) and connector
- One year Warranty
- Sealed construction
- Private label hot stamping available
- Available with 230V/50 Hz input for European use
- UL 544 listable for patient connected medical products

BENEFITS

- Eliminate UL considerations because hazardous voltages are kept out of your product
- Increase space for other components in your product
- Increase aesthetic appearance and portability by reducing the size and weight of your product
- Keep power source heat out of your product for increased life
- Tamperproof power source
- Reduce design time for your product
- International uniformity of your product

EXTERNAL BATTERY CHARGERS

Battery chargers for Gel-Cel and Sealed Lead Acid batteries are available in 6, 12 and 24 volt charge models for fixed voltage (float) and automatic fast charge applications.

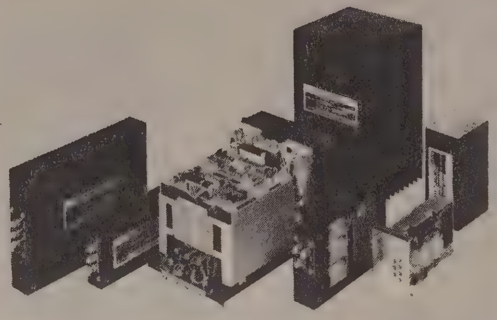
HIGH PERFORMANCE MILITARY POWER SUPPLIES



Send for further information or call the toll free number below.

Custom/Standard Supplies

The power supplies described below are typical of those designed and produced by Astrosystems. Modular design and plug-in circuitry facilitate special designs. Our engineering department will customize these units to your exact requirements. Send us your specs or call the toll free number below.

Programmable Power Supplies

Astrosystems also designs and manufactures programmable DC and AC power supplies. These precision power sources are programmable using an IEEE 488 bus and the latest version of CIIL language.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

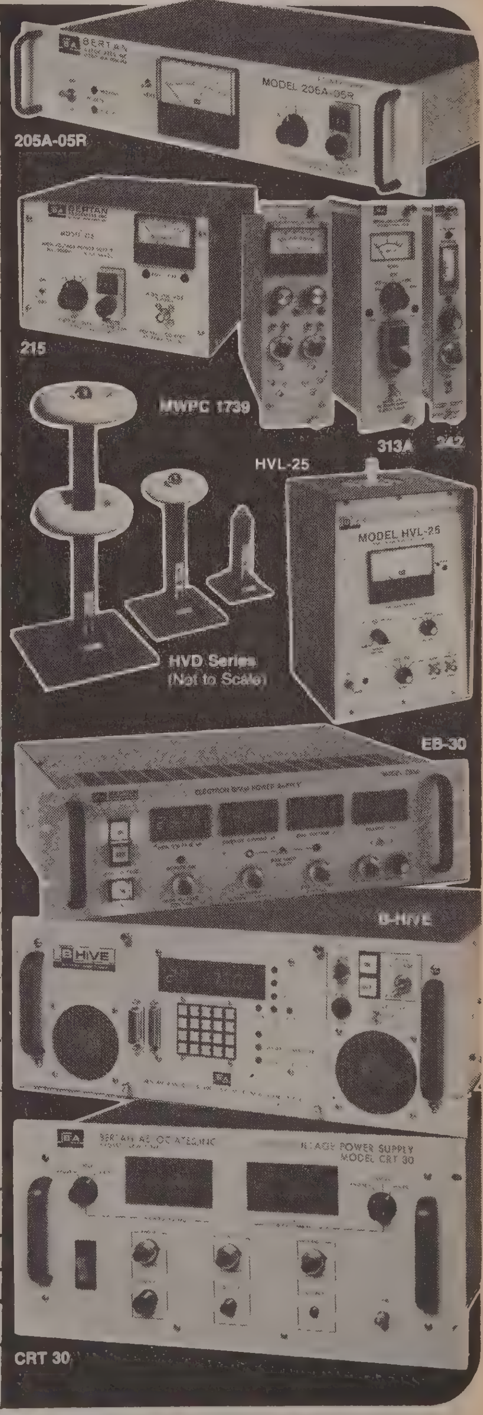
HVD-60	60kV	600meg.	± 0.2%	25ppm	29.6 × 12 × 12



Application Oriented Custom Designs

Bertan provides the widest range of standard *off-the-shelf* High Voltage Power Supplies available. If our Application Engineers cannot match a standard catalog unit to your requirement we will be pleased to quote to your exact specifications.

We produce hundreds of *different* custom designed units each year. Many designs incorporate custom interface, control and monitoring circuits (including IEEE-488) that can more economically and reliably be included in the High Voltage power supply.

Contact your local representative or call the factory directly. We can probably meet your special need with a quick, minor modification to one of our reliable, field proven designs. If not, we can design a new unit and deliver the first article in 120 days *or less*. Either way our Application Engineers will ensure that you obtain the best overall solution to your High Voltage power supply requirements.

BERTAN ASSOCIATES, Inc. 121 New South Rd., Hicksville, NY 11801 • (516)433-3110 • TWX 510-221-2144

We've been building towers of strength for years. Until now we kept it quiet.

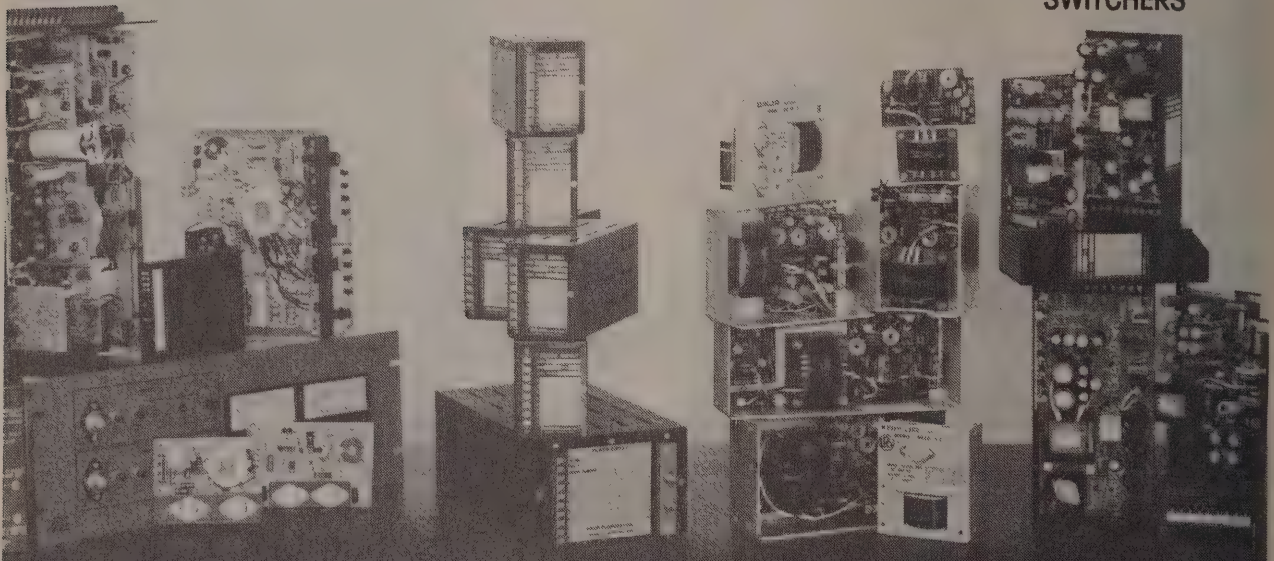
MULTI-OUTPUT
SWITCHERS



Drawing on more than 30 standard sub-assembly module designs and over a decade of specialized power conditioning expertise, BIKOR is in a position to provide customized solutions that best fit your particular requirements — even on fairly limited production runs — and it's done accurately, quickly and at economically attractive prices.

- **AC/DC Uninterruptable Power Systems — available with or without batteries and battery chargers.**
- **Broad range of standard enclosures and sub-modules result in lower costs.**
- **Configurations can range from miniature 6-Watt units, for use in flow control applications, all the way up to 3KW power control assemblies.**

For over 10 years, BIKOR has been systematically building up the most comprehensive line of modular systems in the power conditioning field. The result: You can now choose from hundreds of cost-consciously priced DC/DC and AC/DC models to best fit your particular application requirements.

- **Unregulated and regulated single and multi-output DC/DC units — 12Vdc; 24Vdc; 48Vdc; 110Vdc and 220Vdc input versions.**
- **115VAC or dual 115VAC/230VAC input, single and multiple output AC/DC line and load regulated types.**
- **Output voltages range from 2Vdc to 250Vdc. Currents from 100mA to 50A.**

Offering as standards those most sought after features normally only available as extra charge options with other brands, BIKOR's open-frame "L" Series will prove a boon for the discriminating seeker of peak-performance power supplies at bargain prices.

- **Single, dual, triple and multi-output types (ideal for micro-computer based equipment).**
- **115VAC/230VAC inputs.**
- **Tight regulation of both line and load.**
- **Reverse voltage, overvoltage, and overload protection.**
- **Built-in remote sensing.**
- **Meets UL and CSA standards.**
- **Wide range of case sizes and voltage/ current output combinations.**

These premium switching-mode units provide protection against brownouts. Their reliable peak-performance — yet small size and light weight — combine with cost-conscious price tags to provide best-buy solutions for most every application where weight, compactness, prime quality, and reliability are called for.

- **30, 40, 55, 75 and 125-Watt output versions — in PC board, "L" bracket and enclosed housings.**
- **Built to UL, CSA and VDE safety standards.**
- **Built-in protection against overvoltage, overloads and short circuits.**
- **90-130VAC and 180-260VAC input ranges.**

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087 • Cable Address: BANDKO

LABORATORY POWER SUPPLIES

Model 1601 / $375.00

FEATURES

• Isolated 0-50 VDC, continuously variable; 02 A in four ranges • Fully automatic shutdown, adjustable current limit • Perfect for solid state servicing.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 60 Hz.

Output Voltage: 0-50 VDC, continuously variable; two ranges, 0-25 and 0-50 VDC.

Output Current: 02 A in four ranges — 0-50 mA, 0-0.2 A, 0-0.5 A, 0-2 A.

Load Regulation: Minimum, 0.05%; maximum, 0.1%; typical, 0.07%.

Line Regulation: 0.02% typical from 105 to 125 VAC with output of 50 VDC and 2 A.

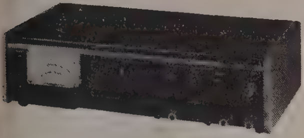
Ripple: 5 mV peak-to-peak.

Temperature Coefficient: .002% of output voltage per °C.

Size (HxWxD): 9.8 x 35 x 25 cm (3.8 x 14.13 x 10″).

Net Weight: 5 kg. (11 lbs.).

TRI-OUTPUT AUTO-TRACKING LAB POWER SUPPLY



Model 1650 / $399.00

FEATURES

• Functions as three separate power supplies • 5 VDC, 5 A fixed output • Two separate 0 to 25 VDC outputs at 0.5 A • Fully automatic, current-limited overload protection • Unique tracking circuit allows automatic tracking of variable DC outputs • + and — terminals of each output are fully isolated, even when in automatic tracking mode • All three outputs may be connected in series or parallel for higher voltage or current requirements.

Our Model 1650 tri-output power supply was designed for modern solid-state applications were both linear and digital circuits are encountered. In one package, this unit combines the features of a separate 5 VDC fixed-output supply and two 0-25 VDC variable supplies. The 5 volt output is rated at 5 amps, to satisfy power requirements of complex digital devices.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 60 Hz.

OUTPUT VOLTAGES

5 Volt Supply: 5 Volts DC ±5%.

A Supply: 0 to 25 VDC.

B Supply: 0 to 25 VDC.

OUTPUT CURRENT

5 Volt Supply: 5 A max; A & B Supplies: 0.5 A current lim.

REGULATION

Load: 0.1% (25 mV) variation to full-load on 25 V supplies. 3% (150 mV) variation from 10 mA. to 5 A change in load current on 5-volt supply.

Line: 0.2% (50 mV) for a line voltage change of 20-volts on 25 V supplies. 0.4% (20 mV) for a line voltage change of 20 volts on 5 V supply.

NOISE RIPPLE

All supplies: 5 mV rms. (not applicable to "A" in track mode).

GENERAL

Current limiting: Limiting for each 0-25 V supply fixed slightly above rated current for short-circuit protection. The 0-5 V supply has automatic fold-back to 2.5 A short-circuit.

TRACKING

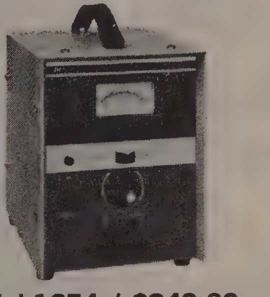
(0-25 V Supplies): "A" Supply Tracks "B" supply at a fixed or selected ratio. Applies whether the supplies are connected in series, back-to-back or are completely isolated.

Tracking Error: ±1% of rated voltage (±250 mV).

Size (HxWxD): 9.8 x 35 x 25 cm (3.88 x 14.13 x 10″).

Weight: 10 kg (22 lbs.) CSA listed.

LOW-VOLTAGE/HIGH-CURRENT POWER SUPPLY



Model 1654 / $349.00

FEATURES

• Continuously variable 2.0 to 6.0 volt output with Vernier control • Remote sensing feature eliminates regulation error by monitoring output directly at load • Complete overvoltage/overload protection circuitry • High-current 10 amp output capability.

APPLICATIONS

Power TTL logic circuitry . . . power microcomputer projects . . . drive low-voltage servo systems . . . power opto-electronic devices . . . general-purpose digital power applications.

The Model 1654 power supply has been designed especially to power a wide range of digital circuits. With reserve power to 10 amps, the 1654 is well suited for powering complex logic circuits; power microcomputer and peripheral circuitry.

The output is floating for flexibility of output connections and may be referenced to an external voltage or connected to chassis or earth ground. Two supplies can be paralleled.

SPECIFICATIONS

Input Voltage: 100, 120, 220, or 240 VAC ±10%, 50/60 Hz; 140 W max. at full rated load. External line voltage selection from rear panel. Output: 2.0 V (typical) to 6.0 VDC at 0 to 10 A. Cont. variable. Noise and Ripple: <15 mV rms, or 60 mV p-p, measured differentially across (+) and (−), outputs not shorted to SENSE terminals. Load Regulation, No Load to Full Load: 0.5%, measured at output. Line Regulation: 0.4%, for ±10% of 120 VAC.

Overvoltage Protection: SCR protection circuit set to crowbar between 6.5 and 7.0 VDC. Reverse Pol. Protection: Didoe protected. Current Limiting: at approx. 15 A if output is short circuited or overloaded. Output voltage drops to 0.18 V for short circuit.

GENERAL

Metering: Output voltage or current. 0-to-7 V and 0-to-11 A ranges. Operating Temperature: 0° to +40°C (32° to 104°F) at full rated load. Max current is derated 200 mA per degree C above +40°C to a max. temperature of 50°C. Size (HxWxD): 21.9 x 16.2 x 24.1 cm (8⅝ x 6⅜ x 9½″). Weight: 5.75 kg (12¾ lbs.).

Model 1654 includes power cord, fuse for alternate line voltage, instruction manual, schematic diagram and parts list.

OPTIONAL ACCESSORY

Rack Mounting Kit RM-16.

DUAL-OUTPUT LOW-VOLTAGE POWER SUPPLY

Model 1652 / $484.00

FEATURES

• More capabilities than two separate supplies • Automatic tracking of A and B outputs • Two 0 to 25 volt, 1.5 amp outputs • Outputs may be connected in series or parallel combination for added current or voltage • Complete overload and reverse polarity protection.

APPLICATIONS

Power linear or CMOS integrated circuits . . . engineering lab applications . . . production testing . . . service requirements . . . classroom and laboratory applications . . . microcomputer projects.

The Model 1652 provides two variable A and B, 0 to 25 volts outputs at 0 to 1.5 amps each. It's well suited for applications involving both analog and MOS digital circuits.

Both supplies can be operated independently or in a tracking mode. In the tracking mode, the B supply can be preset to any percentage of the A supply voltage from 0 to 100%.

SPECIFICATIONS

Input Power Requirements: 100, 120, 220, or 240 VAC ±10%, 50/60 Hz; 130 W max.

OUTPUTS

A Supply: 0-to-25 VDC at 0-to-1.5 amps. Cont. variable. B Supply: 0-to-25 VDC at 0-to-1.5 amps in indep. mode; 0 to 100% of A supply voltage at 0-to-1.5 amps in tracking mode. Cont. variable. Ripple Voltage: <2.5 mV rms. Regulation Load: Within ±0.1% or ±20 mV. Line: Output variation ±0.1% for line variation of ±10%. Current Limiting: Current limiting at approx. 1.8 amps.

GENERAL

Tracking: B supply voltage tracks A supply voltage at selected ratio, cont. variable, 0 to 100%. Tracking Error: Within ±1% ±250 mV in the 2-to-23 volt range. Reverse Pol. Protection: Diode protected. Isolation: Each supply may be floated independently, including tracking mode. Max. voltage diff. between supplies is 250 volts (DC-AC peak). Metering: Built-in meters for A supply and B supply. Switchable to voltage or current. 0-to-27 volt and 0-to-2.0 amp ranges. Operating Temp.: 0° to +40°C (32° to 104°F) at full rated load. Max. current is derated 50 mA per degree C above +40° to a max. operating temp. of 50°C. Series Operation: Outputs may be conn. in series for 0-to-50 volt, 0-to-1.5 amp DC output. Parallel Operation: Outputs may be conn. in parallel (cur. equalizing resistors req.) for 0-to-25 volt, 0-to-3 amp output. Dimensions (HxWxD): 219 x 162 x 241 mm (8⅝ x 6⅜ x 9½″). Weight: 5.75 kg (12¾ lbs.).

Model 1652 includes power cord, fuse for alternate line voltage, instruction manual, schematic diagram and parts list.

OPTIONAL ACCESSORY

Rack Mounting Kit RM-16.

NEW ISOLATED-VARIABLE AC POWER SUPPLY

Model 1655 / $350.00

FEATURES

• Power line leakage tester • Variable-isolated output — 0-150 VAC • 3 amp continuous, 4 amp intermittent output • Built-in solid state soldering iron temperature control • Expanded leakage scale • Circuit breaker overload protection • Display volts, amps, VA, leakage • Two volt-amp ranges (0-240, 0-480) for convenient load requirements.

DESCRIPTION

B&K-PRECISION MODEL 1655 is an isolated-variable (0-150V) AC power supply with a built-in isolation transformer. It includes a leakage test capability and a built-in solid state soldering iron temperature control.

APPLICATIONS

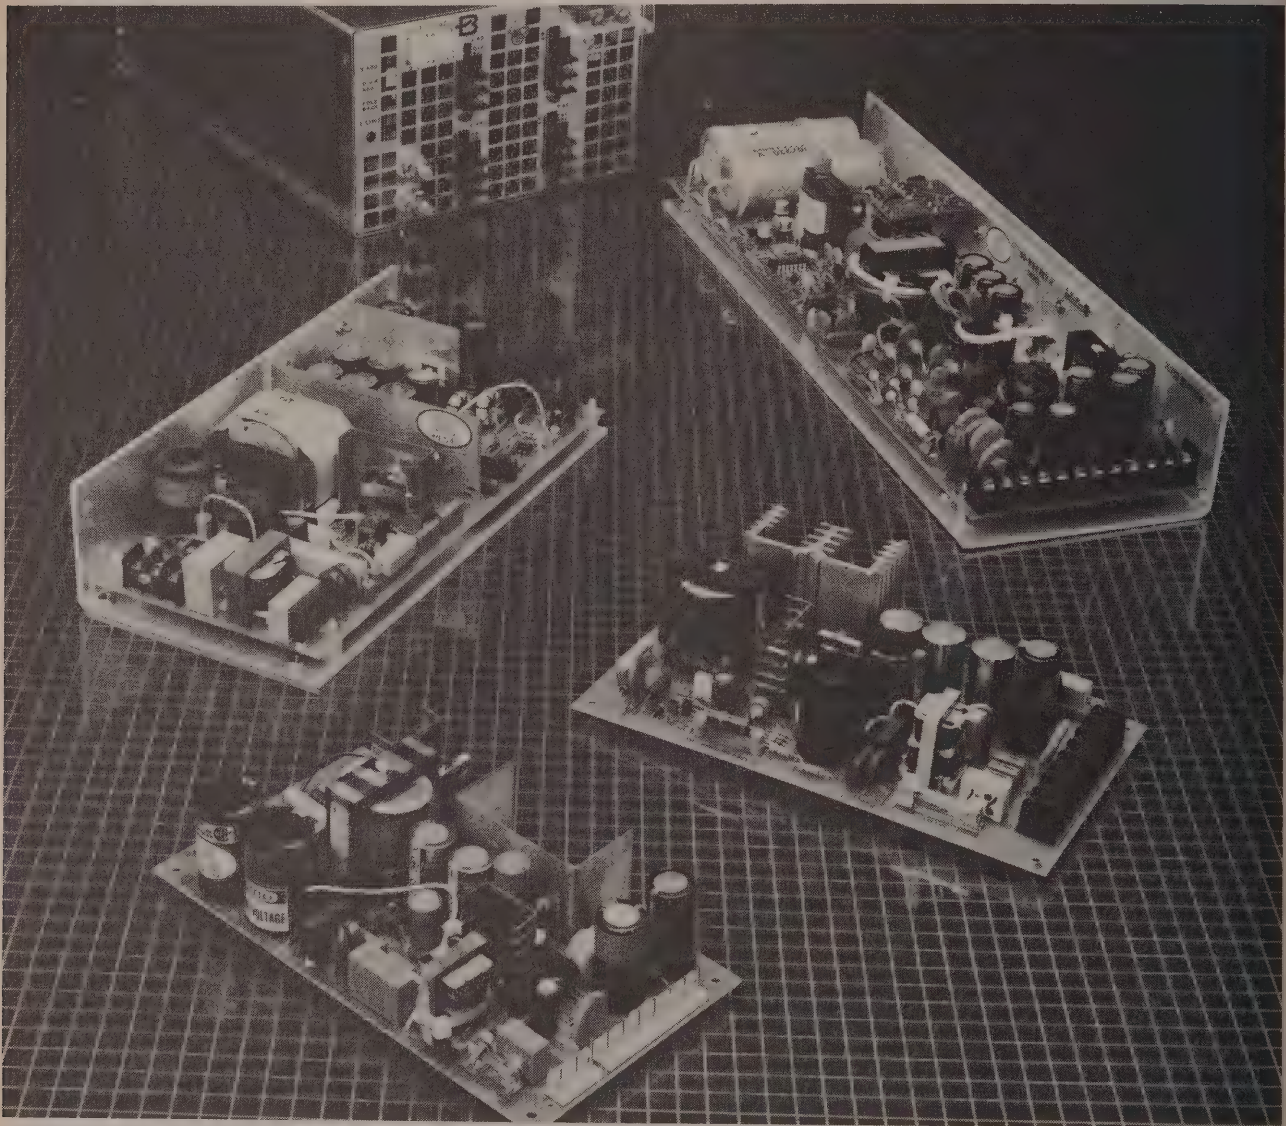
Power line to chassis leakage testing to verify compliance to OSHA, UL and CSA leakage requirements . . . locate dielectric breakdowns with leakage test. Ideal OEM and MRO instrument. Performance testing at normal, low and high line voltages . . . troubleshooting.

SPECIFICATIONS

Voltage Adjust. Range: 0-150 VAC, with input at 120 VAC. Output Isolation: Leakage <0.1 mA (25°C, 50% rel. humidity). Current Ranges: 0-2 A, 0-4 A. Max. Current (Isolated): 3 A cont., 4 A intermittent (0-130 V). Peak Current (Inrush): 30 A max. (inrush limited to one cycle at 30 A). Voltage/Current Sensing: Sinewave average, calibrated in rms. Volt-Amp Ranges: 0-240 VA, 0-480 VA (voltage set at 120). Leakage Range: 0 to 5,000 µA (expanded in 100-500 µA portion, compressed to 5 mA full scale). Solder Iron Temp. Control: 70%-99% of power line (100 W max.) Power: 120 VAC ±10%, 60 Hz, 600 VA at max. output. Dimensions (HxWxD): 30.5 x 15.2 x 28.0 cm (12 x 6 x 11″). Weight: 10 kg (22 lbs.).

SWITCHING POWER SELECTION GUIDE

Boschert Incorporated
384 Santa Trinita Avenue
Sunnyvale, CA 94086
(408) 732-2440
TWX 910-339-9241



- All Boschert products are designed to meet UL and CSA safety requirements.
- All XL and SL Boschert products are designed to meet IEC 380 VDE 0806 Safety, FCC Level B and VDE 0871 Level B EMI, and are available in versions designed to meet British Telecom Safety.
- All Boschert AC to DC products have user selectable 110/220 VAC inputs.
- Multiple Output and Single Output Switchers have a one-year warranty. High Power Products have a two-year warranty.

CASE SIZES

- **A**- 3" x 2" x 1" (76.2mm x 50.8mm x 25.4mm)
- **B1**- 3.5" x 2.5" x .875" (88.9mm x 63.5mm x 22.2mm)
- **B2**- 3.5" x 2.5" x 1.25" (88.9mm x 63.5mm x 31.8mm)
- **B3**- 3.5" x 2.5" x 1.56" (88.9mm x 63.5mm x 39.6mm)
- **C**- 2.25" x 1.75" x 1" (57.15mm x 44.75mm x 25.4mm)
- **CM**- 4" x 2.7" x 1.4" (101.6mm x 68.6mm x 35.56mm)

COMMON SPECIFICATIONS FOR ALL SUPPLIES

Input Voltage:
115 ± 10VAC
100 ± 10VAC (add " - 100" to Model No.)
220 ± 20VAC (add " - 220" to Model No.)
230 ± 20VAC (add " - 230" to Model No.)
240 ± 20VAC (add " - 240" to Model No.)
(no additional charge)

Input Frequency Range:
50 to 60Hz
400 Hz Consult Factory

Isolation: 1250Vrms
Resistance: 50M min.
Capacitance: 250pF max.

Over Voltage Protection:
Standard on all B Case 5Volt Singles above 2Watts except 7009.

Temperature Coefficient:
±0.01%/°C

Storage Temperature:
−25°C to +85°C

Maximum Operating Case Temperature:
+71°C

Short Circuit Protection:
Foldback Current Limiting or Constant Current Limiting

DC/DC CONVERTERS

CALEX

The CALEX lines of 3, 6, and 12 Watt DC/DC Converters are designed for applications where analog voltages are needed in digital systems, when negative voltages are required, for field portable and battery operated equipment, and where isolated positive or negative voltage sources are necessary in instrumentation systems. These units cover input voltages from 5 to 48 volts, are low noise, and have efficiencies up to 80%. CALEX can also design custom OEM DC/DC units to fit your special needs. Contact the factory for details.

Features of CALEX DC/DC Converters

- 5 Year Warranty
- 6 sided shielded cases
- 100% burn-in & testing
- Input/output isolation
- Stock Delivery
- Very low input/output noise
- Low profile cases
- PI type input filters
- Dual tracking outputs
- Short circuit protection

- Other main and auxiliary voltages can be specified and may be available. Please consult factory.
- All units designed to meet UL478, CSA C22.2-154, VDE 0806 (VDE 0730) and FCC Class A. Please consult factory for current status of agency approvals.

California DC offers a broad range of switching power supplies designed to provide reliable power under a variety of operating conditions. Hundreds of thousands of units in customer systems are powering TTL, CMOS, and ECL logic; removable and fixed media drives; CRT monitors; impact and non-impact printer mechanisms; and a number of additional applications. Let our experience work for you, whether your requirements demand off-the-shelf power supplies, custom designs, or modified standard products. Our applications and field support are second to none — dedicated to ensuring the best solution for your systems needs.

STANDARD FEATURES

- Cost effective, reliable designs
- Dual input voltage, jumper selectable
- ±20% line tolerance
- 20 msec hold up
- Overvoltage protection, main output
- Overpower limit
- 65% minimum efficiency at full load
- 1% peak-to-peak output ripple and noise
- Inrush current limit on turn-on
- 50°C full output

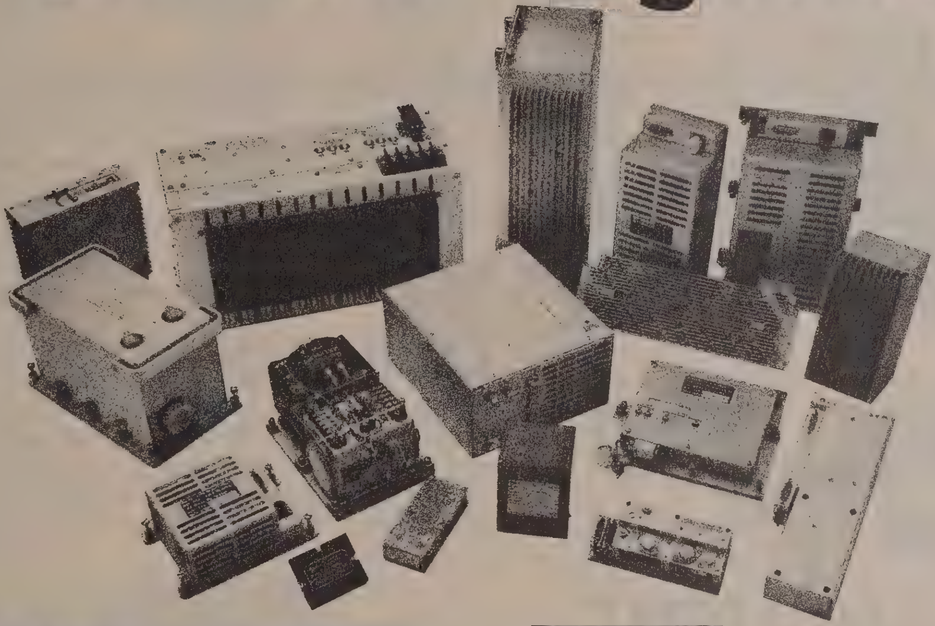
We are in the business of making products that are best forgotten.



Power supplies are memorable only for the wrong reasons.

You never remember the power supplies (or think about them) when they are working properly. It's when they fail, or provide undesired performance, that a power supply is utmost on your mind.

That's why CEA makes forgettable products. When you turn one on, it stays that way. We can say that for real reasons. Please read on.

Reason #1:

We have designed, developed and manufactured more than 2000 different custom power supplies. And we've done it for a wide variety of military and demanding industrial applications.

Reason #2:

We are, without question, a high-technology company. We have developed high-frequency MOSFET switcher technology. We are expert in Tempest techniques, nuclear survivability, critical military specifications, UL, CSA and VDE.

Reason #3:

CEA Program Management makes your project an efficient process, delivering finished supplies without surprises, failures, or restart of the whole process.

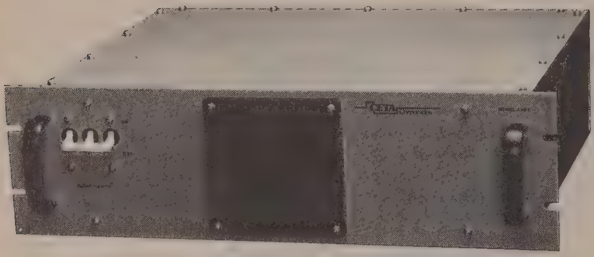
At CEA, you are assigned a professional program team. You are able to review preliminary designs on paper. Based on this review, you receive a fully-tested breadboard, followed by an engineering model for full spec and parts review, and only then into production units — with full performance and no surprises. Your involvement at critical design points assures it.

Let us tell you the whole story.

We would like to send you our new brochure with the full story. We hope you'll see why CEA is the **custom** power conversion specialist.

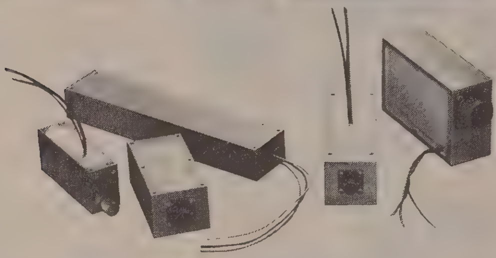
CEA, a division of Berkleonics, Inc., 1 Aerovista Park, San Luis Obispo, California 93401. (805) 544-5454. TWX 910-351-6705.

POWER



HIGH VOLTAGE

"SWITCHERS" up to 100 Kilovolts or up to 15 Kilowatts. Featuring variable output with typical regulation of less than 1%. High density packaging techniques, getting high voltage into 10 watt/cubic inch. 90% efficiency units can be paralleled.

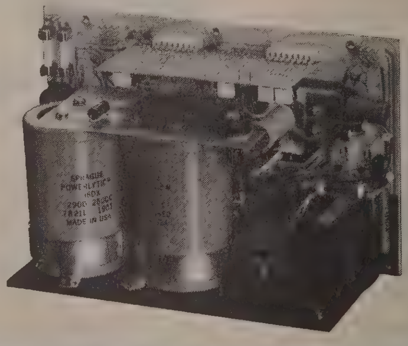


LOW VOLTAGE

Switchers, linears, and hybrid power supplies to meet the rigid demand for high efficiency in small packaging. Any number of outputs in combinations of regulated, unregulated, current limit, programmed or controlled are available.

INPUT/OUTPUT

Input configurations are available for the foreign and domestic, for EMI filtering, with undervoltage (brownout) protection and all the normal variations for frequency and voltage. Most any combination of single or multiple output. High voltage with low voltage to operate filaments, control circuits, etc., eliminating additional supplies.



APPLICATIONS

- X-RAY
- LASERS
- TWT
- VIDEO
- MICROPROCESSORS
- DC to DC
- MICROWAVE
- INSTRUMENTATION
- POWER TUBE
- ELECTROSTATIC

CETA HAS IT . . . the custom designed power supply to fit your application that can't be found . . . except here.

Call or send us your specifications and we'll be glad to provide a quote.

CHRISTIE HI-CURRENT DC POWER

If you are looking for the most reliable high current DC power supplies, float and ultra-fast battery chargers, ni-cad battery packs or whole DC power systems—whether for industrial, military, or NASA-type applications—you need Christie. For 54 years, Christie has produced a wide range of high quality electrical products. Just call our 800 number for information and ordering.

HIGH CURRENT DC POWER SUPPLIES

36, 48	25, 50, 60,* 130*					
72, 120	12, 25, 30,* 50, 60,* 100					

REFLEX-CHARGERS AND NI-CAD BATTERY PACKS

ReFLEX-20 Ultra Fast Charger

If you need ni-cad battery packs, full recharge in 20 minutes, DC-to-DC conversion, uninterruptible DC power for communications, missiles, medical or other applications—you need ReFLEX-20.

The patented Christie ReFLEX-20 "burping" charger-and-battery system fully recharges completely discharged Christie ReFLEX-20 nickel-cadmium batteries in only 20 minutes with 95 percent efficiency. The secret is the interjection of controlled negative discharge pulses during the charging process. This results in longer battery life, more actual ampere-hours, and greater reliability with less capacity fading ("memory"). And there's no battery overheating.

Use Christie long-life ni-cad battery packs with Christie ReFLEX or slow chargers.

REFLEX 20
CHRISTIE

ReFLEX Chargers For Aircraft Applications

The exclusive Christie "burping" principle is also employed for ground-charging vented aircraft 5 to 50 ampere-hour ni-cads fully in one hour...AND THE BATTERY STAYS COOL. The plane you fly on has probably been "burped"!

SPECIAL MILITARY/ NASA POWER SUPPLIES

NASA and most U.S. and many foreign military organizations rely on Christie DC ground power supplies and shipboard power for:

- Electronics equipment trucks (shelters)
- Missile testing
- Helicopter/aircraft starting
- Space Shuttle ground power
- Shipboard forklift chargers
- Radio power
- Automatic battery chargers
- Missile ground power

You Can Depend On Us!

Christie Electric Corp. also produces motion picture theatre projection and stereo sound equipment as well as a variety of battery chargers and testers for electrically driven vehicles and automotive service stations.

Christie gives you state-of-the-art engineering, outstanding quality control, complete in-house magnetic and sheet metal manufacturing capabilities, the latest production techniques, and unparalleled service before and after sales.

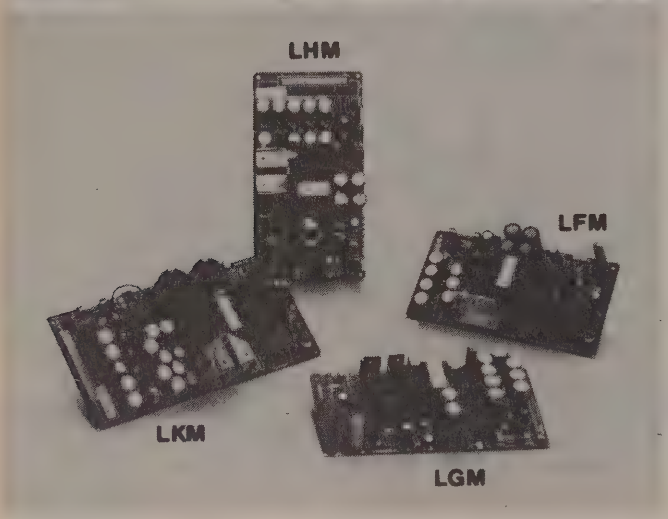
L SERIES SWITCHERS



The L series of low power, open frame multiple output power supplies are designed for small systems. Many of the popular microprocessor, CRT, mini-floppy and video game power requirements can be satisfied with these efficient power supplies.

FEATURES:

- PCB Construction (optional chassis)
- Short-Circuit Protection
- Input fusing included
- Overvoltage protection
- Input surge protection
- Input EMI filtering
- 16 ms holdup time
- 25 K Hz switching
- Brown-out rated

Consult factory for complete specifications and applications.

V SERIES SWITCHERS

The "V" series switchers offer the same performance and specifications as the "L" series on the opposite page with the following added features:

- Designed to meet IEC/VDE safety requirements.
- Two of the outputs are isolated and may be paralleled (when same voltage) for increased current or used in series for higher voltage.

Consult factory for complete specifications and applications.

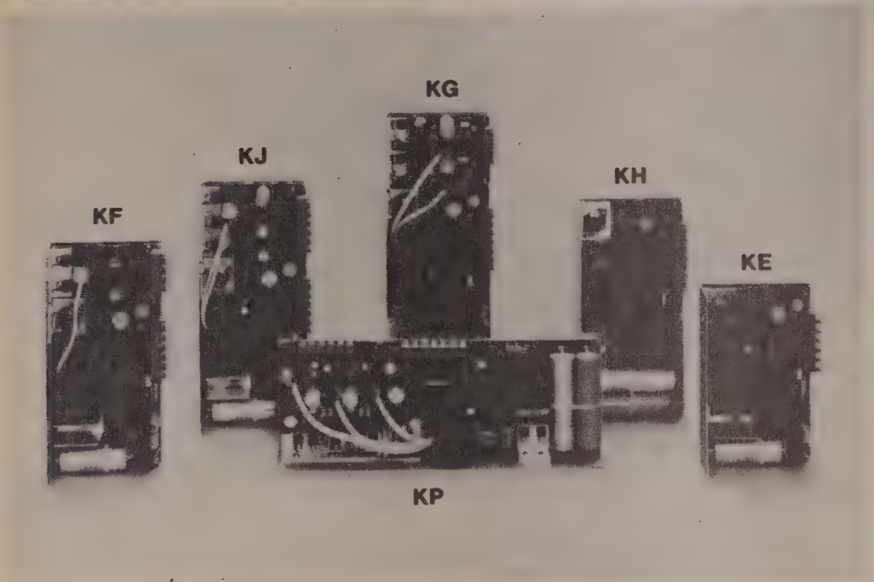
K SERIES SWITCHERS



CONDOR's "K" series switchers feature a wide range of inputs, low prices, plus CONDOR's advanced design and quality construction.

FEATURES;

- All outputs are isolated and independent
- Output regulation of 1% ±20% line tolerance
- Inrush limiting on turn-on
- Thermal protection
- Output ripple and noise ≤50 MV PK-PK
- Temperature 0 to 40°C
- 70% minimum efficiency at full load
- OVP optional on main output
- Current limit with automatic foldback

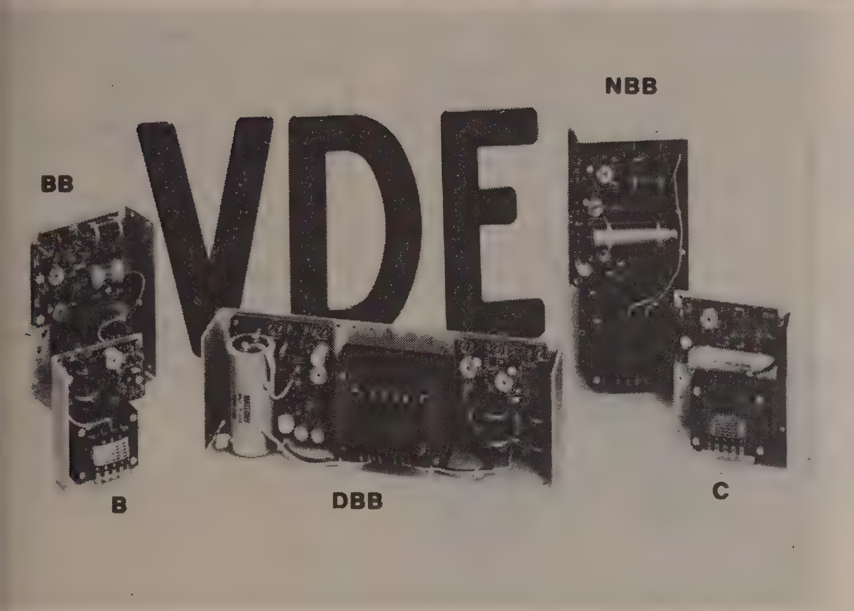
CONDOR INC.

D.C. POWER SUPPLIES

VDE LINEARS



Stop stocking one kind of open frame power supplies to meet domestic needs and another to meet the tough safety, reliability and operational standards of VDE. The forty four models in Condor's new **International Series** will take care of just about all your needs. And to save you more, Condor's new International Series is *priced lower than competition.* General specifications are at the top of the inside front cover. Here are more features:

A Model For Every Application

Twenty five singles, seven duals, six triples, six disc drive models, all with industry standard cases.

Meeting International Requirements

All are designed to meet requirements of IEC,VDE, BPO, CEE and ECMA. UL478/CSA C22.2.

Widest Choice Of Input Voltages And Frequencies

100, 120, 220, 230 and 240 Volt AC, 50-440 Hz, which enables them to be used for a wide variety of applications including aircraft and military ground support equipment.

Increased Reliability

50,000 hrs. MTBF, meet vibration per MIL-STD 810B (Method 514, Curve AB to 50 Hz) and shock to MIL-STD 810B (Method 516-Procedure V). In addition, all IC's are burned in to MIL 883 (Level B).

If you don't need international capability, take a look at the rest of this catalog. One of Condor's over 230 other open frame models will surely meet your needs. Call or write the factory, your local Condor representative or distributor (see back cover) for the whole story.

SPECIFICATIONS

AC Input:	115/230VAC ±10%, 47-440HZ. (Derate output current 10% for 50HZ operation)
DC Output:	See Voltage/Current Rating Chart. Adjustment range, ±5% minimum
Line Regulation:	±.05% for a 10% change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	2 to 15V unit: 5.0 mV PK-PK maximum; 20 to 200V unit: .02% PK-PK maximum.
Transient Response:	30 μ seconds for 50% load change
Short Circuit & Overload Protection:	Automatic current limit/foldback.
Overvoltage Protection:	Built-in on all 5V models. Set at 6.2V ±.4V. Other models use optional overvoltage protection. Refer to back page for specs.
Remote Sensing:	Provided on all models, 3 amps and above, open sense lead protection built-in.
Stability:	±.05% for 24 hours after warm up.
Temperature Rating:	0°C to 50°C full rated, derated linearly to 40% at 70°C.
Temp. Coefficient:	±.01%/°C maximum.
Efficiency:	5V units: 45%, 12 & 15V units: 55%, 20 & 24V units: 60%.
Vibration:	Per Mil-Std-810B, Method 514, Procedure 1, curve AB (to 50HZ)
Shock:	Per Mil-Std-810B, Method 516, Procedure V.
Remote Programming:	Capability included on remote sense models.
Inhibit:	F & G units.

TWO YEAR WARRANTY

CONDOR will repair or replace any power supply of its manufacture that does not perform to published specifications as a result of defective materials or workmanship for a period of 2 years from the date of original purchase. No other obligations or liabilities are implied or expressed. Returns must be freight prepaid.

***__NON STOCK:__ Requires setup fee of $250 per release if less than 50 pieces. per order. No setup fee on orders over 50 pieces with 50 pieces minimum per release.

NOTES: Quantity discounts: 10-24 (5% off 1-9), 25-49 (10% off 1-9), 50-99 (15% off 1-9), 100-249 (20% off 1-9)

RETURN POLICY

Repairs:	Condor will expeditiously repair and return at no charge to our customers any units that do not meet specifications as a result of defects in materials or workmanship. A brief memo describing the problem will accompany each shipment.
No Defect:	Approximately 50% of the power supplies returned to Condor do not have a defect. Condor will test, burn-in, torque screws, hipot, and completely retest units in all production test parameters prior to reboxing for shipment. Condor will bill customer $15.00 minimum labor and handling for each **NO DEFECT** power supply, in addition to appropriate freight charges.
Customer Damaged Units:	Condor will submit repair estimates to the customer if these costs exceed 30% of the power supply value. When repair costs are 30% or less, repairs will be made and billed to customer without prior notice.
Return Freight:	Return Freight must be prepaid. Condor will refuse freight collect returns.

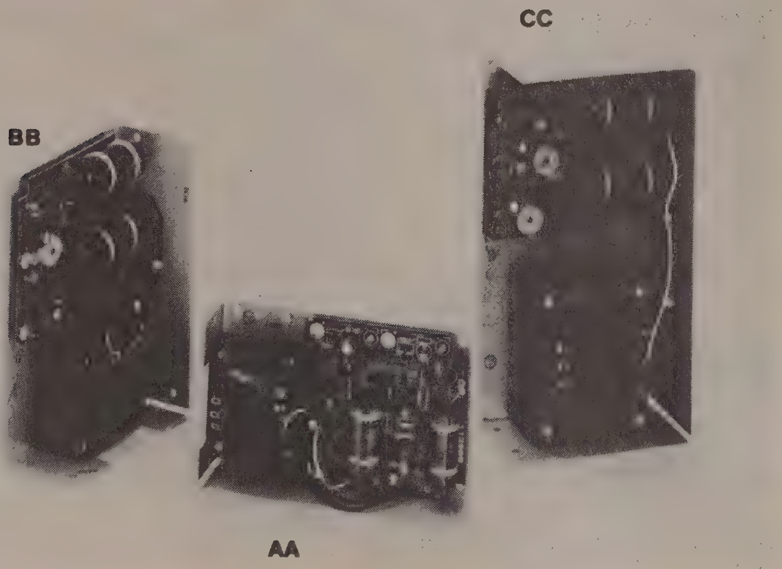
DUAL OUTPUT



FEATURES

- 115/230VAC INPUT
- OVP ON +5V OUTPUTS
- ±.05% REGULATION
- FOLDBACK CURRENT LIMIT
- I.C. REGULATED DESIGN
- 2 HOUR BURN-IN — ALL UNITS UNDERGO:
  1. Full function test
  2. Minimum 2 hr. burn-in
  3. Final full function test
- TWO YEAR WARRANTY
- UL478/CSA C22.2
- 14 DUAL OUTPUT MODELS

DESCRIPTION

CONDOR dual output power supplies are an excellent choice where multiple outputs are required. All 5V outputs have Built-in OVP and the 115/230 VAC input and remote sense features of Condor singles are generally retained.

SPECIFICATIONS

AC Input:	115/230VAC ±10%, 47-440HZ. (Derate output current 10% for 50HZ operation)
DC Output:	See Voltage/Current Rating Chart. Adjustment range, ±5% minimum except continuously variable 9V to 15V outputs.
Line Regulation:	±.05% for a 10% change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	5.0 mV PK-PK maximum.
Overvoltage Protection:	Provided on ±5V outputs set at 6.2V ±0.4V. Other outputs use optional overvoltage protection. Refer to back page for OVP specifications.
Transient Response:	30µ seconds for 50% load change.
Short Circuit & Overload Protection:	Automatic current limit/foldback.
Remote Sensing:	Provided on all except TAA model and isolated duals, open sense lead protection built-in.
Stability:	±.05% for 24 hours after warm up.
Temperature Rating:	0°C to 50°C full rated, derated linearly to 40% at 70°C.
Temp. Coefficient:	±.01%/°C maximum.
Efficiency:	5V outputs: 45%, 12 & 15V outputs: 55%, 20 & 24V outputs: 60%
Vibration:	Per Mil-Std-810B, Method 514, Procedure 1, curve AB (to 50HZ)
Shock:	Per Mil-Std-810B, Method 516, Procedure V

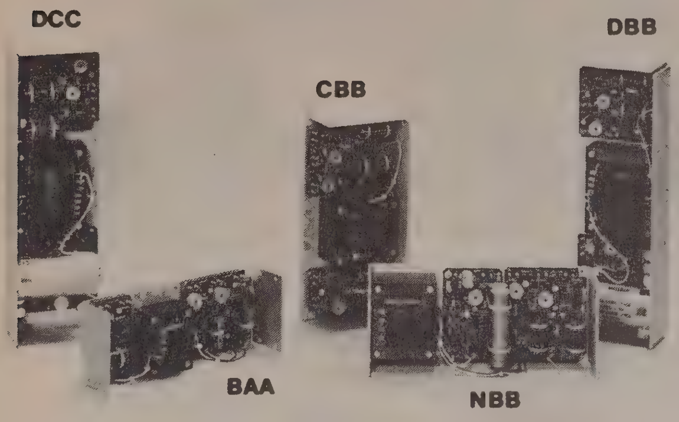
DISC DRIVE - PRINTER - 3 & 5 OUTPUT



DESCRIPTION

3 & 5 OUTPUT FIXED DISC SERIES

Seven new fixed disc supplies for Winchester, Shugart, Micropolis and other fixed disc memories. International transformer is standard.

DISC-DRIVE AND PRINTER SERIES

CONDOR offers 7 models of DISC-DRIVE Power Supplies with 3 of these Triple output and 4 Five output. They will power a variety of Single/Dual Drive and mini floppy uses. Our new printer supplies are designed for Hard-Disc applications or Printer Power requirements, and will deliver controlled power to severe overloads for long periods of time.

SPECIFICATIONS

AC Input:	
Printer Models:	115/230VAC ±10%, 47-440HZ.
Fixed Disc:	110/120/230/240VAC±10%, 47-440Hz
DC Output:	See Voltage/Current Rating Chart. Adjustment range, ±5% minimum.
Line Regulation:	±.05% for a 10% change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	5.0 mV PK-PK maximum.
Overvoltage Protection:	Built-in 5V outputs. Other outputs use optional overvoltage protection. Refer to back page for OVP specifications.
Transient Response:	50u seconds for a 50% load change
Short Circuit & Overload Protection:	Automatic current limit/foldback.
Stability:	±.05% for 24 hours after warm up.
Temperature Rating:	Operating 0°C to 50°C at full current ratings; derated linearly to 40% at 71°C. Storage: −55°C to +85°C.
Temp. Coefficient:	±.01%/°C maximum.
Vibration:	Per Mil-Std-810B, Method 514, Procedure 1, curve AB (to 50HZ)
Shock:	Per Mil-Std-810B, Method 516, Procedure V
Burn-in:	Each unit undergoes a 2 hour burn-in and is fully retested before shipping.

FEATURES

- 115/230VAC INPUT
- OVP ON +5V OUTPUTS
- ±.05% REGULATION

DESCRIPTION

CONDOR Engineering has designed the first series of 4 output units in the standard "OEM" outline and mounting pattern. All units have 115/230 VAC Input, and most retain the remote sensing and Built-in OVP feature of our other products.

SPECIFICATIONS

AC Input:	115/230VAC ±10%, 47-440 HZ.
DC Output:	See Voltage/Current Rating Chart. Adjustment range, ±5% minimum.
Line Regulation:	±.05% for a 10% change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	5.0mV PK-PK maximum.
Overvoltage Protection:	Built-in 5V outputs. Other outputs use optional overvoltage protection. Refer to back page for specifications.
Transient Response:	50µ seconds for a 50% load change.
Short Circuit & Overload Protection:	Automatic current limit/foldback.
Stability:	±.05% for 24 hours after warm up.
Temperature Rating:	Operating 0°C to 50°C at full current ratings; derated linearly to 40% at 71°C. Storage: −55°C to +85°C.
Temp. Coefficient:	±.01%/°C maximum.
Vibration:	Per Mil-Std-810B, Method 514, Procedure 1, curve AB (to 50 HZ)
Shock:	Per Mil-Std-810B, Method 516, Procedure V.
Burn-in:	Each unit undergoes a 2 hour burn-in and is fully retested before shipping.

CONDOR INC.

THE OPEN FRAME POWER SUPPLY COMPANY WHOSE TIME HAS ARRIVED

Condor, Inc. was formed in February, 1979 with 3360 square feet of space and a goal: Take our innovative but field-proven ideas and produce better open frame power supplies than competition. And with better delivery and lower prices. Within six months we were shipping 80 models, all U.L. recognized.

We knew we were on the right track because we had to move into our second facility with 21,000 square feet just one year later in February, 1980. It's now bulging at the seams so we'll be moving into our third plant with over 100,000 square feet early in 1984.

We now produce linears, switchers and specials for microprocessors, mini's, micro's, terminals and all kinds of disc memories. Singles, duals, triples, and quads. Models for domestic use and models that meet international requirements. OVER 250 MODELS! THAT'S MORE MODELS OF OPEN FRAME POWER SUPPLIES THAN ANYONE!

Condor has gained a reputation for top quality, reliability and features. What's more, in almost every case, model for model, our specs, delivery and prices are STILL better than competition! Many of our customers have switched from other brands to Condor. What this all means is CONDOR IS THE OPEN FRAME POWER SUPPLY COMPANY WHOSE TIME HAS ARRIVED!

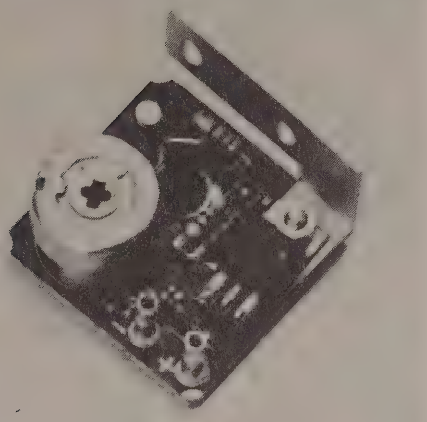
If you're buying open frame (or modular) D.C. power supplies, YOU'LL DO BETTER WITH CONDOR. Call our reps or distributors listed on the back cover or the factory for prices and delivery.

4880 Adohr Lane, Camarillo, CA 93010 / (805) 484-2851 / Outside CA (800) 235-5929 / TWX: 910-336-1140

CONDOR INC.

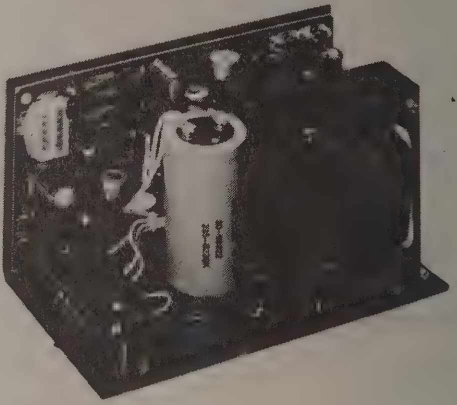
D.C. POWER SUPPLIES

SPECIAL PRODUCTS



OVERVOLTAGE PROTECTION — These OVP modules are available for use on any output not provided with Built-in OVP. Mounting holes are provided to accommodate these modules within the outline and mounting dimensions of each Power Supply.

OVP-24 is used on E and F Models, OVP-12 is used on all other units. One OVP-12 protects both outputs on ±12V and ±15V supplies.



CUSTOM DESIGNS AND MODIFIED STANDARDS

The CONDOR design team is ready to help solve your power supply problems with custom designs or modified standards. Call CONDOR or our local representatives for fast, expert assistance.

2 YEAR WARRANTY

CONDOR will repair or replace any power supply of its manufacture that does not perform to published specifications as a result of defective materials or workmanship for a period of 2 years from date of original purchase. No other obligations or liabilities are implied or expressed. Returns must be freight prepaid.

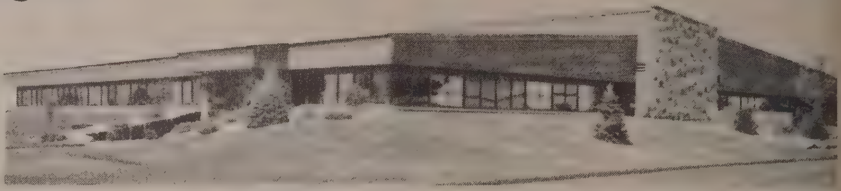
CONVERTER CONCEPTS

15 to 165 Watt Switching Power Supplies with Ultra-Wide Input Ranges for all World Voltages



The Company and the Product

Converter Concepts specializes in switching power supplies with ultra-wide input ranges for worldwide use with microprocessors and microcomputers. Converter Concepts is unique in the area of power supplies since we devote our total efforts to answering the needs of the OEM for switching power supplies and uninterruptible power supplies (UPS). Our mission is to design and manufacture a product of utmost quality, efficiency, and reliability—a component in which you can have complete confidence.

Since 1976, Converter Concepts has been producing switching power supplies with up to 165 watts output. We are the **only** producer of 15 to 165 watt switching power supplies that operate **continuously** on any voltage worldwide from 90 to 265 VAC or 10 to 40 VDC and 20 to 60 VDC—**without the switches, jumpers, taps or other modifications needed by other switchers.** And we offer AC-to-DC and DC-to-DC converters in the same type of compact package.

Latest Converter Technology

Converter Concepts incorporates the latest electronic technology in the design of its converters. Our advanced switchers use a single transistor, single transformer flyback design with soft turn-on characteristics and short-circuit protection.

Other features of these compact and lightweight switchers include brownout protection to as low as 70 VAC, and convection cooling—no fans or blowers are needed. With our state-of-the-art flyback design, you get excellent regulation capability, less complexity, higher reliability and efficiency (up to 70% typical), and a cost that's competitive with that of linears.

Automatic Continuous Compensation

Converter Concepts' unique **Versatron** converter circuit automatically compensates for extremely wide input variations while maintaining constant output voltage. Input voltage variations as much as 5:1 can be accommodated by employing this versatile approach.

How to Order

Use this guide to select a power supply. Replace all "Xs" with numbers and letters derived from separate power supply listings and from options charts. Orders may be placed factory-direct or through Converter Concepts' sales representatives.

Sample Part Number

VT 100-241-10/EF

orders:

standard series,
100 watts,
dual output,
+5 V @ 2.4 - 12A,
+12 V @ .6 - 3A,
90 - 265 VAC input,
enclosed frame,
terminal bloc,

with these options,

remote sense,
logic shutdown,
reverse polarity protection,
thermal shutdown.

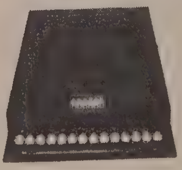
VF 65/ VF 100

- **Open and Enclosed Package**
- **65 and 100 Watt Switching Fail Safe Power Supply**
- **Most Advanced Low Power UPS Available**
- **Ultra-Wide AC and DC Input Range**



Specifications shared by both VF units:

Efficiency AC Input:
80% Typical 70% Minimum - Single Output
75% Typical 65% Minimum - Multiple Output

Efficiency DC Input:
70% Typical 60% Minimum - Single Output
65% Typical 55% Minimum - Multiple Output

Turn-on Time: 200 m seconds

Ripple: All Outputs
2X Line Frequency 15mV pk-pk maximum
20kHz 15mV pk-pk maximum

Multiple Output Regulation Specifications:
Regulation: Line, All Outputs: 0.1%
Regulation: Load, Output No. 1: 0 Load - Full Load 2%
20% Load - Full Load 1%

NOTE: Output No. 1 must have a minimum load of 20% of full load for all other outputs to maintain regulation.

ALL OTHER OUTPUTS: 0 Load - Full Load 1.0% to 1.5A; greater than 1.5A, 2.0%

Specifications

Common to VT and VX Series

Efficiency AC Input:
80% Typical 70% Minimum Single Output
75% Typical 65% Minimum Multiple Output

Efficiency DC Input:
75% Typical 55% Minimum Single Output
70% Typical 50% Minimum Multiple Output

Turn-On Surge Current: AC Input 5A max.

Turn-On Time: 200m sec.

Ripple: All Outputs
2X Line Frequency 10mV pk-pk max
20kHz 10mV pk-pk max

Switching Noise:
2MHz @ 20kH Rep. Rate, 50mV pk-pk max

Transient Response: 0.5V excursion for a 50% to 100% or 100% to 50% load change with return to regulation in 2m sec. load change 1 A/ μ sec.

Operating Temp:
−20°C to +80°C Base Plate Full Load
−20°C to +55°C Free Air Full Load
Derate Linearly to 50% output at 80°C

Insulation: Input to output or input to case 1.5 kV min. AC input, 250V min. DC output to case

Insulation: Output to case: 250VDC Floating output enables plus or minus operation of the output voltage

Short Circuit Protection: Current limited for overload and short circuit protection. Normal operation returns upon overload removal

Multiple Output Regulation Specifications:
Regulation: Line, All Outputs: 0.1%
Regulation: Load, Output No. 1: 0 Load - Full Load 2%
20% Load - Full Load 0.5 %

NOTE: Output No. 1 must have a minimum load of 20% of full load for all other outputs to maintain regulation.

ALL OTHER OUTPUTS: 0 Load - Full Load 1.0% to 1.5A: greater than 1.5A, 2.0%

VT 15/ VX 15

- **15 Watt Switching Power Supply**
- **3 Input Options Available**
- **Single, Dual, and Triple Outputs**
- **Low Cost in a Compact and Lightweight Package**

Hold-up Time:
90 VAC Input (Low Line) -9m sec.
115 VAC Input (Nominal Line) -16m sec.
250 VAC Input - 104m sec.

Weight: 1.3 lbs.

Size:

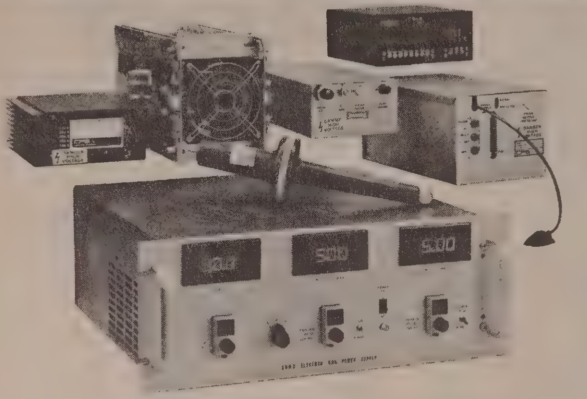
High Voltage - High Precision POWER SUPPLIES from CPS



CRT • SEM • Radiographics • Beam-Penetration • Optics • PMT • X-Ray • Lithography • COM • LAB • Phototypeset.

FEATURES • Output voltages to 50 kV • Low ripple, precision regulation—high stability • Remote programming and metering models • Short circuit and arc protection • Self restoring • Multiple output voltage options • Solid state design • UL approved.

CPS offers a full range of standard and custom high voltage power supplies for commercial, industrial and mil-spec OEM's having applications requiring high-precision control of an electron beam. All power supply designs feature state-of-the-art production-proven techniques. Many years of experience in encapsulation of high voltage components provide compact packaging without compromise of performance reliability. All designs incorporate short-circuit and arc protection.

GENERAL PURPOSE—PRECISION & ULTRA PRECISION HIGH VOLTAGE POWER SUPPLIES

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

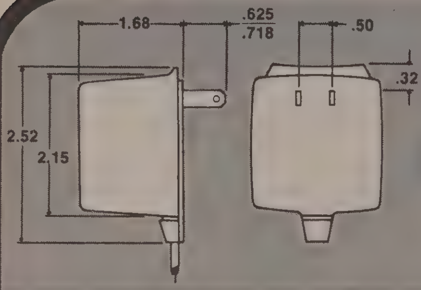
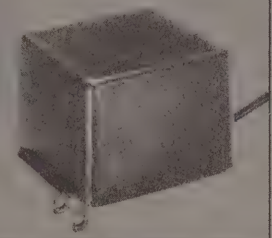
D & B POWER, INC.

Wall Plug-in Power Sources

'C' SIZE

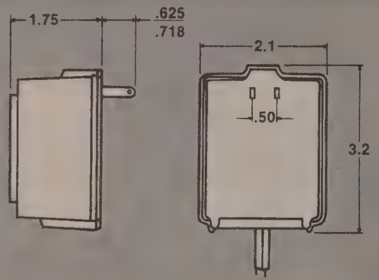


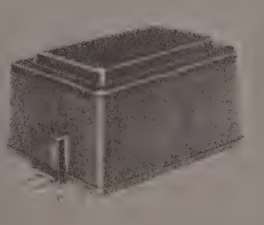


SPECIFICATIONS

AC/AC RANGE: 6 VA to 12 VA
AC/DC FILTERED RANGE: 4 Watts (Filtered) to 9 Watts (Unfiltered)
REGULATED RANGE: 5 VDC-24 VDC up to 150 ma.
LEAD-ACID (CYCLIC): 2 V-6V (11 V.N.L.) 8V-12V (21V.N.L.) up to 9 Watts
LEAD-ACID (REGULATED): 2.35V/cell No load; Average: 150 ma. up to 4 Watts
NICAD: AA-up to 25 cells Sub C — up to 20 cells, C — up to 20 cells D — up to 16 cells, F - up to 9 cells

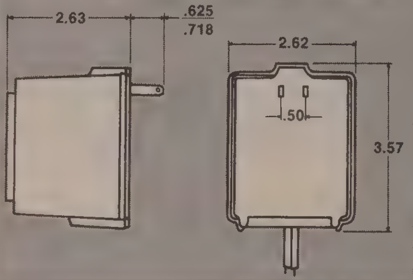
'D₂' SIZE





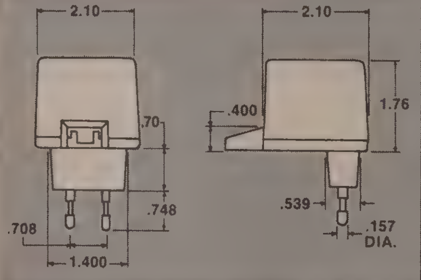
AC/AC RANGE: 6 VA, 12 VA, 20 VA
AC/DC FILTERED RANGE: 4 Watts, 9 Watts, 13 Watts, all available with filter
REGULATED RANGE: 5 VDC — 24 VDC up to 250 ma.
LEAD-ACID (CYCLIC): 2V — 6V (11 V.N.L), 8V — 12V (21 V.N.L.) Average: 250 ma. up to 9 Watts
LEAD-ACID (REGULATED): 2.35 V/cell, no load Average: 250 ma. up to 9 Watts
NICAD: AA — up to 25 cells, Sub C - up to 20 cells, C — up to 20 cells, D — up to 18 cells, F — up to 8 cells

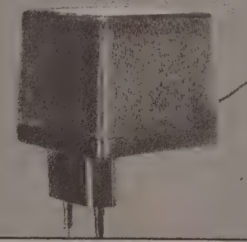
'E' SIZE



AC/AC RANGE: 20 VA, 30 VA, 37 VA, 56 VA
AC/DC FILTERED RANGE: 13 Watts, 19 Watts 35 Watts filtered
REGULATED RANGE: 5 VDC — 12 VDC up to 1 amp., 15 VDC — 24 VDC @750 ma. 25 VDC — 35 VDC up to 500 ma., 35 VDC — 50 VDC up to 350 ma.
LEAD-ACID (CYCLIC): 2V — 12V up to 35 Watts, 20% N.L. — full-load regulation
LEAD-ACID (REGULATED): 2.35V/Cell N.L. up to 35 Watts
NICAD: AA — N/A, Sub C — N/A, C — N/A, D — any, F — up to 20 cells

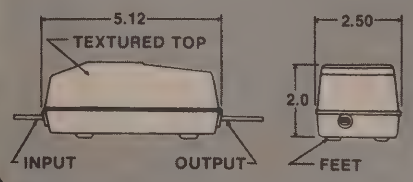
'C' EURO WALL STYLE

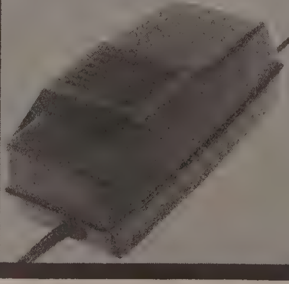




AC/AC RANGE: Up to 12 VA
AC/DC FILTERED RANGE: Up to 4 Watts filtered, up to 9 Watts unfiltered
REGULATED RANGE: Up to 150 ma. at specified voltage not to exceed 4 Watts
LEAD-ACID (CYCLIC): 2V — 6V (11 V.N.L.) up to 9 Watts, 8V — 12V (21 V.N.L.) up to 9 Watts
LEAD-ACID (REGULATED): 2.35 V/cell N.L., Average 150 ma. up to 4 Watts
NICAD: AA — up to 25 cells, Sub C — up to 20 cells, C — up to 12 cells, D — up to 6 cells

DPC DESK TOP





AC/AC RANGE: 6 VA, 12 VA, 20 VA
AC/DC FILTERED RANGE: 4 Watts, 9 Watts, 13 Watts, all available with filter
REGULATED RANGE: 5 VDC — 24 VDC up to 250 ma.
LEAD-ACID (CYCLIC): 2V — 6V (11 V.N.L), 8V — 12V (21 V.N.L.) Average: 250 ma. up to 9 Watts
LEAD-ACID (REGULATED): 2.35 V/cell, no load Average: 250 ma. up to 9 Watts
NICAD: AA — up to 25 cells, Sub C - up to 20 cells, C — up to 20 cells, D — up to 18 cells, F — up to 8 cells

☐ Regulated DC Supplies

☐ Battery Chargers

ELECTRICAL AND MECHANICAL SPECIFICATIONS

ELECTRICAL

INPUT
120 VAC 60 Hz (Standard); 240 VAC 50/60 Hz & 120/240 VAC 50/60 Hz Switchable available as options.

OUTPUT
± .5 VDC Typical except regulated

REGULATED UNITS
± 3% standard line and load regulation

STANDARD CHARGE RATE
C/10, C/5 & C/1 available

MECHANICAL

HOUSING MATERIAL
Black ABS-KJB, except E case molded in Noryl

OUTPUT CORDS
All industry standard miniature molded cordsets are stocked at D and B Power.

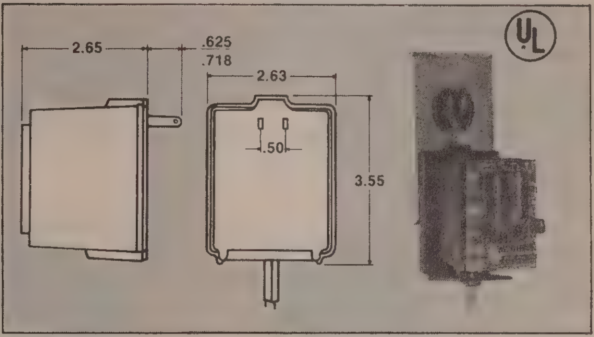
OPTIONS

1. L.E.D. charge or power-on indicator light
2. Ground pin — can be carried through secondary
3. Center-tapped secondary on AC/AC
4. European Input desk-top for D_2 and E power
5. Japanese or other World-Wide input voltages and frequencies
6. Switchable 120 VAC/240 VAC 50/60 Hz available in all case sizes
7. ± DC non-regulated and regulated outputs
8. Ink-stamp for quick delivery, custom Hot-Stamping facilities
9. UL and CSA designs
10. UL and/or CSA submittals upon request
11. Custom designs to meet your exact requirements are available on request
12. D & B Power qualified to MIL STD MIL-C-4566A and MIL-I-45208

Custom Products

MPPS 512

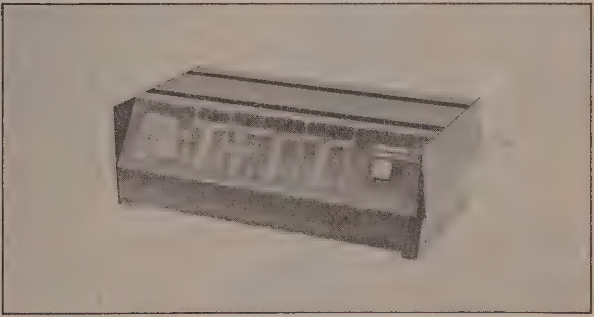
REGULATED, MULTIPLE OUTPUT MICRO PROCESSOR POWER SUPPLY



MECHANICAL DATA: Wall plug-in with ground pin and five (5) conductor output cord.

ELECTRICAL DATA: Input: 117 VAC ± 10%, 60 Hz. Output: 1) + 5 VDC @ 750 ma., Line Regulation 0.1% Load Regulation 2%, 10 MV RMS MAX Ripple. 2) + 12 VDC @ 150 ma., Line Regulation 0.1%, Load Regulation 0.5%, 1 MV RMS MAX Ripple. 3) – 12 VDC @ 150 ma., Line Regulation 0.1% Load Regulation 0.5%, 1 MV RMS MAX Ripple. 4) UL Approved.

DUAL STAGE NICAD AND DUAL STAGE LEAD-ACID



NICAD: Fast charge @ C/5 or C/1, float at C/10 Discharge circuit available

LEAD-ACID: 2.45V/cell fast charge, 2.30V/cell float

BOTH UNITS: L.E.D. indicator, nominal input voltage = 117 VAC 60 Hz ± 10%, 230 VAC 50 Hz. available

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

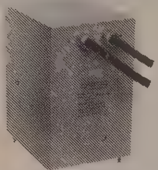
Unregulated Modules Compact High Voltage—Series "S"

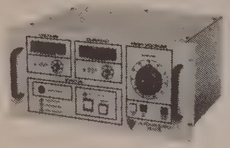


- ▼ Output: Two shielded poly-ethylene cables insulated for reversible polarity
- ▼ Construction: Solid state rectifiers, all units hermetically sealed in epoxy, vacuum filled, metal case

Input: 0-115-125V, 50/60Hz
400 Hz available upon request
Output: Variable with input ac line

Output Range (kV)	Current (mA)	Ripple %rms/mA @ 60Hz
0 to 2.5-60	1	0.25
0 to 1-30	5	0.25
0 to 1-40	10	0.15

Rack Mounted Power Supplies RIU Series 875 and 1400

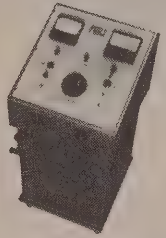


- ▼ Easy to read 3 digit DPM for voltage and current
- ▼ Adjustable overcurrent and overvoltage
- ▼ All solid state technology
- ▼ Low RMS ripple
- ▼ External and HV interlock
- ▼ Zero start interlock and bypass
- ▼ Polarity reversible (Below 60KVDC)

Input: 105-125VAC 50/60 Hz
Output: Continuously adjustable 0-100%

Output Voltage	Output Current
0-1KVDC	25-1500MADC
0-2.5KVDC	10-1000MADC
0-5KVDC	10-300MADC
0-10KVDC	10-100MADC
0-20KVDC	5-75MADC
0-30KVDC	5-10MADC
0-40KVDC	3MADC
0-60KVDC	1MADC
0-90KVDC	1MADC

High Pot Testers—Series "TC"



- ▼ Multi-purpose power supplies fully instrumented and protected. Ratings up to 80,000 volts dc
- ▼ Solid State
- ▼ Oil insulated

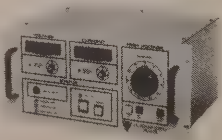
Input: 105-125V, 50/60 Hz
Output: Continuously adjustable

F. L. Voltage (kV)	Current Range (mA)	Ripple Type %rms/mA @ 60Hz
0 to 30	5, 20	0.4
0 to 40	5, 20	0.4
0 to 50	5, 10	0.4
0 to 60	5, 10	0.4
0 to 70	5	0.4
0 to 80	5	0.4

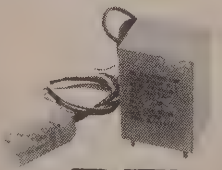
High Voltage DC Supplies Series "HVOU"

- ▼ Input, 120 & 208VAC, 50/60Hz
- ▼ Front Panel DPM's
- ▼ Adjustable overcurrent and overvoltage
- ▼ Continuously adjustable 0-100%
- ▼ Remote polarity reversible
- ▼ Fully instrumented
- ▼ Fully interlocked

Standard Voltage & Currents	
Output Voltage (KV)	Output Current (MA)
0-40	10 to 250
0-50	8 to 200
0-75	5.5 to 130
0-100	4 to 100
0-150	2.5 to 66



DC-DC Proportional Converters for Photomultiplier Tube—Series "PMS"



- ▼ Reverse polarity protected
- ▼ Output isolated
- ▼ Momentary short circuit protected
- ▼ Small size
- ▼ Low cost

Model Number	Input Range (dc volts)	Output Range (dc volts)	Size D&L
PMS 1-1	3 to 15	300 to 1500@1mA	1 X 2¼
PMS 1-4	3 to 19	300 to 2000@1mA	1 X 2¼
PMS 1-6	3 to 15	400 to 2500@0.5mA	1 X 2¼
PMS 1-7-7	4 to 12	500 to 1500@0.5mA	2.4 X 1.5 X 0.812

Phone 914/699 2000 TWX 710 562 0130

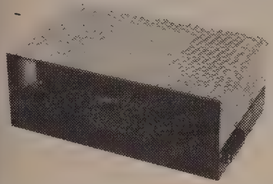
Highly Regulated Adjustable Hermetic Sealed, Epoxy Filled Series "CARDE"

- ▼ Adjustable output (50 to 100%) (Resistance programmed)
- ▼ Short circuit proof—foldback
- ▼ Designed to meet environmental requirements of MIL-E-16400

Input: 115V ±10%, 47-420Hz
Output: Line and load regulation ±0.005%
Ripple: 0.03% rms
Temp. coeff: 0.02%/°C
Temp. range: −25°C to 65°C
Polarity: specify pos. or neg.

Outputs			
Voltage Range (dc)	**Current Max.**	**Voltage Range (dc)**	**Current Max.**
600V to 1200V	8mA	5.0kV to 10kV	1mA
1200V to 2500V	4mA	7.5kV to 15kV	0.6mA
2.5kV to 5.0kV	2mA	10kV to 20kV	0.5mA
3.5kV to 7.0kV	1.4mA		

Highly Regulated Adjustable Industrial Grade—Series "HARD"

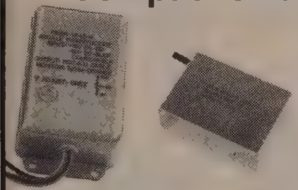


- ▼ High frequency design
  Low energy storage
- ▼ Adjustable output (50 to 100%) (Resistance programmed)
- ▼ Short circuit proof

Input: 115V ±10%, 50/400Hz
Output: Line and load regulation: ±0.005%
Temp. coeff: ±0.02%/°C
Temp. range: −20°C to 55°C
Polarity: specify pos. or neg.
Ripple: 0.03% rms

Outputs			
Voltage Max.	**Current Max.**	**Voltage Max.**	**Current Max.**
1200V	2,10,20mA	15kV	0.25, 0.5, 1mA
2500V	1, 4, 8mA	20kV	0.2, 0.5, 1mA
5000V	0.5, 2, 4mA	30kV	0.75mA
10kV	0.25, 1, 2mA	40kV	0.5mA

Highly Regulated Adjustable Compact Size—Series "PMSR"

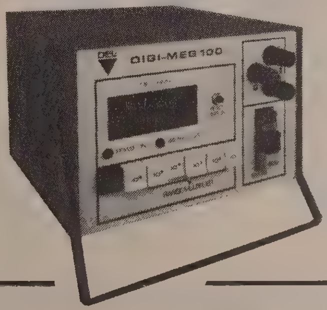


- ▼ DC-DC converter
- ▼ Adjustable output (Resistance programmed)
- ▼ Short circuit proof

Input: ±15V dc
Output: Regulation: line and load ±0.002%
Temp. coeff: 100ppm/°C
Temp. range: 0 to 60°C
Ripple: 25mV, peak to peak max.

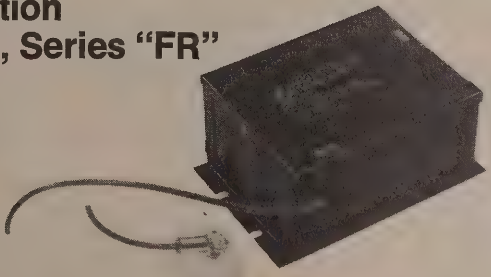
Outputs			
Voltage (+)	**Current**	**Size (in.)**	**Construction**
600 to 1400V	0 to 1.5mA	1.25 X 2.5 X 4.0	A metal case
600 to 1400V	0 to 1.5mA	1.25 X 2.5 X 3.5	B plastic case
300 to 1500V	0 to 2mA	1.25 X 2.5 X 4.0	A metal case

Digi-Meg 100 Digital Megohmeter



- ▼ Solid state LED panel meter
- ▼ Ranges to 10,000,000 Megohms in 6 ranges
- ▼ 50/500VDC test voltages
- ▼ Short circuit proof
- ▼ Optional battery pack available
- ▼ Size: 7½" W x 5" H x 10" D

Ferro-Resonant HV Line Regulation Power Supplies, Series "FR"



- ▼ Simple reliable design
- ▼ Low cost
- ▼ 1% line regulation
- ▼ Short circuit proof

Input: 115VAC + 10%, 50 or 60 Hz
Output: Models to 20KVDC & 600 Watts
Line Regulation: ±1%
Load Regulation: ±10% NL to FL.

Digi-power has all the power you'll ever need in OEM power supplies

(Custom or standard)

Select from a complete line of compact power supplies, 50 to 500 watts. Each unit is burned-in for a full 12 hours at 100% rated load before final testing and packaging for shipment. Reliability is assured with a one year warranty. Digi-power has the size you need for your microprocessor, mini-computer Winchester-type modules or peripheral equipment.

Units are available open-frame or enclosed to meet your specific requirements. Standard or optional features include brown-out protection, short circuit protection, power-fail option, over-temperature protection, and OVP for all outputs. Each Digi-power component is EMI filtered and constructed of tested and proven quality materials. All units deliver up to 80% efficiency. UL recognized.

Custom designs are available for OEM customers requiring special electrical, mechanical or physical parameters. A staff of service personnel and off-the-shelf replacement parts can be readily accessed should the need arise. Call or write for informative booklet and specification sheets.

Electrical Specifications

AC Input: 90-132/180-264 VAC at 47-63 Hz
Line Regulation: 0.1% for a 15% AC input change
Load Regulation: A) Main output +0.2% for a 10-100% load change
B) Auxiliaries with post regulation +0.5% for a 10-100% load change
C) Auxiliaries without post regulation typical +5% for a 20-100% load change
Stability: 0.05% for 24 hours after warm up
Output Ripple: 100 mv for +5 volts. other outputs 1% maximum
Remote Sense: Standard on most models
Temperature Rating: Operating 0 C to 50 C. derate linearly to 50% at 70 C
Short Circuit and Overload Protection: Self restoring current limiting (foldback type)
Overvoltage Protection: OVP is standard on all outputs
Efficiency: 65% minimum
Input Surge: Cold start. 115VAC 10A max.. 230VAC 20A max
Holdup Time: 10 m s. minimum
Options: Power Fail. Battery Charger. Battery Backup. Clock Circuitry. Remote Shutoff

SHIPBOARD SWITCHING POWER SUPPLY

P/N 2-12150-01

Input Power: 115VAC, 60Hz, 3ϕ per MIL-STD-1399, Sec. 103, Type I

Outputs	Reg.	Noise
+5VDC @ 70a	±1%	50mV
−5VDC @ 1a	±1%	50mV
+12VDC @ 1a	±1%	120mv
−12VDC @ 2a	±1%	120mv

Size: 10 x 6.25 x 3 inches

Weight: 12 pounds

Environment: (MIL-E-16400):
Temp: 0 to 75°C
Humidity: to 95%
Fungus: Per MIL-STD-16400
Vibration: MIL-STD-167
Shock: 75g's

Cooling: Convection/Conduction

Efficiency: 66%

EMI: MIL-STD-461 Notice I

MTBF: 40,000 hours

SHIPBOARD POWER SUPPLY

P/N 2-10703

Input Power: 115VAC, 400Hz, 3ϕ per MIL-STD-1399 Sec. 103 Type I Power

Outputs	Reg.	Noise
+15VDC @ 7a	±0.15	20mv
−15VDC @ 7a	±0.15	20mv

Size: 9 x 6 x 4.75 inches

Weight: 9.8 pounds

Environment:
Temp: −40°C to +65°C
Shock: MIL-STD-202 Method 213A Test Condition A
Vibration: MIL-STD-167 Table I (increased by a factor of 2)

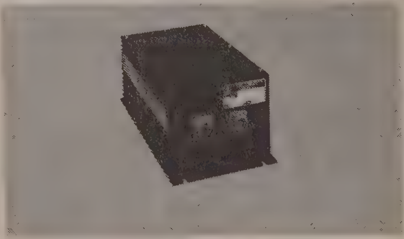
Noise: MIL-STD-740

Cooling: Cold plate conduction

Efficiency: 60%

EMI: MIL-STD-461, Type D

MTBF: 40,000 hours



MILITARY POWER SUPPLY

P/N 2-10568

Input Power: 115 ±10VAC, 47-420, 1ϕ

Output	Reg.	Noise
+28VDC @ 14a	±0.5%	50mv

Size: 11.5 x 6 x 5 in. (incl. mfg. flanges)

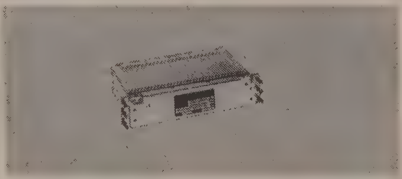
Weight: 14 pounds

Environment:
Temp: −20°C to +55°C
Magnetic Radiation — Less than 0.5 gauss
Magnetic Radiation — Less than 0.5 gauss one inch from top surface

Cooling: Circulating air

Efficiency: 60%

Provides power for military magnetic tape recorders which are used in military programs — for ship, ground and aircraft applications.



AIRBORNE POWER SUPPLY

P/N 2-11470

Input Power: +28 VDC per MIL-STD-704

Outputs	Reg.	Noise
+20VDC @ .69a	±5%	100mv
+12VDC @ .975a	±5%	100mv
+5VDC @ 11.28a	±5%	100mv
−14.7VDC @ 2.3a	±2%	100mv

Size: 7.63 x 5.6 x 1.69 (incl. mounting flanges)

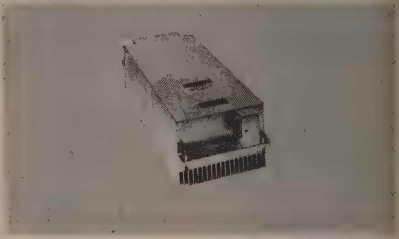
Weight: 4 pounds

Environment:
Temp: −65°F to +212°F
Altitude: 0.506 to 15.5 psia
Acceleration: ±10g's, all aids
Vibration: MIL-E-5400, Curve IV
Shock: MIL-T-5422, 30g's
Explosive Atmosphere: MIL-E-5400
Humidity: MIL-T-5422, Para. 4.4
Salt Spray: MIL-T-5422, Para. 4.5
Sand & Dust: MIL-T-5422, Para. 4.7
Fungus: MIL-T-5422, Para. 4.8

Cooling: Conduction through mounting flanges

EMI: MIL-STD-461A (CE01, CE03, RS02, RS03, RE02, CS01, CS02)

MTBF: 27,000 hours



SHIPBOARD SWITCHING POWER SUPPLY

P/N 2-12090-01

Input Power: 115VAC, 60Hz 3ϕ per MIL-STD-1399, Sec. 103, Type I

Outputs	Reg.	Noise
+5.15VDC @ 1.5a	±1%	100mv
−5VDC @ 1.5a	±1%	100mv
+12VDC @ 1a	±1%	60mv
−12VDC @ 0.3a	±1%	60mv
+15VDC @ 7a	±0.5%	40mv
−15VDC @ 2a	±0.5%	75mv
+55VDC @ 0.1a	±0.1%	55mv

Size: 14 x 6 x 2.89 inches

Weight: 15 pounds

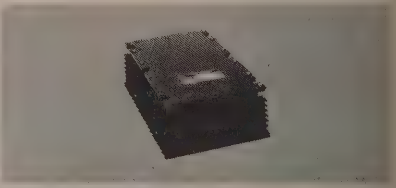
Environment:
Temp: 0 to +75°C
Humidity: to 95%
Fungus: Per MIL-STD-16400
Vibration: MIL-STD-167
Shock: 75g's

Cooling: Convection

Efficiency: 56%

EMI: MIL-STD-461 Notice I

MTBF: 35.000 hours



SHIPBOARD POWER SUPPLY

P/N 2-10500

Input Power: 115VAC, 400Hz, 3ϕ per MIL-STD-761 Type I Power

Output	Reg.	Noise
5VDC @ 15a	±2%	28mv

Size: 9.9 x 6 x 3 inches

Weight: 14 pounds

Environment:
Temp: −40°C to +80°C
Humidity: 0 to 95%
Shock: MIL-S-901 Grade A Class I
Vibration: MIL-STD-740
Noise: MIL-STD-740

Cooling: Combination convection & cold plate

Efficiency: 45%

EMI: MIL-STD-461

MTBF: 70,000 hours

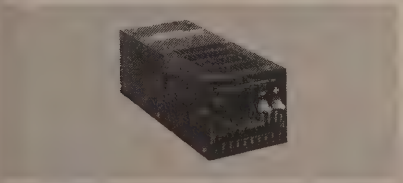
INDUSTRIAL — COMPUTER GRADE — MARINE APPLICATIONS



SINGLE OUTPUT SWITCHING POWER SUPPLY

Input Power: 115/230VAC, 47-63 Hz, 1 φ

Output Power: 5, 12, 15, 18, 24, & 28VDC
(Mainframe output 375 watts)

Size: 12 x 5 x 4.18 inches

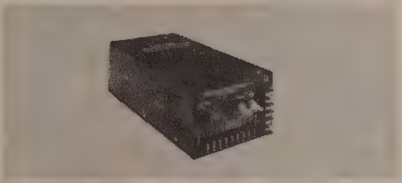
Weight: 8.5 pounds

Environment:
Temp: −10°C to +60°C (No derating)
Vibration: MIL-STD-167 Type I
Shock: MIL-STD-202, Method 213, Cond. A
Non-corrosive construction

Cooling: Internal blower

Efficiency: To 83%

MTBF: Greater than 40,000 hours
Listed under UL-478



DUAL OUTPUT SWITCHING POWER SUPPLY

Input Power: 115/230VAC, 47-63 Hz, 1 φ

Output Power: 5, 12, 15, 18, 24, & 28VDC
(Mainframe output 375 watts)

Size: 12 x 6.12 x 4.18 inches

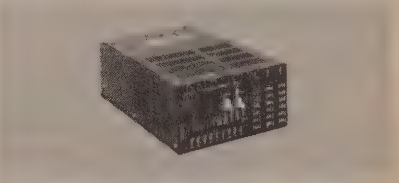
Weight: 10 pounds

Environment:
Temp: −10°C to +60°C (No derating)
Vibration: MIL-STD-167 Type I
Shock: MIL-STD-202, Method 213, Cond. A
Non-corrosive construction

Cooling: Internal blower

Efficiency: To 70%+

MTBF: Greater than 40,000 hours
Listed under UL-478



TRIPLE OR QUAD OUTPUT SWITCHING POWER SUPPLY

Input Power: 115/230VAC. 47-63 Hz, 1 φ

Output Power: 5, 12, 15, 18, 24, & 28VDC
(Mainframe output 375 watts)

Size: 12 x 8.12 x 4.18 inches

Weight: 11.7 pounds

Environment:
Temp: −10°C to +60°C (No derating)
Vibration: MIL-STD-167 Type I
Shock: MIL-STD-202, Method 213, Cond. A
Non-corrosive construction

Cooling: Internal blower

Efficiency: To 70%+

MTBF: Greater than 40,000 hours
Listed under UL-478

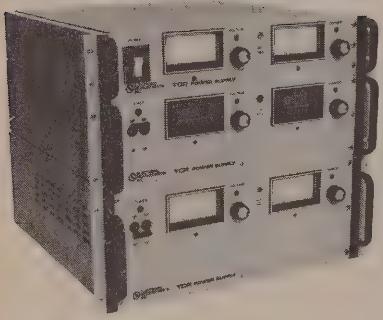
SCR-REGULATED DC POWER SUPPLIES

TCR SERIES SINGLE-PHASE MODELS



MAJOR SPECIFICATIONS

AC input voltage:
105-130V, 47-63 Hz (600, 1000 and 1800W Models)
190-253V, 47-63 Hz (2800W Model) 190-253V
Input options available on 600, 1000 and 1800W Models.

DC output:
Zero to value shown in model designation (volts-phase-amps. See chart.) Regulation 0.1%.

Options:
Over voltage protection $75 (600-1000W units); $95 (1800W unit); $110 (2800W unit); 190-253 volt input (600 and 1000W units) $40; (1800W units) $60. Digital panel meters available at no additional cost.

Sizes:
600 and 1000 watt: 3½″ High, 19″ rack by 18½″ Deep
1800 watt: 5¼″ High, 19″ rack by 18½″ Deep
2800 watt: 7″ High, 10″ rack by 18½″ Deep

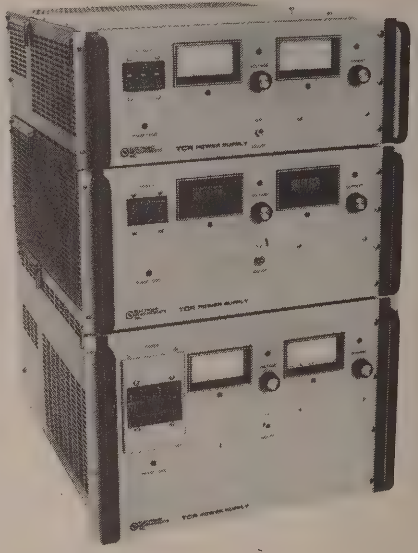
TCR SERIES THREE-PHASE MODELS



MAJOR SPECIFICATIONS

AC input voltage:
188-242 VAC 3φ 50/60 Hz Standard. Optional nominal inputs 200V, 380V, 415V 440/460/480.

DC output:
Zero to value shown in model designation (volts-phase-amps). See chart. Regulation 0.1%.

Options:
Over voltage protection $190. Optional inputs $200 except 380V, no charge. Digital panel meters available at no additional cost.

Sizes:
2.5 KW: 7″ High, 19″ rack by 23.25 (includes output terminal)
5.0 KW: 8.75″ High, 19″ rack by 23.25 (includes output terminal)
10.0 KW: 12.25″ High, 19″ rack by 24.25 (includes output terminal)

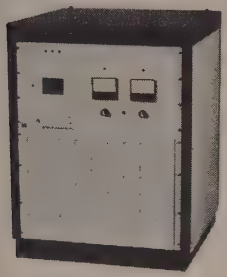
EMHP SERIES THREE-PHASE MODELS 20, 30, 60 KILOWATTS



APPLICATIONS

- Electromagnets
- Magnetic beam bending
- Cryogenic magnets
- Precision electroplating
- DC motor power
- Large relay systems
- Inverter power source
- High energy electronic systems
- Electrochemical processes
- High-power illumination systems
- Thermodynamic and thermonuclear research
- Battery charging
- Industrial DC power

FEATURES

- Low cost
- Quick delivery time
- High efficiency
- High performance

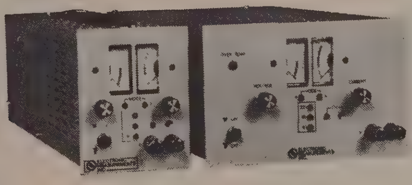
ATR SERIES LINEAR POWER SUPPLIES



ATR-100

ATR-250

FEATURES:

ATR-100 and ATR-250 are 100 and 250 watt, wide range, linear, DC power supplies. Through a unique switching circuit these units produce essentially a constant power output capability at 8V, 18V and 32V outputs so that as the output voltage requirement is lower the available current output is higher. The units are fully metered, programmable and have a self contained OVP circuit.

MAJOR SPECIFICATIONS

AC Input: 105-125V, 47-63 Hz (Optional inputs)

DC Output:	**ATR-100**	**ATR-250**
	0-8V, 0-10A	0-8V, 0-25A
	0-18V, 0-5A	0-18V, 0-13A
	0-32V, 0-3A	0-32V, 0-7A

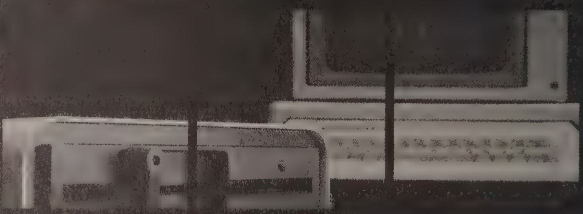
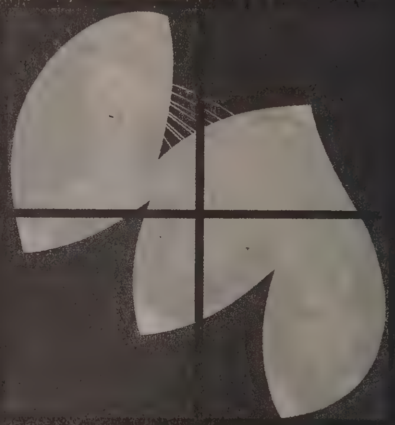
SERVICING YOUR POWER SUPPLY APPLICATIONS WITH A "FREEDOM OF CHOICE"

MASS SERIES



ELPAC



For over 25 years, Elpac has been following the fast-paced technical innovations of the electronic industry by providing components to fit those needs. By constantly evaluating the directions of the marketplace, Elpac has established a wide variety of standard power supplies to fit a multitude of applications, giving the design engineer a "Freedom of Choice."

Elpac services your applications with 98% on-time delivery through over 250 distributor locations internationally.

Marshall Industries • Newark Electronics
Sager Electronics • R.M. Electronics
Plus other regional distributors!

To learn more about Elpac's expanding product line or for application assistance call today! (714) 979-4440.

WM SERIES
LOW POWER MULTIPLE OUTPUT WALL MOUNT LINEAR POWER SUPPLIES

FEATURES

- Compatible with Microprocessor Requirements
- UL 1310 Listed
- Includes 6-foot DC output Cable
- 20 Millivolts (max) Output Ripple
- Din Type Output Connector (optional panel mount or PCB mount)

PART NO.	OUTPUTS

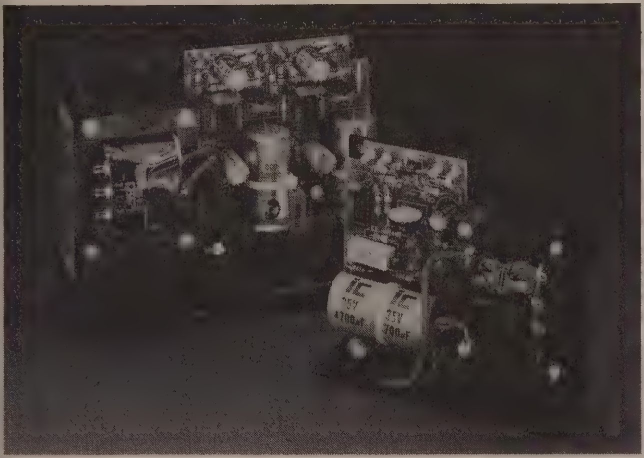
BFS SERIES UNREGULATED POWER SUPPLIES



FEATURES

- Isolated Outputs for Positive or Negative Operation
- Full Rated Output from 0 to + 55 C
- Standard BFS has 104-125 VAC/47-440 Hz Input
- New Universal BFS Series has 100/110/120/200/220/230 & 240 VAC Inputs
- All have an Electrostatically Shielded Transformer

SINGLE OUTPUT (FOR THE UNIVERSAL BFS ADD U TO THE PART NUMBER)

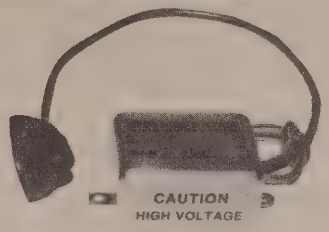
EMCO High Voltage Co.

POWER SUPPLIES CUSTOM / STANDARD

MINIATURE C.R.T. 12,000 VOLTS

$45.00

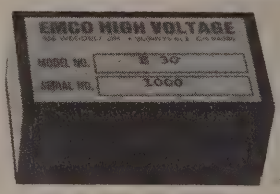


HIGH VOLTAGE OUTPUT: +12.000 Volts DC @ 50 UA
OUTPUT NO. 2: +400 Volts @ 500UA (±10%)
OUTPUT NO. 3: −100 Volts @ 500UA (±10%)
REGULATION: Output Tracks Input Voltage (5% @ 5UA)
RIPPLE: 0.05% CL=500PF
INPUT VOLTAGE: +15 Volts DC
SIZE 1.25" X 2.0" X 2.5"
* OTHER INPUTS AND OUTPUTS ARE AVAILABLE

MODEL 350

P.C. MOUNT DC/DC CONVERTERS

$33.00



INPUT VOLTAGE: 4 thru 12 Volts DC
OUTPUT VOLTAGE: 500 thru 1.500 Volts DC @ 2MA
RIPPLE: .05% PK to PK
REGULATION: Output Proportional to Input
* PLUS and MINUS INUPT/OUTPUT
* INPUT/OUTPUT ISOLATION: 3.500 Volts
* RFI FILTERING
* SHORT CIRCUIT PROTECTION
* FLOATING INPUT/OUTPUT
SIZE: 2.5" X 1.5" X .85"

MODEL E15

PRECISION COLOR CRT

$125.00

HIGH VOLTAGE OUTPUT: +25.000 Volts DC @ 1.5MA
Adjustment Range: ±300 Volts
REGULATION: Line — .05%
Load — (Static) 0.1%
Load — (Dynamic) 0.1%/100UA
RIPPLE: 0.1% (P-P) CL=1000PF
TEMP. COEFFICIENT: 200 PPM/°C
FOCUS VOLTAGE: Adjustable from 22% to 36% of Anode Voltage @ ±20UA
G1 VOLTAGE: Fixed — 120 Volts DC ±10% @ 1MA
G2 VOLTAGE: Adjustable from 0 to 750 Volts DC ±10% @ ±20UA
INPUT VOLTAGE: +28 Volts DC ±10%
SIZE: 5.1" X 4.2" X 1.7"
* SHORT CIRCUIT PROTECTION
* ARC OVER AND OVER VOLTAGE PROTECTED
* EXCELLENT DYNAMIC RESPONSE AND STABLE PERFORMANCE

MODEL EHV

REGULATED 18,000 VOLTS

$59.00

HIGH VOLTAGE

OUTPUT VOLTAGE: +18.000 Volts DC @ 500UA
(Adjustable ±5%)
REGULATION: Line — .05%
Load (Static) — .05%
Load (Dynamic) — 5 Volts @ 100UA
RIPPLE: .05% (P-P) CL=1000PF
OUTPUT NO. 2: +1.000 Volts DC @ 1MA
OUTPUT NO. 3: −100 Volts DC @ 5MA
INPUT VOLTAGE: +24 Volts DC
INPUT REGULATION: .005%
SIZE: 4.2" X 3.1" X 1.2"
* OVERVOLTAGE PROTECTION
* SHUTDOWN CONTROL CIRCUIT
* FULLY ENCAPSULATED

MODEL EHT

APPLICATIONS

X-Ray
Photomultiplier
Video
Computer
Capacitor Charging
Electronic Accelerator
Sem-ion Sources
Image Intensifiers
Cad/Cam
Shadow Mask
CRT
Laser
Medical
Airborne Navigation
Marine Navigation
Military Equipment
Energy Storage

CAPABILITIES

OUTPUTS: +5 Volts thru +30,000 Volts DC

CURRENT: Up to 10 AMPS

INPUTS: +5 to +40 Volts DC
110/220 Volts AC 50-400 HZ

REGULATION, RIPPLE & NOISE: .001%

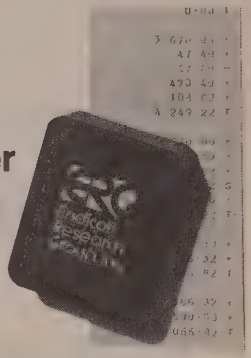
E500 Series
Made in U.S.A.

ERG converter savings add up!



Ideal for any end-use where up to 25W is needed from battery or other low-voltage source. No reason to design "special" multiple output power supplies for your unique application! Mount up to 4.2W per cu. in. on your P.C. board. Operating efficiencies to 85%. For as little as $1/W! We'll **transform** the way you look at DC-DC conversion!

- Adapts single output on main DC switched mode power supply into additional outputs as needed–no more than you need, no less than you want.
- Eliminates extensive bussing of alternate voltages throughout main frame of the end-product.
- Easily added on to existing designs when new capabilities and new voltage needs are anticipated.
- You don't pay for regulation when you don't need it.
- The **flexibility** of custom with the **economy** of standard.

Match our converter to your power need

Your Power Requirements	ERG Converter Series	Options	Input	Output†	Size	Weight	Package
Up to 3W	E700	Single, center tap (± voltages) Unregulated, regulated (single output only)	5,9,12,15 V DC standard (to 48 available)	5-1000 V DC (your choice)	unregulated: 1.1" (27.94 mm) × 1.2" (30.48 mm) × .91" (23.11 mm) high regulated: 1.43" (36.32 mm) × 1.50" (38.10 mm) × 1.03" (26.16 mm) high	30 gms. unregulated 40 gms. regulated	Plastic
	E500*	Single, center tap (± voltages)	5,9,12,15 V DC standard (to 48 available)	5-500 V DC (your choice)	1.00" (25.40 mm) × 1.38" (35.05 mm) × 0.70" (17.78 mm) high	20 gms.	Plastic
Up to 6W	E1600	Center tap (± voltages) available	5,9,12,15 V DC standard (to 48 available)	5-500 V DC (your choice)	1.30" (33.02 mm) × 1.88" (47.75 mm) × .82" (20.83 mm) high	44 gms.	Plastic
Up to 12W	E900	Dual output	5,12,15 V DC standard (to 48 available)	5-500 V DC (your choice)	2" (50.80 mm) × 2.5" (63.50 mm) × .95" (24.13 mm) high	122 gms.	Aluminum
Up to 25W	E1200	Single output only	12,15 V DC standard (others available)	5-500 V DC (your choice)	2" (50.80 mm) × 2.5" (63.50 mm) × 1.19" (30.23 mm)	185 gms.	Aluminum

*For high-volume requirements, E500 delivers same performance as E700 at significantly lower unit cost!
Mounting: P.C. board standard
Encapsulation: All ERG converters are fully encapsulated
Isolation (in/out): 600V RMS (60 Hz. breakdown for 1 min.) standard
Temperature: 0–70° C. standard. Wider ranges available. 85° C. case max. 25° C. temp. rise typical for E1200
†Output power may be derated up to 50%, dependent on output voltage, output current and temperature.
All specifications subject to change without notice.

EPSCO

REGULATED & SEMI-REGULATED POWER SUPPLIES

Ruggedly-constructed, low voltage D.C. power supplies for use in design, development, testing of transistor circuitry . . . for servicing and operating auto, aircraft, marine-craft radio, electronic equipment . . . for production line testing, industrial and educational laboratory work and many other applications.

Precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, AC ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty.

INPUT—*Regulated Models:* 105-125 V. AC. 60 Hz *Industrial and General Purpose Models:* 117 V. AC 60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specs.

INVERTER — Transistorized. Converts 12 V. DC to 117 V. AC, 60 Hz to operate equipment from car, truck or boat battery, or other 12 V. DC source for camping, traveling, boating. Reverse polarity and short circuit protection.

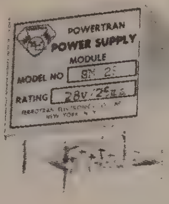
SMF-400, SMF-500 } 3″x1¼″x1½″ SMF-750, SMF-1000 } 2⅜″x1¹⁵⁄₁₆″x1⅞″

This series also available with a 220VAC input case: 3″ x 1¼″ x 1½″. Add $10 to prices shown above. Order as SML-5-2, SML-6-2, etc.

Available with printed circuit pins. Order as SML-5-PC, SML-6-PC, etc. No additional charge.

SM SERIES



SM-28
$55

Case; 1⅝″ x 1⅞″ x 1⅝″; Mounts on a chassis with 4 ea. 6-32 studs. ⅝″ diam. connector in cover. 4 pin connector. Input volts — 115VAC.

Specifications and prices are the same as for SML and SMF units. i.e.; SM-28 corresponds to SML-28; price $55.; only difference is case style.

NEW!!

SMR — DUAL OUTPUT

Same case style as SMR units but with 2 ea. isolated outputs which are floating; input volts — 115VAC.

Model	D.C. Volts	D.C. Current	% Reg.	% Rip.	Price

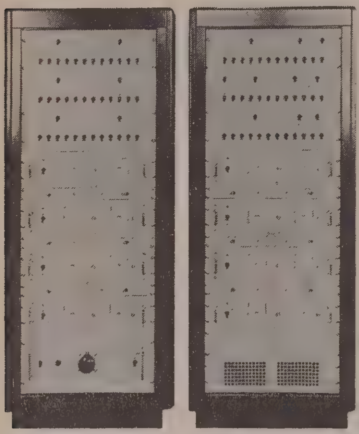
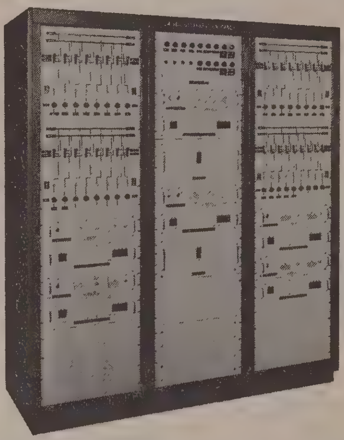
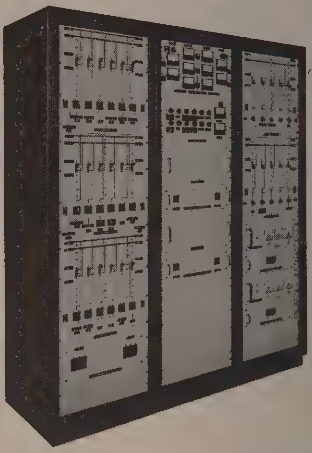
Custom Power Supplies and Systems



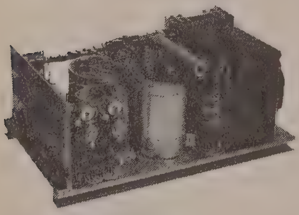
Regulated, no-break, redundant power distribution system with battery back-up for petroleum processing industry.



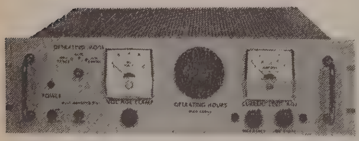
Double redundant regulated DC power distribution system for process industry. Features no break transfer and battery backup.



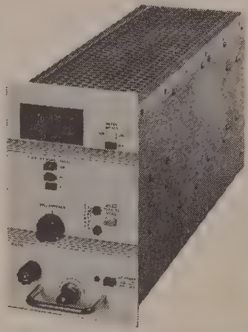
Redundant regulated DC & AC power system used for process control in oil refining complex.



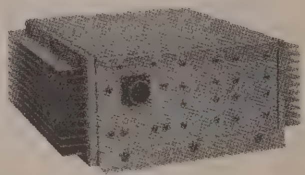
Regulated multi-output power supply for computer.



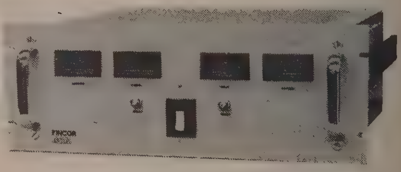
Automatic constant current battery charger with automatic range selection based on battery temperature and voltage level.



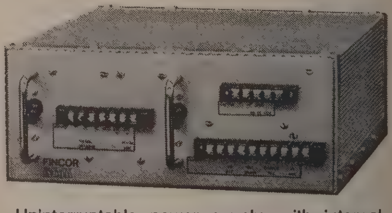
Zero-1200 volt, 200 milliampere constant current power supply for semi-conductor testing and burn-in.



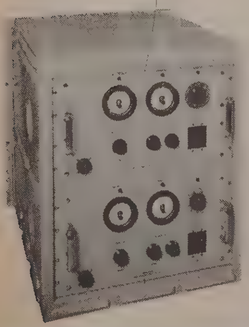
Mil Spec 4 output regulated power supply.



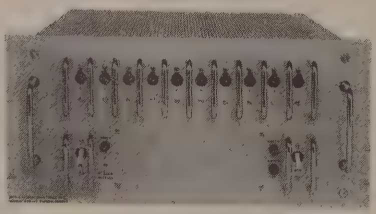
Two-channel linear regulated power supply for semi-conductor testing and burn-in.



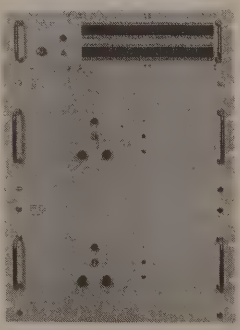
Uninterruptable power supply, with internal battery charger, used for avionics instrumentation.



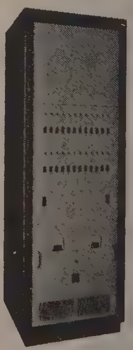
High power, 150-Volt, constant current/constant voltage, shipboard-qualified power supply.



Regulated no-break, redundant 24-volt dc, 15-ampere, 10-channel power distribution system for television studios.



Regulated no-break, redundant power distribution system for military application.



Regulated dc distribution system for computer controlled petroleum processing unit.

NOTE: Not pictured are these special devices: (a) Power supply for CW lasers; (b) Redundant power systems for military telephone communications systems; (c) Xenon lamp power supplies; (d) True RMS regulated ac power supplies; and (e) High current dc power supply for automotive production line testing.

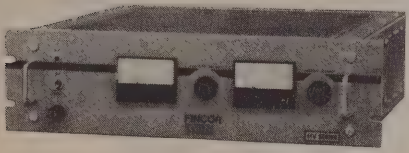
HV Constant High Voltage Supplies

FEATURES
- All Solid State
- Adjustable Current Limit
- < 1 Millivolt Ripple
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing

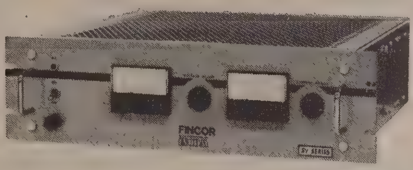


APPLICATION
The HV is a versatile series of constant voltage units adjustable from zero to full rated voltage. Adjustable solid state current limiting is a feature. Options provide for either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		Regulation		Size	Price
	Volts	Amps	Line %	Load %		
HV 350-1	0-350	1	0.005	0.01	3½ x 19 x 16½	$2225.
HV 350-2	0-350	2	0.005	0.01	5¼ x 19 x 16½	2650.
HV 350-3	0-350	3	0.005	0.01	7 x 19 x 16½	2970.
HV 350-5	0-350	5	0.005	0.01	7 x 19 x 16½	3390.

SV Constant High Voltage Power Supplies

FEATURES
- All Solid State
- Adjustable Current Limit
- 1 Millivolt Ripple
- 0.01% Regulation
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing
- Meters

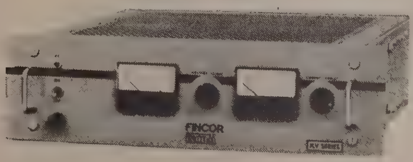


APPLICATION
The SV is a versatile series of constant voltage units adjustable from 0 to full rated voltage. Options provide either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		RMS Ripple	Regulation		Size	Price
	Volts	Amps		Line %	Load %		
SV 600-0.5	0-600	0-0.5	<3mv	0.01	0.01	3½ x 19 x 16½	$2600.
SV 600-1	0-600	0-1	<3mv	0.01	0.01	5¼ x 19 16½	3150.
SV 600-2	0-600	0-2	<3mv	0.01	0.01	7 x 19 x 16½	3950.

KV1000 High Voltage Power Supplies

FEATURES
- Output 100 to 1000 VDC
- Voltage Regulated 0.5%
- Current Regulated 0.5%
- Voltmeter and Ammeter
- Ripple 0.5% RMS



APPLICATION
The KV1000 Series of Power Supplies are constant voltage/constant current units with automatic crossover. Models are available with up to 2 ampere current capacity over the full voltage range. Options such as remote voltage and current programming, remote turn on and turn off make the unit a versatile piece of equipment for laboratory or manufacturing operations.

Model Number	Output		Regulation		Panel Height	Price
	Volts	Amps	Current %	Volts %		
KV 1000-0.5	100-1000	0-0.5	0.5	0.5	5¼″	$2545.
KV 1000-1	100-1000	0-1	0.5	0.5	7″	3150.
KV 1000-2	100-1000	0-2	0.5	0.5	10½″	5400.

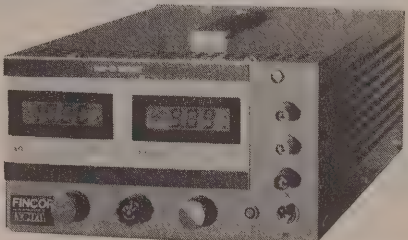
HWD Constant Voltage/Constant Current Supplies

FEATURES

- Digital Ammeter/Voltmeter
- Remotely Programmable
- Remote Sensing
- Series and Parallel Operation
- 500 µ Volts Ripple
- .01% Load Regulation
- .01% Line Regulation
- Separate Voltmeter and Ammeter
- Models to 200 Volts
- Half Rack Size or Bench Mounting



APPLICATION

The HWD Series power supplies are designed to be used in the lab bench or for system application. The use of digital meters provides accurate readings of output voltage and current without the need of external DVM'S.

Model Number	Output		Regulation				Price
	Volts	Amps	Line % CV	Line % CC	Load % CV	Load % CC	
HWD 6-20A	0-6	0-20	0.01	0.1	0.01 or 1 mv	0.5	$825.

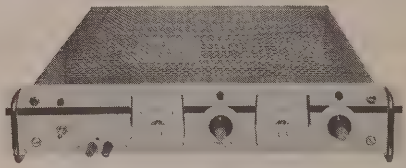
PR Constant Voltage/Current Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- All Silicon Semiconductors
- Mode Lites
- Low Ripple
- .01% Regulation
- Constant Voltage/Constant Current
- Parallel Operation



APPLICATION

The PR Series find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. Both 3½" 5 ¼" models are available. The voltage to current crossover point may be set anywhere within the limits of zero to full rated output voltage and zero to full rated output current.

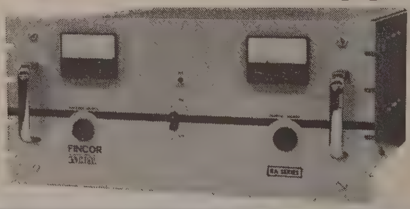
RA Constant Voltage Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- Low Ripple
- Parallel Operation
- .01% Regulation
- All Silicon Semiconductors



APPLICATION

The RA Series are all silicon, relatively high in power, and tightly regulated. They find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. Adjustable solid state current limiting provides load protection.

Model Number	Output		Regulation		Panel Ht.	Price

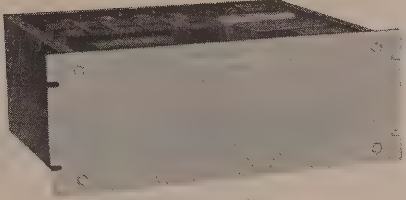
MS High Power System Component Power Supplies

FEATURES

- Most Complete Coverage
  - Up to 600 Volts
  - Up to 1200 Amperes
  - 139 Standard Models
- Low Cost
- All Solid State
- Extreme Reliability
- 10 Year Guarantee



APPLICATION

Strictly designed for incorporation into systems, these supplies are considered as components. They are of exceptionally high reliability; yield the highest power at lowest cost; and provide complete coverage of all possible needs.

NOTE: The digits of the Model Number indicate the output voltage and current in amps. Example: MS9-600 has an output of 9 volts, current of 600 amps. MS9-1200 has an output of 9 volts at 1200 amps. **Consult factory for prices.**

SM High Power Switching Supplies

FEATURES

- Soft-Start • No Parallel Transistors
- 1.8 Watts/Cu. In.
- Overvoltage Protection
- Current Limit • Remote Shut Down
- Over Temperature Protection
- 47-400 Hz AC Input
- Convection Cooled
- Fully Enclosed
- −20° to +50°C Ambient
- Low Profile • Lightweight

APPLICATION

SMs are fully enclosed, convection cooled designs providing 300 or 600 watts of output power. With power densities of 1.8 watts/cubic inch, SMs are attractive for 400 Hz AC input applications. Standard units are available with single outputs from 5 to 15 volts.

Model	Nominal Output Voltage	Output Adjustment Min.	Output Adjustment Max.	Output Current	Price
SM 5-120	5	4.5	5.5	120	$675.
SM 6-100	6	5.4	6.6	100	675.
SM 12-50	12	10.8	13.2	50	675.
SM 15-40	15	13.5	16.5	40	675.

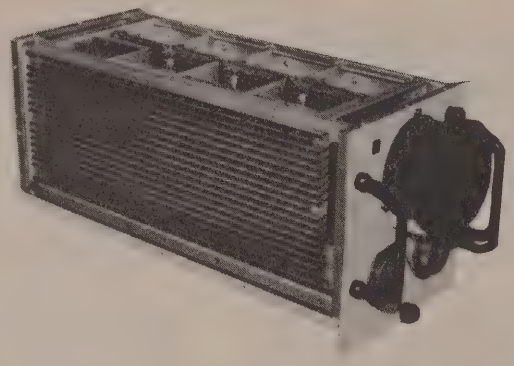
Model	Nominal Output Voltage	Output Adjustment Min.	Output Adjustment Max.	Output Current	Price
SM 5-60	5	4.5	5.5	60	$475.
SM 6-50	6	5.4	6.6	50	475.
SM 12-25	12	10.8	13.2	25	475.
SM 15-20	15	13.5	16.5	20	475.

MILITARY

AIRBORNE

HELIONETICS, INC.

21 Output Aircraft DC Power Supply



MODEL 61188: Designed for use on military aircraft for multi-output power supply applications.

- MEETS MIL-E-5400, CLASS-I
- QA: MIL-STD-9858A
- EMI: MIL-STD-461
- RELIABILITY: MIL-HDBK-217
- EFFICIENCY: 80%
- OVERVOLTAGE/CURRENT PROTECTION
- MODULAR CONSTRUCTION FOR EASE OF SERVICE

INPUT
Voltage: 200 VAC, 3-Phase
Frequency: 400 Hz per MIL-STD-704

21 OUTPUTS
7 Outputs: +28 VDC at 5 Amps
7 Outputs: +15 VDC at 3 Amps
7 Outputs: −15 VDC at 1 Amp
Voltage Regulation: ±0.59 VDC

TEMP. RANGE: −54°C to +55°C

SIZE: 7.6"W x 8.5"H x 20.25"D

WEIGHT: 45 lbs.

ALTITUDE: 50,000 ft.

Surveillance Aircraft Multi-Output DC Power Supply

Model 6117: Designed for use on the CP-140, the Canadian version of the Lockheed P3-A, this unit supplies power to an onboard computer.

INPUT
Voltage: 115/200 VAC; 3-Phase
Frequency: 400 Hz

OUTPUTS
Output 1: +5 VDC at 3 Amps
Output 2: +23 VDC at 3.7 Amps
Output 3: −23 VDC at 3.7 Amps
Regulation: ±2%
Ripple: ±1% for 102 VAC Input or Higher
Impedance: 0.02 Ohms; 0-12 kHz
Power Density: 3 Watts per Cubic Inch

TEMP RANGE: −54°C to +85°C

SIZE: 4.03"W x 2.29"H x 7.15"D

WEIGHT: 3.75 lbs.

ALTITUDE: 30,000 ft.

HIGH VOLTAGE POWER SUPPLIES MODULAR

SERIES MC

3 Models Covering the range of 50VDC to 3000VDC

ELECTRICAL CHARACTERISTICS:

Input Voltage:	1.75 to 12VDC
Input Current:	400mA
Output Voltage:	Proportional to Input (see table)
Output Current:	3 Watts maximum (see table)
Load Regulation:	5% (½ load to full load)
Ripple:	1% p-p (typical)
Insulation Strength:	3000V Input/Output

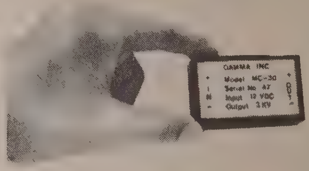
PHYSICAL CHARACTERISTICS:

Dimensions:	1.5″ x 2.5″ x 0.75″
Volume:	2.8 cu. in.
Weight:	4 oz.
Packaging:	Solid encapsulation
Terminations*:	4 P.C. Pins (.043 Dia holes)

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: −20°C to +60°C

MINIATURE HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE RANGE	OUTPUT CURRENT
MC-5	50VDC to 500VDC	6mA
MC-15	150VDC to 1500VDC	2mA
MC-30	300VDC to 3000VDC	1mA

SERIES RC

7 Models Covering the range of 0-3KV to 0-30KV at 10 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage:	+28VDC ±10%
Output Voltage:	Programmable from zero to maximum rated voltage from either an external 5K ohm potentiometer or a zero to +10 volt low voltage ground referenced source
Output Current:	10 Watts maximum
Line Regulation:	0.01% maximum
Load Regulation:	0.01% maximum
Ripple:	0.05% maximum
Temp. Coefficient:	0.01%/°C
Stability:	0.01%/8 hours
Monitor Outputs:	1) Voltage Monitor (Optional) 2) Current Monitor (Optional)
Programming:	
Method 1.	Resistance: External 5K ohm potentiometer
Method 2.	Voltage: Zero to +10 Volts

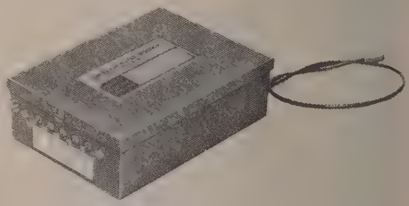
PHYSICAL CHARACTERISTICS:

Dimensions:	3½″ x 5⅛″ x 1¹³⁄₁₆″ (up to 15KV) 3¾″ x 6″ x 2¾″ (20 & 30KV)
Weight:	2½ lbs (up to 15KV) 3½ lbs (20 & 30KV)
Packaging:	Solid encapsulation, metal case with metal inserts in base
Input Connector:	Terminal strip.
Output Termination:	12″ flying lead

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

REGULATED DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
RC10-3	0-3KV	3.3mA
RC10-5	0-5KV	2.0mA
RC10-10	0-10KV	1.0mA
RC10-15	0-15KV	0.66mA
RC10-20	0-20KV	0.5mA
RC10-25	0-25KV	0.4mA
RC10-30	0-30KV	0.33mA

All units are available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired.

SERIES UC

7 Models Covering the range of 0-3KV to 0-30KV at 5 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage:	+24VDC ±10%
Input Current:	400mA maximum
Output Voltage:	Adjustable from zero to rated voltage by adjustment of DC input voltage
Output Current:	5 Watts maximum (see table)
Load Regulation:	20% maximum (½ load to full load)
Ripple:	0.1% per watt

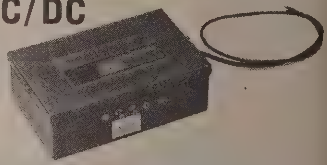
PHYSICAL CHARACTERISTICS:

Dimensions:	2¾″ x 4½″ x 1¾₁₆″
Weight:	1½ lbs.
Packaging:	Solid encapsulation, metal case with metal inserts in base
Terminations:	Two terminals for DC input. 12″ flying lead for H.V. output

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

PROPORTIONAL DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
UC5-3	0-3KV *	1.6mA
UC5-5	0-5KV *	1.0mA
UC5-10	0-10KV*	0.5mA
UC5-15	0-15KV	0.33mA
UC5-20	0-20KV	0.25mA
UC5-25	0-25KV	0.2mA
UC5-30	0-30KV	0.166mA

All Models available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired. * 3KV, 5KV and 10KV Models can be provided with reversible polarity (consult factory).

GAMMA HIGH VOLTAGE RESEARCH INC.

Designers/Manufacturers—High Voltage Power Supplies

152 SOUTH MacQUESTEN PKWY., MT. VERNON, NY 10550 • TEL. 914 667-5050

HIGH VOLTAGE POWER SUPPLIES REGULATED CONSTANT VOLTAGE CONSTANT CURRENT

SPECIFICATIONS

Input Voltage: 105-125V RMS at 5 Amps maximum (50 to 60Hz)

Output Voltage: Continuously adjustable from zero to maximum output voltage rating of power supply. See Model selection guide.

Voltage Regulation*: Line: Better than ±0.005% over specified input range.
Load: 0.005% for full load change

Current Regulation*: Line: Better than ±0.005% over specified input range.
Load: Better than 75µA for a 75% change in compliance voltage.

Ripple: 60 and 150 Watt units: 0.02%
300 Watt units: 0.05%

Temp. Coefficient*: 100ppm/°C over the range of 0 to 60°C

Stability*: 0.01%/hour. 0.03%/8 hours.

* For voltage range from 10% to 100% of rated output.

Controls:
1. Power (HV ON)
2. Output Voltage (10-turn potentiometer)
3. Output Current: (10-turn potentiometer)

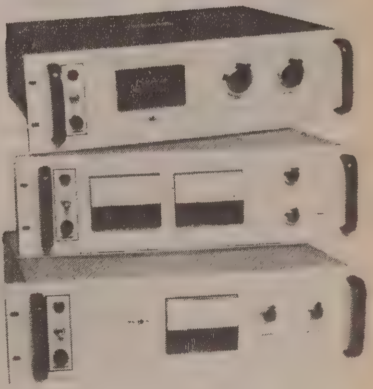
Indicators:
1. Power (HV ON)
2. Output Voltage (meter ±2% of full scale)
3. Output Current (meter ±2% of full scale)

Connectors:
1. High Voltage: All models are provided with 6 feet of shielded high voltage cable. The cables are fitted with bushings to mate with a re-entrant receptacle.
2. Input: 3-wire line cord
3. Low Voltage: Rear mounted barrier terminal block for:
   a) External Interlock
   b) Voltage Programming
   c) Current Programming
   d) V/I monitors

Size/Weight:

Fixed Polarity:		Reversible Polarity:	
Up to 60KV: 5¼″H x 16″D x 19″W	35 lbs.	Up to 40KV: 5¼″H x 16″D x 19″W	35 lbs.
80 and 100KV: 10½″H x 16″D x 19″W	75 lbs.	50 to 100 KV: 10½″H x 16″D x 19″W	75 lbs.

SERIES RR



FEATURES

LOW STORED ENERGY: The use of high frequency (>20KHz), high voltage power supply techniques allows stored energy to be minimized thus insuring maximum safety to operating personnel and sensitive loads.

PROGRAMMING OUTPUT VOLTAGE & OUTPUT CURRENT: This feature allows output voltage or output current to be remotely programmed from either an external voltage source or with external potentiometers from the internal reference voltage. A zero to +5V voltage source is required for full scale programming. Internal circuitry insures that the output voltage and output current cannot be externally programmed beyond the maximum settings of the front panel controls.

CONSTANT VOLTAGE/CONSTANT CURRENT WITH AUTOMATIC CROSSOVER: Dual control loops allow either voltage or current to be precisely regulated. Each parameter is controlled and limited by a ten-turn potentiometer on the front panel. The constant voltage/constant current automatic crossover feature allows the power supply to be used as a voltage regulated current limited system or as a current regulated voltage limited system. Thus, both output voltage and output current are totally under operator control under all load conditions, including overload and arc-over conditions.

OVERLOAD, ARC-OVER & SHORT CIRCUIT PROTECTION: Full protection against any overload condition is inherent in the constant voltage/constant current design concept. This is augmented by the liberal use of surge limiting resistors and reactive limiting.

VOLTAGE REGULATION: Line and load regulation is better than 0.005%.

CURRENT REGULATION: Current regulation is better than 75µA.

RIPPLE: At 150 watts ripple of 0.02%. At 300 watts ripple of 0.05%.

EFFICIENCY: Efficiency is typically greater than 75% at full load.

EXTERNAL POLARITY REVERSAL (Reversible Units Only): A reversing switch mechanism located at the rear of the power supply facilitates polarity reversal.

EXTERNAL INTERLOCK/OUTPUT INHIBIT: Circuitry is provided so that the user can, if desired, inhibit output voltage. External contact closure located on the rear terminal strip will enable the power supply. Open contacts will inhibit the power supply.

FLOATING GROUND: This feature allows the low end return of the power supply to be isolated with respect to chassis ground.

REMOTE OUTPUT VOLTAGE & CURRENT MONITORING: Voltage monitoring and true output current monitoring signals are provided at the rear terminal strip.

MODULAR CONSTRUCTION: Modular construction techniques are used throughout this design thus reducing downtime in critical applications.

OPTIONS

ZERO VOLTAGE START INTERLOCK (ZVS): To prevent accidental damage to loads, the output voltage control must be set to zero before the high voltage can be applied.

VARIABLE OVERVOLTAGE PROTECTION (VOV): This option causes the power supply to shut down when the output voltage exceeds the setting of the overvoltage control potentiometer located at the rear of the power supply (adjustable from 20% to 110% of maximum rated output voltage.)

VARIABLE OVERLOAD TRIPOUT (VOL): This opion causes the power supply to shut down when the output current equals the setting of the front panel current control (adjustable from 20% to 110% of maximum output current of the power supply.)

DIGITAL PANEL METER: SINGLE METER (SDPM) — TWO METERS (DDPM): A single 3½ digit meter reading both voltage and current is available. This meter replaces the two analog meters normally provided. Two 3½ digit meters can also be provided in place of the two analog meters normally provided.

SLOW START (SS): The slow start option enables the output voltage of the power supply to ramp to its maximum output voltage setting at a linear rate. This rate can be factory set from one to fifteen seconds.

SLAVED BI-POLAR OPERATION (SBP): Any two power supplies of the same voltage rating may be operated as a Bi-Polar pair. One power supply acting as the master controller will control both power supplies from zero to maximum rated output voltage. The output voltages of both power supplies will track each other within 2% from 10% to maximum rated output voltage. Each power supply is also capable of operating independently.

PARALLEL OPERATION (PO): Any two supplies of the same voltage rating, current rating and polarity may be paralleled. The supplies may also be operated independently.

AUXILIARY OUTPUT/FOCUS TAP (FT): This option provides an independent auxiliary output which is variable from zero to maximum rated voltage up to 15KV at 300µA maximum. Control is achieved via front panel mounted potentiometer. For other voltages and power levels consult factory. Multiple auxiliary outputs are also available. Consult factory.

REMOTE CONTROL PANEL (RCP): Any standard model can be supplied with a control panel remote from the basic power supply. 20 feet of appropriately shielded interconnection is provided. This remote control panel replaces the front panel normally provided on standard units.

220 VOLT INPUT — 50/60 Hz (220): 220 volt, 50-60 Hz input is available.

BENCH CABINET (BC): A deluxe style cabinet is available for all models.

ORDERING INFORMATION: ADD LETTERS IN PARENTHESIS AS SUFFIX TO MODEL NUMBER.

Lightweight, Compact, Air-insulated, High Voltage DC Power Supplies. Hundreds of Standard Models from 0-5KV @ 1 Watt to 0-400KV @ 5000 Watts

Advantages of "RF" Based Designs

High voltage regulated DC power supplies which utilize circuit designs based on radio frequency (RF) high voltage generators have several significant advantages over power supplies based on line frequency operation. These include simplicity of regulating circuitry, greater efficiency and economy, reduced packaging size and weight, and most importantly, lower amounts of stored energy.

Stored Energy

Simply put, in an RF design, for a given ripple requirement, the amount of capacitance required is on the order of 1/500 of that required for the same ripple in a 60 cycle power supply. This is derived from the fact that ripple is inversely proportional to generator frequency; in Glassman Power Supplies, the 30K Hz operating frequency is approximately 500 times line frequency. Since stored energy is directly proportional to capacitance, it follows that the stored energy in Glassman Supplies (with the same ripple factor as a 60 cycle supply) is less by a factor of 500. This ratio of stored energy is huge, resulting in significant reduction of hazardous conditions for personnel and equipment.

Regulation

The high frequency of the RF supply simplifies the closed loop regulator design, and response time in the order of 1 millisecond is relatively easy to achieve when compared to servo regulators and/or phase controlled SCR primary regulators. The degree of regulation and speed of response is considerably better in the RF supplies than in line frequency based regulator circuits.

Efficiency, Size, and Weight

Only the series regulator is capable of achieving comparable regulation characteristics to the RF designs. These circuits, however, are notoriously inefficient. In regard to weight and size, we have already pointed out how filter capacitors are much smaller at the higher frequencies of the RF design. The same applies to inductive elements such as the high voltage transformer. Lighter, smaller components reflect in reduced package size and, obviously more economical equipment.

Typical Specifications

Voltage Regulation: Load, better than 0.005% for full load variation; line better than ±0.005% over specified input range.**

Current Regulation: Load, better than 100 microamperes from short circuit to rated voltage at any load condition. Line, better than ±0.005% over specified input range.**

Ripple: 0.1% rms of rated voltage at full load. Ripple voltage is proportional to load current and decreases linearly to 0.01% rms of rated voltage at no load.**

Stability: 0.01% per hour after ½-hour warm-up. 0.05% per 8 hours.**

Temperature Coefficient: 0.01%/°C.*

Ambient Temperature: −20°C to +60°C, operating; −40°C to +85°C, storage.

Protection: Automatic current regulation protects power supply against all overload conditions, including arcs and short circuits.

* Some specifications vary on particular models. Check factory or individual product data sheet.
** Or ±1 volt, whichever is greater.

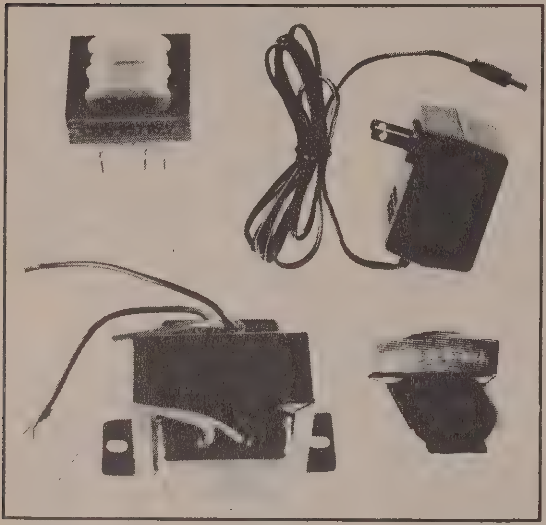
GPE

YOUR O.E.M. SUPPLIER SOURCE for Electronic Power Components.

- POWER TRANSFORMERS
- AC / DC ADAPTORS
- LINEAR Wall Mount or Desk Top POWER SUPPLIES
- SWITCHING POWER SUPPLIES 20 Watt to 200 Watt.



• POWER TRANSFORMERS

- Meets UL (UL 1411, 506), CSA and International Standards.
- Sizes up to 500 VA.
- PC Mount, Split Bobbin design.

• AC/DC ADAPTORS

- Single or Multiple Outputs
- Meets UL 1310 & CSA Standards.

• LINEAR Wall Mount POWER SUPPLIES

- Meets UL 1012.
- Regulated Multiple Outputs.
- Microprocessor Compatible
- Shielded DC Output Cable.
- DESKTOP version available.

• SWITCHING POWER SUPPLIES

- 20 Watt to 200 Watt.
- 115V/220V Inputs selectable.
- Input surge protected.
- Over-Voltage, Short Circuit protected.
- Typical Efficiency 70% minimum.
- 0° - 50° C Non-derated operation.
- Meet UL & CSA Safety Standards.
- Comply with FCC Part 15, Subpart J, Class B.

Series 04, 06, 07 models available for OEM application design evaluation.

Custom Design to O.E.M. Specifications.

VDE type Flyback Switchers

These 50 to 130 watt Flyback Switchers use fewer parts than conventional switching power supplies. This means smaller, lighter, less costly supplies per watt. All GFC/Hammond Flyback Switchers are designed to meet UL478, CSA 22.2 No. 154, VDE 0804 0806 0871, IEC 380, and FCC 20780 sub. J class A. for highest reliability.

Features

- Molex type quick disconnect connectors.
- Minimum 25kHZ switching frequency.
- PCB mount
- Separate AC and DC terminals.
- 2 year Warranty.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

The Choice in DC Power Supplies

- *Low-Cost Lab Supplies*
- *General Purpose Lab & System Supplies*
- *Autoranging Power Supplies*
- *High-Power, High-Efficiency Supplies*
- *OEM Modular Power Supplies*
- *Custom Power Systems*
- *Bipolar Power Supply/Amplifiers*
- *Precision Voltage & Current Sources*
- *High Voltage Power Supplies*
- *Power Supply Programmers*
- *Digitally Controlled Power Sources*
- *Multiprogrammers*
- *HP-IB (IEEE 488) System Power Supplies*

Power Supplies for the Lab or System

Hewlett-Packard power supplies are available in many types, sizes, and ratings. You can choose from bench-type supplies for circuit testing and development, modular supplies to power systems, high-power supplies used in industrial processes, and many special purpose supplies ranging from bipolar power supply/amplifiers to digital power sources. Most are covered briefly in this short-form listing and in much greater detail in the 128-page DC Power Supply Catalog which can be obtained free of cost from your local HP Field Engineer.

In selecting the best power supply for a given job, one usually looks to satisfy all the physical and electrical criteria first: voltage and current ratings, performance specifications, size, and operating features. However, there are other less tangible factors which affect the usability and long-range performance of a power supply. Reliability, for example, is closely related to design thoroughness and the use of quality parts. Service assistance in the form of helpful advice, excellent operating and service manuals, and worldwide availability of spare parts can help return a failed instrument to service in a minimum of time. These factors do not appear on a data sheet, but are closely related to a company's capability and responsibility towards its customers. When you purchase a power supply from Hewlett-Packard, you receive guaranteed product performance plus all the intangibles that add up to long-term value — and it usually costs no more.

Ordering Information

Although Hewlett-Packard products are manufactured throughout the world, the Hewlett-Packard field office or distributor in your area is best equipped to handle all your needs concerning products described in this catalog, and for parts and service on Hewlett-Packard products you already own. A listing of field offices current at the time of publication, can be found on the back page of this section.

10-Watt General Purpose Bench Supplies

- Single, Dual & Triple Output Models

0-100	0-0.1	6212B	8mV	4mV	200μ/1mV	$355

These popular low-cost bench supplies are designed for general laboratory use. All models have front-panel voltage controls, a combination volt/ammeter, and output binding posts. Output voltage is continuously variable from 0V to 15% above the maximum rated output of the supply. A meter function switch selects either output voltage or current for display on the panel meter. Models 6212B-6218B are Constant Voltage/Constant Current (CV/CC)-type supplies and have concentric coarse and fine current controls which allow the current limit point to be set to any value within the current rating. They can also be operated as constant current sources with 500μA load regulation.

HEWLETT PACKARD

20-200 Watt Lab/System Supplies

6282A, 6286A, 6291A, 6296A

6253A, 6255A

This series of low and medium-power Constant Voltage/Constant Current power supplies includes both single and dual output models. All supplies have separate front-panel voltage/current controls that allow the voltage and current outputs to be varied from zero to the maximum rated values. Crossover from constant voltage to constant current operation occurs automatically when the load current exceeds the value established by the current control setting.

The dual-output supplies each contain two identical, independently-adjustable supplies. By combining the versatility of a dual power supply with the flexibility of auto-series and auto-parallel operation, twice the maximum rated output voltage or current of each section can be obtained from the one supply. In addition, using the autotracking capability, opposite-polarity voltages can be obtained.

Autoranging supplies employ a regulation control that automatically yields a continuous span of voltage and current ratings within the basic power rating boundry. More current is available at lower voltages, and higher voltages are available at a given current level. Autoranging supplies have features for system applications and have the flexibility for multi-application or multi-user situations. The 6002A has a maximum 200 watts output from 20V to 50V, the 6024A and 6034A from 20V to 60V. Model 6012A has 1000 watts output from 20V to 60V.

Ratings for Autoranging Supplies

Volts	Amps	Model	Load Effect	Source Effect	PARD Rms/p-p	Price

HEWLETT PACKARD

200-2,000 Watt High-Performance Supplies for Systems or the Lab

- Constant Voltage/Constant Current Operation
- Built-in Overvoltage Protection
- Auto-Series, - Parallel, - Tracking

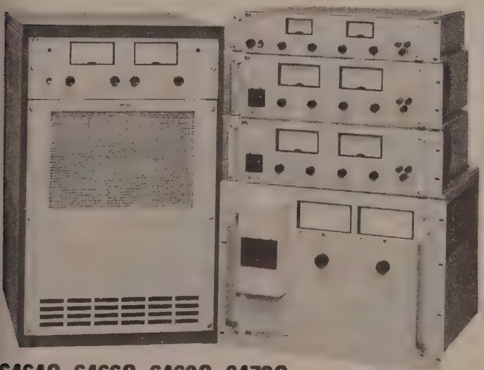
6259B,6260B
6268B,6269B
6264B
6267B,6274B
6263B,6266B,6271B

All models in this series employ a transistor series-regulator/triac preregulator circuit to achieve high efficiency, excellent regulation, low ripple and noise, and moderate programming speeds in a compact full-rack width package.

Separate coarse and fine voltage and current controls allow the voltage and current outputs to be varied from zero to the maximum rated value.

300-11,000 Watt High-Power, High-Efficiency Supplies

- Constant Voltage/Constant Current Operation
- Low Cost/Watt
- Up to 75% Efficiency
- Auto-Series, -Parallel, -Tracking



6464C, 6466C, 6469C, 6472C, 6475C, 6477C, 6479C, 6483C

This series of SCR-regulated power supplies is designed for high-power applications requiring a fixed or variable DC source with moderate regulation and ripple. Typical applications include battery charging and discharging, computer mainframe and memory system power, life testing and aging of large quantities of components, etc.

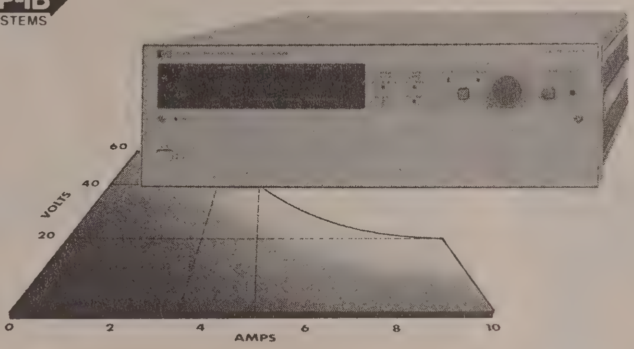
HEWLETT PACKARD

The 6034A *Autoranging* DC Power Supply with HP-IB has expanded systems capability . . . a comprehensive solution for system-controlled DC power.

DESIGNED FOR HP-IB SYSTEMS



- HP-IB programming of voltage, current and OVP
- HP-IB measurement of voltage and current
- Read-back of status information
- Autoranging output
- Programmable "soft" limits
- Friendly programming format
- Digital panel meters
- Fast down-programming
- Compact and lightweight
- Self-test and diagnostics

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

STANDARD HIGH VOLTAGE DC POWER SUPPLIES

Complete line of HV DC power supplies available with voltages up to 300 kV, listed according to power rating. Features are identical throughout the line.

STANDARD FEATURES

(provided with all units)

- Output connected triple range voltage meter.
- Triple range current meter in return leg of HV circuit.
- Reversible polarity.
- Rated current available from zero to rated voltage.
- Solid state rectifiers.
- Continuously variable output voltage from zero to maximum.
- HV on and off pushbuttons.
- Meter recalibration potentiometers.

Model No.	Voltage (kV)	Current (mA)	Output	Input
801-1A	1	1 Amp	1 KILOWATT	115 VOLT, 50/60 Hz, SINGLE PHASE

Typical DC Power Supply

Hipotronics

Quality Products

These units are designed and manufactured with the highest quality components. They are available with fully instrumented control consoles or without controls for use in OEM equipment.

All critical components—transformers, capacitors, rectifier assemblies, tanks etc., are designed and manufactured by Hipotronics so that superior quality and on-time delivery schedules can be assured.

Model No.	Voltage (kV)	Current (mA)	Output	Input

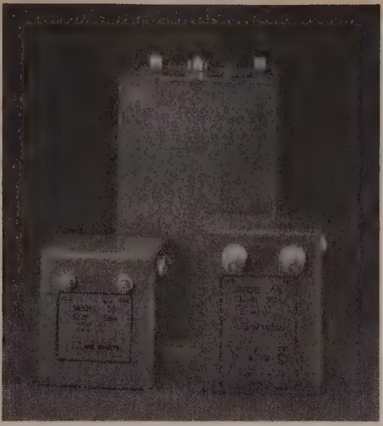
HV DC POWER PACKS



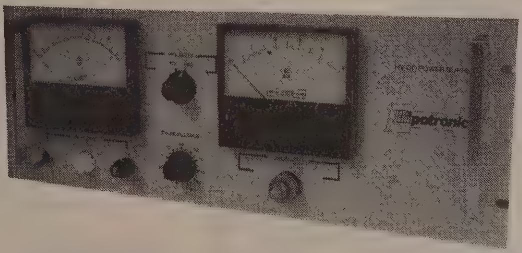
1. Power Packs:

Manufactured with all components rated at well above designated operating level and pre-assembly Hipot tested at 1.5 operating voltage. Power Packs are available from 2.5kV to 100kV.

Model No.	Input		Polarity (Neg./Pos.)	Output	
	115 Volts 50/60 Hz	220 Volts 50/60 Hz		KV	MA
2.5B	.5 Amps	.25 Amps	Both	2.5	5
2.5C	1 Amp	.5 Amps	Both	2.5	10
5B	1 Amp	.5 Amps	Both	5	5
7.5C	.75 Amps	.4 Amps	Both	7.5	10
10B	1.5 Amps	1 Amp	Both	10	5
10C	.5 Amps	.25 Amps	Both	10	10
15B	.75 Amps	.4 Amps	Both	15	5
15C	2 Amps	1 Amp	Both	15	10
20B	2 Amps	1 Amp	Both	20	5
30B	2 Amps	1 Amp	Both	30	5
30C	2 Amps	1 Amp	Both	30	10
40A	2 Amps	1 Amp	Both	40	2.0
50B	3 Amps	1.5 Amps	Both	50	5
60A	3 Amps	1.5 Amps	Both	60	2.0
100C	15 Amps	8 Amps	Both	100	10

2. Metered Power Pakcs with simplified controls:

Provide complete output metering and overload protection system in a unit suitable for mounting in standard 19" relay racks. Current limited to 5mA.



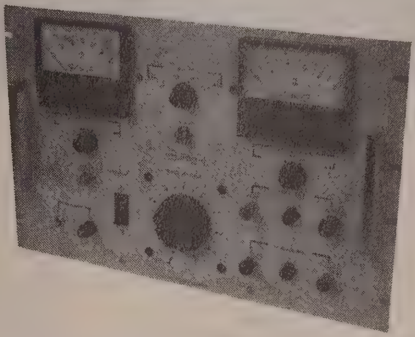
SPECIFICATIONS:

INPUT: 125 Volts [Output Voltages & Currents—Stated for **Nominal 117 Volt Input**].
REGULATION: 10% to 15% No Load to Full Load.
RIPPLE: 0.5% RMS per Milliampere Output.

Model No.	Output (kV)	Current (mA)	Ripple (%rms/mA)	Polarity	KV Meter Range (kV)	Current Meter Range (mA)
R2B	0-2	5	0.5	Reversible	0-2.5	0-5
R5B	0-5	5	0.5	Reversible	0-6	0-5
R10B	0-10	5	0.5	Reversible	0-12	0-5
R15B	0-15	5	0.5	Reversible	0-15	0-5
R20B	0-20	5	0.5	Reversible	0-25	0-5
R30B	0-30	5	0.5	Reversible	0-30	0-5
R50B	0-50	5	0.5	Reversible	0-50	0-5
R60A	0-60	2.0	0.5	Reversible	0-60	0-2.0

3. Power Packs with deluxe controls:

Provided with many safety and control features previously found only in higher power DC Supplies. Current in 2mA, 5mA, and 10mA.



SPECIFICATIONS:

INPUT: 115 Volts, 50/60 Hz, Single Phase.
REGULATION: 15% No Load to Full Load.
RIPPLE: 0.5% RMS Per Milliampere Output.
HV OUTPUT: 20 Foot Shielded Cable.

Model No.	Max kV	mA	kV Meter Ranges	mA Meter Ranges
82.5B	2.5	5	0-.5/1/2.5	0-1/2.5/5
82.5C	2.5	10	0-.5/1/2.5	0-2.5/5/10

HITRAN

Division of AGEX

Key source for reliable magnetic components, power supplies and control systems for over 40 years.

200W TO 200KW STANDARD & SPECIALTY DC POWER SYSTEMS

STANDARD BATTERY CHARGERS

Industrial float type chargers, designed to automatically control charging rates for a wide variety of battery types. Filtered and unfiltered 600V class input. Single phase and three phase. 47 to 63 Hz. Outputs range from 12 to 260V at 6 to 600Adc.

Two series are available:

***SCR Series** constant voltage chargers automatically controlled by solid state integrated circuitry.*

***SR Series** constant voltage chargers automatically controlled by a saturable reactor (magnetic amplifier) and solid state integrated circuitry.*

Performance

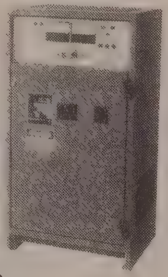
- Full rated output for both continuous and intermittant loads.
- Electronic current limiting at 110% of rated output.

Regulation.

- Continous taper charging as required.
- ± ½% Load Regulation of DC voltages from no load to full load.
- ± ½% of DC voltage setting maintained with input line variations of ± 10% voltage, and/or ± 5% frequency.
- ± 1% Output Regulation maintained against the combined variations of line, load and temperature.

Design Features

- Components selected for long life and reliability.
- Components derated to assure protection against voltage transients and short term overloads.
- No adjustment taps required.
- Lockable float/equalize controls on recessed front panel.
- Enclosures wall, floor or rack mountable.



Specialty SR Series Battery Charger

AC Input Voltage

120, 220, 240, 480 single phase, 47-63Hz and 208, 240, 380, 416, 480 three phase, 47-63Hz.

DC Output Ratings

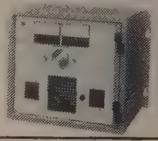
6-600 Adc at 12, 24, 48, 130 or 260 Vdc, nominal.

Standard Accessories

- DC Ammeter and Voltmeter.
- Potentiometers for float and equalize charge adjustments.
- AC input circuit breaker.
- Dual fused DC output.
- Front panel switch to change from float to equalize charging rate.
- Internal connection blocks for AC input, DC output and optional accessories.
- Protection diode to prevent damage due to improper connection of battery cables.

Optional Accessories

- DC circuit breaker to replace standard fusing.
- Equalize timer, 0-72 hour.
- Ground detection alarm relays and lights.
- HI & LO Vdc alarm relays and lights.
- Charger failure alarm relay and lights.
- Output filtering as required, 30mV RMS or less as charger or eliminator.
- And many more.



SCR Series Battery Charger

STANDARD PLASMA POWER SUPPLIES

DCS SERIES — Direct Current Sputtering

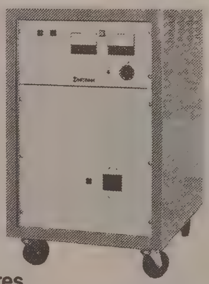
Designed for use in the vacuum sputtering, thin film deposition industry. Constant-current control, saturable reactor regulated, 600V class input, three phase, 50/60Hz, 600 and 1000Vdc at 3 to 25KW output. Special outputs to 75KW available.

Performance

- Input: 210/240 or 440/480V three phase 50/60Hz
- Output: 600/1000Vdc
- AC ripple less than 5%
- Current regulation better than 5%

Standard Features

- Tapped transformer secondaries
- Short circuit protection
- Transient supression
- Grounded B+ on chassis
- Forced air cooled
- Current rate signal interface ability



DCS-10000L

Optional Features

- Constant power or constant voltage
- Floating B+ to 50V off ground
- Free floating B+, (B− and B+ ground free)
- Multiple gun output
- Programmable timer (0.2 seconds to 60 hours)
- Remote control adapter kit
- Auto transformer for 380-415V input

Standard Models Available

KW	CATALOG NUMBER DCS-	CURRENT OUTPUT AT 600/1000VDC	CABINET DIMENSIONS H″ × W″ × D″
3	3000L	5A/3A	17.5 × 19 × 20
5	5000L	8.3A/5A	37 × 22 × 30
10	10000L	16.7A/10A	37 × 22 × 30
15	15000L	25A/15A	43 × 26 × 36

MINIATURE DC-DC CONVERTERS

When size is at a premium, performance is critical, and reliability is a must, ICI Miniature DC-DC Converters are the industry leaders.

Since 1969, ICI has been developing innovative designs of on-board power devices. ICI combines unique electrical design with proven thick-film hybrid processes to obtain maximum performance and power per cubic inch. With dedicated engineering and production, the power devices group conducts a continuous development program in DC-DC converter technology. This program assures state-of-the-art products for demanding applications. At ICI, every unit receives individual testing; every unit carries ICI's one-year warranty.

Standard models, normally shipped from inventory, are available for both military/airborne and industrial applications. With over 100 models in production and power ratings to 20 watts, the ICI product line provides the customer with a wide selection of devices for his application.

For military and airborne applications, ICI's metal-packaged hermetically-sealed units are available in several configurations—each series offering unique advantages.

For industrial applications, ICI's standard families of encapsulated designs provide a broad choice of models for operation over a temperature range of −20°C to +70°C.

And for custom applications, including MIL-STD-883 requirements, ICI can provide design expertise based on solid experience to achieve quick response and expedited delivery of an end-item that will do the job—and do it well.

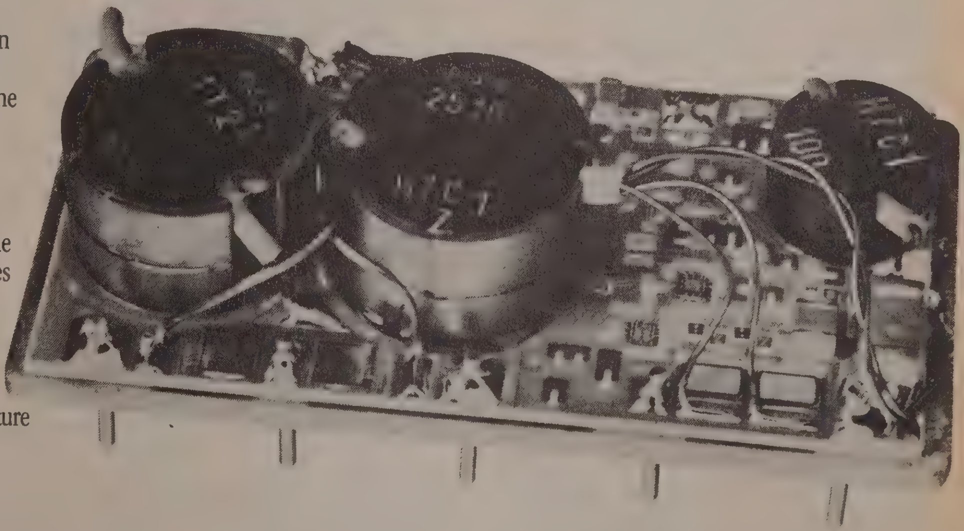
Integrated Circuits Incorporated . . . for the best in DC-DC converters.

Optional Environmental Screening

All ICI metal-packaged units are available with environmental screening, referenced to MIL-STD-883, per ICI's in-house screening procedure, as follows:

- Pre-cap internal visual inspection: Method 2017.
- Stabilization bake: 24 hours at 125°C, Method 1008, Cond. B.
- Temperature cycle: 10 times, −55°C/+125°C, Method 1010.
- Constant Acceleration: 500 g, Method 2001.
- Gross Leak: Method 1014.
- Fine Leak: Method 1014, Cond. A.
- Burn-in: 96 hour, at max. rated case temp., Method 1015
- Final electrical test: Per specification.
- Final external visual inspection: Method 2009

To order optional screening, add suffix /ES to part number. Example: MHE2805S/ES. Consult ICI for prices.



MHE SERIES

- **Up to 20 watts output power**
- **16 to 40 VDC input range**
- **Up to 86% typical efficiency**
- **-55°C to +85°C case temp. range**

The MHE models are high efficiency, isolated, regulated DC-DC converters that require no external components. Various output voltages are available in these hermetically-sealed, metal-packaged models that are suitable for military and airborne applications.

MLP SERIES

- **Up to 15 watts output power**
- **Low profile: 0.4 inches high**
- **16 to 40 VDC input range**
- **-55°C to +85°C case temp. range**

The MLP series devices are similar to the MHE series except for a lower case profile. Isolation, regulated outputs, high efficiency, wide input voltage range, and metal hermetic package make the MLP series ideal for military, aerospace, or other high reliability applications.

MTO SERIES

- **15 watts—triple output**
- **16 to 40 VDC input range**
- **79% efficiency**
- **-55°C to +85°C case temp. range**

The MTO models have three output voltages, with a common ground. All three regulated outputs are fully isolated from the input. The full rated output power can be drawn from the +5 VDC output, or the dual outputs can be loaded up to the limits shown. Total output power must be limited to 15 watts. Metal, hermetic package.

MSR SERIES

- **Up to 4 watts output power**
- **16 to 32 VDC input range**
- **Up to 75% efficiency**
- **-55°C to +85°C case temp. range**

The MSR models offer the high efficiency and wide input range of flyback switching regulators, yet have full input/output isolation. There are single, dual and triple output models, with all outputs fully regulated. The packages are metal, hermetically-sealed.

NOTE: EXTERNAL OUTPUT CAPACITORS ARE REQUIRED.

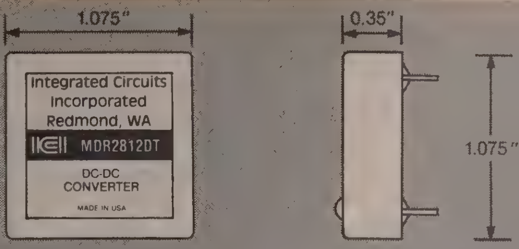
MDR SERIES

- **3 watts of output power**
- **Input voltages of 12, 24, and 28 VDC**
- **Regulated, isolated outputs**
- **-55°C to +85°C case temp. range**

The MDR series of DC-DC converters offers the excellent regulation and low output ripple provided by a series output regulator, in a hermetically-sealed metal package. No external components are required, and the outputs are fully isolated from the input.



PRICE GROUP	MODEL	VDC INPUT	OUTPUT @ FULL LOAD			MAX. WATTS

DCH SERIES

- **Up to 3 watts output power**
- **Unregulated**
- **Input voltages of 5, 12, and 28 VDC**
- **-55°C to +100°C case temp. range**

The DCH series consists of isolated, unregulated models that deliver up to 3 watts of output power. They can be used with external series regulators or in applications not requiring well regulated voltages. The metal packages are hermetically sealed.

MDP SERIES

- **Up to 1.5 watts output power**
- **Wide input voltage ranges**
- **High efficiency/non-isolated**
- **-55°C to +85°C case temp. range**

The MDP miniature switching regulators include models with one regulated output and one unregulated output, as well as models with dual regulated outputs. The input common is connected internally to the output common. They are contained in metal, hermetically-sealed packages.

NOTE: EXTERNAL OUTPUT CAPACITORS ARE REQUIRED.

DC SERIES

- Up to 6.4 watts of output power @ 70°C
- Isolated, unregulated outputs
- Rugged encapsulated construction
- 4 input voltage ranges

The DC series of unregulated DC-DC converters consists of single and dual output models, in four input voltage ranges. They can be used with external regulators or in applications that do not require regulated voltages. Operating ambient temperature range for these plastic, encapsulated devices is −20°C to +70°C.

DCR SERIES

- Up to 4 watts output power @ 70°C
- Isolated, regulated outputs
- Foldback current limiting
- High efficiency—no external components

The DCR series features isolated, dual-tracking outputs and four different input voltage ranges. They have input pi filters for good ripple rejection and the non-saturating core design minimizes radiated and conducted noise. These plastic, encapsulated converters can be operated over an ambient temperature range of −20°C to +70°C.

DIP SERIES

- Up to 1.5 watts output power
- High efficiency
- Wide input voltage ranges
- 14 pin DIP compatible package

The DIP switching regulator series consists of units that operate over a wide input voltage range, over a wide range of loads, with high efficiency. They are ideal for battery applications or wherever high efficiency and small size are important. The output common is connected internally to the input common. They are encapsulated in plastic packages and will operate over the ambient temperature range of −20°C to +70°C.

NOTE: EXTERNAL OUTPUT CAPACITORS ARE REQUIRED.

DDR SERIES

- **Up to 3 watts output power @ 70°C**
- **Isolated, regulated outputs**
- **24 pin DIP compatible package**
- **5 input voltage ranges**

The DDR series DC-DC converters are isolated and regulated. They have short-term short-circuit protection and are built with a non-saturating core design to minimize reflected ripple and radiated noise. The rugged plastic 24-pin DIP packages are rated for operation from −20°C to +70°C ambient.

DIP__DT SERIES

- **1 watt output power @ 70°C**
- **Isolated, regulated outputs**
- **14 pin DIP compatible package**
- **5 input voltage ranges**

The DIP__ DT series converters can provide up to one watt of regulated, isolated output power. The ±12 VDC and ±15 VDC outputs are regulated by monolithic dual-tracking series regulators, which provide good regulation and ripple characteristics. Also available as non-catalog standards are 5 VDC output models that provide up to 0.5 watts. The plastic, encapsulated packages are rated for operation from −20°C to +70°C ambient.

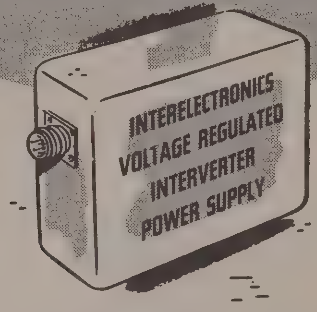
PROVEN RELIABILITY—

DC-DC, DC-AC, SOLID-STATE POWER INVERTERS

over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—



Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. High conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Wide input voltage range (1 to 250 volts DC). Wide input voltage regulation (output voltage maintained with variations up to 50% in input voltage).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2%) with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards.

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit to actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call (914) EL 8-8000 in Congers.

We design and manufacture high-voltage CRT power supplies. Years of experience in this specialty enable us to propose specifications and to supply power-source products that satisfy the most demanding display quality requirements.

We also design and manufacture products that require the same expertise and experience. They include high-voltage power supplies for photo-copy, PMT, image intensifier, electrostatics, X-ray spectroscopy, radiology, electron microscope, ion and electron accelerator, laser, and TWT applications.

Three representative product lines are cataloged briefly here. Please call us with your specific needs and price/performance goals.

HVS shadow-mask color CRT power supply 20 kV to 25 kV

Stable anode supply with low ripple reduces "banding" effect on screen

Use the HVS power supply where color CRT image quality is one of your prime concerns. The typical specifications shown here can be tightened or relaxed to meet your performance requirements most economically.

We can synchronize the power supply's internal oscillator with your sweep frequency. Our engineers may propose other options to cope with specific display problems.

We can furnish the HVS power supply to operate on your available DC power source at any nominal voltage from 24 to 33 volts.

The HVS supply responds to remote TTL shutdown and startup signals.

Circuits are protected against arcs and momentary shorts. Under fault conditions that would cause overvoltage or overcurrent, the supply shuts down, then attempts to restart. The cycle will repeat if the fault persists. This performance characteristic satisfies DHHS safety requirements.

TYPICAL SPECIFICATIONS

INPUTS

Nominal power supply: 24 to 33 volts DC
Supply voltage regulation: +10% −5%
Input current: 2.3 amperes
TTL remote shutdown:
  0=high voltage OFF
  1=high voltage ON

OUTPUTS

ANODE VOLTAGE

Adjustable, 20 kV to 25 kV
Current: 1.2 milliampere at 25 kV
Ripple: less than 500 millivolts peak-to-peak
Line regulation: 0.05%
Load regulation, no-load to full-load: 0.05%
Temperature coefficient: 200 ppm/°C

FOCUS VOLTAGE

Adjustable, 5.5 kV to 6.5 kV
Typical ripple: less than 400 millivolts
(Floating focus voltage section accepts input from dynamic focus amplifier.)
Bandwidth for coupler: 40 Hz to 250 kHz
B+ power for external focus amplifier: 400 volts DC @ 4 milliamperes

G1 VOLTAGE

−200 volts DC, zener-regulated
Ripple: less than 200 millivolts
Current: 0 to 0.5 milliampere

G2 VOLTAGE

Adjustable, 0 to 825 volts DC
Ripple: less than 400 millivolts

SAFETY

Anode voltage cannot exceed 27 kV
Anode current cannot exceed 1.4 mA
Tolerates momentary short circuits
Outputs are arc-over protected

ENVIRONMENTAL

Operating temperature: 0°C to 60°C (case)
Storage temperature: −35°C to 90°C
Weight: 3.6 pounds

DIMENSIONS IN INCHES

For a better CRT display

The best spot size for clear resolution across the entire area of a CRT screen is maintained by the HDF electrostatic focus power supply. Its output voltage is stable with low ripple. That voltage is modulated as the beam is deflected. It increases with the longer beam lengths from gun to screen edges and corners, so that focus voltage is, in effect, being adjusted continuously throughout every sweep. Correspondingly, screen resolution remains optimum at all locations.

A dynamic focus amplifier is built into the HDF power supply. In response to DC signals that may range from 0 to 10 volts, it adds the variable correction to the high-voltage focus output. The amplifier's output can range up to 300 volts, peak-to-peak.

The electron beam's length changes as a parabolic function of its deflection, and a compliant system is essential for good dynamic focus performance. The HDF power supply is capable of transient responses corresponding to a bandwidth from DC to 50 kHz.

Four HDF models are available with four ranges of adjustable output voltages. Any focus voltage from 2.5 kV to 6 kV can be provided by selecting the appropriate HDF model.

TYPICAL SPECIFICATIONS

INPUT POWER

Input supply: 24 volts DC ±10%
Input current: 500 milliamperes
(other available inputs to 33 volts DC)

FOCUS VOLTAGE OUTPUT

Adjustable: see table for range
Output current: 300 microamperes
Line regulation: 0.03%
Load regulation: 0.03%
Dynamic load regulation: 5 volts/100μA
Ripple: 0.1% of voltage, peak-to-peak
Temperature coefficient: 200 ppm/°C

DYNAMIC FOCUS AMPLIFIER

Input voltage signal: 0 to 10 volts DC
Gain adjustment: 22 to 33
Phase delay: less than 1 microsecond
Modulation output: 300 volts DC, peak-to-peak
Full-power bandwidth: DC to 200 kHz

ENVIRONMENTAL

Operating temperature: 0°C to 60°C
Storage temperature: −35°C to 90°C
Weight: approximately 1 pound

HF

CRT focus power supplies

2.5 kV to 6 kV

Model	Output Voltage
HF3	2.5 kV to 3 kV
HF4	3 kV to 4 kV
HF5	4 kV to 5 kV
HF6	5 kV to 6 kV

FOR SEPARATE AMPLIFIER

B+ voltage: 350 volts DC
B+ current: 4 milliamperes

The HF dynamic focus voltage power supply is identical to the HDF supply, except that it does not contain a built-in amplifier. It has an isolated, floating high-voltage section. Connections are provided to add a modulating voltage between ground and the low end of the high-voltage output circuit.

The HF supply provides B+ voltage for an external focus amplifier. With suitable amplifier performance, the HF supply's performance is just as good as that of the HDF supply.

INPUT POWER

Nominal power supply: 24 to 33 volts DC ±10%

VOLTAGE OUTPUT

Ripple, peak-to-peak: 0.05% of voltage (anode and auxiliary voltages)
Transient response: 0.05% of voltage (per 100μA current change)
Line regulation: ±0.03%
Load regulation: ±0.03%
Temperature coefficient: 0.02%/°C

ENVIRONMENTAL

Operating temperature: 0°C to 60°C (case)
Storage temperature: −55°C to +90°C
Case material: aluminum
Weight: approximately 1 pound

TYPICAL OPTIONS

Connectors and mounting to suit your design.
G1 and focus voltages to ±1 kV.
Ripple, peak-to-peak: 0.001% of voltage.
Ability to tolerate continuous short circuit.
Oscillator sync. with your clock frequency.
Input supply to suit your circuitry.
H.V. ADJ. range between minus 10% and rated maximum voltage instead of zero to maximum.
Pre-set anode voltage between 2 kV and 20 kV with elimination of external H.V. ADJ.

Prevent distortion on critical CRT displays

A high-voltage anode power supply that is carefully engineered for the application with minimum ripple and tight regulation is essential to clean, stable, undistorted, high-resolution image reproduction. Display quality plays a vital life-support role in medical equipment, and it often determines the effectiveness of an entire costly system in other graphics applications.

All HVC high-voltage power supplies meet rigorous test specifications. More important, they perform exceedingly well on actual CRT's under actual field conditions.

Circuit design is built around an efficient self-excited sine-wave inverter that powers a high-voltage transformer at a frequency in the 100 kHz range. It provides fold-back on overload and minimizes RFI. Outputs of the transformer secondary are multiplier-rectified and filtered to derive the anode voltage and any required auxiliary outputs.

Refinements in circuit and package design protect against arcs, corona and temporary shorts to ground. They also protect your other circuitry from electrostatic or electromagnetic interference. The transformer is of ferrite-cup core design. All HVC circuits are enclosed in an aluminum case, and all high-voltage components are carefully potted in a high-quality silicone elastomer.

High-voltage outputs are filtered and regulated precisely to prevent the spurious patterns and distortions that voltage swings and ripple would create.

You can select from five maximum anode voltages that range from 5 to 20 kV. You can set the exact anode voltage you require—zero to rated maximum—with a screwdriver adjustment.

Other case designs, in addition to the one shown here, are available. Other input power supplies, from 24 volts to 33 volts DC, can be accommodated.

You can call for auxiliary outputs, such as focus and G1 voltages, up to 1 kV with either polarity. Their operating voltages will change proportionally when the anode voltage is adjusted.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

IXYS
SOLUTIONS FOR POWER CONTROL

3685 ENOCHS
SANTA CLARA, CA 95051
TELEPHONE: (408) 733-4045

50 WATT CMOS POWER MOS SWITCHING POWER SUPPLY
SINGLE & TRIPLE OUTPUT

FEATURES
- 50W continuous power rating
- Highly regulated output standard options: 5, 12, 15, 24, 48, 75 Volts
- High reliability
- Fault tolerant connector for Un-interruptable operation
- Short circuit protection
- Over Voltage protection
- Soft start
- No minimum load
- 90 to 135 VAC input
- Designed to meet UL-478 and CSA 22.2 #154
- Tailorability: see note 1
- XVS module: see note 2

APPLICATIONS
- Desktop computers
- Computer peripherals
- Terminals
- Work stations
- Telecommunication
- Electronic instruments
- Industrial control
- DC servo motor control
- Stepper motor control
- Logic power supplies
- Custom electronics
- General purpose power supplies

STATE OF THE ART
- CMOS Pulse Width Modulation (PWM)
- 50 to 200 KHz customer specified fixed switching frequency
- IXYS proprietary XVS-3 Opto-Coupled Voltage Sensing module
- Highest Efficiency
- Lowest component count
- Smallest size
- Lightest weight

GENERAL SPECIFICATIONS

Parameter	Typical Limits
Input voltage	90 to 135 VAC
Hold-up Time	16 milliseconds
Line Regulation	±0.05-0.1%
Load Regulation	±0.1%
Adjustability	±10%
Efficiency	80% Typical
Temperature Coefficient of Output	±0.04%/deg C Maximum
Transient response (75%-100% load swing)	Transient setting to within 1% regulation band in less than 500 μs
Temperature Derating	50 watts at 50 deg C ambient 35 watts at 70 deg C ambient
Ripple: Main Output	20mV P.P.
High Frequency Noise	20mV P.P
Dimensions	5×3½×1¾ in (12.7×8.9×4.5 cm)
Weight	9.5 ounces (270 grams)

NOTES

(1) For quantity orders, power rating (to 75 watts max.), switching frequency (to 200KHz max.), regulated output voltage (to 2 volts min.), and form factor (output connectors, PCB, et al) are tailorable to customer specification.

(2) IXYS Opto-Coupled Voltage Sensor Module(s) available OEM in model XVS-3 (VDE package) as shown on XS5D and model XVS-2 (8 pin DIP package). Inquire direct to IXYS.

CUSTOM DESIGN

JEROME INDUSTRIES CORPORATION

POWER SOURCES — WALL PLUG-IN AND DESK TOP STYLE

APPLICATIONS—Computers, Modems, Microprocessor Controlled Systems, Telecommunications, Operational Amplifiers, Computer Peripherals, Test Equipment, Security Systems, Multiplexers, Medical Equipment

ALL ITEMS CAN BE MADE TO U.L. SPECIFICATIONS 478, 1310, 506, 516, 544, 697, 1012, 1236, 1411 AND OTHERS. ALSO EQUIVALENT C.S.A. REQUIREMENTS

FEATURES

Available Electrical and Mechanical Features to Enhance the Appearance or Working Capability of Plug-In Adapters:

- Screw Terminals, Styles D, J, G and M.
- Cord & Plug assemblies to Customer Specs.
- On & Off Switch
- Single & Multiple Outputs Available
- Pilot Light
- Regulated Models are Short Circuit and Thermal Protected
- Others to Specific Customer Requirements

NOTED FEATURES FOR ALL PLUG-IN CONVERTER/ ADAPTERS

- All Units can be designed to U.L. & C.S.A. Requirements
- Molded Cases have dual tapered Surface for positive push-pull grip
- Case available in a variety of colors — to match the product they operate
- Your personal Hot Leaf stamped Logo or Trade Mark enhance the case appearance.

High Voltage Power Supplies: The

High voltage power supplies used to be a disreputable, exasperating lot. They were always breaking down, blowing up, or causing a general panic at precisely the wrong time.

In short, high voltage didn't have a very good name.

Inside Story.

Then along came a company called KSI. Remarkably, KSI brought common sense (and uncommon engineering) to the uncertain world of high voltage.

First, KSI invented the Arc Quencher™—an ingenious new design that makes high voltage power supplies short-circuit proof. And unlike other "fail-safe" systems, the Arc Quencher doesn't preserve itself at the expense of the load.

KSI then added double shielding, RFI filtering, isolated control power, and many other protective features.

Finally!!! High voltage power supplies were becoming reliable, upstanding citizens!

But KSI didn't stop here. High voltage power supplies were still notoriously behind the times. Who wanted to put an antique bucket of bolts into a highly advanced system?

So KSI went to work. It employed the latest vacuum-tube and control-circuit technology. It housed the components in compact tanks and modern control modules. And it used plug-in PCBs with LED indicators and test points.

To make matters even better, KSI taught its power supplies to speak ASCII with computers. Through fiber optics, computers precisely control each critical aspect of power-supply operation.

What's more, KSI is applying the same sensible engineering approach to high-frequency switchmode and resonant supplies.

And now for the happy ending: KSI custom designs high voltage *systems* for a whole range of applications, including:

- Ion implantation
- X-ray systems
- Lasers
- E-beam systems
- Ion deposition
- Ion milling.

To find out the latest developments in this exciting and continuing story, call or write: Kaiser Systems, Inc., 33 Cherry Hill Drive, Danvers, MA 01923. Phone (617) 777-5102. TWX: 887159. FAX: (617) 777-3340.

Typical Specifications

Description	Output Voltage	Reg.	Max. Current	Technology	Application
Multiple Output	Quad 0 to 10kV	.05%	4x 4mA	High-freq.	Beam optics
	0 to 10V 0 to 1.5kV 0 to 10kV	1% 1% 1%	300A 2.2A 40mA	High-freq. resonant	Deposition systems
D.C. Adjustable	+5 to +100kV	.01%	40mA	Output tube regulation	Ion implanters
Pulsed	+40 to +130kV	.1%	800mA		X-ray
Bipolar	−75, +75kV	.01%	200mA	High-freq. resonant	
Fixed voltage	25kV	1%	100mA		Lasers

We've given high voltage power supplies a good name...

High Voltage Power Supply Selection Guide

Selecting the right high voltage power supply for a specific application requires careful consideration of many parameters. The following table, which compares the performance characteristics of several types of high voltage supplies, will provide guidance in making the appropriate choice for your application.

Type	Unregulated	Input Regulated			Output Regulated
Technology	—	linear	switch mode	resonant converter	linear
Frequency	50 Hz to 400 Hz	50 Hz to 400 Hz	10 kHz to 50 kHz	10 kHz to 50 kHz	50 Hz to 400 Hz
Output Voltage (Max.)	to > 1 MV	to > 1 MV	to 500 kV	to 500 kV	to 150 kV
Power Level	any	any	to 3 kW	to 50 kW	200 W to 200 kW
Regulation Method	N/A	var. transf. SCR	pulse width modulation	freq., phase modulation	series pass element
Stored Energy*	high	high	low	low	lowest
Output Current Limit Δt	≥ 10 ms	≈ 10 ms	≈ .1 ms	≈ .5 ms	< 1 μs
Transient Response	N/A	slow	medium	medium	very fast
EMI	very low	medium	high	medium	very low
Efficiency	≈ 95%	≈ 90%	≈ 85%	≈ 85%	75 to 90%
Parts Count	lowest	low	high	high	low
Size per Watt	large	large	small	small	large
Cost per Watt	low	medium–high	medium	medium	high
Insulation Medium	air, oil, SF6		air, oil, SF6, encapsulation		air, oil, SF6

*Stored energy at output due to output filter. Low filter requirements (higher ripple) reduce stored energy.

Choose your supplier as carefully as you choose your supplies. Ask yourself the following: are his designs modern, efficient, and reliable? Does he care as much about quality as you do? Will he deliver on time and to specifications?

Then call KSI.

We've given high voltage power supplies a good name...

Why KEC Switchers place first with
the Specifier,
the Qualifier,
the Buyer.
10
10
10

KEC makes a line of high-quality, reliable, switching power supplies guaranteed to make all three important members of your procurement team happy, and here's why:

Here's why your design engineers will love them:

- We build a better power supply to begin with and then we guarantee it with a full two-year warranty.
- We don't play "specmanship." All our specs are extremely conservative, so there is no need for our customers to design in safety margins. We do it for you.
- Our power supplies won't be the weak link that makes your system fail. (Our return rate is less than 1%).

Here's why your components engineers will score KEC first:

- KEC products not only perform as advertised—they perform much better.
- KEC welcomes head-on confrontation with any other equally rated power supplies because KEC always wins.
- The qualifying engineer knows he isn't wasting his time when he tests KEC product performance.

Here's why purchasing loves to do business with KEC:

- There is no more friendly power supply company. You always have a direct line to our top management, and we give helpful answers—not gruff responses.
- We continue to service and support our customers after they buy—with on-time deliveries, with schedule flexibility, and with helpful application consultations.
- And, perhaps of greatest importance to the buyer—we are fiercely competitive in across-the-board pricing from "onesies and twosies" to 5,000 or 10,000 pieces.

KEC offers a complete selection of precision switching power supplies ranging from 15W to 750W. The line includes both single and multi-output units in open frame and modular enclosed styles. To learn more about this remarkable line of switchers, send for the brochure on KEC's newest line of KS Series multi-output switching power supplies, with ratings from 100 watts to 300 watts—all UL recognized.

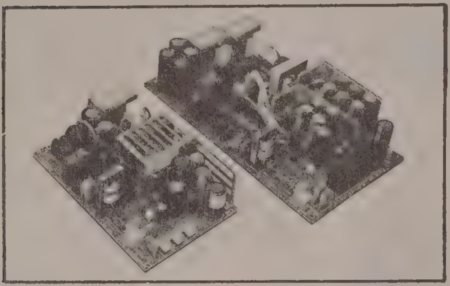
PRECISION SWITCHING POWER SUPPLIES
SELECTOR GUIDE

It tells you all you'll ever need to know to locate the exact switching power supply for most applications. It's complete with brief specs and prices. If you need to know more, just send for our comprehensive product data sheets.

MULTI-OUTPUT

KFD SERIES - MULTI OUTPUT 25, 40, 80 W.

The KFD-25E, 40E and 80E world-class power supplies have been engineered for full time duty at their maximum rated out-puts. They are designed to meet UL, CSA, and VDE safety requirements; and EMI emissions comply with FCC/VDE requirements.



AC INPUT . . . 115/230 VAC (-20% to +15%)

*1-9 units

KS SERIES – MULTI OUTPUT (UP TO 6). 100-300 W.

With a range of 100 to 300 watts, these two Series cover the broadest spectrum of applications. They are particularly well suited for use with word processing equipment, computers, as well as a wide range of peripherals. Both overload and overvoltage protection is standard. All models UL recognized.

KFL SERIES – 4 OUTPUT. 15, 25, 40 W.

The KFL Series features independently regulated outputs and offers optimum size-to-power ratios. Available in both caged and open versions in 15, 25, and 40-watt models, these units provide ultra-reliable performance in the smallest possible space. Ideal for personal computers. All models UL recognized.

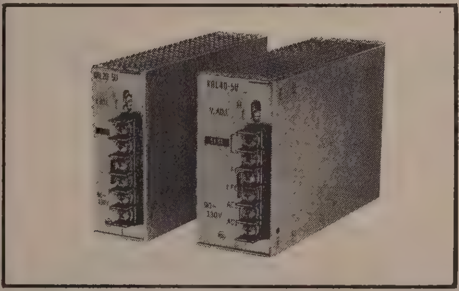
MODEL	H	L	W
KRV 60	3.94	6.65	1.69
KRV 100	3.94	8.74	2.09

KRV SERIES—SINGLE OUTPUT, 60 & 100W.

The KRV Series features **100 kHz** switching speed instead of the usual 20 kHz, resulting in very small efficient packages and providing more wattage per cubic inch. These state-of-the-art power supplies are ideal for any application where space is at a premium.

MODEL NUMBER	Maximum Current Output at 50°C				
	5Vdc	12Vdc	15Vdc	24Vdc	Watt/Price*
KRV 60**	12A	5A	4A	2.5A	60W / $129
KRV 100**	20A	8A	6.5A	4A	100W / $176

**Add voltage to complete model number. Contact factory for non-standard voltages *1-9 units



AC INPUT...115VAC (−20% to +10%)
Efficiency (Typical)...62%

MODEL	H	L	W
KRL 20	3.9	6.46	1.46
KRL 40	3.9	6.46	1.97

KRL SERIES – SINGLE OUTPUT, 20 & 40 W.

The KRL Series is optimum for those applications requiring totally isolated outputs. A compact size and low price allows maximum flexibility in configuring your own multi-output system—often at a cost less than competitive multi-output units.

MODEL NUMBER	Maximum Current Output at 50°C				
	5Vdc	12Vdc	15Vdc	24Vdc	Watt/Price*
KRL20**	4A	1.7A	1.3A	0.8A	20W / $57
KRL40**	8A	3.3A	2.7A	1.7A	40W / $66

**Add voltage to complete model number. Contact factory for non-standard voltages. *1-9 units

L	7.88	7.88	7.88	7.88	7.88	7.88

SB MODULAR SERIES – SINGLE OUTPUT, FULLY ENCLOSED. 30-300 W.

Compact and cool operating, the SB series of modular power supplies are particularly well suited for a wide range of applications requiring a fully enclosed unit with a single output and high reliability. These rugged units feature overvoltage and overload protection as standard.

MODEL NUMBER	Max. Current Output at 50°C						
	5Vdc	12Vdc	15Vdc	20Vdc	24Vdc	48Vdc	Watt/Price*

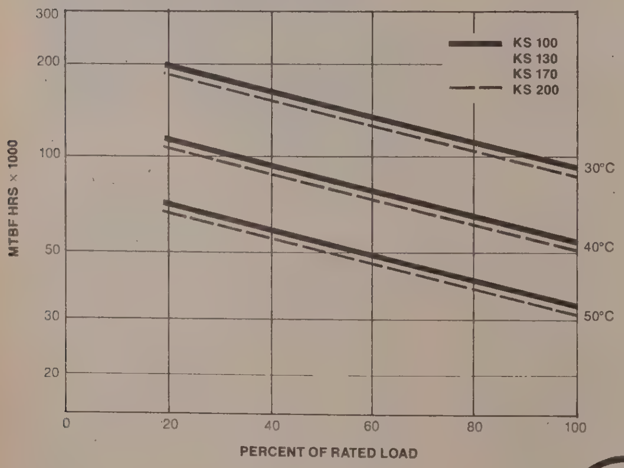
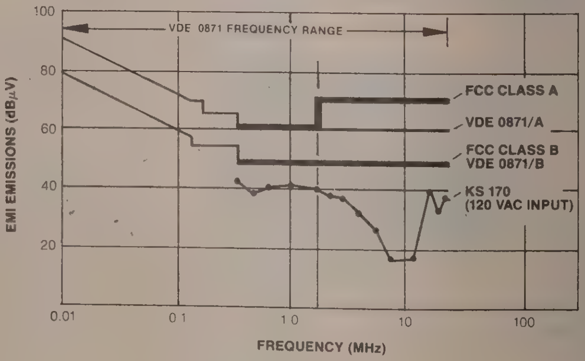
KS SERIES, RELIABILITY AND FCC/EMI COMPLIANCE

MEAN TIME BETWEEN FAILURE



EMI SPECIFICATIONS—KS PERFORMANCE WITH OPTION F



OPTION F—Reduces conducted noise to comply with FCC and VDE levels A. Although the figure above indicates that the actual conducted noise is less than FCC level B, an external filter is recommended for compliance with FCC and VDE levels B. The recommended filter is a Stanford Applied Engineering Model CA-3, or equivalent.

KELTEC
FLORIDA

Keltec Florida for custom mil spec and high reliability industrial power supplies.

Two new facilities to better serve your power supply requirements.

Keltec Florida, a leading power conversion company, has added two new facilities designed to provide faster, more efficient service for our customers. A total of 100,000 sq. ft. of specially designed workspace is now being occupied by our Military and Industrial Operations.

Keltec power supplies are the choice for use in sophisticated electronic surveillance and electronic counter measure systems for the military market, plus civilian applications in telecommunications, computers and satellite communications systems.

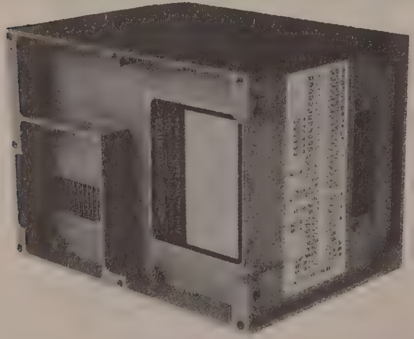
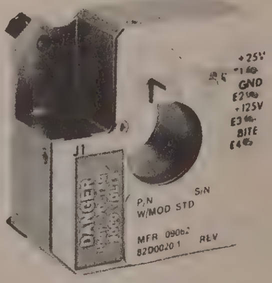
Multi-TWT Power Supply & Modulator for an Airborne ECM Pod



Multi-output Low Voltage Power Supply for Airborne Radar Warning Receiver System



High Voltage CRT Power Supply for Airborne Display

For over twenty years, Keltec Florida has been designing and manufacturing high reliability power conversion products to meet the most stringent military environmental specifications. Long recognized as a leader in TWT power supplies, we have used our vast experience base to enhance and improve our entire product capability.

For all of your power conversion needs, look to Keltec Florida—The Leader!

At Keltec, we provide our customers the ultimate in state-of-the-art custom-designed power conversion products. Whether your needs demand high power density, multi-output low voltage power supplies or high technology high voltage supplies for TWT's, CRT's, magnetrons, or klystrons, Keltec stands ready to design and build to your specifications.

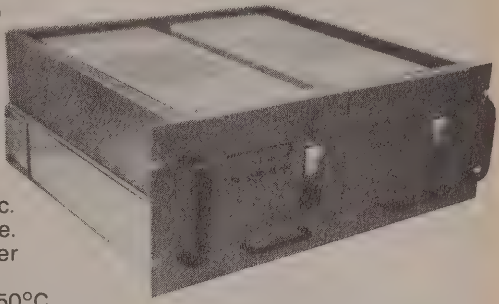
Custom Designed High Grade Industrial Power Supplies

- **Switchers**
- **Linears**
- **DC to DC Converters**
- **AC to DC Off-Line Switchers**
- **Multi-Input**
- **Multi-Output**
- **High MTBF Designs**

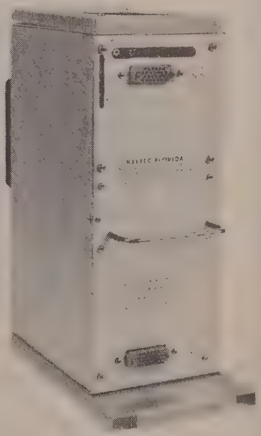
Keltec Industrial Operations provides custom Engineering and Manufacturing capability to a wide variety of industrial power supply users. Complete electrical and mechanical design service; modern manufacturing methods; a highly skilled production test capability and a fully staffed Quality Assurance department combine to provide highly reliable, cost efficient power supplies in large quantities to support major industrial/ commercial programs.

Redundant Multi-Output AC to DC Switcher Provides 650 Watts!



Dual input range: 115V or 220V; 40 to 400Hz.
Outputs: +5V @ 50A
±15V @ 2A
−5V @ 3A
Regulation: ±0.3%
Ripple: 100mV p-p. max.
Fully protected with electronic overload. Automatic recovery. 30msec. storage protects against power failure.
MTBF in excess of 50,000 hours per MIL-STD-2127D at 50°C ambient.
Operating temperature: −10° to +50°C.
Meets FCC20780 EMI requirements for Class A equipment.

100,00 Hours MTBF Low Noise DC to DC Switcher



Low noise switching power supply with 5 outputs is used to power logic circuits in digital microwave radio links. Highly reliable with over 100,000 hours calculated MTBF.
Inputs: 20-28vdc and 42-56vdc.
Outputs: ±5V @ 25A ±0.5%
+12V @ 3A ±0.5%
−15V @ 1.5A ±1.0%
−20V @ 1.5A ±1.0%
Ripple: 50mv p-p. max.
Protection: Adjustable current limiting. Automatic recovery on all outputs. Reverse polarity and overtemp. protection.
Operating Temp: −20° to +55°C.

Off-Line Switcher has 5-Outputs.

Off-Line AC to DC switcher with 5-outputs is used in air-traffic control systems world-wide.
Inputs: 115V and 220V; 40 to 400Hz.
Outputs: +5V @ 10A
±15V @ 2A
10V @ 6A
12V @ 6A
Regulation: ±0.3%
Ripple: 100mv p-p. max.
Meets FCC20780 EMI requirements for Class A equipment.
MTBF in excess of 50,000 hours calculated in accordance with MIL-STD-217D at 50° ambient.
10V and 12V outputs are fully adjustable over the range for panel light control.

Complete capabilities for any type of high reliability, industrial power supply. Contact Keltec Florida, Industrial Operations with your requirements.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

KEPCO® POWER SUPPLIES

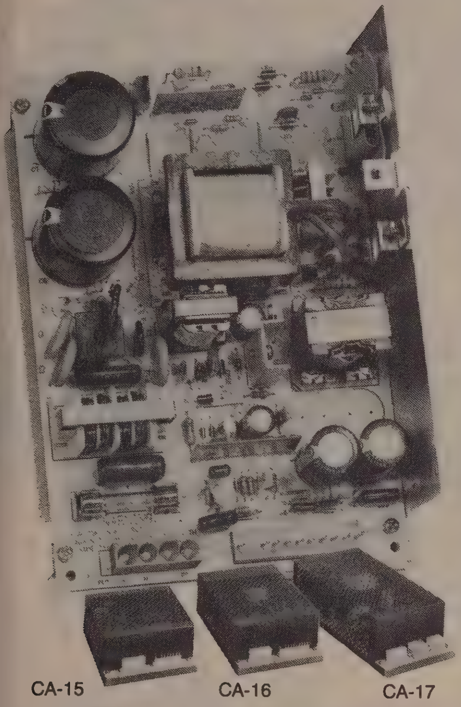
KEPCO/TDK OEM SWITCHING MODULES

High Frequency, High Efficiency Power Supplies with Built-In Overvoltage Protector and Current Limiter

NEW WORLD POWER™ ERX™ SINGLE OUTPUT



OPTIONAL STEEL ENCLOSURES

This series introduces a whole new generation of cost-effective switchers meeting the highest international safety and EMI standards at remarkably low prices. A built-in filter attenuates conducted EMI below FCC 20780, Class B, and VDE 0871. Optional enclosure reduces radiated EMI below VDE 0875/7.1, level N.

All models are "SELV" per the spacings and hi-pot requirements of VDE 0806 and IEC-380 (certified by TÜV Rheinland), and also meet the requirements of UL478 and CSA C22.2-154. The spacing, even with the larger transformer needed to meet these requirements, has been achieved through the use of two custom hybrid microcircuits. These also reduce the number of parts on the board, resulting in a clean, uncluttered layout, and greatly extended reliability.

The series consist of 12 models: 5V, 12V, 15V, and 24V models in three sizes, 30 Watts, 60 Watts, and 120 Watts. They provide well-stabilized, adjustable d-c outputs, protected by a current limiter and overvoltage protector, with remote error sensing available to compensate for the connecting wire's voltage loss.

KEPCO® POWER SUPPLIES

KEPCO/TDK OEM SWITCHING MODULES

High Frequency, High Efficiency Power Supplies with Built-In Overvoltage Protector and Current Limiter

MRM™ TRIPLE AND QUADRUPLE OUTPUT

This series of frameless, printed-card style switching power supplies produce multiple outputs to meet, in various combinations, the logic, display, serial output, and disk drive needs of CRT terminals, microcomputers, and video games.

All members of the series have built-in filtering which meets FCC/VDE conducted EMI specs class B (except MRM 147K, Class A). All are UL recognized and CSA certified. The newest member, MRM 250KV, additionally meets the safety requirements of an SELV power supply per VDE 0806 and IEC 380. MRM 144KV also meets these requirements. Both have been so certified by TÜV Rheinland. All models have OVP on their +5V outputs, and all except MRM 146K and MRM 183K have 115/230V selectable inputs.

The 60 Watt MRM 250KV, a flyback converter, has four outputs: +5V, +12V, −12V, and −5V. The 40 Watt MRM 144K and −KV and 146K, also flyback converters have three outputs: +5V, +12V, and −12V. MRM 147K (70 Watts), a forward converter, and MRM 183K (43 Watts), a flyback, both produce three outputs. Both have one +5V output; MRM 147K has a −12V, and MRM 183K a −5V, negative reference rail for serial communication outputs. Both have a +24V output: in the MRM 147K it can produce 2.2A; in the MRM 183K it can produce 1.3A. MRM 174K (75 Watts), a forward converter, has four outputs: two separate +12V outputs, one to power a CRT display, the other up to two 5-1/4″ disk drives; a +5V output for TTL logic; and a −12V negative reference rail for serial communications.

A special feature of the MRM 174K is a circuit to minimize transient disturbances on the +12V output being used to power the video display. Such disturbances normally occur when other outputs undergo load change, as when a r/w head starts seeking. Also, the source frequency component of the ripple in the CRT's + 12V output is held below 4mV p-p to minimize interaction with the vertical rate of a CRT display.

MRM 144K, 144KV, 146K	40W
Output #1	+ 5V/0.45 to 2.5A (5.0 max)
Output #2	+12V/0.3 to 2.0A (2.5 max)
Output #3	−12V/0.0 to 0.1A (0.5 max)

MRM 147K	70W
Output #1	+ 5V/0.75 to 3.0A (6.6A peak)
Output #2	−12V/0.04 to 0.17A (0.37A peak)
Output #3	+24V/0.0 to 2.2A (3.3A peak)

MRM 174K	75W
Output #1	+ 5V/2.0 to 5.0A
Output #2	+12V/0.5 to 1.8A (2.8 peak)
Output #3	+12V/0.5 to 2.0A
Output #4	−12V/0.25 to 0.5A

MRM 183K	43W
Output #1	+ 5V/0.13 to 2.2A
Output #2	− 5V/0.08 to 0.14A

This KEPCO product is backed by a firm 1-YEAR WARRANTY

These new high-quality multi-output fully enclosed and shielded power supplies are priced well below many competitive open frame designs. This is due to the computer-aided design of these units, and to the extensive use of proprietary TDK hybrid microcircuits, which dramatically reduce the parts population of the boards.

The five EMR models range from a 3-output 22-Watt model for logic circuits, through a 4-output 80-Watt model with sufficient 24V power to run an 8″ floppy disk drive.

EMR 100K (22W)	Output #1	+ 5V/1.0 to 3.0A

KEPCO® POWER SUPPLIES

KEPCO/TDK OEM SWITCHING MODULES

High Frequency, High Efficiency Power Supplies with Built-In Overvoltage Protector and Current Limiter

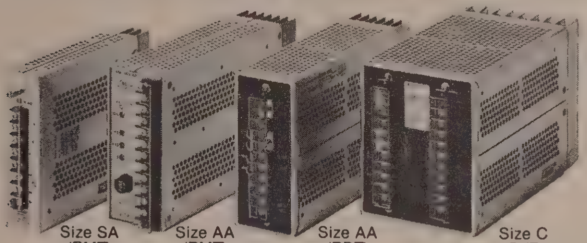
RMT™ RDT™ RXT™ TRIPLE OUTPUT

UL RECOGNIZED CSA CERTIFIED

The KEPCO/TDK Series RDT/RMT/RXT provide the instrument designer with a compact, high efficiency source of the multiple voltages needed to drive modern digital-analog circuits. Each model provides a basic 5V logic output. The SA size is rated at 0-6 Amperes; the AA size provides 0-10 Amperes, and the C size is rated at 0-20 Amperes. These are combined with various auxiliary outputs as tabulated below.



Size SA (RMT) Size AA (RMT) Size AA (RDT) Size C (RXT)

SIZE SA

Size: 5.12''H x 1.38''W x 6.97''D **Wgt:** 1.4 lbs.

MODEL	PRINCIPAL OUTPUT#1		AUXILIARY OUTPUT #2		OUTPUT #3	
	VOLTS	AMPS	VOLTS	AMPS	VOLTS	AMPS
RMT 021-SA	+5	6	+12	0.4	−12	0.4
RMT 022-SA	+5	6	+15	0.4	−15	0.4
RMT 023-SA	+5	6	+12	0.4	− 5	0.4
RMT 024-SA	+5	6	+15	0.4	− 5	0.4
RMT 025-SA	+5	6	+12	0.4	− 9	0.4

50°C ratings. At +71°C derate principal output to 2.4A. For Models RMT 021-SA and RMT 022-SA derate each auxiliary output to 0.2A. Input is 115V a-c only.

SIZE AA

Size: 5.12''H x 2.17''W x 8.82''D **Wgt:** 3.3 lbs.

MODEL	PRINCIPAL OUTPUT#1		AUXILIARY OUTPUT #2		OUTPUT #3	
	VOLTS	AMPS	VOLTS	AMPS	VOLTS	AMPS
RMT 001-AA(1)	+5	10	+12	1	−12	1
RMT 002-AA(1)	+5	10	+15	1	−15	1
RMT 003-AA(1)	+5	10	+12	1	− 5	1
RMT 004-AA(1)	+5	10	+15	1	− 5	1
RMT 005-AA(1)	+5	10	+12	1	− 9	1

(1) Std. input: 115V a-c, for 250V a-c input, add suffix "-230" to model number.

50°C ratings. At +71°C derate principal output to 4.0A. Derate each auxiliary output to 0.3A.

RDT 001-AA-24	+5	10	+12	1	−12	1
RDT 002-AA-24	+5	10	+15	1	−15	1
RDT 001-AA-48	+5	10	+12	1	−12	1
RDT 002-AA-48	+5	10	+15	1	−15	1

50°C ratings. At +71°C derate principal output to 4.0A. Derate each auxiliary output to 0.3A. Suffix "-24" input is 20-30V d-c. Suffix "-48" is 42-56V d-c.

SIZE C

Size: 5.12''H x 4.06''W x 8.82''D **Wgt:** 6.4 lbs.

MODEL	PRINCIPAL OUTPUT#1		AUXILIARY OUTPUT #2		OUTPUT #3	
	VOLTS	AMPS	VOLTS	AMPS	VOLTS	AMPS
RXT 051-C	5	20	12	2.0	12	2.0

(7) MRM 144KV: 1.25/3.75
(8) For principal output only
(9) Rectangular characteristics
(10) Foldback characteristics

HOLDING TIME: The minimum time, in milliseconds, that the power supply will function, at full load, after loss of source power.

SOFT START: A surge limiting circuit is incorporated to limit the initial turn-on current. A separate logic level on-off circuit is provided in many models for no-surge cycling. (See Remote Control)

REMOTE CONTROL: A TTL compatible logic level signal can be used to turn the power supply on and off. An internal pull-up resistor programs the power supply on in the absence of external signals. This can be used for sequencing and for no-surge cycling.

REMOTE ERROR SENSING: Separate terminals allow a 4-terminal connection between power supply and load. These connections can compensate for voltage drops in the connecting wires.

RECOVERY CHARACTERISTICS: The table lists the time for recovery to within 0.5% (or 0.05V) of the final output value following a step load change of either 50% to 100% or 100% to 50% of maximum (+50 °C) rated load.

OVERVOLTAGE PROTECTION: The tabulated overvoltage protector either shuts down the power supply at the O.V.P. voltage threshold or, in the case of the zener shunt-type, limits the maximum voltage.

CURRENT LIMIT: The rectangular shape of the current limit characteristic means these units may be connected in series or in parallel and may drive capacitive or non-linear loads without special precaution.

PRM 12-5	12.0	0-5.0
PRM 15-4	15.0	0-4.0
PRM 21-2.9	21.0	0-2.9
PRM 26-2.3	26.0	0-2.3
PRM 36-1.7	36.0	0-1.7
PRM 120-0.50	120.0	0-0.50
PRM 240-0.25	240.0	0-0.25

The nominal output is listed. Taps for two settings higher and two settings lower.

Fixed output, heavy duty stabilizers for exceptional longevity under rugged conditions. PRM's offer high efficiency (50-75%) and excellent source isolation. For custom volt-ampere combinations, consult factory.

NOTE: The models listed are for operation on 115V a-c 60 Hz mains only (tolerance ±3 Hz). For 50 Hz service areas separate models are available. These units have reduced ratings (approximately 20% less than the corresponding 60 Hz models).

DIMENSIONS:
Size A Models:(1) $6\frac{13}{16}$H x $4\frac{3}{4}$W x $10\frac{27}{32}$D.
Weight : 24 lbs.
Size AA Models:(1) $6\frac{13}{16}$H x $4\frac{3}{4}$W x $10\frac{29}{32}$D.
Weight: 24 lbs.
Size B Models: $3\frac{13}{32}$H x 5W x $13\frac{7}{8}$D.
Weight: 17 lbs.
Size C Models:(1) $6\frac{13}{16}$H x $4\frac{3}{4}$W x $15\frac{1}{8}$D.
Weight: 30 lbs(2)
Size D Models: $3\frac{13}{32}$H x 5W x $10\frac{7}{8}$D.
Weight: 11 lbs.

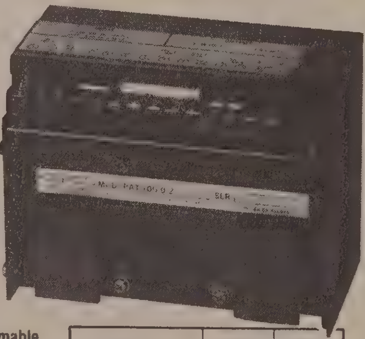
(1) Dimension, Models A and C are uncased modules
(2) Dual Output: 38 lbs. 450 Series: 40 lbs.

PRM™

LINEAR PROGRAMMABLE VOLTAGE / CURRENT STABILIZERS

PAT™

20 WATT PROGRAMMABLE VOLTAGE STABILIZER



These operationally programmable power modules offer a single high-gain control channel for voltage or current stabilization, backed up by an adjustable overcurrent limiter. Programmable from IEEE-488 bus using a Kepco digital interface.

MODEL	VOLTS	AMPS
PAT 7-2	0-7	0-2

KEPCO® POWER SUPPLIES

POWER MANAGERS™ for LABORATORY/SYSTEMS

ATE™ LINEAR PROGRAMMABLE POWER SUPPLIES FOR AUTOMATIC TEST EQUIPMENT SYSTEMS.

FEATURING:

- Full external control over both voltage and current with automatic crossover; separate voltmeter and ammeter for continuous output monitoring. Local control through 10-turn rheostats on front panel, remote through fixed gain power amplifier scaling from an input of 10 Volts to rated voltage. Digital input via IEEE 488 bus possible with Kepco digital interface programmer.
- User selectable slow or fast mode of operation; slow mode is ideal for delivering constant voltage; in fast mode, the ATE can follow rapidly changing load voltages to deliver constant current, or follow high speed voltage or current programming.
- Two built-in, uncommitted amplifiers for scaling, summing, or other manipulation of programming signals. Both voltage and current control channels have full zeroing and calibration facilities for compatibility with Kepco's digital interfaces.
- Programmable/tracking overvoltage protection.

This KEPCO product is backed by a firm 5-YEAR WARRANTY

1000 Watt (Full-Rack):(2)
$6\frac{31}{32}$"H x $16\frac{1}{2}$"W x $20\frac{1}{64}$"D(1) Weight: 103 lbs.

(1) Add 2 1/2" for connector protrusion.

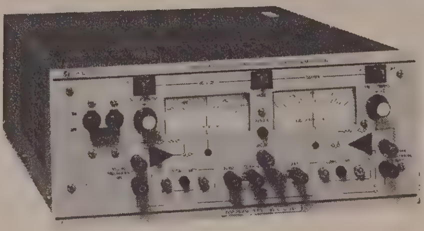
(2) The full rack model is supplied with brackets for direct mounting in a standard 19-inch rack.

KEPCO® POWER SUPPLIES

POWER MANAGERS™ for LABORATORY/SYSTEMS

4-QUADRANT VOLTAGE/CURRENT STABILIZERS

This KEPCO product is backed by a firm
5-YEAR WARRANTY



BOP™

These low-voltage bipolar power supplies offer full, programmable control over both voltage and current with a mode selector. The power supply is bounded in all four quadrants by four fully adjustable, programmable boundary limits. The wide-band BOP offers two operational pre-amplifiers for scaling, summing and signal processing. Programmable from an IEEE-488 bus using optional interface board. (See page 21).

(1) 105-125/210-250V a-c.

(2) Output effects, expressed as a percentage, are referred to the maximum rated output voltage or current.

(3) Measured with the common terminal grounded so that the common mode current does not flow through the load.

(4) Peak-to-peak ripple is measured over a 20 Hz to 10 MHz bandwidth.

KEPCO® POWER SUPPLIES

POWER MANAGERS™ for LABORATORY/SYSTEMS

JQE™ GENERAL PURPOSE VOLTAGE STABILIZERS

Systems-type, voltage stabilizers with current limiting, programmable from the IEEE bus using Kepco digital interfaces. JQE's voltage control channel has an I-C front end for maximum stability and minimum offset. The rated power is delivered under the realistic thermal environs of a system's cabinet with no derating. The 10-turn voltage control is standard. For units requiring overvoltage protection and/or high speed programming, see the ATE group.

(1) External current sensing, using the *voltage* amplifier. Effects are measured for a 1-volt current sensing voltage drop.

(2) Whichever is greater.

(3) Typical temperature effect coefficients are: 0.005% per °C voltage mode; 0.01% per °C externally sensed current mode.

(4) One terminal grounded or connected so that the common-mode current does not flow through the load or (in current-mode) through a sensing resistor.

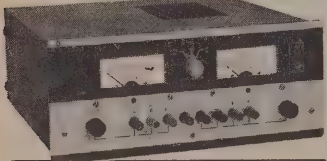
(5) 20 Hz to 10 MHz.

KEPCO® POWER SUPPLIES

POWER MANAGERS™ for LABORATORY/SYSTEMS

MPS 620M™

Multiple output voltage stabilizer with adjustable current limits. Model MPS 620M is the ideal bench power supply for the logic experimenter.



Output #1	0-6V, 0-5A
Output #2	0 to +20V, 0-1A
Output #3	0 to −20V, 0-1A

Outputs 2 and 3 are tracked. Output 1 is protected by an overvoltage crowbar.

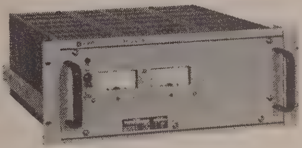
DIMENSIONS:

$5\,^{7}/_{32}$"H x $12\,^{17}/_{32}$"W x $12\,^{7}/_{8}$"D.

WEIGHT: 29 lbs.

PRR™

Ferroresonant stabilized 1000W designs producing fixed voltages.



MODEL	VOLTS	AMPS
PRR 12-77M	12.0	0-77
PRR 24-42M	24.0	0-42
PRR 28-36M	28.0	0-36
PRR 48-22M	48.0	0-22

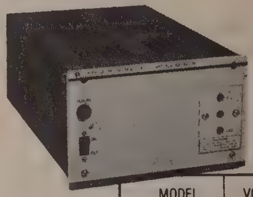
DIMENSIONS:

$6\,^{31}/_{32}$"H x 19"W x $13\,^{7}/_{16}$"D behind panel.

WEIGHT: 63 lbs.

NTC™

Low power shunt stabilized power supplies that can be used on their own as a fast-programmable voltage source, or serve as an interface for higher-powered operational power supplies. The NTC as an interface permits programming with the negative terminal common.



MODEL	VOLTS	AMPS
NTC-200	0-200	0-0.01
NTC 2000	0-2000	0-0.001

DIMENSIONS:

NTC–200: $5\,^{7}/_{32}$"H x $4\,^{5}/_{32}$"W x $17\,^{3}/_{16}$"D.
NTC–2000: $5\,^{7}/_{32}$"H x $8\,^{11}/_{32}$"W x $12\,^{7}/_{8}$"D.

WEIGHT: NTC–200: 11 lbs., NTC–2000: 21 lbs.

INFLUENCE QUANTITY	MPS		PRR		NTC(2)		
	OUTPUT EFFECTS		OUTPUT EFFECTS		VOLTAGE AMPLIFIER OFFSETS		REFERENCE ±6.2V

KEPCO® POWER SUPPLIES

POWER MANAGERS™ for LABORATORY/SYSTEMS

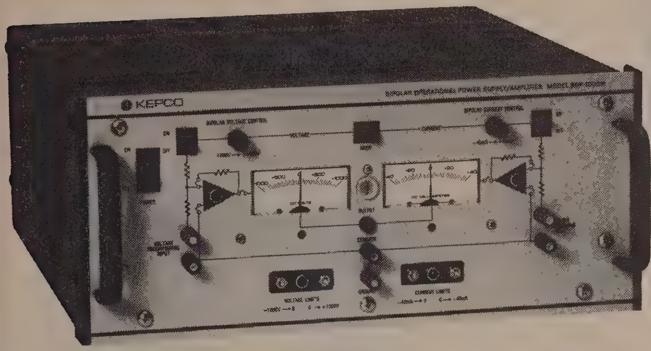
HIGH VOLTAGE MODELS

FOUR-QUADRANT VOLTAGE/CURRENT STABILIZERS

Programmable from IEEE-488 using one of the Kepco stand-alone digital interfaces.

BOP-HV, Bipolar High-voltage Operational Power Supplies, combine the capabilities of fast-programmable power supplies with a bi-directional output stage that can respond in either direction from zero and permits operation either as a sink or as a source. The BOP-HV are programmable from an IEEE-488 bus using one of the stand-alone Kepco digital interfaces.

This KEPCO product is backed by a firm
5-YEAR WARRANTY



BOP-HV™

BHK™ 200 WATT AUTOMATIC CROSSOVER CONVENTIONAL AND HIGH SPEED

Programmable (up to 1000V) from an IEEE-488 bus using one of the stand-alone Kepco digital interfaces. Programmable voltage and current stabilizer for high voltage arranged in an automatic crossover configuration. Provision is made for disconnecting the output capacitor for high speed programming.

MODEL	VOLTS	AMPS
BHK 500-0.4M	0-500	0-0.4
BHK 1000-0.2M	0-1000	0-0.2
BHK 2000-0.1M	0-2000	0-0.1

CONTROL/PROGRAMMING:
Output voltage is controlled from the panel by a combination of a 10-position decade switch and a 10-turn vernier control. This arrangement provides 0.005% resolution yet does not inhibit the ability to sweep program a BHK linearly through its entire range. External control can be exercised by a resistance (1000 ohms per volt) or by a control voltage, delivering 0 to +1 milliampere into the summing junction with respect to the plus (+) output/sense terminal. External signals can be substituted for, or summed with, the internal reference for additional control. BHK can be strapped for either conventional speed operation or for fast programming. In fast mode the output can be controlled at 0.5V per microsecond.

DIMENSIONS: $5\frac{7}{32}$"H x 19'W x $15\frac{5}{16}$"D (behind panel)

WEIGHT: 46 lbs.

[1] Calculated for a feedback resistance of 1000 ohms per volt of output and a feedback capacitance of 200 pF. The range of capacitance available internally is 200 pF to 1900 pF.

[2] Calculated for a load resistance equal to E_{omax}/I_{omax} and the tabulated value for equivalent output capacitance.

KEPCO® DIGITAL PROGRAMMING INTERFACES

NEW TLA 488-16 INTERACTIVE PROGRAMMER

FOR CONTROLLING UP TO 16 POWER SUPPLIES, USING CIIL COMMANDS

This new Kepco interface not only enables your computer or bus controller to give commands in the Control Interface Intermediate Language (CIIL) over the IEEE 488 bus to as many as 16 Kepco ATE or BOP power supplies; it also enables the power supplies to respond with appropriate flags if they are unable to carry out those commands (hence TLA: Talker-Listener-Adapter).

The commands you can give are voltage setting with current limit, or current setting with voltage limit. The TLA 488-16 automatically translates the desired voltage or current settings into percentages of full scale.

The responses you receive inform you whether your commands have been carried out, and if not why not.

A discrete fault (or status) monitor reports catastrophic failure either in the unit itself, or in the power supplies.

The TLA 488-16 consists of one single-board micro-computer which uses the 8088 CPU microprocessor, and as many as four plug-in boards. The "A" boards are for Kepco ATE power supplies: TL 488-1A controls one power supply, TL 488-2A controls two, and TA 488-4A controls four. TL 488-4B controls up to four Kepco bipolar BOP power supplies. All control circuits of the plug-in boards are optically isolated, to 500 Volts, from each other and from the digital interface circuit. The microcomputer board and all plug-in boards are standard Multibus[1] size.

TLA 488-16 recognizes these CIIL commands:

Function
Close
Set
Open
Reset
Confidence Test
Internal Self Test
Status

It recognizes this noun:
Direct Current Source

It recognizes these noun modifiers:

Voltage
Current
Voltage Limit
Current Limit

(the only allowable combinations of noun modifiers are "Voltage with Current Limit" and "Current with Voltage Limit")

It can receive from the power supplies under its control, and transmit to the host computer, these error messages:

Voltage Comparison Error
Current Comparison Error
Invalid Command
Voltage Out of Range
Relay Not Open[2]
Relay Not Closed[2]
Set Modifier Error
Current Out of Range
Device Not Present
Device Not Selected
Device Disconnected
Crowbarred
Overload

TLA 488-16 implements these interface functions on the IEEE 488 bus:

Source Handshake
Acceptor Handshake
Service Request
Talker
Listener
Device clear

---

[1] Multibus™ is a trademark of the Intel Corporation

[2] Refers to optional relay placed between the power supply and the load driven by a separate port of the TLA 488/16

GENERAL SPECIFICATIONS

Ambient operating temperature range: 0 to +55°C Storage range: −20 to +75°C
Mounting: 19" rack (Provisions for Jonathan 130-QD series slides)
A-C input: Selectable 115/230V a-c; 50~60 Hz
Input current: @ 115V a-c: 5A; @ 230V a-c: 2.5A
Aux. d.c. output: +5V at 10A
Dimensions: 5-7/32" x 19" x 16-3/16" Weight: 8 lbs.
Color: Gray, Fed. Std. 26440

PLUG-IN PROGRAM CARDS

(Standard Multibus Size)

The TLA 488-16 has provision for up to four plug-in cards, which can control the voltage and current function of up to four Kepco unipolar ATE or bipolar BOP power supplies.

SPECIFICATIONS

MODEL	For ATE Models: TL 488-1A -2A -4A	For BOP Models: TL 488-4B
Number of isolated input/output ports	1 2 4	4
Analog outputs/port	Two (2) channels.	
Analog output channels mode of Operation	Voltage and Current Limit or Current and Voltage Limit. Determined by noun modifiers within set command.	
Analog output voltage level	0 to + 10V for Volt. or Volt. limit channel 0 to + 1V for Curr. or Curr. limit channel.	0 to ± 10V for main or Curr. channel. 0 to + 10V for complementary Curr. or Volt. limit channel.
Analog output current level	0 to + 2mA per channel.	0 to ± 2mA for main channel. 0 to + 2mA for limit channel.
Output impedance	< 0.05 ohms.	
Output resolution	12 bit.	
Linearity error (0 to + 70 °C)	< ± ½ LSB.	
Adjustments (both channels)	Full scale calibration. Zero adjustment.	
Temp. coefficient (per degree C)	± 0.002% at full scale. ± 20μV at zero.	
Isolation between ports	500V d-c.	
Power supply ident. codes	Set with DIP switch for each port.	
Input signals accepted from the power supply	Supply absent flag. Voltage/current mode flag. Crowbar flag. Volt. out of limit (0.1% of full scale). Curr. out of limit (1.0% of full scale).	
Input digital commands	Via Multibus from TLA 488-16. All signals TTL compatible.	
Power requirements	+ 5V at 2A, via Multibus from TLA 488-16.	
Card, Physical characteristics	Width: 12''. Length 6.75''. Thickness: 0.5''. Weight: 20 ounces.

KEPCO®

INTERNAL DIGITAL PROGRAMMING INTERFACES FOR THE BIPOLAR POWER SUPPLIES

The Kepco Bipolar power supplies in the new 100 Watt, 200 Watt and 400 Watt series are designed to accept a built-in interface card for digital control. The interface cards, termed "BIT", are available in two styles: "-500" for parallel data buses and "-488" for the popular instrumentation bus based on IEEE-488. In either style, the cards are available with either hexadecimal (12 bit) or decimal (3-BCD) format.

Each card is configured to control either the host BOP's voltage control channel or its current control channel as the user may select. There is an additional "limit channel" which can be addressed to control either voltage or current limits with 8 bit or 2-BCD resolution.

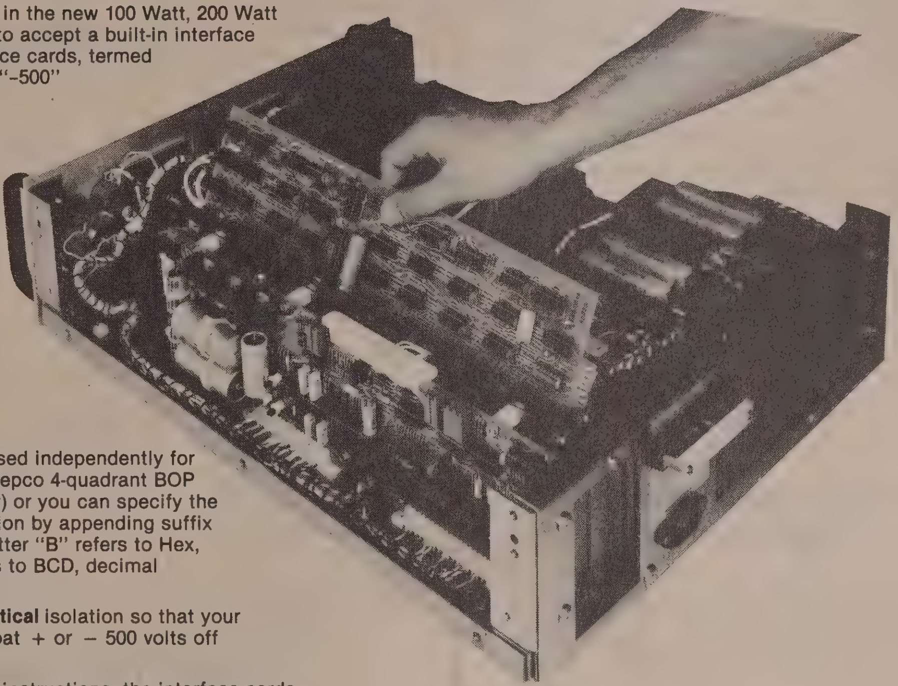
The interface cards can be purchased independently for field installation into an existing Kepco 4-quadrant BOP (100W, 200W, or 400W models only) or you can specify the interface as a factory-provided option by appending suffix -500B (or D) or -488 B (or D). The letter "B" refers to Hex, binary control; the letter "D" refers to BCD, decimal control.

The interface cards incorporate **optical** isolation so that your power supply can be allowed to float + or − 500 volts off digital ground.

In addition to the setting and limit instructions, the interface cards accept polarity (plus or minus) and range (10:1) instructions. The BIT-488 cards (IEEE-488) also implement the GPIB's remote enable and device clear interface functions.

An interconnecting cable is provided for field installation of the series BIT interface card into the host power supply. The interconnect cable from a BIT-488 interface to a GPIB is included when the digital interface is ordered. Model SNQ 488-2 (2 meters long).

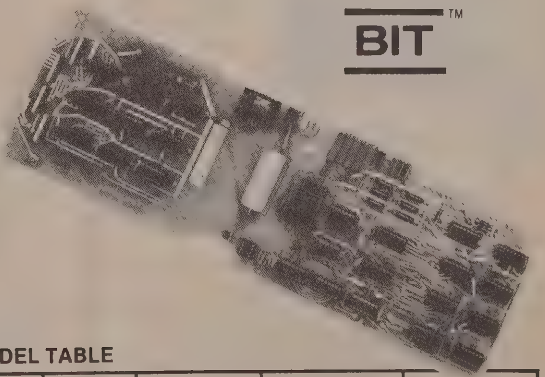
The BIT-500 parallel data interfaces require only a digital input connector model PC-12 which is supplied with the interface card.



Digital interface card mounts inside your BOP and provides either parallel data or IEEE-488 control.

Data Form (For IEEE-488 interfaces)
The digital interface looks for an instruction of the form CMMMLL (six ASCII encoded characters) where "C" is a 1-byte control character that specifies range and polarity while "MMM" are the 3 characters that specify the setting of the main control channel (voltage or current) in terms of percent of full scale. "LL" are the two control characters for the corresponding limit channel.

BIT™



SPECIFICATIONS

OUTPUT VOLTAGE (Main Channel)	High Range	0 to ± 10V
	Low Range	0 to ± 1.0V
OUTPUT VOLTAGE (Limit Channel)		0 to + 10V
OUTPUT CURRENT (Each Channel)		± 2.0 mA max
OUTPUT IMPEDANCE		<0.05 ohms

MODEL TABLE

SUFFIX (1)	MODEL (2)	DATA FORMAT	RESOLUTION Principal Channel	Limit Channel	INPUT
—488-B	BIT 488-B	ASCII/Hex	12 Bits (binary)	8 Bits (binary)	For IEEE-488 (GPIB) bus
—488-D	BIT 488-D	ASCII/Decimal	3-Digit (BCD)	2-Digit (BCD)	For IEEE-488 (GPIB) bus
—500-B	BIT 500-B	Hexadecimal	12 Bits (binary)	8 Bits (binary)	For parallel data transfer bus
—500-D	BIT 500-D	Decimal	3-Digit (BCD)	2-Digit (BCD)	For parallel data transfer bus

(1) Add to model No. of the BOP to specify a factory-installed interface.
(2) Use this designation when ordering separately for field installation.

KEPCO®

STAND ALONE DIGITAL INTERFACES FOR SINGLE OR MULTIPLE CHANNEL OPERATION

These digital programmers are designed for use with all Kepco operationally-programmable power supplies (high speed and conventionally filtered) and/or voltage-controlled instruments. They enable you to interface your d-c power supplies with the logic bus of a computer-controlled system.

The interface output is an isolated ±10 volt analog signal that makes a simple 2-wire connection to the programming terminals of Kepco ATE, BOP and other programmable power supplies.

Use the 2-channel version to control both voltage and current.

The two channels provided on each Model SN 488-B or SN 488-D plug-in card in the 4-card or 8-card housings are not isolated. Use them to control both voltage and current of the same power supply.

MODEL		SINGLE AND DUAL-CHANNEL PROGRAMMERS, ¼-RACK SIZE								PLUG-IN BOARDS FOR 4 CARD & 8-CARD HOUSINGS

	Power	≈12 VA								≈7 VA	
ISOLATION		1000V max. between digital input and analog input									

QUARTER-RACK STYLE PROGRAMMERS

Are available in either bit-parallel format or byte-serial format that is compatible with any IEEE-488 controller. You can buy single channel models or programmers with two independent, isolated channels.

SN 488

A 2-meter long GPIB Cable to SN 488 is included.

Optional connectors:
SNQ 488-1 (Cable, 1 meter)
SNQ 488-2 (Cable, 2 meters)
PC-488 Plug printed circuit edge to IEEE-488

DIMENSIONS: $5\frac{7}{32}$"H x $4\frac{5}{32}$"W x $17\frac{3}{16}$"D.
WEIGHT: 10 lbs.

Applicable to Model SN 488-121,-122,-031-,032
and to Model SN 500-121,-122,-031,-032

CARD-CAGE STYLE PROGRAMMERS FOR MULTIPLE UNIT SYSTEMS

HALF RACK SNR 488-4

Housing for 4 Dual-Channel Cards
SN 488B or SN 488D

DIMENSIONS:
$5\frac{7}{32}$"H x 19"W

RACK MOUNTING SYSTEMS RA 39™ RA 40™ for switchers

The RA-39 and RA-40 rack mount systems are designed to allow you to combine a variety of switching Power Supply modules in a standard 19" equipment housing.

THE RA-39 SYSTEM: This system is designed for installation of the following KEPCO/TDK switching power units:
RMK-S; RMX-A,-B; RMD-SA,-AA,-A,-B; RMT-SA,-AA; RDT-AA; MP-H; CMP-H; ERX-30W, 60W, 120W.

THE RA-40 SYSTEM: This system is designed for installation of the following KEPCO/TDK switching power units:
RMK-S; RMX-A,-B,-C,-N,-D; RMD-SA,-AA,-A,-B,-D; RMT-SA,-AA; RXT-C; RDT-AA; MP-H; CMP-H; ERX-30W, 60W, 120W.

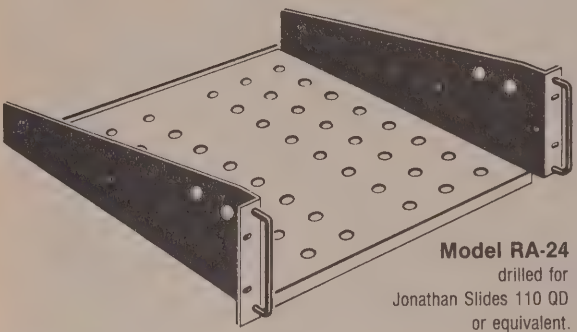
KEPCO® RACK MOUNTING SYSTEMS

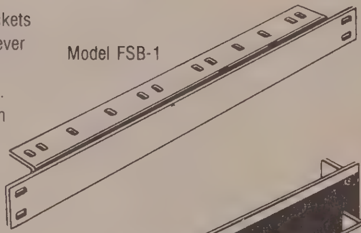
RA 24™ RA 37™

Model RA 24 mounts ATE, APH, BOP, JQE, MPS, OPS IXB, SN 488 and SN 500.
Model RA 37 mounts only ATE, SN 488, SN 500 and BOP ¾ Rack.



Model RA-24
drilled for
Jonathan Slides 110 QD
or equivalent.

Model FSB
The filler support brackets should be used whenever the total load in an RA-24 exceeds 75 lbs. Mount directly beneath the lower front edge of the housing and fasten to the rack edge.



BLANK FILLER PANELS
are finished with a matching stripe on one side and solid gray on the other. Color 26440 per Fed. Std. 595.

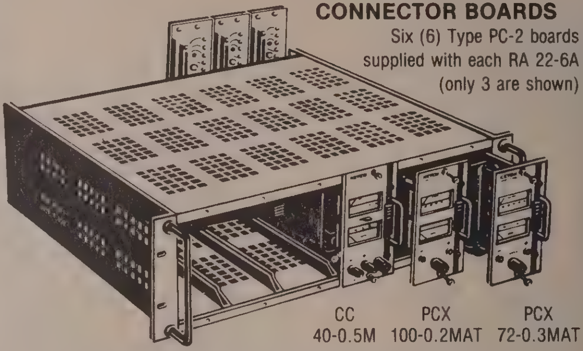
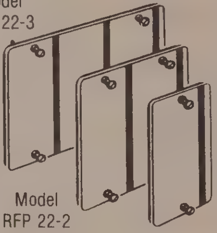
RA 22-6A™ RA 32™

The model RA-22-6A mounts Kepco Laboratory-type power supplies CC and PCX-MAT
The model RA-32 mounts, CC, PCX-MAT and any one ½ Rack or two ¼ rack size models.

PLUG-IN CONNECTOR BOARDS
Six (6) Type PC-2 boards supplied with each RA 22-6A (only 3 are shown)

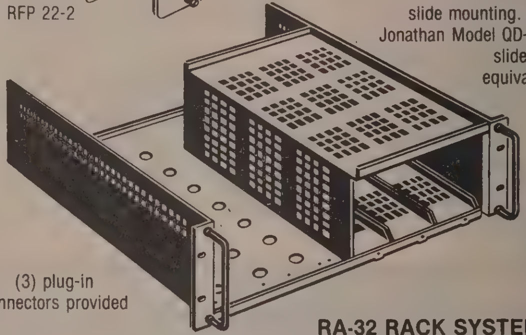


6-SLOT RACK HOUSING—MODEL RA 22-6A



FILLER PANELS
supplied without slide assembly and handle, may be used to fill unused slots in RA 22-6A, RA-32, CA-4 and CA-5.

NOTE: RA-32 is drilled for slide mounting. Use Jonathan Model QD-110 slides or equivalent



RA-32 RACK SYSTEM
combines three plug-in slots of the RA 22-6A with a half-rack space from RA-24 to provide a convenient way of mixing models.

MODEL	DESCRIPTION	DIMENSIONS[2] H	W	D
RA 22-6A	Six-slot rack housing including (6) PC-2 connectors.	5 7/32 132.6	19 482.6	16¼ 412.8

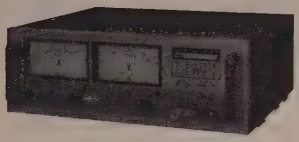
KIK – Supplies for Labs and Systems



Eight Series in 93 Models are Available

PAC Series (8 models)
General Purpose Power Supplies.
To 110 @ 1A-To 10A @ 16V.

PAD-L Series (45 models)
High Current, Low Noise, High Precision
To 1000V @ 0.2A-To 500A @ 16V.

PAB Series (17 models)
Low Cost Power Supplies
To 350V @ 0.2A-To 5A @ 8V.

PAB-A Series (5 models)
Digital Readout Economical
32 @ 2.0A to 18 @ 3A

PAL Series (6 models)
Highest Efficiency >70% Lightweight
16V @ 20, 40, 60A and
32V @ 10, 20, 30A.

POW Series (3 models)
Bi-Polar Power Supply/Amplifier
±35V @ ±1A, ±35V @ 5A,
±70V @ 2A.

PDM Series (5 models)
Dual Tracking Power Supplies
To ±60V @ ±0.5-To ±3A @ ±35V.

PAE Series System Supply (3 models)
High Speed — Low Noise Modes
0-35V @ 10 amps, 20 amps or 30 amps.

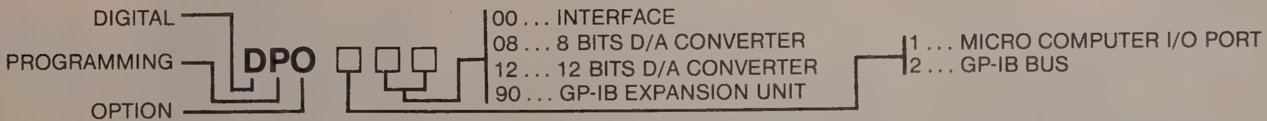
Programmable Options – DPO Series

The DPO was developed for use with the Kikusui PAD-L line of power supplies in automatic testing applications. The DPO can also be used with the Kikusui Electronic Load (PLZ) the PAE Series and PAL Series.

The DPO Series is divided into two parts. The DPO100 Series interfaces with a micro-computer I/O bus, while the DPO200 Series interfaces with the IEEE-488 bus.



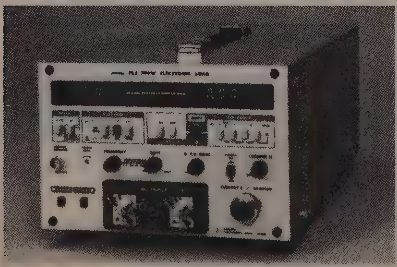
DIGITAL
PROGRAMMING
OPTION
DPO
00 . . . INTERFACE
08 . . . 8 BITS D/A CONVERTER
12 . . . 12 BITS D/A CONVERTER
90 . . . GP-IB EXPANSION UNIT
1 . . . MICRO COMPUTER I/O PORT
2 . . . GP-IB BUS

Compact
The D/A converter comes in a compact package which fits on the back of Kikusui power supplies.

Optical Insolation
The power source is optically isolated from the controller, protecting the controller from possible damage.

Expandable System
Just by adding an Expansion Unit (DPO290), it is possible to control up to 10 units using only one Interface (DPO200).

Electronic Load for General Purpose Power Supply Testing – Model PLZW



- Internal or external signal
- Internal square wave generator with variable duty cycle
- Operates in 3 modes – resistance, constant voltage, constant current
- 3 simultaneous display modes – voltage (digital) – current (digital) & peak power
- Resistance and average power displayed digitally
- Upper and lower current limit (in square wave mode) are independently controlled
- Max. capability – 4 to 60 Volts; 30, 60 & 140 amps; 150 - 300 - 700 watts

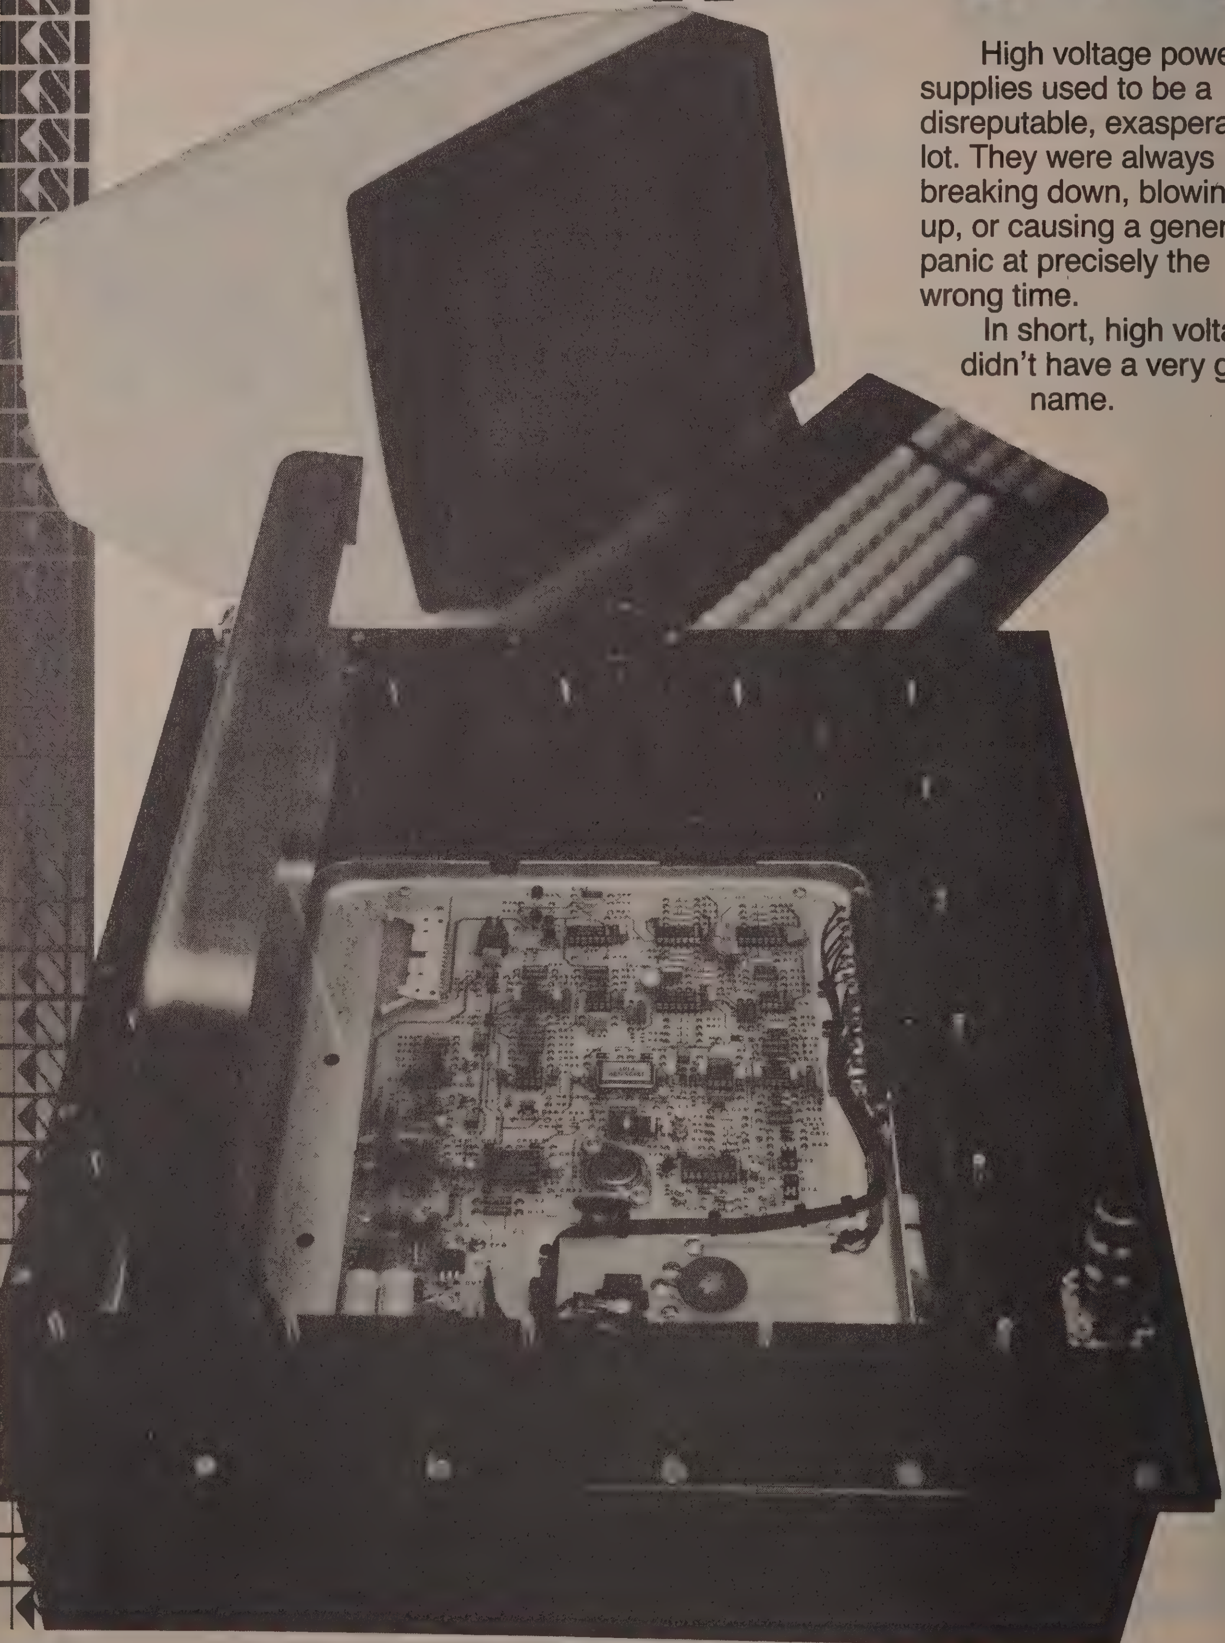
High Voltage Power Supplies: The

High voltage power supplies used to be a disreputable, exasperating lot. They were always breaking down, blowing up, or causing a general panic at precisely the wrong time.

In short, high voltage didn't have a very good name.



Inside Story.

Then along came a company called KSI. Remarkably, KSI brought common sense (and uncommon engineering) to the uncertain world of high voltage.

First, KSI invented the Arc Quencher™—an ingenious new design that makes high voltage power supplies short-circuit proof. And unlike other "fail-safe" systems, the Arc Quencher doesn't preserve itself at the expense of the load.

KSI then added double shielding, RFI filtering, isolated control power, and many other protective features.

Finally!!! High voltage power supplies were becoming reliable, upstanding citizens!

But KSI didn't stop here. High voltage power supplies were still notoriously behind the times. Who wanted to put an antique bucket of bolts into a highly advanced system?

So KSI went to work. It employed the latest vacuum-tube and control-circuit technology. It housed the components in compact tanks and modern control modules. And it used plug-in PCBs with LED indicators and test points.

To make matters even better, KSI taught its power supplies to speak ASCII with computers. Through fiber optics, computers precisely control each critical aspect of power-supply operation.

What's more, KSI is applying the same sensible engineering approach to high-frequency switchmode and resonant supplies.

And now for the happy ending: KSI custom designs high voltage *systems* for a whole range of applications, including:

- Ion implantation
- X-ray systems
- Lasers
- E-beam systems
- Ion deposition
- Ion milling.

To find out the latest developments in this exciting and continuing story, call or write: Kaiser Systems, Inc., 33 Cherry Hill Drive, Danvers, MA 01923. Phone (617) 777-5102. TWX: 887159. FAX: (617) 777-3340.

Typical Specifications

Description	Output Voltage	Reg.	Max. Current	Technology	Application
Multiple Output	Quad 0 to 10kV	.05%	4x 4mA	High-freq.	Beam optics
	0 to 10V 0 to 1.5kV 0 to 10kV	1% 1% 1%	300A 2.2A 40mA	High-freq. resonant	Deposition systems
D.C. Adjustable	+5 to +100kV	.01%	40mA	Output tube regulation	Ion implanters
Pulsed	+40 to +130kV	.1%	800mA		X-ray
Bipolar	−75, +75kV	.01%	200mA	High-freq. resonant	
Fixed voltage	25kV	1%	100mA		Lasers

High Voltage Power Supply Selection Guide

Selecting the right high voltage power supply for a specific application requires careful consideration of many parameters. The following table, which compares the performance characteristics of several types of high voltage supplies, will provide guidance in making the appropriate choice for your application.

Type	Unregulated	Input Regulated			Output Regulated
Technology	—	linear	switch mode	resonant converter	linear
Frequency	50 Hz to 400 Hz	50 Hz to 400 Hz	10 kHz to 50 kHz	10 kHz to 50 kHz	50 Hz to 400 Hz
Output Voltage (Max.)	to > 1 MV	to > 1 MV	to 500 kV	to 500 kV	to 150 kV
Power Level	any	any	to 3 kW	to 50 kW	200 W to 200 kW
Regulation Method	N/A	var. transf. SCR	pulse width modulation	freq., phase modulation	series pass element
Stored Energy*	high	high	low	low	lowest
Output Current Limit Δt	≥ 10 ms	≈ 10 ms	≈ .1 ms	≈ .5 ms	< 1 μs
Transient Response	N/A	slow	medium	medium	very fast
EMI	very low	medium	high	medium	very low
Efficiency	≈ 95%	≈ 90%	≈ 85%	≈ 85%	75 to 90%
Parts Count	lowest	low	high	high	low
Size per Watt	large	large	small	small	large
Cost per Watt	low	medium–high	medium	medium	high
Insulation Medium	air, oil, SF6		air, oil, SF6, encapsulation		air, oil, SF6

*Stored energy at output due to output filter. Low filter requirements (higher ripple) reduce stored energy.

Choose your supplier as carefully as you choose your supplies. Ask yourself the following: are his designs modern, efficient, and reliable? Does he care as much about quality as you do? Will he deliver on time and to specifications?

Then call KSI.

We've given high voltage power supplies a good name...

SWITCHING POWER SUPPLIES

L-COM has gained a reputation by selling high quality switching power supplies to users who value product reliability and consistency of delivery performance.

Our design and manufacturing expertise has been focused on the varied requirements of our OEM clientele which resulted in the development of the eight families of standard switching power supplies as shown below. This is only a brief outline of product availability and capabilities but it does represent the culmination of an intensive design and development program including quality and reliability testing.

Some of the built-in features found in L-COM switchers include: Continuous use ratings; Dual AC inputs; EMI-RFI Filters; Soft start and brown out features; Replaceable fuses; Conforming to UL-478; Post regulators as required; Adequate hold-up time after loss of AC power; Adequate load and line regulation; etc. Burn-in is provided to assure years of predictable trouble-free service and all switchers are fully warranteed for one year.

Our customer service people stand ready to discuss your specific needs. If your requirements fall in the 15 to 150 watt category, there's a good chance that L-COM could help you.

SPECIFICATIONS

OUTPUT POWER
50 to 240 Watts.

OUTPUT VOLTAGES
5, 12, 15 and 24 Volts.

OUTPUT CURRENT
25 Amps maximum.

COOLING
Convection or external forced air flow of 200 LFM.

INPUT VOLTAGE
92-132VAC or 184-264VAC, 47-63 Hz. Conversion by strapping change on PCB (no soldering required).

HOLD-UP TIME
20 msec minimum after removal of nominal AC input.

PARD (RIPPLE & NOISE)
1% or 100 mV, whichever is greater. Over 50 Hz-20 m Hz 8W.

EFFICIENCY
Up to 80% (70% typical).

OVERVOLTAGE PROTECTION
Standard for V1.
Factory set at 125% ± 7%.

OVER POWER PROTECTION
Fully protected from excessive power and output short circuits. A sustained fault condition will latch the power supply off. Removal of power for 30 seconds will reset the power supply. CAUTION: Outputs should not be loaded above their rated loads or damage may occur.

OVERSHOOT-UNDERSHOOT
Less than 5% for line turn on/off. Less than 2% for 20% step load change (Load current must not drop below 20%).

RESPONSE TIME
For regulated outputs — 1 msec maximum within 1% after a 20% step load change at < 1A/μsec.

OPERATING TEMPERATURE
0-40°C full power. Derates linearly to 50% power at 70°C.

STORAGE TEMPERATURE
-55°C to +85°C.

OUTPUT POLARITY (Triple & Quad Supplies)
V1 and V4 are floating and may be referenced as either positive or negative outputs. +V2 and -V3 share a common return.

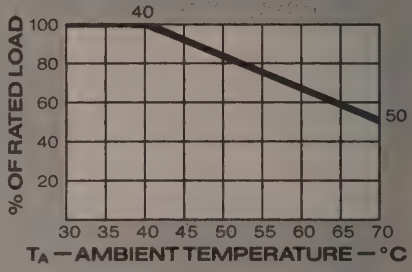
LIMITED INRUSH CURRENT
AC inrush current is limited to the following when averaged over one cycle:
115VAC — 14A Max.
230VAC — 28A Max.

VOLTAGE ADJUST RANGE
±5% for V1.
Available for selected models.

REMOTE SENSE
Standard for V1 output.
Compensates for up to 250 mV total cable drop.

SHOCK (Operating)
15G peak for 11 msec, hard mount.

POWER DERATING CURVE



VIBRATION (Operating)
5-500 Hz at 0.75G peak, limited by 0.25 inch double amplitude.

SAFETY
Meets applicable requirements of IEC 380, VDE 0806, UL1012, CSA 22.2, No. 143 and 154.

EMI (ElectroMagnetic Interference)
Meets VDE 0871, Curve "B," and FCC Docket 20780, Curve "B."

MOV — Provides protection against input line transients.

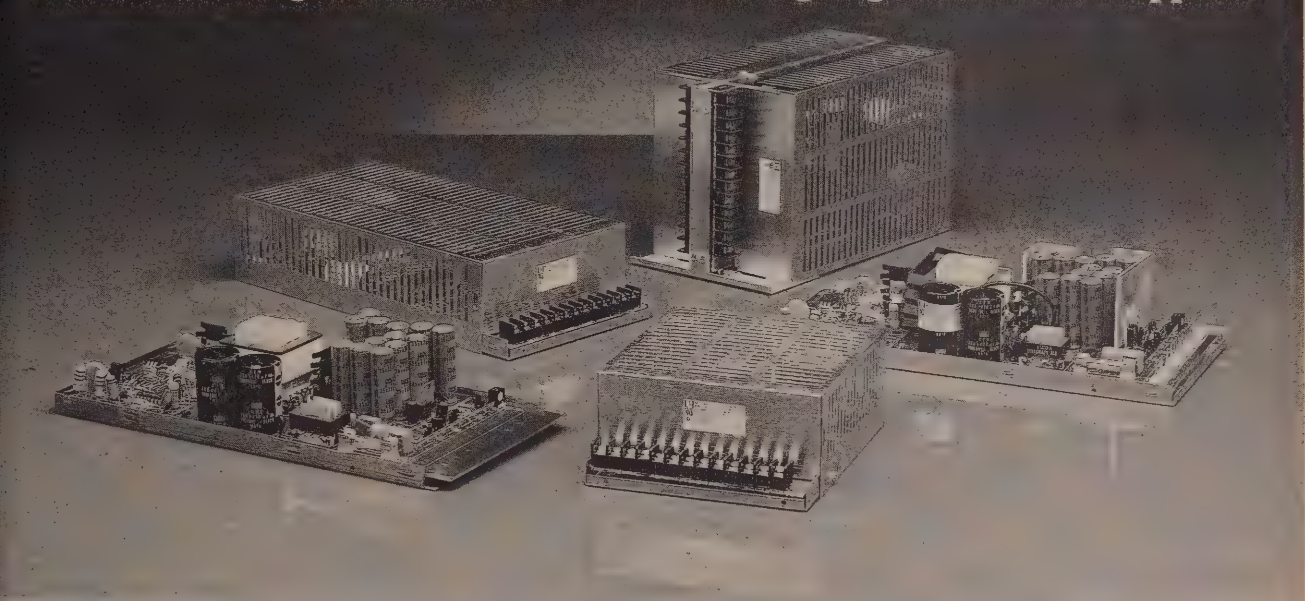
PRINTED IN USA

The World's Largest Manufacturer of Switching Regulated Power Supplies.



NEW! 50-240W Multi-Output Switchers that Meet All Safety & Emissions Specs, and Are Price-Competitive with Linears.

At last! A broad line of low power switchers that is priced competitively with linear power supplies.

Introducing the new International-MITE Series switchers. They offer you a broad selection of high performance power at low, low prices.

Available in three basic configurations, the new IM series is designed to meet or exceed the most stringent federal and international safety and emissions specifications. And every supply is made by LH Research; your best assurance of quality and reliability.

- State-of-the-Art MOSFET Circuitry.
- 130 Basic Models.
- Four Basic Terminations:
  - Barrier Strip
  - AMP/Molex
  - Edge Card Compatible
- Up to 8 Outputs Available.
- Three Basic Configurations:
  - Enclosed
  - Base Mounted
  - PC Board
- Designed to Meet UL, CSA, VDE and IEC Safety Specifications.
- 115V or 230V, User-Selectable.
- Designed to Meet VDE and FCC Emissions Specifications.
- Automatic Shutdown and Restart on AC Power Surge — Self-Protecting.
- Regulated & Semi-Regulated Versions.
- Off-the-Shelf Delivery.

FOOTNOTES:

*Except TTM models (5-24 VDC only).

1 Maximum output 100 watts.

2 Maximum output 250 watts.

3 Maximum output 500 watts.

4 Contains two 375W mains (750W total). Total loading of each main plus all associated auxiliaries combined not to exceed 375W.

5 See SM11 for typical photo.

6 Little-Mite: 115 or 230 VAC, Dyna-Mite: 48 VDC input.

7 DMA33 and DMA34 have maximum of 4 outputs.

GENERAL NOTE:

Actual maximum auxiliary currents will vary depending on voltage levels.

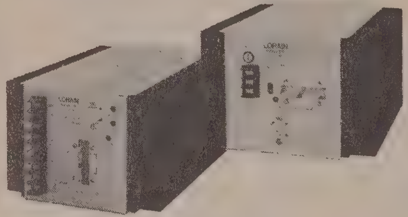
BRING IT TO THE POWER SUPPLY PROBLEM SOLVER!

PROBLEM X:

A 70°C AMBIENT FOR AN INDUSTRIAL METALS PROCESS.

SOLUTION:

THE HI-TEMP POWER SUPPLIES FROM LORAIN PRODUCTS.



The Problems Solvers at Lorain specified aluminum alloy (6063-T5) heat sinks with special black anodize to maximize heat transfer. Capacitors, IC's, and other devices are rated for high temperature operation. Our magnetics are designed with more volume than usual to reduce losses and provide better heat dissipation. No derating tricks. Full output power at the required ambient. Lorain can do it. Lorain has done it!

HI-TEMP SWITCHERS

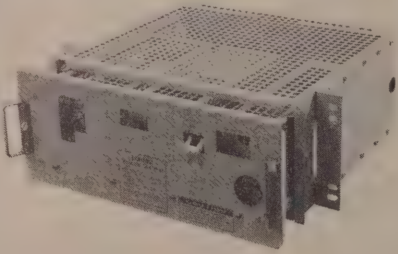
MODEL	OUTPUT
ES281AM	5V @ 45A, +12V @ 3A, −12V @ 2A
ES311F5	5V @ 60A
ES311X5	5V @ 60A (48 VDC input)
ES381CM	5V @ 60A, +15V @ 5A, −15V @ 1A

PROBLEM Y:

LOST MEMORIES DURING POWER FAILURES; SCRAMBLED DATA DUE TO LARGE MOTOR START-UPS OR CIRCUIT BREAKER TRIPS.

SOLUTION:

THE LORAIN COMPANION BACK-UP WITH BATTERY MODULE AND AUTO-RECHARGE.



Memory is lost during a power interrupt. Logic becomes illogical and data highways miss their exits. No more. Lorain's back up takes over — for seconds or minutes — until the power is restored to normal or allows for orderly shutdown. A built-in alarm tells you when it's working and it recharges itself when power returns. Easy plug-in installation in a rack or modules for direct mounting.

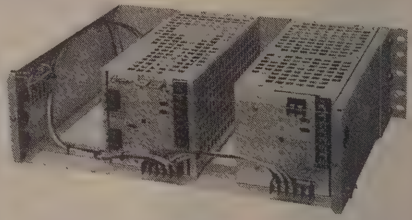
MODEL	OUTPUT
151H1A3U	5V @ 30A
151H3B3U	5V @ 15A, ±15V @ 2.5A
151F1G4C	24V @ 5A
301H1B3U	5V @ 60A

PROBLEM Z:

A PROCESS CONTROLLER NEEDS STANDARD VOLTAGES AT NON-STANDARD CURRENTS.

SOLUTION:

THE LORAIN COMPANION MULTIPLE OUTPUT POWER ASSEMBLY.



We select from our ®UL, FCC and CSA certified OEM output modules . . .

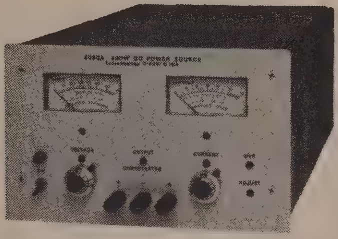
MODEL 4060A "CONSTA-POWER" EXPANDED RANGE POWER SOURCE



APPLICATIONS FOR LABORATORY-PRODUCTION-SYSTEMS

This 200 watt DC power source operates automatically in a constant-voltage or constant-current mode.

The precision MOSFET SWITCHING technology power source provides the rated 200W power over a 20 to 60 volt range, as shown in the figure. This "CONSTA-POWER" feature provides more current at lower voltages and, conversely higher voltage for a given current level.

The 4060A has available a maximum voltage of 60 volts and a maximum current of 10 amperes. Precision vernier control of voltage or current is by 10 turn potentiometers featuring a counting dial for accurate logging, and a lock level to prevent accidental mis-adjustment by production personnel. These "counting dials" also simplify returning to a given set of test conditions for laboratory or production applications.

OPERATIONAL FEATURES

- Adjustable overvoltage protection
- Fast remote programming speed
- Operation mode status indicators
- Current-locking 10 turn voltage and current controls providing high resolution
- High efficiency, light weight
- External programming of output voltage and current by voltage or resistance
- Auto-Parallel operation: up to 8 units can be connected for additional output current, controlled by one master unit
- Auto series operation of up to 4 units providing a maximum of 240 volts, controlled by one master unit.

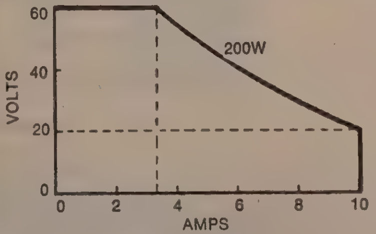
OPTION 01 — REMOTE PROGRAMMING THROUGH IEEE BUS

The 01 option makes possible digital control of the supply by a computer, calculator or other controllers. The digital format is bit parallel, byte serial ASCII coded format conforming to IEEE Standard 488-1978 (GPIB).

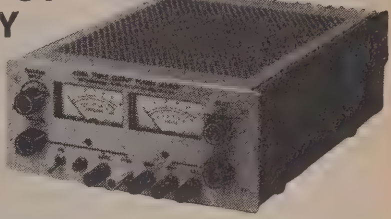
Basically, the 01 option is a digital-to-analog converter which programs either the output voltage or the output current. If both voltage and current programming is desired, either can be selected for BUS control and the remaining is programmed by an external analog voltage or resistance.

Option 01 can be installed at the factory or in the field.

DIMENSIONS: 8.5″ W x 5.25″ H x 15.6″ D. Net weight 12 lbs. Operation over 87-240 VAC, 48-63 Hz. Normal AC input 104-127 VAC, 48-63 Hz. 5.3A RMS max.



MODELS 4206A & 4218A TRIPLE OUTPUT LABORATORY POWER SOURCES



LuTechnology, Inc. introduces the Series 4200 triple output laboratory power sources.

TRIPLE OUTPUT POWER SOURCES FOR OPERATING PROTOTYPES

The LuTechnology Model 4206A and Model 4218A triple output laboratory power sources are valuable tools for developing operating prototypes utilizing digital and linear integrated circuits, microprocessors and displays.

High performance, small size, ease of operation make the Series 4200 power sources an asset to any laboratory environment. Measuring only 3½ inches (88.1 mm) high, 8¼ inches (208.7 mm) wide and 12½ inches (319.1 mm) deep, these 9½ pound (4.3 kg) units require very little space and are easy to handle.

DUAL TRACKING OUTPUTS

The 4200 Series power sources from LuTechnology combine 0 to ±20 volt tracking outputs rated at 0.5 amps with a single output rated at 0 to +6 volts at up to 2.5 amps in the 4206A and 0 to +18 volts at 1 amp in the 4218A.

OVERLOAD PROTECTION

The 4206A has a current foldback characteristic which provides further overload protection for the +6 volt output which reduces the maximum available current and minimizes semiconductor dissipation during overloads.

All outputs are protected against overload and short-circuit damage by fixed current limiting circuits. The +20 volt and −20 volt outputs in both models are limited to 0.55 amps and the +18 volt output in the 4218A is limited to 1.1 amps.

THE SERIES 4200 POWER SOURCE FEATURES

- Selectable line voltages. Standard 120 VAC, 100 VAC or 240 VAC. 47-63 Hz
- Convection cooled.
- Rack mounting kits optional
- Color: panel-light olive; cabinet — willow green.

ELECTRICAL CHARACTERISTICS

PARAMETER	SINGLE OUTPUT		DUAL TRACKING OUTPUTS
	4206A	4218A	4206A & 4218A
DC Output — Volts	0 to +6V	0 to +18V	0 to +20V & 0 to −20V
DC Output — Amps	2.5A at 6V decreasing to 1.0A at 0V	1.0A	0.5A per output
Tracking Agency	Not Applicable	Not Applicable	1% in fixed tracking ratio mode *
Resolution	20 mV	70 mV	70 mV
Output Impedance (Typical)	0.3 mΩ + 1 μH	0.3 mΩ + 1.5 μH	0.5 mΩ + 1.5 μH
Output Mode	Constant Voltage/ Current Foldback	Constant Voltage/ Current Limited	Constant Voltage/ Current Limited
PARD (Ripple & Noise)	0.35 mV rms, 20 Hz to 20 MHz 1.5 mV p-p, 20 Hz to 20 MHz		
Temperature Coefficient	(0.02% + 1 mV)/°C		
Drift (Stability)	0.1% + 5 mV		
Load Effect (Load Regulation)	0.01% + 2 mV		
Source Effect (Line Regulation)	0.01% + 2 mV		
Load Transient Recovery	50 μs to within 15 mV		
Output Voltage Overshoot	Output control setting ≥1V: No overshoot Output control setting <1V: Sum of output plus overshoot <1V		

* In variable tracking ratio mode, negative tracking output can be adjusted from less than 0.5V to within ±10% of the setting of the positive output.

ALL AMERICAN MADE

All LuTechnology products are warranted against defective materials and workmanship for a period of three years from date of shipment.

FEATURES:

- Fully isolated outputs
- Meets UL and CSA requirements
- Overvoltage and overcurrent protected
- Plug-in convenience
- Multiple and single output to 12 watts
- Lightweight, tough impact resistant casing
- High efficiency
- One year warranty
- Short circuit protected
- Complies with FCC EMI regulations
- Regulated with low ripple
- Available with input and/or output cords and connector

BENEFITS:

- Reduce size and weight of product
- Reduce design time for product
- Eliminate power supply heat and need for other cooling devices
- Eliminate hazardous voltages
- Provide a tamper-proof power source

SPECIFICATIONS:

Input:	117V ± 10% 50/60 Hz
Regulation:	+5V 2% overall
Regulation:	+15V or +12V 5% overall
Regulation:	-15V or -12V 5% overall
Ripple:	50 MV P-P
Operating Temp:	0° C to +50° C
Storage Temp:	-55° C to 105° C
Operating Altitude:	15,000′

Custom Design

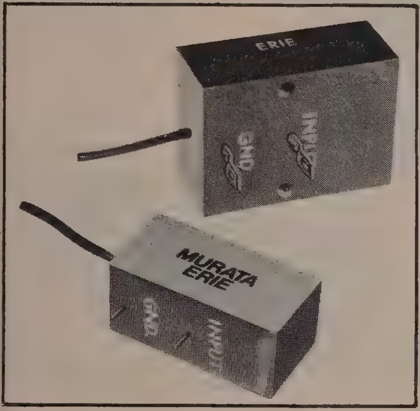
The design and fabrication of custom high voltage power supplies is a highly sophisticated specialty in which Murata Erie enjoys a high standard of excellence.

Miniaturization of power supplies is easily accomplished at Murata Erie through the use of its own miniature rectifiers, capacitors and specially designed series-bank capacitors. Industrial and military standards are met efficiently and economically, for high quality, low cost power supplies over a wide range of high voltage applications.

Murata Erie Sales Engineers are available at all times to discuss power supply requirements.

TYPICAL OPTIONAL FEATURES

- Positive or Negative Output Requirements
- Positive or Negative Input Requirements
- Multiple Outputs
- Isolated Output, with Separate Ground Return
- Inhibit Gate Input, to Turn Off the Power Supply
- Short-Circuit from Reverse Input Polarity
- Overvoltage Input Protection
- Output Current Limiting



Standard Designs

The MPS series of low cost miniature power supplies was originally designed for miniature CRT displays, but they have found a wide range of applications in the 1 KV to 5 KV range.

FEATURES

- PCB Mounting
- Miniature — Low Cost
- Ideal for many electro-optical applications

SPECIFICATIONS

Electrical

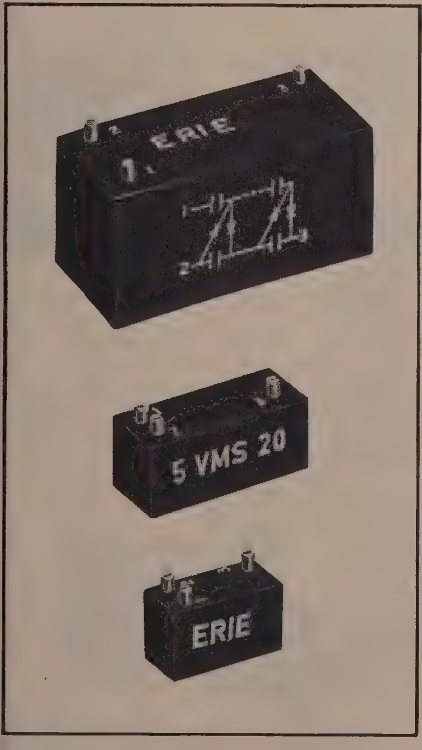
Input: See part number
Output Voltage: See part number
Output Current: To 100 μA
Load Regulation: <10%, 0 to full load
Ripple: <0.5% p-p, full load
Temp. Range: 0°C to 70°C (operating)

Mechanical

Size: .76″ x .76″ x 1.56″
Weight: <1.4 oz. (40 grams)
Terminations: PCB pins (input), 3″ lead (output)

Optional Features

— Negative input and/or output
— Isolated output (extra output ground PCB pin)
— Inhibit gate (extra PCB pin)



Multipliers

Murata Erie designs and manufactures a wide variety of custom designed high voltage multipliers. The units shown on this page are illustrative of the capabilities and expertise that Murata Erie can apply to meet your particular high voltage power supply specifications. Our application engineers will be happy to work with you to provide the best possible solution to your specific design and packaging application requirements.

FEATURES

- High Voltage Miniaturized Packaging
- Solder Post Terminations
- Positive or Negative Outputs Available
- Solid Encapsulation Eliminates Corona and Provides Environmental Protection

Send us your custom switcher specs

When your application calls for a custom power supply, get National Power Technology on the line, fast.

We have the full-service expertise to design and build the supply that meets your most critical requirements.

Our highly skilled engineering staff will thoroughly review your specification to ensure a reliable, cost-effective solution.

Manufacturing follows the latest, most up-to-date assembly techniques, with progressive workstations, state-of-the-art functional testing and 24-hour burn-in.

Quality is assured through multiple, on-line inspections and strict adherence to production test procedures developed from your specification. All units are carefully burned in under controlled temperature and loads; then, they are re-tested prior to shipment. Our typical MTBF rates exceed the most demanding industry standards.

So call us. Your custom power supply will arrive as specified. On time. And within budget.

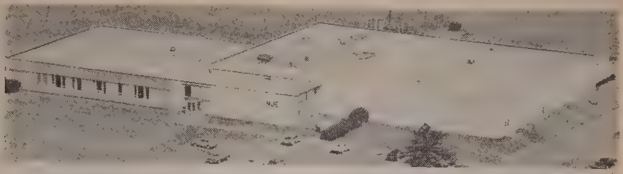
NJE 5 YEAR WARRANTY ON ALL POWER SUPPLIES AGAINST DEFECTS IN MATERIAL OR WORKMANSHIP



DEPT. E, 50 CULVER ROAD, DAYTON, N.J. 08810 • PHONE 201-329-4611 • TWX: 710-480-5674

300-1728 WATT SINGLE OUTPUT SWITCHERS
ALL MODELS ARE IN TRUE INDUSTRY STANDARD 5"x8"x11"PACKAGE

- CSA Certified
- UL recognized
- 5 year warranty
- Expanded AC input range
- Inrush current limiting
- Up to 85% efficiency
- 0.2% line/load regulation
- OVP standard on all models
- Remote inhibit
- Power failure signal
- 20 msec hold-up time
- Reverse voltage and overload protection
- Remote sensing; loss of sense protection
- Thermal protection; automatic restart
- Full rated to 50° C, operation to 70° C
- Industry standard case size, 5"x8"x11" (11¼" with fan cover)

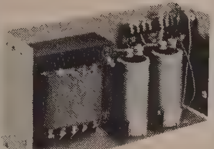
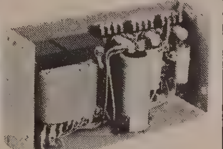
SINGLE



DUAL

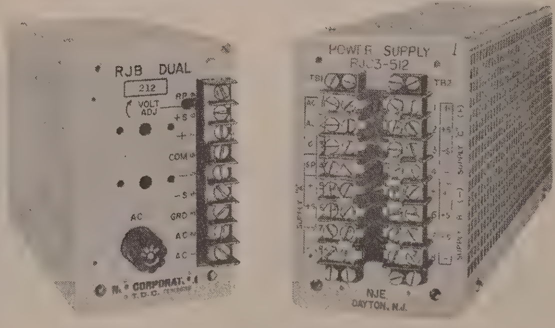


TRIPLE

- CSA Certified
- UL Recognized
- 5 year warranty
- Input: 115/230 VAC ± 10%, 47-440 Hz
- 0.1% line regulation for total line change
- 0.1% load regulation for 100% load change
- Adjustable OVP standard on 5 volt units, optional for others
- Adjustable foldback current limit
- Reverse voltage protection
- Remote sensing; loss of sense protection
- Quad output models also available
- Industry standard case sizes

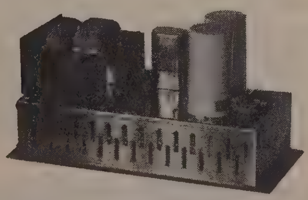
STANDARD & CUSTOM OPEN FRAME LINEARS

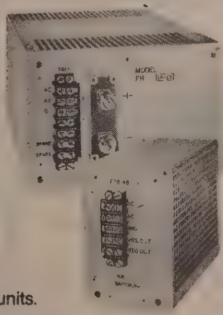
year version of industry standards.



FULLY-ENCLOSED STANDARD & CUSTOM LINEAR

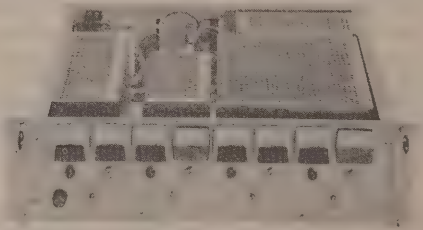
For critical applications requiring excellent regulation (.01% + 1mV), very low ripple and noise (1mV rms). Over 320 single and multiple output models; 2-500V/ .1-175A.





IGH QUALITY STANDARD
CUSTOM FERRORESONANT

or highest reliability. Efficiency, 65 to 0%; Highest MTBF per Watt. Up to 400V, 2000W units.



RACK MOUNTING ACCESSORIES

for systems using NJE power supplies and custom rack system capability.

PRECISION CURRENT & VOLTAGE SOURCES

PRECISION CURRENT SOURCES

ACCURACIES TO 0.01% **STABILITIES TO 2 PPM**

APPLICATIONS:

- Laboratory and Production Testing of Semiconductors, Gyros, Lamps, Meters, Thermistors, etc.
- Systems requiring a Precision Constant Current Setting such as X-ray Equipments, Electron Beam Welders, and Electron Beam Microscopes.

FEATURES:

- Digital In-Line Current Setting and Readout.
- 5 or 6 Decade Dividers for Setting to 1 Part in 100,000 or 1 Part in 1,000,000 of Full Scale.
- Uni- and Bi-Polar Models.
- Externally Programmable Models.
- External Modulation Capability.
- Automatic Protection Circuits.

DCVS-220

PRECISION VOLTAGE/CURRENT SOURCES

These highly stable and accurate precision sources can be operated in either constant voltage or constant current modes.

All models include such features as manual and remote programming, and output voltage regulation by either local or remote sensing.

Voltage and current outputs are selected on decade switches whose markings form an in-line digital readout.

Automatic protection limits output voltage and current to safe levels. No voltage or current overshoot occurs during turn-on or turn-off. A warning indicator alerts the operator if the actual output should differ from the dialed setting beyond the specified limits. Models TC-100.2BR and TC-602CR include a panel meter to monitor output current.

Model	Constant Voltage (V)	Constant Current (mA)	Accuracy (%)	Stability (ppm)	Decades

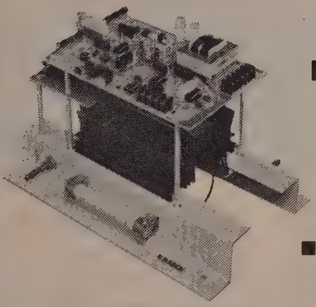
CUSTOM AC/DC POWER SUPPLIES
CONVERTERS, INVERTERS, CONTROLLERS

FROM WATTS TO MEGAWATTS

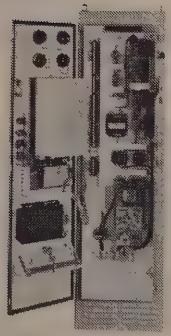
Products from NWL:
- AC/AC & AC/DC power supplies and controllers
- Silicon controlled rectifier (SCR) supplies
- High or low amperage and voltage
- Regulated: voltage, current and power
- Polarity reversing power supplies
- Transformers (oil, silicone, water-cooled, epoxy, dry)
- Reactors/chokes/filters

Products from
MEGATRAN ELECTRONIC POWER:
- Phase angle modular power controllers
- Phase angle firing circuits
- Voltage current regulators
- DC amplifiers (5 AMP + 25 AMP models)
- Current limiters
- Solid state alarm modules
- Diode stacks

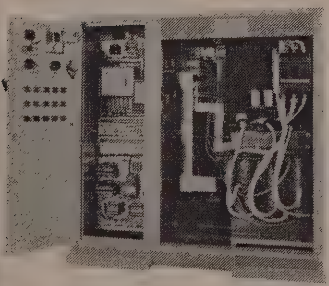
TYPICAL OF THE RANGE OF NWL CAPABILITIES. . .



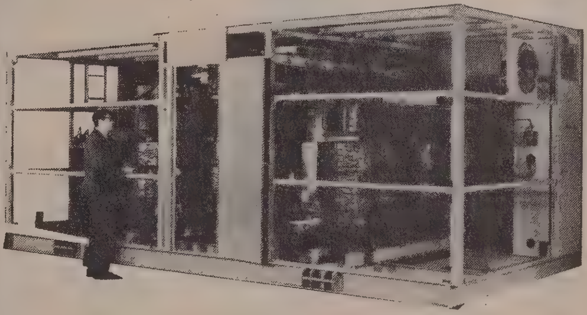
Phase Angle Modular Power Controllers
- AC line amperes: from 40 to 495
- "Linear" firing circuit
- RC network and MOV
- SCR's individually fused



Patented Microprocessor based SCR Controller with spark-rate logic for electrostatic precipitator application.



DC Power Supply for Super-conducting Magnets — 0-50 VDC @ 5000 Amps DC. Incorporates 12 pulse output, phase-angle controlled SCR's, L.C. Filter and programmable controller.



6.34 Megawatt Power Supply
- 20-ton unit for Compact Toroid Experiment (CTX). . .entirely produced at NWL's facilities. . .from micro-electronics, to magnetics, to fabrication and assembly, to full-load testing

MANUFACTURING RANGE

Up to 200 KV
1 ma to 50,000 AMP
4 Hz to 50 kHz
5 KVA to 6,000 KVA
Dry, Oil-Filled, Silicone Fluid-Filled, Water Cooled, and Epoxy Cast Units Available.

NWL also manufactures various types of power transformers, reactors, chokes. See our full page ad in the transformer section of EEM. Our engineers are available to assist you in selecting magnetic components to meet your application requirements.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

1500 WATT, 100 KHz OFF-LINE SWITCHMODE POWER SUPPLY — MODEL SP-1500-XX

2.0 to 48.0 Volt Outputs (5.0 Volt, 300 Amperes, Specifications Typical)*

The SP-1500X series achieves 3.75 watts per cubic inch with standard forced air cooling. Reliability is in excess of 100,000 hours — MTBF in the commercial version.

This series is suitable for applications in high reliability main frame systems, telephone switchgear systems, and other systems requiring low to medium voltages. The basic converter topology used is also being applied in custom high voltage applications, such as S and K band TWT amplifiers and jammers.

ELECTRICAL CHARACTERISTICS

Output Voltage Range: 4.5V to 5.5V
Output Current: 300A
Output Overcurrent adj. range: 50A to 325A
Output Ripple, Max. rated Load current: 35 mv P-P Max.
Output Voltage Regulation: ±0.2 Max.
Holdup Time — Standard: ≥10 Msec
Float Battery Option Available
Overvoltage Protection
(Automatic reset or latch avail.): 6.0 ±25V
Short Circuit Current
(Automatic reset or latch avail): 0 Amps
Logic Inhibit (≤0.5V inhibits, ≥2.4V enables): TTL Compatible
Remote Sense (both output and return): 0.5V Max.
Polarity (Isolation: ±200 VDC to chassis): Floating Output
Overtemperature Flag (normally open): Sinks 5 ma Max.
Throughput Efficiency (full load): ≥ 80% (5V, 300A)
Soft Start: Linear Ramp.

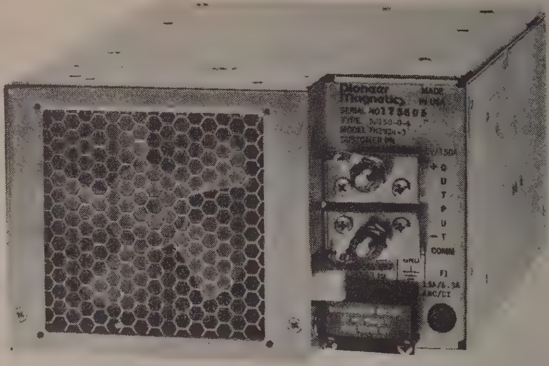
INPUT

30, 208-240 VAC, Standard: 167-265 VAC
230 VAC, Single Phase, Optional: 167-265 VAC
280 VDC, Optional: 210-325 VDC
Frequency Range: 47-500 Hz
Inrush Current: 30A Max.
Turn-on time with application of Primary Power: 1 sec
Turn-on time with Logic Enable: 200 msec
Size: 5″W x 8″H x 10″L
Weight: 14 pounds
UL, CSA recognized, designed to meet VDE
MTBE Commercial Version — ≥ 100,000 Hrs. Available in Military Version
Any output voltage from 2.0 to 48.0 volts available. Voltages below 5.0 volts limited to 350 Amperes output current.
XX Specifies output voltage (i.e., 5V-05/28V-28)

Pioneer Magnetics

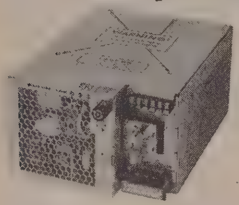
The best in high power switching supplies

You can choose from two complete lines of medium and high power switching power supplies. First, the Dependables: Setting industry standards for reliability and performance. Second, the International Line: Designed to meet tough international noise and safety specs.



THE INTERNATIONAL LINE

The Dependables



- Over 200,000 units in the field
- Demonstrated MTBF's as high as 115,000 hours
- UL recognized and CSA certified for data processing and office machines
- Exceptional dynamic load and line performance
- Full output rating at 50°C
- 60% to over 80% efficiency
- AC and DC input versions
- Optional battery backup

The International Line

- Designed to meet FCC and VDE level B conducted and radiated noise specs. (150 KHz to 30 MHz)
- Designed to meet IEC/VDE, UL and CSA safety standards
- Conservatively rated to provide full performance at maximum output
- Full output rating at 50°C
- 60% to over 80% efficient
- No main channel preload required to maintain secondary channel regulation
- Selectable input
- Optional low-voltage battery backup

Specifications

AC Input

Dependables Dedicated Input:
92-138 VRMs, 184-264 VRMS
47-63 Hz, Single Phase. Line Dips to 70-140 VRMS

International Line Selectable Input:
90-135 VRMS or 180-264 VRMS
47-63 Hz, Single Phase. Line Dips to 75 or 140 VAC

DC Input (Dependables Only)

22-34, 42-56 or 100-145 VDC

Total Error Band (Main Channel)

±2% including the following:

- Input line voltage variation over the specified range
- Static loads from 0 to 100%
- Ripple and switching spikes
- Temperature stability over full operating range of 0 — 50°C
- Drift for 8 hr. period following initial warmup

Dynamic Load Response

Dependables: Dynamic load steps (1A/μsec slew rate) 25% on 5 VDC units; up to 90% on higher voltage units: Included in 2% error band above. International Line: 2% maximum excursion on 5 VDC units with 25% load step (1A/μsec slew rate) at nominal input line; up to 90% load step on higher voltage units.

Overvoltage Protection

Standard on primary channel and optional on secondary channels.

Other Standard Features

- Overload protection (foldback-type)
- Overtemperature protection
- Reverse voltage protection
- Remote Sense
- AC Input Fuse
- No turn-on or turn-off overshoot
- Operating temperature: 0° to 50°; derates to 80% of rated power at 71°C
- Storage temperature: −55°C to +85°C

Standard Options

Standard Options Include:

- Power Fail Signal
- Logic On/Off
- Crowbar
- Remote Programming/Margining
- Local Margin Check
- Output Tolerance Status
- Output Power Good Signal
- OV Secondary Channels

Special Options Include:

- Precision parallel load sharing module
- Automatic battery backup and charging
- EMI filtering for FCC and VDE requirements

Custom options may be designed to your exact requirements.

18 (8.2)[8]						

NOTES:

[1] Brownout capability may be reduced for this model.
[2] Dependables multiple require 50W minimum load on main channel to maintain proper regulation on other channels. No minimum load required on International Line.
[3] For 2V and 3C channels, wattage is 60% of figure shown.
[4] Sum of all channel output wattages may not exceed maximum supply rating.
[5] For higher current ratings (up to 30A), consult factory.
[6] For 24 VDC-input model ratings, consult factory.
[7] Models PM2975 and 2976 measure 5 x 8 x 12¾ inches. (12.7 x 20.3 x 32.4 cm). For multiple outputs, allow ¾ inch for clearance of molex connectors.
[8] Models PM2975 and PM2976 weigh 20 lb. (9.1 kg).
[9] Consult factory for DC-input model of International Line.

Pioneer Magnetics

The most powerful name in switching supplies.

800-233-1745 (Outside California)
800-848-1745 (Within California)
1745 Berkeley St., Santa Monica, CA 90404
(213) 829-6751 TWX 910-343-6249

It is Pioneer Magnetic's policy to improve products as new techniques and components become available. We reserve the right to change specifications without prior notice.

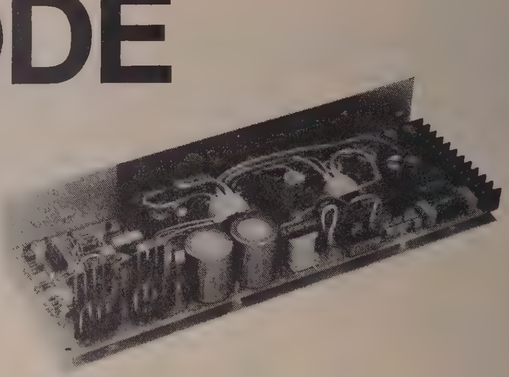
SWITCH-MODE POWER SUPPLIES
FOR THE OEM MARKET



UNIQUE FEATURES

- Proportional Base Drive Circuitry
- Pulse Width Modulated by Single I.C. for Higher Reliability
- Soft Start Circuitry
- Built-in Line Filtering
- All Auxiliary Outputs Post Regulated
- 100% Burn-in at Full Load
- 100% Computer Tested
- UL/CSA/VDE/FCC

ELECTRICAL SPECIFICATIONS

Input: 90-132 VAC or 180-264 VAC 47-500 Hz

Output: See tables

Line Regulation: .1% of all outputs

Load Regulation: .1% or better on main output; 1% on auxiliary outputs

Ripple and Noise:
Main Output: Line harmonic frequency 50 mV pk-pk
Switching frequency 50 mV pk-pk
Noise and spikes 1% of V_o (see graph)
Auxiliary Outputs: Line harmonic frequency 5 mV pk-pk
Switching frequency and noise 1% max of V_o

Temperature: 0-70°C

Protection: Overvoltage protection — main output
Overload/short circuit protection — self recovery type
Over temperature — self recovery type with hysterisis

Holdup Time: 20 ms @ nominal line and full load

Overshoot: Turn On/Turn-Off — none

Remote Sensing: Main output

Efficiency: 70% minimum

Power Fail Signal Monitors AC Line Voltage (Option):*

eem

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS-silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

THE QUIET ONES!

Outstanding performance parameters in a completely enclosed power supply, with extremely low noise (figure shown in tables). Line noise is limited by differential and common mode line filters.

More power per cubic inch in a power supply built to precision instrument standards.

FEATURES

- 168 Hour Burn-In
- Single/Triple/Quad Outputs
- 70% Typical Efficiency
- No 50/60 Hz Magnetics
- Built to meet VDE, FCC, UL, CSA and RFI
- 2 Year Warranty
- Soft Start
- Fused
- Surge Guard
- RFI Filters
- Brown-Out Protection
- Reverse Voltage Protection
- Sense Leads on Single Output Models
- Barrier Strip or Connector for Input/Output

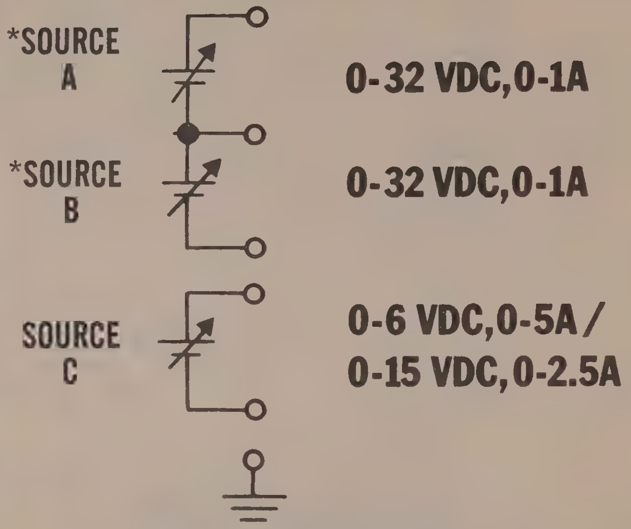
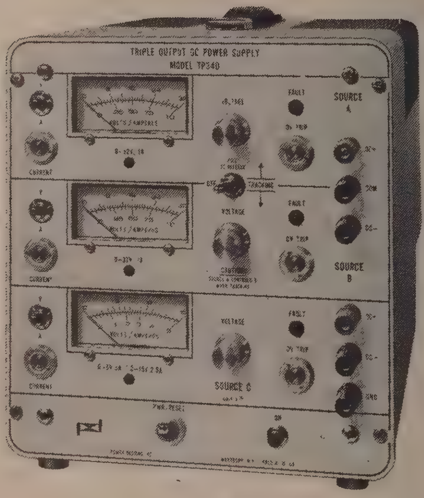
TECHNICAL DATA

TRIPLE OUTPUT LABORATORY POWER SUPPLY T²L, COS/MOS & MICROPROCESSOR ANALOG APPLICATIONS





MODEL TP340

* Independent or 0.1% tracking with panel switch

NOISE & RIPPLE LESS THAN 1mV P-P

features:

- No derating. All outputs may be operated simultaneously at full capacity for a maximum of 100W.
- Outputs are floating with respect to each other and chassis except for an internal connection between one negative terminal and one positive terminal of the 32 volt sources. The two 32 volt sources may be operated in series to provide 0-64 VDC, 0-1A in any polarity with respect to chassis or left floating. The 0-6 VDC source may be operated in any polarity with respect to chassis or left floating.
- Independent adjustment of each output voltage utilizing 10-turn potentiometers with .05% resolution.
- Separate current limiting adjustment for each output.
- Separately adjustable overvoltage crowbars on each output. Overvoltage crowbars on 0-32V outputs trip simultaneously if either one operates.
- Three taut band suspension dual range meters individually selectable for voltage or current of each source.
- A "FAULT" indicator lamp on each output signals overload, short circuit, crowbar trip or current limit operation.
- Automatic voltage tracking of the 0-32 VDC sources to ±0.1% by means of a panel toggle switch. This switch is equipped with a locking lever to prevent accidental operation. Single potentiometer control of tracking outputs.
- Outputs may be shorted into each other in any polarity without damage.

electrical specifications:

Parameter	Sources A & B (1) 0-32V, 0-1A each output	Source C 0-6V, 0-5A 0-15V, 0-2.5V
INPUT:	105-125, 58-440 Hz (2)	
OUTPUT	0-32V, 0-1A	0-6V, 0-5A/ 0-15V, 0-2.5A
LOAD REGULATION:	0.01% +1 mV	0.01% +1 mV per amp
LINE REGULATION:	0.01% +0.5 mV	0.01% +0.5 mV
STABILITY (3)	0.02% +1 mV	0.02% +1 mV
RECOVERY TIME (4)	50 μs	100 μs
CURRENT LIMIT	2%-105% of rated current	2%-105% of rated current
TEMPERATURE	0-50°C	0-50°C
TEMP. COEFFICIENT	0.02% +300 μV/°C	0.02% +300 μV/°C
OV CROWBAR	Adj. 3-40V (5)	Adj. 3-20V
TRACKING	0.1% +10 mV by front panel switch	
VOLTAGE CONTROLS	10 turn potentiometer	10 turn potentiometer
FAULT INDICATORS	Lamp indicates short circuit and overload	Lamp indicates short circuit and overload
METERING	Dual range volt/ammeter	Dual range volt/ammeter

(1) Sources A & B have one common terminal
(2) Options available for 50 Hz and/or 220V operation
(3) 24 hours at constant line, load and ambient temperature
(4) To recover to within 15 mV of nominal for a 10%-100% load change
(5) Both sources will crowbar if either one operates

mechanical specifications:

DIMENSIONS: 8¾" H x 7¾" W x 13½" D.
WEIGHT: 20 lbs.
FINISH: Natural anodized aluminum panels blue vinyl enamel cabinet, with carrying handle.

features:

- No derating. All outputs may be operated simultaneously at full capacity for a maximum of 140W.
- Outputs are floating with respect to each other and chassis except for an internal connection between one negative terminal and one positive terminal of the 20 volt sources. The two 20 volt sources may be operated in series to provide 0-40 VDC, 0-2.5A in any polarity with respect to chassis or left floating. The 0-15V source may be operated in any polarity with respect to chassis or left floating.
- Independent adjustment of each output voltage utilizing 10-turn potentiometers with .05% resolution.
- Separate current limiting adjustment for each output.
- Separately adjustable overvoltage crowbars on each output. Overvoltage crowbars on 0-20V outputs trip simultaneoulsy if either one operates.
- Three taut band suspension dual range meters individually selectable for voltage or current of each source.
- A "FAULT" indicator lamp on each output signals overload, short circuit, crowbar trip or current limit operation.
- Automatic voltage tracking of the 0-20 VDC sources to ±0.1% by means of a panel toggle switch. This switch is equipped with a locking lever to prevent accidental operation. Single potentiometer control of tracking outputs.
- Outputs may be shorted into each other in any polarity without damage.

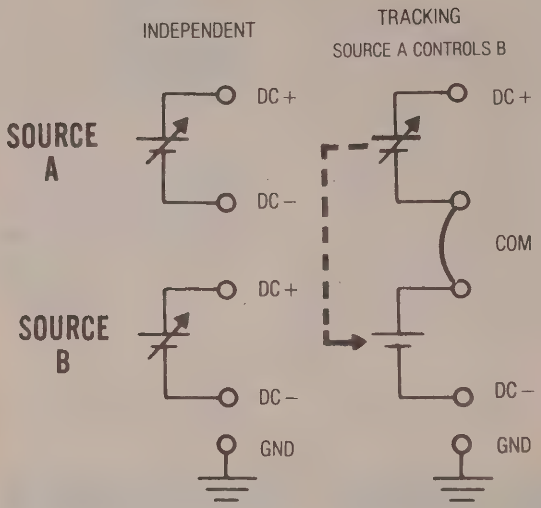
CONSTANT VOLTAGE/CONSTANT CURRENT DUAL OUTPUT DC POWER SUPPLY

MODEL TW347

TWO SOURCES, INDEPENDENT OR TRACKING* EACH 0-16 VDC, 0-5A/0-18 VDC, 0-3A



*10mV with panel switch

MODEL TW347 DUAL OUTPUT DC POWER SUPPLY
CONSTANT VOLTAGE/CONSTANT CURRENT
SOURCE A
SOURCE B

features:

Each independent source in this general-purpose instrument can supply either a constant-voltage output with continuously adjustable current limiting or a constant-current output with continuously adjustable voltage compliance. The source will automatically transfer from voltage regulation to current regulation or vice versa at any predetermined operating point.

No derating. Outputs may be operated simultaneously at full capacity for a maximum of 160W.

When operated in the independent mode, the outputs are floating with respect to each other and chassis. In the tracking mode there is an internal connection between both outputs and source B tracks source A within 10 mV.

The two sources can be operated in series to provide 0-32V, 0-5A / 0-36V, 0-3A either as a constant voltage or constant current source.

Two taut band suspension dual range meters individually selectable for voltage or current.

parameter:	electrical specifications:	
INPUT	105-125V RMS 57-63 Hz; 350 W; 3.5A RMS	
OUTPUT	Dual, each source 0-16VDC 0-5A/0-18VDC 0-3A	
	CONSTANT VOLTAGE	CONSTANT CURRENT

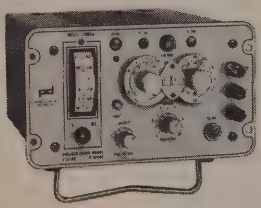
CALIBRATED POWER SOURCES

CALIBRATED, STABLE, LOW NOISE, HIGH RESOLUTION POWER SOURCES FOR PRECISION LABORATORY APPLICATIONS

0-20 VDC/0-2A

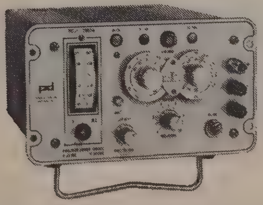
MODEL 2020B



• Two dual concentric switches (four decades) and a calibrated potentiometer provide digital readout to five significant figures • A toggle switch provides readout to six figures above 10 volts • Last-place potentiometer has 10 μV resolution • Source impedance is less than two milliohms at DC, less than 0.5 ohms at 1 MHz • Recovery time is less than 50 microseconds to return within a 20 millivolt band of the programmed voltage for an 80% load change • Front and rear access terminals.

• Better than 0.1% calibration accuracy • 10 PPM plus 100 μV stability for 8 hours • Temperature coefficient better than 10 PPM or 50 μV per °C • Self-restoring overload and short circuit protection with adjustable current limit control and flashing limit indicator • 100 μV maximum peak-to-peak ripple • Solid silver decade switch contacts • 100 hour minimum burn-in prior to calibration • Individual calibration data furnished with each unit • Provisions for remote sensing and remote resistance programming at 1000 Ω/volt • Voltage or current metering.

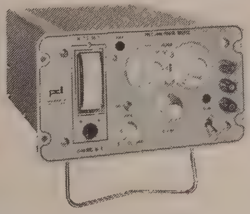
0-20 VDC/0-1A



• Two dual concentric switches (four decades) and a calibrated potentiometer provide digital readout to five significant figures • A toggle switch provides readout to six figures above 10 volts • Last-place potentiometer has 10 μV resolution • Source impedance is less than two milliohms at DC, less than 0.5 ohms at 1 MHz • Recovery time is less than 50 microseconds to return within a 20 μV band of the programmed voltage for an 80% load change • Front and rear access terminals.

MODEL 2010

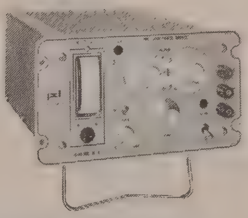
0-20 VDC, 2 A/0-50 VDC, 1A



• Two dual concentric switches (4 decades) and a calibrated 10-turn potentiometer provide calibrated readout to six significant figures • Dual range with automatic switchover • UNIPLY® provides 2 amperes output to 20 VDC and 1.0 ampere output to 50 VDC • Sixth place interpolation with 10 microvolts resolution • Electrical performance equivalent to Model 2010 and 2020B.

MODEL 5020

0-100 VDC/0-500 mA



• Two dual concentric switches (4 decades) and a calibrated 10-turn potentiometer provide calibrated readout to six significant figures • Sixth place interpolation with 10 microvolts resolution • Electrical performance equivalent to Model 2010 and 2020B.

MODEL C500

Model	Range Volts	Current Amps	Regulation Line/Load	Max. Ripple Pk to Pk	Stability	TC Per °C	Size	Special Features
2010	0-20	0-1.0	.0005% +100 μV	100 μV	.001% +100 μV/8 hrs.	.001% or 50 μV	8⅜ x 4¾ x 8 27/32	4 decade readout with .1% accuracy. Continuous current limiting with panel pushbutton setting. Remote programmable 1000Ω/V.
2020B	0-20	0-2	.0005% +100 μV	100 μV	.001% +100 μV/8 hrs.	.001% or 50 μV	8⅜ x 4¾ x 11 9/16	4 decade readout with .1% accuracy. Remote programmable 1000Ω/V.

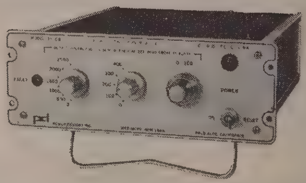
TECHNICAL DATA

PHOTOMULTIPLIER HIGH VOLTAGE POWER SOURCES

MODEL 3K10B

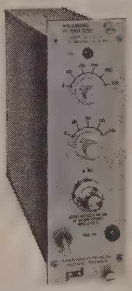
10-3000 VDC 0-10 MA



The Model 3K10B is a calibrated laboratory power source ideally suited for photomultiplier and similar applications requiring high stability, low noise and superior regulation.
Noise & Ripple: 3 mV P-P to 15 MHz • Reg. .001%

MODEL AEC-315B

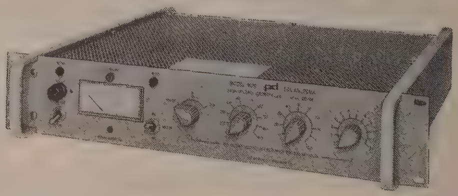
10-3000 VDC • 0-10 MA



The Model AEC-315B is a calibrated high voltage power supply designed for use with photomultiplier systems requiring a high stability, low noise, well regulated power source. It mounts in a standard 8¾" NIM Bin per AEC Specification TID-20893 (Rev. 3) "Standard Nuclear Instrument Modules" and occupies two module widths. It is supplied with an integral three-wire power cord and NEMA plug and does not use the NIM Bin Power Supply.
Noise & Ripple: 3 mV P-P to 15 MHz • Reg. .001%

MODEL 2K20

1-2012 VDC • 0-20 MA



The Model 2K20 is a calibrated high voltage power source designed to supply closely regulated DC to critical circuits where stability, low noise and reliability are of prime consideration.
Noise & Ripple: Less than 300 μV rms • Reg. .001% or 10 PPM

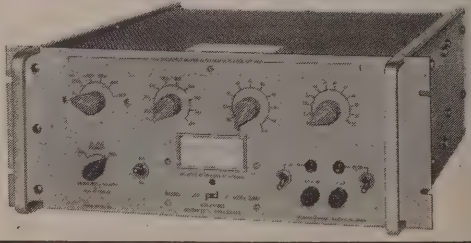
MODEL 1570

1-3012 VDC • 0-40 MA

The Model 1570 is a calibrated, high voltage power source designed to supply closely regulated DC to critical circuits where stability, low noise and reliability are prime considerations.
Ripple. 1 mV P-P • Reg. 0.001% +2 mV

MODEL 1556B

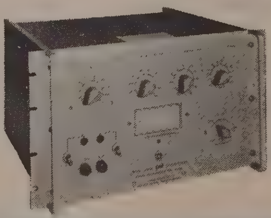
10-6021 VDC • 0-20 MA



The Model 1556B is a calibrated high voltage power source designed to supply closely regulated DC with unusually low noise and ripple content. This instrument reflects field experience with more than 5000 units in field service for six years.
Ripple & Noise: 1 mV P-P Max 30 MHz • Reg. 0.001% +2 mV

MODEL 1543A

10-10,021 VDC • 0-10 MA



The Model 1543A is a calibrated high voltage power source designed to supply closely regulated DC with unusually low noise and ripple content. This instrument reflects field experience with more than 5000 units in field service for six years.
Ripple & Noise: 5 mV P-P Max. 30 MHz • Reg. 0.001% +2 mV

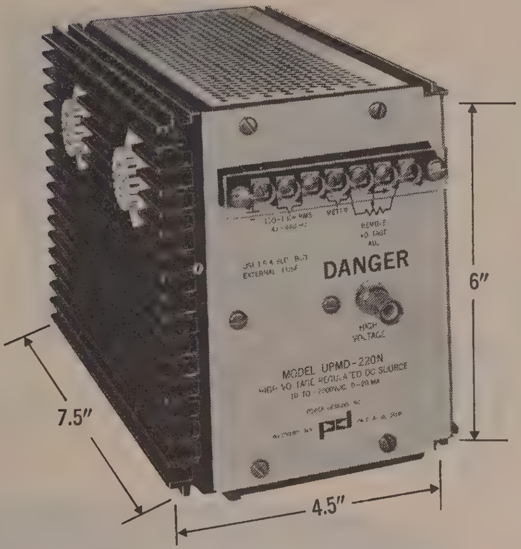
TECHNICAL DATA

MODULAR HIGH VOLTAGE PRECISION POWER SOURCES POWER SUPPLIES FOR NUCLEAR INSTRUMENTATION



The UPMD series of high voltage sources are compact modular units designed for critical applications where high stability, low noise and flexibility of output voltage control are important considerations.
They are ideal for such applications as photomultipliers, Geiger-Muller counters, proportional detectors, CRT sources, high resolution video displays, electrostatic lenses, etc.

MODELS UPMD N/P 10-2000VDC • 0-20MA
MODELS UPMD N/P 10-3000VDC • 0-10MA
MODELS UPMD N/P 10-5000VDC • 0-5MA

MODEL	*OUTPUT POLARITY	VOLTAGE RANGE	OUTPUT CURRENT
UPMD-220N	NEGATIVE	10-2000 VDC	0-20 MA
UPMD-220P	POSITIVE	10-2000 VDC	0-20 MA
UPMD-310N	NEGATIVE	10-3000 VDC	0-10 MA
UPMD-310P	POSITIVE	10-3000 VDC	0-10 MA
UPMD-550N	NEGATIVE	10-5000 VDC	0-5 MA
UPMD-550P	POSITIVE	10-5000 VDC	0-5 MA

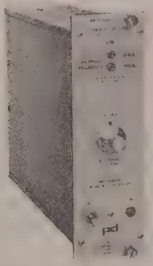
* Corresponding output terminal connected to chassis.

OPTIONS
1. Remote voltage programming (specify ratio)
2. Isolation up to 250V above chassis

MODEL AEC-5000B

The Model AEC-5000 is a high voltage calibrated modular power source for operation with high resolution solid state detectors where low noise and stability is a prime consideration.

The instrument occupies two module widths in a standard NIM Bin per AEC Specification TID-20893 (Rev. 3) for "Standard Nuclear Instrument Modules" and operates from the ±24 VDC sources provided by the Bin power supply.

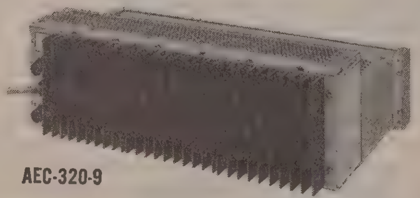


AEC-5000B

MODEL AEC-320-9

The Model AEC-320-9 power supply is a ±6, ±12, and ±24 VDC source designed to mount at the rear of a modular instrumentation bin (NIM) it exceeds the requirements of the AEC Report TID 20893 (Rev. 4) for a type V-H supply.

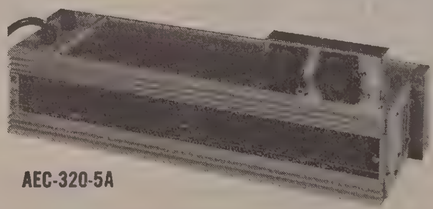
1.2.1 INPUT
103-129V (117V nominal) 47-65 Hz 350 watts or
206-258V (234V nominal) 47-65 Hz 350 watts
1.2.2 OUTPUT
+24 VDC, 0-1.5 Amperes current shared
−24 VDC, 0-1.5 Amperes current shared
Total combined currents must not exceed 2 Amperes
+12 VDC, 0-3A current shared
−12 VDC, 0-3A current shared
Total combined currents must not exceed 4 Amperes
+6 VDC, 0-10A current shared
−6 VDC, 0-10A current shared
Total combined currents must not exceed 10 Amperes
117 VAC, 0-.5A
Total power output capability
150 VA with equally shared currents
130 VA with unbalanced currents



AEC-320-9

MODEL AEC-320-5A

This is a 12/24V power supply that will be mounted at the rear of a modular instrumentation bin in accordance with AEC Report TID-20893. Due to the restricted volume available and high operational reliability required, only the highest quality components are be employed. All semiconductor components are constructed of hermetically sealed silicon units. The supply is designed with a life expectancy of at least 5 years. No internal fans or blowers. The supply is in accordance with Drawing ND-515 and is constructed and wired as shown for System 1b in Drawing ND-522.



AEC-320-5A

Four output power sources for mounting at the rear of a nuclear instrument BIN per TID-20893.
+ and −24 VDC, 0-1A
+ and −12 VDC, 0-2A
Total Power output 96W.
Combined output under 120W

TECHNICAL DATA

LABORATORY BENCH POWER SOURCES

MODEL 6050C

• Constant Voltage/Constant Current. Automatic crossover mode lights indicate operation characteristic. Alternating mode lights indicate operation beyond source capability. • UNIPLY Technique provides increased output current at lower output voltages. • Power Supply provides increased output power at input line voltages above 105 VAC. • A 3 Digit Display permits reading of the output voltage with an accuracy of 0.1V + 1 digit or output current with an accuracy of 20 MA +1 digit and a resolution of 10 MA. • Panel Adjustable overvoltage crowbar operates to short circuit the Power Supply output in less than 200 microseconds at any output voltage above a present level. • Ten-turn potentiometers for voltage and current control with increased resolution. • Positive or Negative output polarity. • Front or Rear access terminals. • Remote Sensing or Remote Programming.
Ripple & Noise: 5 mV P-P Max 30 MHZ • Reg. 0.001% +2 mV

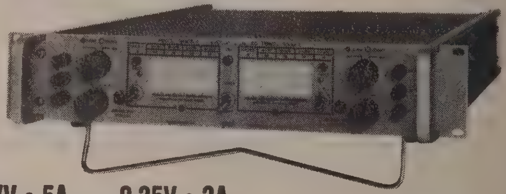
with Digital Panel Meter

MODEL 6050C

MODEL TW6050A

Each independent source in this instrument is a voltage regulated DC power supply that functionally replaces four conventional units. The Model TW6050A utilizes a regulator technique* trademarked UNIPLY® which provides regulator efficiencies and operating features not obtainable with common dissipative type circuits.
Ripple & Noise: Less than 1 mV P-P • Line Reg. 0.01% +1 mV
Load Reg. 0.01% +1 mV for 0-100% changes in rated output current



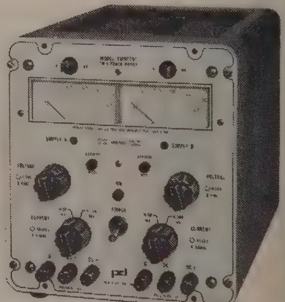
0-7V • 5A **0-25V • 2A**
0-15V • 3A **0-60V • 1A**
EACH SOURCE

MODEL TW6050A

MODEL TW5005W

The Model TW5005W is a general-purpose power supply containing two sources in a single case. Each source may be operated in either the constant-voltage or constant-current mode and the two sources may be operated independently or combined in a series or parallel arrangement. Transfer from constant-voltage to constant-current or vice versa is automatic.
A single ten-turn potentiometer in each source provides voltage control with 15 millivolt resolution. Each source has two current ranges, 50 or 500 ma. When the current range is switched, the current limit adjustment and the meter range are automatically transferred.
Ripple & Noise: Less than 1 mV P-P
Reg. Better than 0.005% +1 mV at front & rear access terminals

0-50 VDC • 0-500 MA
EACH SOURCE



MODEL TW5005W

MODEL 6150

The Model 6150 offers more than twice the output power of the Model 6050A, with essentially the same electrical characteristics. Two taut-band meters are provided. Each instrument has two voltage and current ranges 0-6V/0-60V, 0-1.5A/0-15A. Ranges switch automatically with range switch setting. The Model 6150 mounts in a 19" rack, measures 3½"H x 16"D and is suitable for laboratory bench operation as well.
Ripple & Noise:Less than 1 mV P-P • Line Reg. 0.01% +1 mV
Load Reg. 0.01% +1 mV for 0-100% changes in rated output current

TECHNICAL DATA

LABORATORY BENCH POWER SUPPLIES

• Laboratory workhorse power supplies with over 15 years of field history • Continuously adjustable voltage, current or current limiting controls with limiter or current mode indicating lamps • No FRI generating SCR or switching circuits • Modular package construction suitable for bench or rack mounting • Processed under a "Predictable Reliability" Program for 5-year minimum operation to published specifications. This program features: Avalanche-controlled rectifiers 100% stress testing of transistors, pre-aged zener references with maximum I/F noise specifications, computer grade capacitors, low T.C. 1% tin oxide resistors in critical circuits, etc. • Suppliers are burned in under full load for a minimum of 50 hours prior to test.

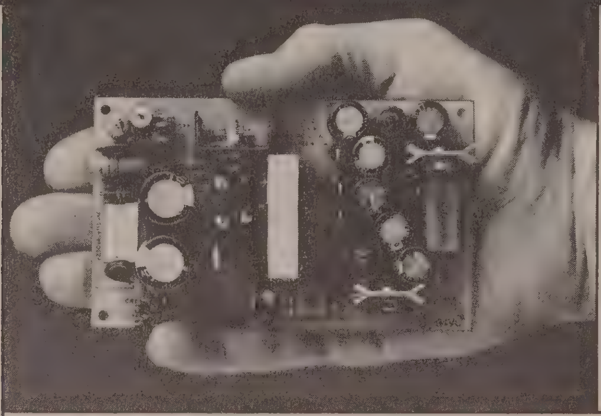
ULTRA MINIATURE
30 WATT SWITCHING POWER SUPPLIES
TRIPLE OUTPUT, LOW NOISE
ALL OUTPUTS FULLY REGULATED

3030 SERIES



FEATURES

- 5, +12, and −12 (or +15 and −15) VDC outputs fully regulated
- Low output noise
- 90–130 VAC or 180–250 VAC input
- Small size — light weight
- Designed to meet VDE, UL, and CSA safety standards

APPLICATIONS

- Analog systems
- Digital systems
- Analog/Digital systems
- Microprocessor based systems
- General-purpose power supply

GENERAL DESCRIPTION

This new series of power supplies features triple outputs delivering a total of 30 watts of continuous output power. All outputs are low noise and tightly regulated for use in analog/digital applications where these characteristics are essential.

Low cost, light weight, and high performance make the Model 3030 an ideal choice for OEM applications where space is at a premium. The Model 3030 is designed to meet the safety requirements of UL, CSA, VDE, and IEC.

Advanced circuit design and manufacturing techniques permit a low price, yet high-grade components are used throughout. Each power supply undergoes a rigorous computerized test and burn-in program before delivery.

WORLD'S SMALLEST 40 WATT SWITCHERS SINGLE, TRIPLE & QUAD OUTPUTS

1040, 3045, 4043 SERIES

Model 3045-1
5V @ 3A, +12V @ 2A (5A pk), −12V @ 0.5A

SIZE—3"W x 5"L x 1.8"H
WEIGHT—8 OZ
$27.50 OEM QTY

FEATURES

- Small size, light weight
- Designed to meet UL, CSA, VDE & IEC safety standards
- 75% efficiency
- 90 to 130 VAC or 180 to 250 VAC user selectable input

APPLICATIONS

- CRT terminals
- Disc drive systems
- Microcomputers
- Portable equipment
- General purpose power supply

GENERAL DESCRIPTION

The 1040, 3045 and 4043 series of power supplies, are comprised of a number of single, triple and quad output models capable of delivering 40 watts of continuous output power.

Their low cost, light weight and high performance features offer the OEM user a power supply which can satisfy the majority of today's CRT, disk-drive, microprocessor and mixed analog/logic applications. Their small size and high efficiency makes these power supplies an ideal choice for portable equipment, microcomputers or peripherals where space is a premium.

All models are designed to meet the safety requirements of UL, CSA, VDE and IEC.

The model 3045-2 is a direct replacement of similar units offered by other manufacturers, but the Power General unit offers higher output current capabilities, to facilitate easy and non-costly end user system upgrade.

Although priced low, due to advanced circuit and manufacturing techniques, high grade components are used, and an extensive computerized test and burn-in program accompanies each unit.

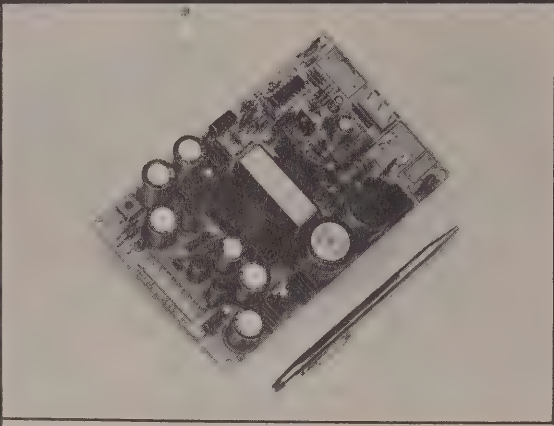
WORLDS SMALLEST 75 WATT, TRIPLE OUTPUT SWITCHING POWER SUPPLY

3075 SERIES



FEATURES:
- 90–130 VAC or 180–250 VAC Input
- Designed to meet VDE, UL, and CSA safety standards
- 70% efficiency
- 4000 VAC isolation
- Small size, light weight
- Convection cooled

APPLICATIONS:
- Microcomputer systems
- Disk drives
- CRT terminals
- Digital/Analog circuits
- General purpose power supply

GENERAL DESCRIPTION

Power Generals' 3075 series are compact, triple output, 75-watt switching power supplies. Each model is designed to conform with UL, CSA and VDE safety standards. Input to output isolation is 4000 volts, hold-up time is 32 msec. minimum and efficiency is 70%. Input voltage ranges of 90 to 130 VAC or 180 to 250 VAC are available as a factory wired option. Cooling is by natural convection.

Utilizing state of the art integrated PWM design techniques and high quality components, these supplies offer high performance and reliability in a small, light weight single P.C. board form-factor. Each unit must pass a stringent test and burn-in program prior to shipment.

Their high level of reliable operating performance compact design, and generous OEM discounts, make the 3075 series an excellent choice for a wide variety of applications.

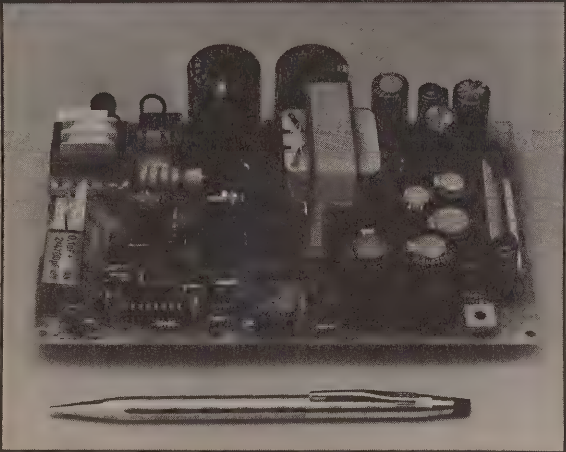
WORLD'S SMALLEST 75 WATT QUAD OUTPUT SWITCHING POWER SUPPLIES

4075 SERIES



FEATURES

- 5, +12, −12, and 5, 12, or 24VDC isolated outputs
- Designed to meet VDE, US, CSA safety standards
- 70% efficiency
- Small size, light weight
- 90-130 or 180-250 VAC input
- Convection cooled

APPLICATIONS

- Microcomputers
- CRT Terminals
- Disk Drives
- Digital/Analog Circuits
- General Purpose Power Supply

GENERAL DESCRIPTIONS

Power General's 4075 series are quad output power supplies capable of providing 75 watts of continuous power within the specified voltages and currents. These power supplies are designed to meet the safety requirements of VDE, UL, and CSA despite their small size and light weight. All models have one of their outputs totally isolated and floating, an ideal characteristic for systems which integrate a disk drive and must eliminate system component interference. These floating outputs will also accept the peak pulsed loads required by most applications.

By using state-of-the-art integrated PWM techniques and high-quality discrete components, these power supplies offer an excellent choice for the quality-minded OEM, since each unit is put through Power General's proven quality control and burn-in programs.

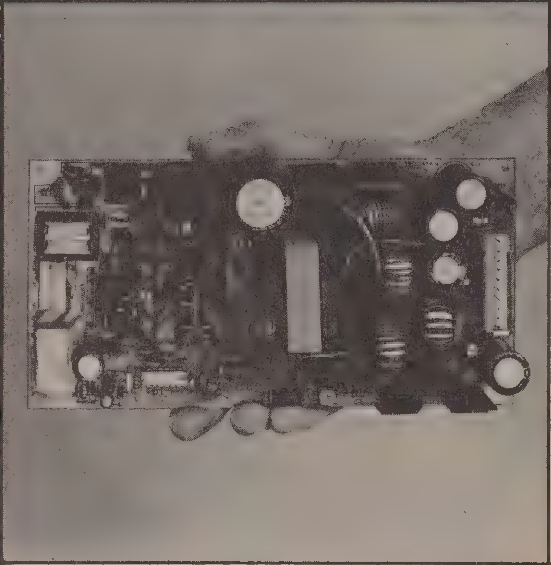
WORLD'S SMALLEST 100 WATT QUAD OUTPUT SWITCHING POWER SUPPLIES

4110 SERIES



FEATURES

- Designed to meet VDE, IEC, UL and CSA safety specifications
- Isolated output for pulsed load
- 90–130VAC or 180–250VAC input user selectable
- Convection cooled — No external heat sinking
- Small size and light weight

APPLICATIONS

- Microprocessor based systems
- CRT terminals
- Disk based systems
- Mixed analog/digital subsystems
- MS/systems
- General purpose power supply

GENERAL DESCRIPTION

The 4110 series of quad output power supplies are capable of delivering 100 watts of continuous output power, with convection cooling, within the voltage-current rating of each output. Small in size and lightweight, these supplies are oriented for today's electronic system needs, and they are designed to comply with national and international safety standards such as UL, CSA, VDE and IEC. Along with the standard outputs, each model has an extra, completely isolated output of either 5V, 12V, 15V or 24V, capable of driving disk drives, printers or other pulsed load electromechanical devices, thus eliminating interference with system integrated CRTs or other sensitive system circuits.

Although the price has been kept low by using advanced circuit and manufacturing techniques, no compromise in performance was made. The components used throughout are high grade, and extensive computerized tests and burn-in programs are performed on each unit.

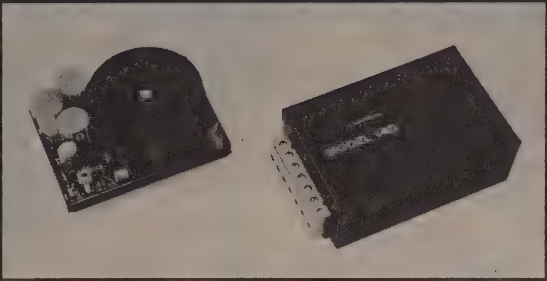
3.5 TO 15 WATT NONENCAPSULATED LINEAR AC/DC MODULES LOW CASE TEMP. RISE HIGH MTBF

140, 240 SERIES



FEATURES

- REPAIRABLE, nonencapsulated, construction
- Low case temperature rise
- 120,000 hour MTBF
- P.C. Mount or Chassis Mount Models
- Continuous short circuit protection
- Plug-in compatible with competing Power Products, Semiconductor Circuits and Acopian models

GENERAL DESCRIPTION

Power Generals 140/240 Series is a family of high reliability AC/DC linear power supplies. Featuring an MTBF of 120,000 hours; their nonencapsulated, metal cased design allows the easy repair of rare component failures by the OEM or Power General, at about one-third the cost of scrapping the entire unit. Convection cooling of this mechanical design results in a lower case temperature rise, significantly improving reliability. Each unit must pass stringent testing and an eight hour burn-in prior to shipment.

Units are available with single outputs of 5, 12, 15 or 24 VDC and dual outputs of ± 12 or ± 15 VDC. All models are available for either P.C. board or chassis mount and are capable of either series or parallel operation. The 140/240 series is plug-in compatible with competing encapsulated units available from Power Products, Semiconductor Circuits, Acopian, etc.

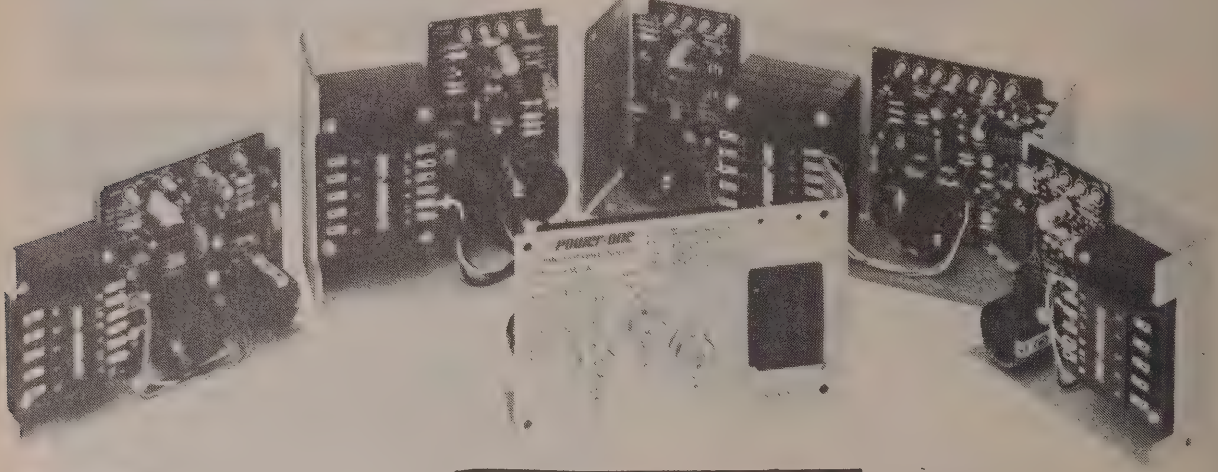
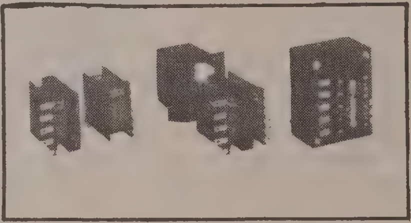
International Series
Open-Frame Linears

THE NEW WORLD STANDARD IN D.C. POWER SUPPLIES



FEATURES

- VDE TRANSFORMER CONSTRUCTION
- WORLDWIDE AC INPUT CAPABILITIES 100/120/220/230/240 VAC
- MEETS DOMESTIC AND FOREIGN SAFETY STANDARDS - UL, CSA, IEC, VDE, BPO, ECMA, CEE
- INDUSTRY STANDARD PACKAGES



Power-One's patented International Series transformers feature separate, fully enclosed, primary and secondary coils. Meets safety requirements of VDE, UL, CSA, BPO, IEC, CEE, and ECMA.

DESCRIPTION

POWER-ONE's new International Series is the first and only high reliability D.C. power supply series designed for products sold throughout the world's major electronics markets.

The International Series can be used anywhere, for almost any application. It meets the most important safety requirements of UL, CSA, IEC, VDE, BPO, ECMA, and CEE. Also, each unit provides the AC input ranges needed for worldwide operation: 100, 120, 220, 230, and 240 volts, 47 to 63 Hz. This multi-range input capability reduces customer inventory and service requirements since only one standard off-the-shelf power supply is needed, regardless of the product's final destination. These are exclusive features of the International Series, and are not available on any competitive standard model.

In an effort to meet the world's toughest safety regulations, POWER-ONE achieved a technological breakthrough in power transformer design. Our new patented winding process features separate, fully enclosed primary and secondary windings. This unique construction complies with the most respected regulatory safety agency specifications, worldwide.

The end result is that product acceptance throughout the world is greatly simplified for domestic and foreign equipment manufacturers. The International Series power supplies comply with the major body of regulatory safety agencies responsible for product safety in virtually all of the major world markets. Its compatibility with world safety standards, combined with dramatically increased flexibility, results in far greater potential for international acceptance of your products.

MEETS SAFETY AGENCY REQUIREMENTS THROUGHOUT THE WORLD

Why compliance is so important!

For years electronic equipment manufacturers have found that safety requirements for most of the world's electronics markets are significantly different than those established in the USA by Underwriters Laboratories (UL). Also, there is little consistency in the requirements among the world's regulatory safety agencies. This has created almost impossible compliance problems for designers who are developing products for worldwide distribution.

Recognizing this dilemma, POWER-ONE initiated an extensive R&D program aimed at producing the first D.C. power supply line that truly meets the world's toughest safety requirements. The innovative new International Series—the solution to the difficult problem of gaining worldwide acceptance for your products.

SAFETY AGENCIES WORLDWIDE

The following regulatory agency specifications have gained industry-wide acceptance as the most important to comply with when designing products for the world's major electronics markets. The International Series meets or exceeds the leakage current, creepage distance, and dielectric withstand test requirements of these safety agency specifications:

UL 1012
UL 478
CSA 22.2 No. 143
CSA 22.2 No. 154
IEC 380 Class I
IEC 380 Class II
IEC 435 Class I
IEC 435 Class II
VDE 0730 Part 2P Class I
VDE 0730 Part 2P Class II
VDE 0804 Class I
VDE 0804 Class II
BPO Tech. Guide No. 26
ECMA-57 Class I
ECMA-57 Class II
CEE-10 Part 2P Class I
CEE-10 Part 2P Class II

INTERNATIONAL SERIES DESIGN STANDARDS:

Leakage Current, Line to Ground: 5.0μa Max.

Safety Spacings,
Live Parts to Dead Metal: 9.0 mm
Other Than Field Terminals: 5.25 mm

Dielectric Withstand Voltage,
Input to Ground: 3750 VAC
Input to Outputs: 3750 VAC
Outputs to Ground: 500 VAC

International Series

Open-Frame Linears

MEETS INTERNATIONAL SAFETY REQUIREMENTS THROUGHOUT THE WORLD

SPECIFICATIONS

AC Input:	100/120/220/240 VAC +10% −13%. 47-63 Hz.Tolerance for 230 VAC operation is +15%, −10%. Derate output current 10% for 50 Hz operation.
DC Output:	See Voltage/Current Rating Chart. Adjustment range ±5% minimum.
Line Regulation:	±.05% for a 10% line change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	5V through 15V models: 5.0 mV PK-PK maximum; 24V and 28V models: 0.2% PK-PK maximum.
Transient Response:	50μ seconds for a 50% load change.
Short Circuit and Overload Protection:	Automatic current limit/foldback.
Overvoltage Protection:	Provided on 5V outputs where indicated. Set at 6.2V ±0.4V. Other outputs use optional overvoltage protectors OVP-12 and OVP-24.

Stability:	±0.3% for 24 hours after warm-up.	
Temperature Rating:	0°C to 50°C full-rated, derated linearly to 40% at 70°C.	
Temperature Coefficient:	.01%/°C typical, .03%/°C maximum.	
Efficiency: (typical)	5V outputs:	45%
	12V and 15V outputs:	55%
	24V and 28V outputs:	60%
Vibration:	Per MIL-STD-810C, Method 514, Procedure X	
Shock:	Per MIL-STD-810C, Method 516, Procedure V	
EMI/RFI:	These linear power supplies have inherently low conducted and radiated noise levels. For most system applications they will meet the requirements of FCC Docket 20780 for Class A equipment and VDE 0871 for Class A equipment without additional noise filtering.

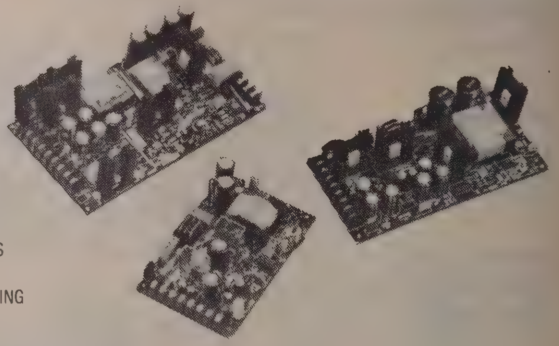
SINGLE AND MULTIPLE OUTPUT MODELS, WITH WORLDWIDE CAPABILITIES



FEATURES

- EFFICIENT, RELIABLE, ECONOMICAL
- 11 MODELS, 40 TO 250 WATTS
- UP TO 5 TIGHTLY REGULATED OUTPUTS
- VDE CONSTRUCTION
- MEETS DOMESTIC AND INTERNATIONAL SAFETY:
  - 3750 VAC ISOLATION
  - VDE SAFETY SPACINGS
- MEETS DOMESTIC AND INTERNATIONAL EMI:
  - FCC DOCKET 20780, CLASS A
  - VDE 0871 / 6.78, CLASS A
- TÜV CERTIFIED TO:
  - VDE 0804 IEC 380
  - VDE 0805 (Proposed) IEC 435
  - VDE 0806
- WORLDWIDE AC INPUT, 90-132 / 180-264 VAC, USER SELECTABLE
- POPULAR INDUSTRY STANDARD PACKAGES
- UL RECOGNIZED, CSA CERTIFIED
- FULL LOAD BURN-IN AND THERMAL CYCLING
- 2 YEAR WARRANTY

Description

Multioutput switchers designed for personal computers, disk-drives, intelligent terminals, word processors and other systems targeted for worldwide distribution.

High capacity 5V outputs easily handle the increased demand of today's 5V-only logic chips, while tightly regulated auxiliary outputs provide the high surge current capability required by disk-drives and printers.

All models meet the world's toughest safety and EMI standards resulting in easier system approval and international marketing.

SPECIFICATIONS

AC Input	90-132 VAC or 180-264 VAC, user selectable. 47-63 HZ, single phase.
DC Outputs:	See Voltage / Current Rating Charts.
Brown-Out Protection:	Regulation is maintained down to 90 / 180 VAC.
Hold-Up Time:	20 msec minimum at full rated load and nominal AC input voltage.
Efficiency:	Measured at full rated output power and nominal AC input voltage: 70% ± 5%
Regulation Characteristics:	See Voltage / Current Rating Charts. Line: Measured over a 90-132 VAC or 180-264 VAC line change. Load: Measured by varying the load current from 60% of full rated to either 20% or 100% of full rated.
Cross Regulation:	Cross regulation specifies the maximum voltage change when the +5V output load current is varied from 75% of full rated to either 50% or 100% of full rated.
Output Noise and Ripple:	0.3% RMS, 1% PK-PK maximum.
Transient Response:	Main 5V output only. Recovery Time: 500μsec typical for a 50-100% load change.
Output Overload Protection:	Fully protected against output overload and short circuit.
Overvoltage Protection:	Provided on +5V outputs.
Reverse Voltage Protection:	Fully protected from damage due to application of reverse polarity voltage across DC output terminals.
Input Protection:	AC input line fuse provided. Internally located.
Inrush Current:	Internally limited by thermistor.
Temperature Rating:	Operating: 0°C to +70°C. Storage -55°C to +85°C
Temperature Coefficient:	±0.03%/°C typical, ±0.05%/°C maximum.
Vibration:	Per Mil-Std-810C, Method 514, Procedure X, Catagory G-1.
Shock:	Per Mil-Std-810C, Method 516, Procedure V.
Warranty:	2 years.

OPTIONS

Input/Output Connectors:	Barrier terminal blocks standard on all models. Consult factory for optional connector styles.
Safety Covers:	Available for SPL130 and SPL200 series models.
User Specified Outputs:	Output voltage and current ratings may be configured to user specified requirements. Consult factory for details.

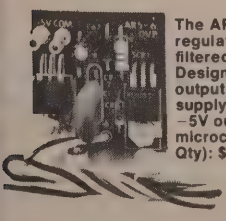
−5V Sub-Regulator Module



AR5-0.6/OVP

The AR5-0.6/OVP will provide a −5V regulated output from any −7V to −30V filtered DC source. Designed to be connected to the negative output of any multiple output power supply, the AR5-0.6/OVP will supply the −5V output required in many microcomputer applications. Price (Unit Qty): $10.95

Custom Designs

POWER-ONE is an experienced manufacturer of custom power supplies for high-quantity applications requiring special electrical and mechanical configurations. We excell at open frame multiple output designs, regulated or unregulated.

Overvoltage Protection

OVP-24

OVP-12

These optional Overvoltage Protection modules are available for use with any power supply NOT supplied with built-in OVP. Each is adjustable from 6.4V to 34V and should be used when maximum load protection is of prime importance.

Mounting holes are provided on all power supplies to accommodate these modules, which mount within the specified outline dimensions of each supply.

OVP-12 For use on all models except E & F case sizes (when used on ±9V thru ±15V models, one OVP-12 protects both outputs): Price Unit Qty: $7.95

OVP-24 For use on E & F case models: Price Unit Qty: $14.95

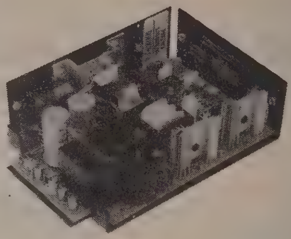
POWER PAC INC.

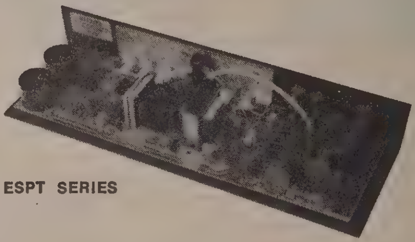
OPEN FRAME SWITCHING POWER SUPPLIES
ESP SINGLE OUTPUT
ESPT MULTIPLE OUTPUT

FEATURES:

- Highest efficiencies
- Latest high performance monolithic pulse width circuit design
- Open frame construction — convection cooled
- Dual input 115/230 VAC — 50/60 Hz
- Wide AC input ranges — brown out protection
- Up to 4 regulated outputs
- Choice of voltage and current on all outputs up to maximum rated power
- State of the art EMI filtering
- 24 hour burn in
- 5 year warranty



ESP SERIES



ESPT SERIES

SPECIFICATIONS:

Input Voltage:	90/130 or 180/260 VAC 47/63 Hz. Jumper or barrier strip selectable.
Output Voltage/Current:	See rating in table.
Voltage Adjustment:	±5% or 0.5 VDC Minimum.
Regulation: (Single Output)	Line: ±0.1% for specified input range. Load: ±0.1% for 100% load change.
Regulation: (Multiple Output)	Line: ±0.2% for specified input range. Load: Output #1 (+5V): ±0.2% for 100% load change. Output #2 (−5V): ±5% for 100% load change; ±3% for cross regulation. Output #3 (+12V/+15V): ±0.2% for 100% load change. Output #4 (−12V/−15V): ±0.2% for 100% load change.
Ripple & Noise:	50 mV peak to peak maximum.
Efficiency:	70-80%.
Operating Temperature:	0°C to +70°C. Derate 2%/°C over 50°C.
Temperature Coefficient:	0.02%/°C over temperature range.
Storage Temperature:	−55°C to +85°C.
Transient Response:	300 μsec for 50% to 100% load change to recover within 1% of voltage set point. 500 μsec for a multiple output.
Overload Protection:	Automatic current limit.
Overvoltage Protection:	Standard on all models.
Soft Start:	Standard on all models.
In Rush Current Limit:	Standard on all models.
Remote Sense:	Standard on all models.
Hold-up:	16 msec minimum after loss of input voltage measured at full load and nominal input.
Overshoot:	No voltage spikes on turn-on, turn-off or power failure.
Remote Shutdown:	Single Output.
Minimum Load: (Multiple Output)	15% minimum loading required on Output #1 to maintain regulation on Outputs #2, 3 & 4.

POWER PAC INC.

OPEN FRAME LINEAR DISK DRIVE POWER SUPPLIES EDD DISK DRIVE

FEATURES:

- Designed to power mosk disk memory systems Floppy disk — fixed disk — multiple drives
- 5¼ inch, 8 inch, fixed disk media 9 models — includes drive controller power
- Dual input 115/230 Volt — 50/60 Hz
- No 50 Hz derating
- Open frame construction Electrostatic shield
- Highest quality computer grade components 24-hour burn-in
- 5 year warranty
- UL recognized

SPECIFICATIONS:

Input Voltage:	105-125/210-250 VAC, 47-440 Hz
Output Voltage/Current:	See ratings in table.
Output Adj:	±5%
Regulation:	±0.15% line and load combined.
Ripple:	3 mV Peak to Peak
Transient Response:	50 μsec, full load to ½ load
Stability:	±.2% for 24 hrs. after ½ hr. warm-up
Temperature Coefficient:	Better than .025%/°C
Temperature Derating:	3%/°C above 50°C
Temperature — Operating:	0-70°C
Temperature — Storage:	−40° C to +85° C
Overload Protection:	All outputs protected by foldback type current limiting circuit. Automatic recovery upon removal of overload. Foldback is delayed on 24 volt output, to allow turn on surge normally encountered.
Overvoltage Protection:	OV Protection, factory set to trip from 5.8 to 7.0 VDC, is provided on both the plus and minus 5 volt outputs.
Shielding:	Electrostatic shield between primary and secondary of transformer
Cooling:	Convection cooled
Mechanical Dimensions:	For specific details of outline and mounting dimensions see PPI 82-06 Mechanical Data Handbook.

OPTION: Perforated cover

CUSTOM POWER SUPPLIES

Power Pac is one of the leading manufacturers of OEM Custom Power Supplies.

If our standard products do not fit your requirement, our experienced staff of engineers and designers are available to design to your exact requirement.

Our power supply applications vary from Medical Electronics, CRT Terminal, Disk Drive, Process Controls, Microprocessor, Main Frame Computers, Printers, Computer Peripheral, Recording Studio, Dental Electronics, Photo-typesetter, Word Processing to Industrial Control.

All supplies are designed to meet rigid quality and reliability requirements and are qualified to meet Underwriter Laboratories, Canadian Standards Association and European VDE Specifications.

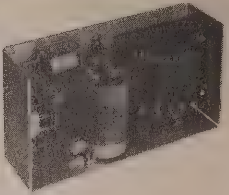
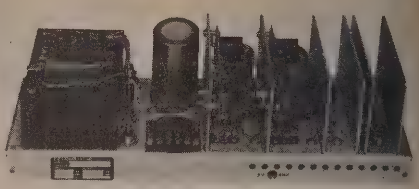
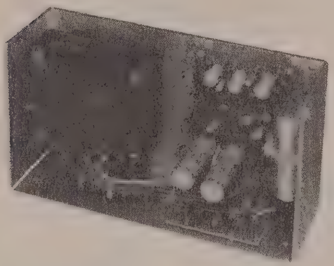
OPEN FRAME LINEAR
EP SINGLE OUTPUT





FEATURES:

- Most popular universal power supply series
- Open frame construction — convection cooled
- Dual input 115/230 Volt — 50/60 Hz
- Electrostatic shield
- Highest quality computer grade components
- Built-in short circuit protection with automatic recovery
- Optional over-voltage protection
- 24 hour burn-in
- 5 year warranty
- UL recognized



SPECIFICATIONS:

Input Voltage:	105/125 or 210/250 VAC, 47/440 Hz
Output Voltage/Current:	See rating in table I. Current ratings are for 57/440 Hz. Derate 10% at 50 Hz
Output Adj. Range:	±5% or .5 VDC minimum
Regulation:	±0.15% Line & Load combined
Ripple:	1.5 mV RMS, 5 mV pk-pk max
Stability:	±0.1% for 8 hours after warm-up
Temperature Operating:	0°C to +71°C continuous
Temperature Derating:	Derate 2%/°C above 40°C
Temperature Coefficient:	Better than 0.03%/°C
Transient Response:	50 μsec for a 50% load change to recover within ±10 mV band
Cooling:	Convection cooled
Overload Protection:	Built-in foldback type current limit circuit to protect against overload and short circuit condition, with automatic recovery. Set to operate at 120 to 135% of full load current at 40°C.
Overvoltage Protection:	Built-in SCR crowbar set at 120-130% of nominal output. (120-140% on EP6A and EP1B)
Remote Sense:	Standard on size 2C and larger
Output Polarity:	Floating, either side may be grounded
Shielding:	Electrostatic shield between primary and secondary of transformer
Mechanical Dimension:	For specific details of outline and mounting dimensions see PPI 82-06 Mechanical Data Handbook.

POWER PAC INC.

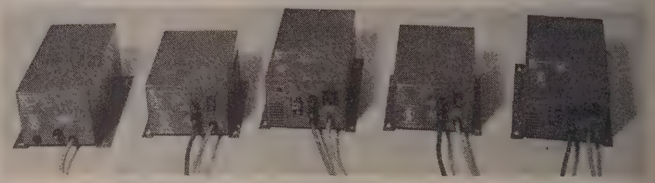
WALL MOUNT BASIC AND CONSTANT VOLTAGE OUTPUT BATTERY BACK-UP AND BATTERY CHARGER



FEATURES:

- Most popular universal power sources
- Wall mount construction
- Convection cooled
- Highest quality computer grade components
- Short circuit protected
- Battery charger/back-up
- Highest efficiencies
- 24 hourn burn-in
- 10 year warranty
- UL 1012 listed
- CSA approved

SPECIFICATIONS:

Input Voltage:	117/234 VAC ±10% 60 Hz Fuse protected. Lighted on/off switch.	
Regulation:	Basic DC models.	Constant Voltage models.
Line:	DC output is proportional to input line changes.	±1%
Load:	10% (20-100% load change)	5% (25-100% load change)
Ripple: (Line Frequency)	5% RMS	0.5% RMS
Efficiency:	80-90%	
Operating Temperature:	0-50 C	
Battery Back-Up:	Battery Charger and Back-up System charges batteries at 1.5 amp maximum rate, monitors Line, DC Output and Battery voltages and will automatically switch in battery system when Line or DC Output voltage falls below specification. When fault is cleared, the Power Source will switch back to normal operation and charge batteries.	
Transient Response:	50 ms for 50 to 100% load change for output to recover within rated voltage. (400 ms for constant voltage models).	
Overload:	150 to 300% of rated output current for one second at turn on.	
Overload Protection:	Automatic current limit is inherent in constant voltage models restricting short circuit current to a safe value. Output returns to normal upon removal of overload. Basic DC output models are fuse protected.	
Polarity:	Isolation between primary and secondary. Positive or negative ground.	
Input Connection:	Standard 3-wire cord 6 ft. long. Right angle molded plug.	
Output Connections:	Barriers or cable.	
Mounting:	All models are designed for wall mounting or stand alone. All models available without cover for installation in key systems.

KSD8-8	48 Volts DC	8.0 Amps	KS7	$440.00

The following options are available on special order.

1. Multiple DC outputs
2. AC outputs
3. Non Standard DC outputs

Power Pac Inc. is a privately held company founded in 1971 and devoted solely to the design and manufacture of Power Sources. Our business philosophy is to produce a conservatively-designed, high-quality product at a competitive price.

In addition to our OEM product lines designed and manufactured for the Electronic Industry we have introduced a complete line of Power Sources to satisfy the Key/PBX Telephone System and Telephone Interconnected Industry. These Power Sources are UL 1012 approved for Telephone Interconnect and will meet the requirements of the FCC.

Basic DC Output models are used when the DC output voltage need not be regulated.

Constant Voltage models are used when the DC output voltage must be input line regulated and have a moderate degree of load regulation.

Higher degrees of Input line and Output load regulation may be obtained by including either Linear or Switching regulators. Consult factory for details.

Battery Charger circuits are available for all models and are designed to charge and control Back-up Battery systems. These circuits will charge at maximum rate of 1.5 amps and will maintain a trickle charge of approximately 0.5 amps. Other charge rates are available.

Included with the battery Charger is a Control Circuit that will automatically monitor the input line, the DC output voltage and the battery voltage. When the output voltage drops below a preset value due to low input line voltage or loss of input line voltage, the Control Circuit will automatically switch in the Back-Up Battery system and monitor battery voltage. When the battery voltage drops below a preset value the Control Circuit will shut the system off. When the input line voltage returns to a normal level the system will be turned on and the battery will be charged. This complete battery Back-up System is available as a separate model. Consult factory for details.

If our standard products do not fit your requirement, our experienced staff of engineers and designers are available to design to your exact requirement.

(1) User May Draw up to Current Shown for Each Output, but Total Watts May Not Exceed Maximum Shown.
* Linear Post Regulator on Output.
† ±10% Regulation with High Peak Capability for Disk Drive.

PACKAGE DIMENSIONS		
EE	10.18 x 4.75 x 2.40 In. (max.)	(258.6 x 120.7 x 61 mm)

NOTE: Barrier Strip Connectors

- All 5 Volt Outputs Overvoltage Protected.
- Operating Temperature Range: 0°C to 70°C. Full Rating up to 60°C. From 60°C to 70°C, derate Linearly to 50% of Full Rating.
- All models feature power foldback output protection, input transient protection, 30 KHz switching rate, soft-start, no turn-on overshoot and 32 msec. hold-up time.
- Input Voltage Range: User-Selectable from 90 VAC to 135 VAC or 180 VAC to 270 VAC. Single-Wire Jumper.
- All models are UL Recognized ® and CSA Ⓢ Certified.

TWO-YEAR WARRANTY

All Prices and Specifications Subject to Change Without Notice.

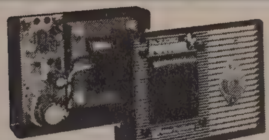
PACKAGED POWER



Open-Frame Linear Power Supplies

- User-Selectable Input Voltage: 100/115/220/230/240 VAC
- Up to 65% Efficiency
- Split-Bobbin Transformers
- 1500 VAC Isolation
- Designed to Meet UL & CSA

Design Capabilities

- **1 to 150 Watts**
- **Single & Multiple Outputs**
- **Standard, Wide, or Ultra-Wide Input Ranges**
- **Encapsulated, Cased or Open-Card Design**
- **Special Options to Standard Products**

WE OFFER THE LEADING EDGE OF TECHNOLOGY IN DESIGN AND PERFORMANCE.

FOR MORE INFORMATION CONTACT OUR APPLICATIONS DEPT. AT 617-268-1170 OR THE LOCAL SALES OFFICE NEAREST YOU.

Local Distributor Information
(617) 933-0237 (Eastern Time)

ORDER PLACEMENT

When ordering any product in this catalog, be sure to specify the complete part number or model number, including suffix letter if you desire a non-standard input voltage and/or pin configuration. Orders may be placed with your local distributor, area field sales representative (see list in manufacturer's directory) or directly with the factory.

For small quantity orders contact your closest distributor or local sales representative. For information regarding your closest distributor call (617) 933-0237. When ordering products directly from the factory, place each order separately with the division that manufactures those products; products made by the Power Products Division are *not* available through Stevens-Arnold or Compower and vice versa. Orders may be placed by mail, telephone, Telex or TWX.

PRICES

All prices quoted are F.O.B. manufacturer in U.S. dollars. Applicable federal, state, and local taxes are extra. Prices subject to change without notice.

DISCOUNTS

Substantial discounts are available for large quantities. Consult your area representative or contact the manufacturer directly for quantity pricing.

TERMS

Terms of payment are 30 days from date of shipment subject to prior credit approval.

MINIMUM ORDER

Minimum net billing per order . . . $50.00.

QUOTATIONS

Price and delivery quotations made by Power Products Division, Stevens-Arnold Division, Compower Division, or their authorized field sales representatives are valid for thirty (30) days, unless specified otherwise.

DELIVERY

All orders placed with Power Products Division, Stevens-Arnold Division, Compower Division, or their authorized field sales representatives are acknowledged within one week after receipt of customer's written purchase order by a Customer Acknowledgement copy of the Sales Order form. The copy contains all information pertinent to the sale including standard terms and conditions, plus the scheduled shipping date. Unless a specific method of shipment is indicated by the customer, the best available method will be used.

WARRANTY

All products carry a TWO-YEAR warranty against defects in materials and workmanship.

SPECIAL AND CUSTOM PRODUCTS

We manufacture many special and custom power supplies and DC/DC converters. For further help on your requirement call one of our divisions or your local sales office.

Custom Designed Power Supplies

Feature: Optimum Performance
Systems Interface
Cost Effectiveness

Specifications

The custom designed supply provides the correct current ratings for each output voltage, at proper temperature ratings for your systems' cooling provisions. The final design is checked out under actual system operating conditions. The system designer may specify adjustment pots, in the desired location for the outputs that require this feature. Also, the custom supply can provide the exact amount of extra current for those optional "expansion" features.

Configuration Control

Form and fit are tailored to employ the available space in the most efficient way. We can use flat assemblies or rectangular modules, fully enclosed or open, match cabinet fittings, bend around corners and mount in any plane. It provides for functional human-engineering as well as aesthetic considerations.

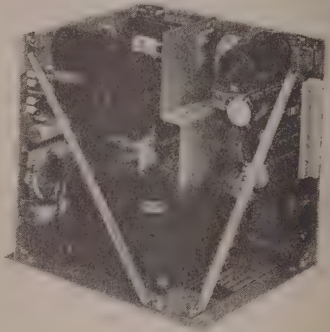
Thermal Design Options

The custom supply can take maximum advantage of the cooling methods designed into the cabinet or housing. It can "sink" heat into sheet metal, or place fins in optimum convection areas. Often the supply includes a fan which ventilates the entire cabinet. 115 VAC for fans is available regardless of the input voltage used (115 or 230 VAC).

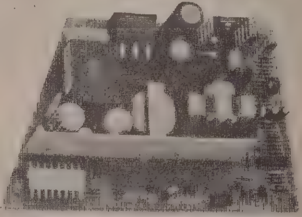
Input/Output Connections

Custom designed power supplies allow the system designer to locate input and output connectors for minimum cabling and ease of assembly. Choices include plated-edge pcb or pin-type connectors, flying-lead cables, solder terminals or barrier-terminal blocks.

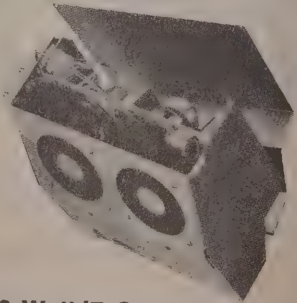
250 Watt Avg. 800 Watt Peak/ 3 Output Printer Power Supply



214 Watt/5 Output Ticketing Terminal



50 Watt/3 Output Terminal Power Supply with Synch.



450 Watt/7 Output High Speed Ticketing Terminal

150 Watt/3 Output with PFS Multi-User Microcomputer

System Related Features

System interface logic of many types is a highly useful advantage that is easy to obtain in a custom design. Standard TTL logic may signal AC power failure, DC power failure, DC power good (one or all outputs), remote inhibit one or all outputs and remote turn-on or off. Choice of digital or analog functions to remote program an output voltage.

Example #1 Complete AC to DC power system with AC PWR Fail, DC PWR Good, Remote Sense, external inhibit and AC fan power.

Example #2 CRT terminal logic supply. To eliminate any interference with the display, we synchronize the switching frequency to the horizontal retrace.

Agency Approvals

PSI designs to meet applicable UL and CSA standards as well as FCC and VDE Safety and EMI/RFI standards. Cards listing Power Systems model numbers already approved by UL and CSA are available upon request. Several supplies have been approved by TUV Rhineland as being compliant with VDE and IEC Safety Standards.

Cost Effectiveness

A higher-power rated "catalog" supply is often needed to compensate for current reduction by derating at higher temperatures. Prices often include unnecessary features. Front-end costs are generally required for a custom design program. When amortized over the total quantity for the product life, this becomes insignificant. The end result of a custom designed power supply is a form, fit and function that exactly matches the needs of the system, thereby optimizing system performance and cost.

Our application engineers will be happy to assist in writing specifications, advising on configuration design or reviewing cost tradeoffs. Send for a free copy of "Guidelines for Custom Specifications" by contacting our offices or your nearest sales representative.

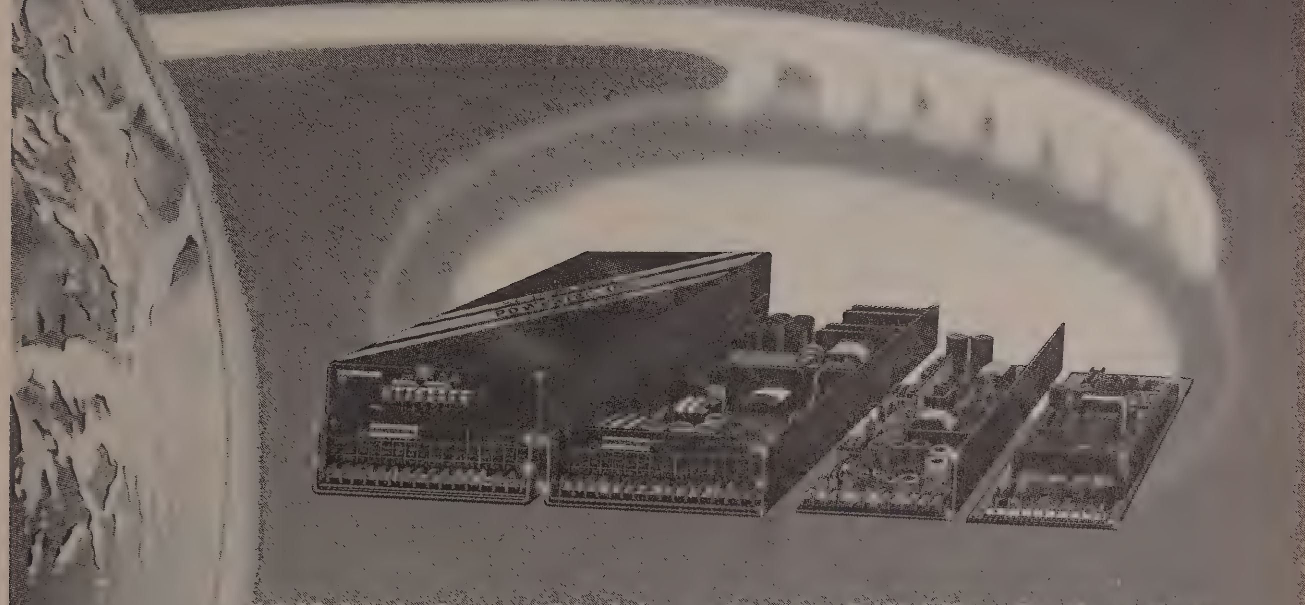
We call them ValuSwitchers.™

You'll Call Them Value Switchers The World Over.



44 Multiple Output Models 50 to 400 Watts

- VDE, IEC, CSA, UL Safety Specs
- FCC & VDE EMI Option
- Fully Regulated All Outputs
  OR
- Fully Regulated Main Output and Semi-regulated Auxiliaries up to 4 Outputs
- Field Strappable 115/230 VAC
- Extended Input Voltage Range: 90-132/180-264 VAC, 47-440 Hz
- Brown-out Below 85 or 170 VAC
- OVP with Crowbar and Inverter Shutdown
- Remote Sense
- Reverse Voltage Protection
- Soft-start Circuit
- Power Fail Signal Option
- Inhibit
- Hold-up Exceeds 20 ms
- Cover Option
- 100% Burn-in
- Powertec's 18 Years of Proven Value

March, 1984 (VS8)

Quality, Reliability, Performance at an Economical Price.

The ValuSwitcher family is Powertec's economical series of switching power supplies, both open frame and enclosed. ValuSwitchers are designed for low and medium power applications (50-400 watts). They are an extension of the SuperSwitcher™ family (400-1700 watts) introduced over ten years ago and the MultiMod™ multiple output switcher family (300-1000 watts).

Designated Series 19, ValuSwitchers offer a fully regulated main output and a choice of fully regulated or semi-regulated auxiliary outputs. OVP is standard on the main output, optional on the others. Additional options include a power fail signal, EMI filter and cover.

Common mode input filtering, logic inhibit, AC undervoltage inhibit and remote sense are all standard features.

Reliability, quality, and performance which have long characterized SuperSwitchers are also hallmarks of the ValuSwitchers. And at a price that offers the best DC power supply value in the industry.

Powertec Series 19 Specifications

See SuperSwitcher™ Family (Series 9) For Single Output Switchers From 400 To 1700 Watts.

AC INPUT

Nominal—115/230 VAC, field selectable,[14] 47 to 440 Hz[16]

Operating range—90-132 or 180-264 VAC.

Brown-out—Below 85 or 170 VAC.

Inrush current—For units that have been off for 0.5 hour, the maximum thermistor-limited inrush current is less than: 15 amps peak for the 19A, 35 amps peak for the 19C, and 50 amps peak for the 19E.

Undervoltage inhibit—Protected against malfunction due to AC undervoltage operation.

DC OUTPUTS

Adjustments—Only the fully[7] regulated outputs (VDC) are adjustable up to ±5% (except the 19A auxiliaries which are nonadjustable).

Initial tolerance, auxiliaries—Tolerance of all semi[6]-regulated outputs and all 19A fully[7] regulated auxiliary outputs is ±5% of nominal with all outputs at 50% load and main output set at 5.0 VDC.

Line regulation—±0.2% over an input range of 90-132/180-264 VAC at 100% of rated load.

Load regulation—All outputs will operate from no-load to full-load. However, proper operation of the auxiliaries requires that the main output be loaded to at least 10% of its 50°C rating. Regulation is measured statically between 20% and 100% of the 50°C rated output. For this measurement, all semi[6]-regulated outputs not under test should have 20%[19] loads. Fully[7] regulated auxiliaries need not be loaded.

	Main Output			Auxiliary Output			
	19A	19C	19E/F 6E/F	19A	19C	19E/19F	6E/6F
FULL[7]	±0.3%	±0.2%	±0.2%	±1.0%	±0.2%	N.A.	±0.2%
SEMI[6]	±0.3%	±0.2%	±0.2%	±2.5%	±2.5%	±2.5%	N.A.

Dynamic response—A step load change of ±25% of rated maximum will cause a regulated output to deviate no more than 2%, with recovery to 0.5% in less than 400μ sec.

Efficiency—Typically exceeds 75%.

Thermal regulation—±0.02%/°C, fully regulated outputs. ±0.05%/°C, semi-regulated outputs.

Cross regulation—Measured with the output under test loaded at 20% of rated max. while the load on any other output is varied from 50% to 100% of rated max.

	Main (Varying auxiliary)	Auxiliary (Varying main)	Auxiliary (Varying auxiliary)
FULL[7]	±0.1%	±0.1%	±0.1%
SEMI[6]	±0.5%	±2.5%	±0.5%

Ripple and Noise—Any output, 0.5% max. RMS ripple. Typically 1.0% P-P measured with a 20MHz scope via X1 probe, having 4″ max. return lead.

Hold-up time—Fully loaded outputs will remain within regulation for 20 msec. minimum from the last nominal line voltage peak.

OVER VOLTAGE PROTECTION

Main output—Both crowbar OVP and inverter shutdown OVP standard on all models.

Auxiliary outputs—19A: Not available. 19C: OVP shutdown available on regulated outputs only (Option A). 19E/19F: OVP shutdown on auxiliary outputs (Option A). Standard on 6E/6F auxiliaries. Remove AC input for 30 sec. to restore operation.

Range—OVP ranges are factory fixed as follows:[13]

5 VDC: 5.5-6.9 VDC	15 VDC: 16-20 VDC
8 VDC: 9.5-10.9 VDC	24 VDC: 25-29 VDC
12 VDC: 13-16 VDC	24 VDC: 31-32 VDC (19E, 19F only)

REVERSE VOLTAGE PROTECTION

Semi-regulated—Protected to rated current.

Fully regulated—Main output protected to rated current. All others protected to 1 amp continuously or full rated current momentarily.

LOADING vs. TEMPERATURE

Convection cooling—100% rated loads from 0°C to 50°C. Derate linearly to 50% at 70°C.

Forced air cooling—100% rated loads at 70°C with 400 LFM air directed along unit (excluding 6F & 19F).

REMOTE SENSING

Standard on +5 VDC output and 6E/6F auxiliaries. Can accommodate 0.25 VDC cable-drop. Open sense protection is provided. (Not available on 19A.)

CURRENT LIMITING

Main output and fully regulated auxiliary outputs are protected against overload and short circuits by fold-back current limiting. Semi-regulated auxiliaries are protected against continuous shorts.

POWER FAIL

Option D: A TTL compatible logic low signal will occur at least 2 ms before the loss of output following the loss of AC input.

LOGIC INHIBIT

All outputs will be shut off by the application of a TTL compatible logic low signal to the inhibit terminal.

SAFETY

Meets the test specifications listed below. UL submittals are automatic for standard units; check with factory for current status on any model. Powertec has been granted self-certification status by CSA. CSA logo available upon request.

UL 114, UL 478, UL 1012
CSA 22.2-143, CSA 22.2-154
IEC 380[10] IEC 435[10]
VDE 730[10] VDE 804[10] VDE 0806[10]

Hipot—3500 VDC Input to Output. 2100 VDC Input to Case. 700 VDC Output to Case.

Creepage/Clearance—3mm primary to secondary. 4mm primary to case.

Leakage—Less than 1 mA input to case.

Grounding—Case ground terminal provided.

Insulation—Exceeds 10 MΩ at 500 VDC.

EMI

Option B allows these units to meet the conducted EMI requirements of FCC Rule 15J (Docket 20780) and VDE 0871 as shown.

	19A	19C	*19E/19F/6E/6F
FCC	Class A	Class B	Class B
VDE	—	Class A	Class A

*Preliminary

WARRANTY—1 year

NOTES:

1. Maximum continuous output power may not exceed the product of rated current and voltage specified in the Selector Guide at indicated temperatures as measured at the output terminals.
2. Max. total power of all outputs combined.
3. Above 50°C, current and power ratings derate linearly to 50% at 70°C.
4. Higher current and power ratings attainable with moving air. Consult Factory. (Excludes 6F and 19F models.)
5. Outputs for 6E and 6F are floating (i.e., outputs may be wired for either plus or minus and may be paralleled).
6. Semi-regulated outputs. "Semi" have less circuitry in order to improve cost. Load regulation is sufficient for many requirements.
7. Fully regulated outputs. "Full" have additional circuitry to assure better regulation than the semi-regulated outputs.
8. Output voltage adjustable to ±5% of specified nominal.
9. Output voltage non-adjustable. Initial voltage within ±% tolerance indicated.
10. Class 1 non-SELV: Meets European safety requirements except in cases where a system does not provide for grounding, or where the possibility exists that an operator (maintenance personnel excepted) can come into physical contact with the power supply or its load terminals.
11. Must be connected (wired) to the load in parallel.
12. Higher peak current ratings may be obtained. Contact Factory.
13. Trip occurs within the applicable range.
14. Units shipped are strapped for 115 VAC input. Customer may change for use at 230 VAC.
15. Cover standard with 6F and 19F, optional on all others.
16. 6F and 19F operate at 47-63 Hz only, except on special order.
17. Line/load regulation, ripple and noise typically double at the higher current rating indicated.
18. To increase output current: Outputs No. 2 and No. 4 may be paralleled. Contact Factory for details.
19. Outputs will operate at lower load conditions with degraded regulation.

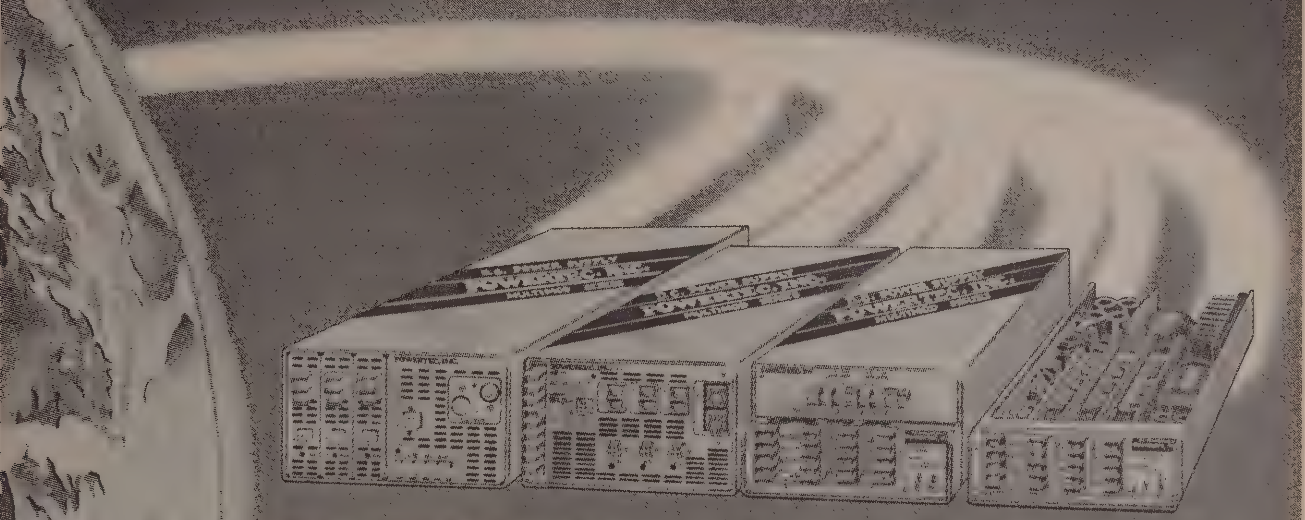
MultiMod™ Multiple Output Switchers.

The Custom Alternative The World Over.



300 to 1000 Watt Power Supplies With Up To 7 Outputs 2 to 48 Volts.

- Standard Off-The-Shelf Delivery
- VDE, IEC, CSA, UL Safety Specs
- FCC and VDE EMI Specs
- All Outputs Switching and Fully Isolated
- Field Selectable 115/230 VAC
- Efficiency Typically 75%
- Remote Sense
- Fully Regulated
- Extended Input Voltage Range: 90-132/165-265 VAC, 47-63 Hz
- Full Power Outputs at 50°C; Derates Linearly to 50% at 70°C
- OVP with Crowbar & Inverter Shut-down
- Power Fail Signal
- Logic Inhibit
- Soft Start
- Brown Out of 85 or 160 VAC
- Reverse Voltage Protection
- 100% Burn-in
- Powertec's 18 Years of Proven Value

MM6 April, 1984

Multi Modular Construction Using Standard Switching Plug-In Modules.

MultiMod™ is a new concept in multiple output modular switching power supplies providing an alternative to costly customs. It allows you to choose your voltage/current combinations from a large selection of standard switching power supplies and standard auxiliary output modules, and we do the rest.

The MultiMod switchers have 2 to 7 fully regulated outputs, which consist of one main output and 1 to 3 fully isolated plug-in output modules. These output modules are off-the-shelf standards which the designer can select as building blocks to provide his ideal voltage/current combinations. He is assured of dependable delivery of supplies which exactly match his unique requirements. And MultiMods operate with proven field reliability because they are put together with standard building blocks produced in high volume.

Main outputs use only pure switch mode design. All auxiliaries are also available as fully switching. Thus, the designer can be assured of maximum efficiency and minimum thermal stress. Post-linear regulated auxiliaries are also available.

Multiple outputs are available from 2 through 48 volts with modules rated from 12 to 750 watts. Total output ratings available are 300, 400, 600, 850 and 1000 watts.

POWERTEC

The Power in DC Power Supplies

Powertec, Inc., 20550 Nordhoff Street, Chatsworth, California 91311-6168 • (818) 882-0004 • TWX 910-494-2092

Selector Guide–Multiple Outputs

See ValuSwitcher™ Family (19 Series) For Other Multiple Output Switchers.

The MultiMod™ is a new concept in multiple output switching power supplies providing 2 to 7 outputs. A building block approach using a selection of flexible "power packages" and standard plug-in output modules provides voltage/current outputs tailored to your specific requirements. The power supply is delivered totally assembled and tested, using the output modules you have selected to meet your needs.

- Select the "power package" that meets your total output power requirements (300 to 1000 watts) by referring to the "Power Package Selector Guide."
- Select the output with the highest output power by referring to the "Main Output Selector Guide."
- Select lower power outputs (auxiliary plug-in modules) by referring to the "Auxiliary Module Selector Guides."
- Each power package accommodates one main output plus space for up to three one-space-wide auxiliary modules.
- One-space-wide auxiliary modules are available with 1 and 2 isolated outputs.
- Column Two of the "Main Output Selector Guide" indicates the quantity of one-space-wide auxiliary modules that may be used with the main output indicated.
- "Auxiliary Spaces Occupied" column of the "Auxiliary Module Selector Guide" indicates the quantity of spaces each auxiliary module occupies (1 to 3 spaces).
- See "Order Information" (Page 3) for more details.

POWER PACKAGE SELECTOR GUIDE

AUXILIARY MODULES SELECTOR GUIDE —DUAL OUTPUTS

Module Designation[11]	Applicable Models[12]	Output Ratings				Load Regulation % [15]	Ripple & Noise % P-P	Aux. Spaces Occupied[8]
		Volts[16]	Amps[1,2,3]					
			50°C	60°C	70°C			
R	6JA & 6JB	12	5	3.8	2.5	0.2	1.0	1
		12	5	3.8	2.5	0.2	1.0	1
T	6JA & 6JB	15	5	3.8	2.5	0.2	1.0	1
		15	5	3.8	2.5	0.2	1.0	1

NOTE: 3.3 volts main outputs and auxiliary outputs are available upon request. Contact Factory.

NOTES:

1. Maximum continuous output power may not exceed the product of rated current and voltage specified in the Selector Guide at indicated temperatures as measured at the output terminals.
2. Higher peak current ratings may be obtained. Contact Factory.
3. Maximum output power at 50°C of combined main and auxiliaries may not exceed the total package power indicated.
4. The combined power for all auxiliaries may not exceed power rating indicated.
5. Higher current and power ratings attainable with moving air (6E only).
6. "M" Auxiliary: Substitute "operating load current" for "rated max."
7. Number of outputs is determined by the output plug-in modules selected.
8. Number of spaces occupied by auxiliary module. Due to mechanical factors, 6JA and 6JB power packages are limited to no more than 2 "R" or "T" modules. Total number of outputs possible, including main, is therefore 6 and 5 outputs respectively.
9. 6J, 6L, 6M: Factory strapped for 230 VAC input. 6E, 6F: Factory strapped for 115 VAC input. Customer may change input strapping.
10. Class 1 Non-SELV: Meets European safety requirements except in cases where a system does not provide for grounding, or where the possibiltiy exists that an operator (maintenance personnel excepted) can come into physical contact with the power supply or its load terminals.
11. The Designation only represents the voltage and current output specs provided (NOT THE LOCATION). Powertec must determine the location of the auxiliaries.
12. Model (Power Package) in which the auxiliary module specifications are applicable.
13. Number of one-space-wide spaces available for auxiliary modules. Corresponds to "Auxiliary Spaces Occupied" column of the Auxiliary Module Selector Guide.
14. CSA logo added upon request. Powertec has been granted self-certification status by CSA.
15. When maximum auxiliary power is being used as shown in the Power Package Selector Guide, the load on the main output must be the following minimum percentage of the "Total Package Output Power" rating at 50°C: (6E:8%), (6F:6.5%), (6J:10%), (6L, 6M:7.5%). Lacking the above, auxiliary output voltages will decrease. Less minimum power on the main is required with reduced auxiliary loads.
16. Other voltages available on special order.

MM6 April,1984

All specifications are subject to change without notice.

Order Information and Specifications

Output to Case: 700 VDC
Creepage/Clearance—Primary to Secondary: 3 mm
Primary to Case: 3 mm
Case Grounded, Insulation Resistance —10M Ω
Leakage—1mA (3mA with Option B)

Custom Options & Modified Standards
5: Parallel Option (Contact Factory)
4: Factory Wired 230 VAC (6E & 6F)
3: CSA Logo[14]
2: Reverse Fan: 6J, 6L, 6M
G: Power Good Option (6L & 6M only)
P: Ball-bearing Fan
D: Power Fail Option (all models)
C: Cover Option: Applicable to 6E only, standard on others.
B: EMI Filter—

6E, 6F, 6J meet FCC 20780 Class B and VDE 0871 Class A.

6L and 6M (non-strappable 165-265 VAC input, version "3" only) meet FCC 20780 Class B and VDE 0871 Class A.

X: Powertec assigned revision letter when applicable.
7: **Input Voltages** (3 or 7)
3. 165 to 265 VAC (47-63 Hz); 6L, 6M only
7. 90 to 132 VAC (47-63 Hz) and 180 to 264 VAC (47-63 Hz) field selectable: 6E, 6F, 6JA, 6JB, 6L, 6M

Note: For 400 Hz operation contact factory.

SPECIFICATIONS

SAFETY and INPUT VOLTAGE
(See "Order Information" above.)

AC INPUTS

Brown Out—Regulates through short term line dips to at least 85 or 160 VAC.

Inrush Current—Limited to 4X operating current to prevent nuisance tripping of protective circuit breakers and fuses.

Turn On Time—0.2 sec. max. for power up.

Undervoltage Inhibit—Protected against malfunction due to AC undervoltage operation.

DC OUTPUTS

Adjustment—Output adjustable ±10% of nominal voltage except for 6E, 6F, 6J auxiliaries which are ±5%. Initial setting to ±1% of nominal voltage.

Line Regulation—
6J, 6L, 6M: 5 mV or 0.1% over input range.
6E and 6F: ±0.2% over input range.

Load Regulation—10 mV or 0.2% at any load up to 100% of rated load with remote sense connected; 0.2 mV/amp with internal sense; auxiliary modules with internal sense are 3 mV/amp.

Dynamic Response—A step load change of ±25% of rated max[6] will cause a max. deviation of 3%. Output will recover to within 0.1% of nominal in 400μsec.

Thermal Regulation—±0.02%/°C over operating range.

Ripple & Noise—See Selector Guide on page 2. Measured on 20 MHz scope via X1 probe having 4 inch maximum return lead.

Hold-up Time—Fully loaded outputs remain within regulation for 20 msec. minimum for the 6E and 6F following the last line voltage peak, measured from either 115 VAC or 230 VAC. Other values of hold-up are noted as follows:

HOLD-UP TIME vs. INPUT VOLTAGE (6JA, 6JB, 6L, 6M)

V_{in} CODE	7		3, 7			
NOMINAL VAC	90	115	165	180	208	230
HOLD-UP (msec.)	10	30	5	10	20	30

Efficiency—Exceeds 75% typically.

Loading vs. Temperature—100% rated load from 0 to 50°C. Derate linearly to 50% at 70°C.

Current Limiting—Foldback type, with automatic recovery upon removal of overload.

OVER VOLTAGE PROTECTION

OVP Inverter Shut-down (Standard)—All outputs: Initiates inverter shut-down and latches supply off. Trip point at output terminals are factory set within the following windows:

NOMINAL OUTPUT	2V	5V	12V	15V	24V	48V
TRIP WINDOW	2.8-3.2V	6.5-6.9V	14-16V	17-19V	27-29V	54-57V

Remove AC input for 30 sec. to restore operation.

OVP Crowbar—An SCR crowbar across the output terminals short circuits output to protect load against excessive voltage. Standard on main output only.

REVERSE VOLTAGE PROTECTION

Main outputs protected up to rated load. Auxiliary outputs protected to 50% rated load.

REMOTE SENSE

Separate sense terminals will accommodate a cable drop of 0.5 VDC. (See Note 1.) Internal circuitry protects load if sense lines are opened or shorted.

Margining: Fixed internal resistors can be installed to permit adjustment up to ±10% for main output. Contact factory regarding auxiliaries.

POWER FAIL SIGNAL

(Option)—Following the loss of AC input, a TTL compatible signal referenced to the negative terminal of the main output will change from high to low at least 2 msec. before the loss of output.

POWER GOOD SIGNAL (Standard Option of 6L and 6M)

(Option)—A TTL compatible signal referenced to the main negative output terminal will change from high to low if the output voltage deviates more than ±4% from nominal.

LOGIC INHIBIT

A TTL high signal referenced to the negative output terminal inhibits the output. A TTL low, or open input, enables the output.

Total Power Supply: Shutdown all outputs when main output is inhibited. Standard on all models.

Auxiliary Output: 6L, 6M: Total shutdown of individual output. 6J: Less than 1 volt.

WARRANTY—1 year

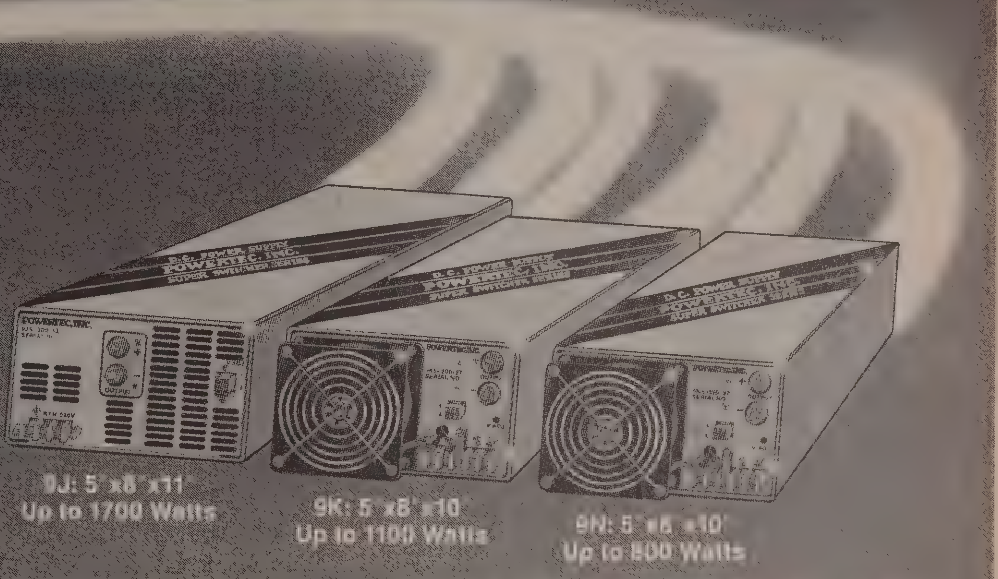
SuperSwitcher™

The Proven Industry Standard The World Over.



9J: 5″x8″x11″
Up to 1700 Watts

9K: 5″x8″x10″
Up to 1100 Watts

9N: 5″x8″x10″
Up to 800 Watts

Single and Multiple Outputs
240 to 1700 Watts
2 to 48 Volts—124 Models

- Class I SELV Approved*: VDE 730, VDE 804, VDE 806
- Class I SELV Approved*: IEC 380, IEC 435
- CSA Certified*: CSA 22.2-143, CSA 22.2-154
- UL Recognized*: UL 114, UL 478, UL 1012
- FCC & VDE EMI Specs
- 115/230 Field Strappable
- All Outputs Switching
- Full Power Outputs at 50°C
- Automatic Thermal Shut-down Protection
- Remote Sense
- Fully Regulated and Fully Isolated Outputs
- Extended Input Voltage Range: 90-132 VAC & 165-265 VAC, 47-63 Hz
- Brown Out Below 85 or 160 VAC
- Efficiency Typically 75%
- OVP with Crowbar & Inverter Shut-down
- Power Fail Signal
- Inhibit
- Soft Start
- Reverse Voltage Protection
- 100% Dynamic Burn-in: AC cycled on & off, Full load to no load to short circuit cycling
- Standard Off-The-Shelf Delivery
- Powertec's 18 Years of Proven Value

March 1984 (SS7)

VDE & IEC Approved* to Class I SELV
CSA Certified*
UL Recognized*

SuperSwitcher is a Powertec first, developed over ten years ago. Today, it is the most second-sourced high power switching power supply on the market.

It's grown to a series consisting of more than 120 models, with both single and multiple outputs, ranging from 2 to 48 volts, and 300 to 1700 watts. Most models are the 5″ x 8″ x 10″ fan cooled box.

Reconfigured to meet the Safety Extra Low Voltage (SELV) requirements of the tough European safety specifications, the new 9N & 9K models are setting new standards of performance for high power switchers. The new designs offer *8 mm spacing* and 5300 VDC hipot capability. Add to this optional *internal* EMI filters to meet either FCC or VDE noise specifications in a 5″ x 8″ x 10″ package, and you can see how Powertec is leading the way. Need more power? Just give us 1″ and you can have the 9J, a real brute dependably delivering up to 1700 watts in a 5″ x 8″ x 11″ package. With a host of standard features and standard options, of course.

Too good to be true? Not from Powertec. We deliver. We set the standard for others to copy. But then, that's what creating a standard is all about.

* Most Models

SuperSwitcher Designation

Package/Power

Output Voltage

Output Current

Safety Specs (-1, -2, or -3)

-1. Available in the 9J, 9K, and 9N
Meets UL 114, UL 478, UL 1012, CSA 22.2-143, CSA 22.2-154
Hipot—Input to Output: 2100 VDC
Input to Case: 2100 VDC
Output to Case: 700 VDC
Creepage/Clearance—Primary to Secondary: 2.4 mm
Primary to Case: 2.4 mm
Case Grounded, Insulation Resistance—10MΩ
Leakage—1mA (3mA with Option B or F)

-2. Available in the 9J, 9K and 9N
Meets all -1 specifications plus the following:
Class I non-SELV: VDE 730[4], VDE 804[4], VDE 806[4], IEC 380[4], IEC 435[4]
Hipot—Input to Output: 3500 VDC
Input to Case: 2100 VDC
Output to Case: 700 VDC
Creepage/Clearance—Primary to Secondary: 3 mm
Primary to Case: 3 mm
Case Grounded, Insulation Resistance—10MΩ
Leakage—1mA (3mA with Option B or F)

-3. Available in the 9K and 9N
Meets all -1 and -2 specifications plus the following:
Class I SELV: VDE 730, VDE 804, VDE 806, IEC 380, IEC 435
Hipot—Input to Output: 5300 VDC
Input to Case: 2100 VDC
Output to Case: 700 VDC
Creepage/Clearance—Primary to Secondary: 8 mm
Primary to Case: 4 mm
Case Grounded, Insulation Resistance—10MΩ
Leakage—1mA (3mA with Option B or F)

Input Voltages (3, 7, or 9)

3. 165 to 265 VAC (47-63 Hz)[7]: 9J, 9K, 9N

7. 90 to 132 VAC (47-63 Hz)[7] and 180 to 264 VAC (47-63 Hz)[7] field selectable: 9K, 9N only

9. 90 to 132 VAC (47-63 Hz)[7]: 9J only. 9K, 9N use 7 above.

Powertec assigned revision letter when applicable.

Custom Options & Modified Standard

5: Parallel Option[5]: 9J, 9K, 9N

4: Factory Wired 230 VAC: 9K, 9N

3: CSA Logo: 9J, 9K, 9N

2: Reverse Fan: 9J, 9K, 9N

P: Ball-bearing Fan: 9J, 9K, 9N

M: Margining: 9J, 9K, 9N

T: Multiple Studs: 9J, 9K, 9N
(See package drawing)

R: Inverted Inhibit: 9J, 9K, 9N

L: Surge Current Limit: 9K, 9N
(Standard in 9J)

A: OVP Crowbar: 9J (9K, 9N see "J" option)

G: Power Good: 9J (9K, 9N see "J" option)

D: Power Fail: 9J (9K, 9N see "J" option)

B: EMI Filter (B or F):
B. FCC 20780 Class A: 9J[6] 9K[6] 9N
F. FCC 20780 Class B: 9K[6] 9N
VDE 0871 Class A: 9J[3,6], 9K[6] 9N

Note: VDE 0871 Class B—all models require external filter.

J: Power Fail—Power Good—OVP Crowbar combined into a single option for the 9K, 9N models only.

March 1984 (SS7)

All specifications are subject to change without notice.

Powertec Series 9 Specifications

See ValuSwitcher™ Family (Series 19) for 50 to 400 Watt Multiple Output Switchers

INPUT VOLTAGE (See "Order Information/Specification"—Page 2.)

SAFETY (See "Order Information/Specification"—Page 2.)

AC INPUT

Brown Out—Regulates through short term line dips to at least 85 or 160 VAC.

Inrush Current—For units (9K, 9N) that have been off for 0.5 hour the maximum inrush current is less than 4x the operating current.

Surge Current Limit (Standard: 9J. Option: 9K, 9N)—Limits inrush current to the maximum steady state line current. See Options—Page 2.

Turn On Time—0.2 sec. max. for power up of standard unit. 1 sec. max. with surge current option.

Undervoltage Inhibit—Protected against malfunction due to AC undervoltage operation.

DC OUTPUT

Adjustment—Output adjustable ±10% of nominal voltage. Initial setting to ±1% of nominal voltage.

Line Regulation—5 mV or 0.1% over input range.

Load Regulation—10 mV or 0.2% at any load up to 100% of rated load with remote sense connected, 0.2 mV/amp with internal sense.

Dynamic Response—A step load change of ±25% of rated max. will cause a max. deviation of 3%. Output will recover to within 0.1% of nominal in 400μsec. typically.

Thermal Regulation—±0.02%°C over operating range.

Ripple & Noise—1% or 50 mV, whichever is greater, P-P maximum measured on 20 MHz scope via X1 probe having 4 inch maximum return lead.

Hold-up Time—Fully loaded outputs remain within regulation for 30 msec. minimum following the last line voltage peak, measured from either 115 VAC or 230 VAC. Other values of hold-up are noted below:

HOLD-UP TIME vs. INPUT VOLTAGE

V_{in} CODE	7, 9		3, 7			
NOMINAL VAC	90	115	165	180	208	230
HOLD-UP (msec.)*	10	30	5	10	20	30

*Typical hold-up times exceed those given above.

Efficiency—Exceeds 75% typically.

Loading vs. Temperature—100% rated load from 0-50°C. Derate linearly to 50% at 70°C.

Current Limiting—Foldback type, factory set at 105% to 125% of nominal, with automatic recovery (except for 2 volt outputs) upon removal of overload. Short circuit current limited to 10 to 50% of rated load current. For parallel operation see Note 5 and Option 5—Page 2.

OVER VOLTAGE PROTECTION

OVP Inverter Shut-down (Standard)—Initiates inverter shut-down and latches supply off. Trip point at output terminals are factory set within the following windows:

NOMINAL OUTPUT	2V	3.3V	5V	12V	15V	24V	28V	48V
TRIP WINDOW	2.8-3.2V	4.5-5.0V	6.5-6.9V	14-16V	17-19V	27-29V	31-33V	54-57V

OVP Crowbar (Option)—An SCR crowbar across the output terminals short circuits output to protect load against excessive voltage.
Remove AC input for 30 sec. to restore operation.

REVERSE VOLTAGE PROTECTION

Output protected up to rated load.

REMOTE SENSE

Separate sense terminals will accommodate a cable drop of 0.5 VDC. (See Note 1.) Internal circuitry protects load if sense lines are opened or shorted. +sense on J1-1, −sense on J1-4.

REMOTE OUTPUT PROGRAMMING

An external potentiometer, or resistors, or an external voltage source may be connected for remote control of output voltage.

LOGIC INHIBIT

(Standard)—A TTL high signal referenced to the negative output terminal inhibits the main DC output. A TTL low, or open input, enables the output. Input to J1-6.

AVAILABLE OPTIONS (See "Order Information/Specification"—Page 2.)

EMI (See Standard Option "B" or "F"—Page 2.)

POWER FAIL SIGNAL

(Option)—Following the loss of AC input, a TTL compatible signal referenced to the negative output terminal will change from high to low typically 5 msec. (but not less than 2 msec.) before the loss of output. Signal on J1-5.

POWER GOOD SIGNAL

(Option)—A TTL compatible signal referenced to the negative output terminal will change from high to low if the output voltage deviates more than ± 3 to 5% from nominal. Signal on J1-2.

INVERTED INHIBIT

(Option)—Inverse of standard logic inhibit. Input to J1-6.

MARGINING

(Option)—Permits fixed step adjustment of output voltage by ±10% minimum.

WARRANTY—1 year.

NOTE:
9N drawing applies to revision D product only.
9K drawing applies to revision B product only.

NOTES:

1. Maximum output power may not exceed the product of rated current and voltage specified in the Selector Guide as measured at the output terminals.
2. Most readily available. Other models available on special order.
3. Preliminary, contact factory for details.
4. Class I non-SELV: Meets European safety requirements except in cases where a system does not provide for grounding, or where the possibility exists that an operator (maintenance personnel excepted) can come into physical contact with the power supply or its load terminals.
5. For parallel operation, contact factory as different configurations are required for different models.
6. Available in the 165-265 VAC input model only (Version "3"). Other input voltage models require external filter.
7. May operate to 400 Hz on special order.
8. Letters and numbers will be put in alphabetical/numerical order for marking and ordering purposes.

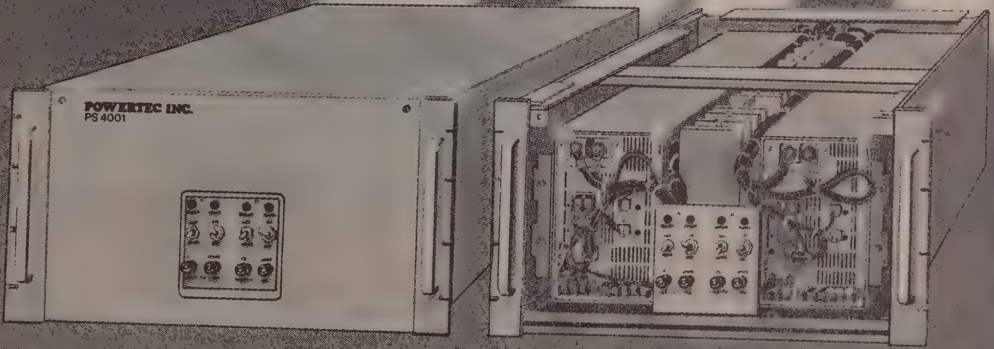
NOTES: 1. Other voltages and power levels up to 790 watts are available.
2. Maximum continuous output power must not exceed the product of rated voltage and current as measured at the output terminals.
3. Higher current ratings attainable with moving air. Consult factory.

April 1984

PowerSystems™ by Powertec

The Solution to Your Total System Power Requirements The World Over.



Single and Multiple Outputs 300 to 3400 Watts with up to 14 Outputs Using Standard Switching Power Supplies

- True redundancy with isolation diodes for fault protection
- Parallel operation for high power requirements
- VDE, IEC, CSA, UL Safety Specs
- FCC and VDE EMI Specs
- Field Selectable 115/230 VAC
- Standard 19″ rack for convenience
- Easy power supply installation via hinged-door and "quick-connect" mounting hardware
- Convenient hook-up via standard power cord and AMP FASTON™-type connectors
- Safe "on line" repair/replacement capabilities in redundant system
- Alarm circuitry for power good and power fail
- 100% Burn-in of Power Supplies
- Brown Out of 85 or 160 VAC
- Separate, electrically isolated outputs
- Powertec's 18 Years of Proven Value
- All the proven performance features and specifications of the SuperSwitcher,™ MultiMod™ and ValuSwitcher™ Power Supply Families.

May 1984 (PS1)

Quality, Reliability, Performance and Value Tailored to your System Requirements

PowerSystems™ by Powertec is a highly flexible building block approach for your total system requirements using standard Powertec power supplies from our three families of switchers:

- ValuSwitcher™—44 multiple output models from 50 to 400 Watts with up to 5 outputs—2 to 48 volts.
- MultiMod™—300 to 1000 watt multiple output power supplies with up to 7 outputs—2 to 48 volts.
- SuperSwitcher™—240 to 1700 watt single output power supplies from 2 to 48 volts—over 100 models available.

Powertec is capable of providing the following type of systems:

- True redundancy for 1 to 7 outputs to achieve maximum system reliability (not simply parallel operation).
- Up to 14 outputs and 2400 watts per system.
- Parallel operation for high current requirement on one or more voltages up to 3400 watts.

With PowerSystems,™ individual outputs can be configured to your needs. And all this in a standard 19″ rack mount or custom package that will meet UL, CSA, BT (formerly BPO) on some models, or VDE safety standards as required. PowerSystems™ by Powertec—deliver your total system power requirements.

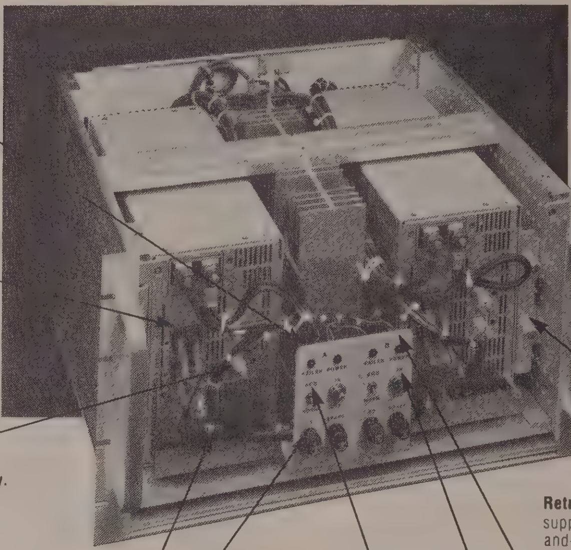
POWERTEC

The Power in DC Power Supplies

Powertec, Inc., 20550 Nordhoff Street, Chatsworth, California 91311-6168 • (818) 882-0004 • TWX 910-494-2092

Powertec PS4001 Features

PowerSystems™—PS4001 consists of two MultiMod™ power supplies configured in parallel redundant mode with current sharing. Parallel redundancy raises the level of system reliability by combining "mirrored" regulated outputs from each of two power supplies via isolation diodes. A detect signal reports and identifies a failed supply. The mechanical/electrical layout and con-



Individual Power Supply Failure Alarm LED Indicator. Lamp turns on upon detection of an undervoltage condition from any output of each supply

Hinged Drop-Down Front Door has easy-to-read wiring layout silk screened on inside of door showing connections with references to color-coded wires. (Not shown.)

AMP FASTON™-Type Connectors and color-coded wire on auxiliary DC outputs and AC inputs of each power supply—minimizes time to replace faulty unit

6JB5-BB-27B MultiMod™ Power Supply.

Retractable Captive Screws secure each power supply to the PowerSystems'™ rack. A simple press-in-and-twist action permits fast power supply removal and installation

Thermal Protection. Each power supply within the system has thermal cutoff protection to prevent damage to the power supply in the event of any condition that results in excessively high temperature within the system.

Individual Power Supply Alarm Cutoff Switch permits deactivation of Power Fail Alarm signal.

Individual Power Supply On/Off LED (Lamp) Indicator. Lamp informs operator that AC input to each supply is present or absent.

Fuses on Front Panel. Each supply (A & B) has "AC" hot input fused. Spare fuse and fuse holder for both supplies permits AC return to be fused in order to meet European safety standards. On domestic models, spare fuse holders are used simply to contain spare fuses.

Individual Power Supply On/Off Switch on Front Panel. Separate AC input to each supply can be switched off via easy access on/off switch on Front Panel, thus keeping service personnel from coming into contact with "hot" AC input

SPECIFICATIONS FOR PS4001

AC INPUT

47-63 Hz (47-400 Hz available as a special).

MODEL	VOLTAGE	
	NOMINAL	RANGE
PS4001	115/230	90-132/180-264 FIELD STRAPPABLE[1]
PS4002	220	180-242
PS4004	240	204-264

Brown Out—Regulates through short term line dips to at least 85 VAC or 160 VAC.

Inrush Current—Limited to 8X peak operating line current to prevent nuisance tripping of protective circuit breakers and fuses.

Turn-on Time—0.2 sec. max. for power-up.

Undervoltage Inhibit—Protected against malfunction due to AC undervoltage operation.

DC OUTPUTS

Regulation & Output Specifications—

OUTPUT	SYSTEM OUTPUT RATING*					REGULATION		
	VOLTS	VO. ADJ.	AMPS			SYSTEM TOLERANCE**	POWER SUPPLIES	
			50°C	60°C	70°C		LINE	LOAD
#1	+ 5.0	± 10%	80	60	40	± 2.5%	1%	0.2%
#2	+ 12.0	± 5%	8	6	4	± 3%	1%	0.2%
#3	12.0	± 5%	8	6	4	± 3%	1%	0.2%

*Total power from system outputs cannot exceed 550 watts. Individual power supplies are 600 watts each.

**Tolerance envelope limits include line, load, temperature, ripple and switching noise. Instrumentation having 20 mHz bandwidth is to be used for this measurement. The loads may be in all combinations. Initial output voltage adjustment better than ±1% of the above readings at room temperature and full load.

System Transient Response—All redundant or non-redundant outputs are to remain within 2% of the initial output specified for a step change (1A/μ sec.) at any output of 20% of load current at any load between 8 to 70 amps on the 5 volt output and between 1 to 8 amps on the ±12 volt outputs both at 50°C.

Thermal Regulation— ±0.02/°C over operating range.

System Ripple and Noise—For all valid static conditions of line and load, the output ripple and noise shall be 20 mV RMS maximum between +5V output and DC return and between DC return and chassis with a 100 ohm ½ watt resistor between chassis and DC return. For the ±12V output the ripple and noise shall be less than 40 mV RMS. Instrumentation for measurement purposes shall be HP3400A True RMS voltmeter or equivalent.

Hold-up Time—Following the last line voltage peak with system under full load.

V_{in} NOMINAL	117		220			
V_{in} ACTUAL	90	115	165	180	208	230
HOLD-UP (msec.)	10	30	5	10	20	30

System Efficiency—Typically exceeds 65% including redundant diode losses.

Current Limiting—

OUTPUT	MAX. CURRENT (AMPS) FOLDBACK KNEE	MAX. SHORT CIRCUIT
+ 5.0V	100	45
+ 12.0V	13	6
- 12.0V	13	6

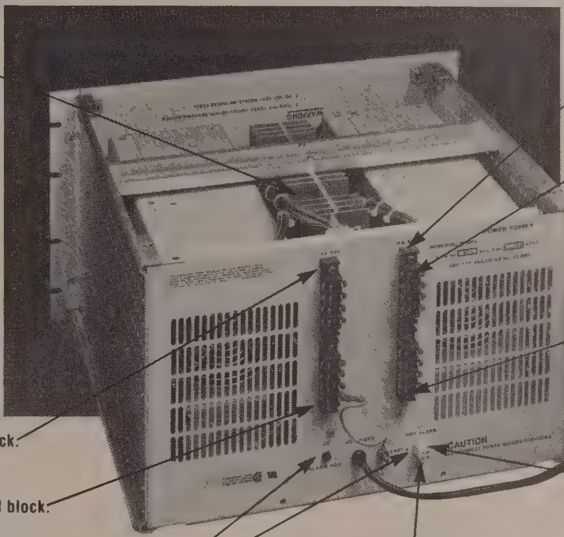
Automatic recovery upon removal of overload. Outputs can sustain indefinite overload or dead short without damage. Also, power supply system is capable of with standing a short from one output to another without damage.

May 1984 (PS1)

All specifications are subject to change without notice.

and Specifications

struction of the system avoids down time and minimizes time and effort required to replace a defective unit. Independent AC on/off switches for each supply allow for replacement of faulty unit while functional supply continues to support system operation.



Heatsink Mounted Diodes "or" outputs from two MultiMod™ power supplies to achieve parallel redundant operation with current sharing. Diodes are a must in order to isolate each supply's output from its "mirror" output on the other supply. Without the diode isolation, a shorted output capacitor or an OVP crowbar condition on any one of either supply's outputs would cripple system operation. Diodes thus insure that non-malfunctioning outputs continue to power the system reliably despite the presence of faulty output. Rack can be designed without diodes if isolation is not a requirement.

5VDC @ 90A output terminal block.

Multiple Connection Terminal Block. Each terminal block (Beau 73704-7311-7312 or Kulka 4696-04-KT547-KT548) consists of 4 posts. Each post has 4 FASTONS™ for a total of 16 per terminal block (AMP FASTON™-type male terminal tabs are .250"w x .032"t (typically))

−12VDC @ 10A output terminal block.

12VDC @ 10A output terminal block.

Common terminal block.

Inhibit Option. Allows for sequencing

Remote Sense Option. PS4001, PS4002, PS4004 have remote sense from the power supplies connected to system output terminals

DC Power Fail and Alarm. J2 (mates with .08" diameter pin) provides a logic + 5 VDC output signal upon detection of any output 20% or more below the nominal output voltage. J1 (Molex receptacle No. 1261-6 mates with Molex No. 03-09-2061), pins 1-3, provides a relay switch closure. The closure can be used to activate an audible warning device; e.g., buzzer or bell alerting attendant operators of the problem.

Guide/Mating Mounting Pins (2) on the rear panel of each power supply makes installation and mounting of each supply a snap. Mounting hardware and mounting effort are kept to a minimum. (Not shown.)

Current Sharing—5 Volt (Main) Output—System must draw 16 amperes or above on the 5 volt system output for each individual supply to current share within ±20% of nominal. ±12 Volt (Auxiliary) Outputs—System must draw 2 amperes or above on each of these system outputs for each individual auxiliary to current share within ±50% of nominal.

Note: $I\ \text{Nominal} = \frac{I_A + I_B}{2}$

Where I_A and I_B is the current drawn from each individual supply.

ADDITIONAL SPECIFICATIONS

Individual Power Supply Load Regulation, Dynamic Response, Ripple and Noise, Overvoltage Protection, etc. (See specific power supply family brochures.)

ADDITIONAL OPTIONS

Remote Sense, Power Fail, Power Good, Logic Inhibit, etc. (See specific power supply family brochures.)

SAFETY

PS4001 (U.S. and Canadian version)

Meets UL 114, UL 478, UL 1012, CSA 22.2-143, CSA 22.2-154

Hipot—Input to Output: 2100 VDC
Input to Case: 2100 VDC
Output to Case: 700 VDC

Creepage/Clearance—Primary to Secondary: 2.4 mm
Primary to Case: 2.4 mm

Case Grounded, Insulation Resistance—10MΩ

Leakage—1mA

PS4002 (European version)

Meets all above specifications plus the following:
Class I non-SELV: VDE 730[2], VDE 804[2], VDE 806[2], IEC 380[2], IEC 435[2]

Hipot—Input to Output: 3500 VDC
Input to Case: 2100 VDC
Output to Case: 700 VDC

Creepage/Clearance—Primary to Secondary: 3 mm
Primary to Case: 3 mm

Case Grounded, Insulation Resistance—10MΩ

Leakage—1mA

PS4004 (United Kingdom version)

Meets BT (formerly BPO) Guide 26

Hipot—Input to Output: 2200 VDC
Input to Case: 2200 VDC

Creepage/Clearance—Primary to Secondary: 3 mm
Primary to Case: 3 mm

Case Grounded, Insulation Resistance—100MΩ

EMI PERFORMANCE (All Models)

FCC 20780 Class B VDE 0871 Class A

DIMENSIONS—19" x 10.47" x 15.125" (not including handles and terminals).

WEIGHT—55 lbs. **WARRANTY**—1 year

NOTES:

1. Individual power supplies are field strappable. Standard 115V three-prong plug provided on line cord.
2. Class I non-SELV: Meets European safety requirements except in cases where a system does not provide for grounding, or where the possibility exists that an operator (maintenance personnel excepted) can come into physical contact with the power supply or its load terminals.

Powertec HP Series Specifications

SPECIFICATIONS

Input Voltage: 115 VAC±10% line to neutral or 208 VAC line to line, 3ϕ, 400 Hz ±5%. Other 3ϕ, 400Hz inputs available; consult factory. Transient withstand capability per Mil-Std-704, category B.

Output Rating: See Output Rating Chart. All output voltages are adjustable ±5% at full rated output current.

Regulation: See Output Rating Chart. Load regulation is specified for a 5 to 100% load change. Line regulation is specified for a −10% to +10% line change.

Ripple: Maximum ripple is 10 mV p-p with a typical ripple of 3mV p-p. Noise and spikes are 50 mV p-p max.

Transient Response: 50μs maximum recovery time to 0.1% of stabilized voltage for a step load of 1/3 full rated load.

Programming: Automatic ±5% remote voltage margining standard on all units by connecting programming pin to either the positive or negative output leads.

Remote Sensing: Remote sensing capability standard on all units.

Stability: ±1% for 8 hours after warm-up.

Temperature Rating: Continuous operation at full rated load from −55°C to +80°C baseplate temperature. Storage temperature: −62°C to +125°C. Meets Mil-Std-810B, method 501.

Temperature Coefficient: ±0.01%/°C maximum.

Overvoltage Protection: All units feature "crowbar" overvoltage protection factory set at 120% ±5% of nominal output voltage rating.

Output Overload Protection: All units feature electronic foldback over-current protection. Units are fully protected for all overload and short circuit conditions for baseplate temperatures up to 80°C.

Humidity: 95% per Mil-Std-810B, method 507, procedure 1.

Fungus: Per Mil-Std-810B, method 508.

Salt Fog: Per Mil-Std-810B, method 509.

Explosive Atmosphere: Per Mil-Std-810B, method 511, procedure 1.

Vibration: Designed to meet Mil-Std-810B, method 514, procedure 1, curve Z.

Shock: Designed to meet Mil-Std-810B, method 516, procedure 1, curve 516-1.

Isolation Resistance: 500 Megohm minimum between input, output and case.

Construction: All aluminum chassis black anodized per Mil-A-8625, Type II, Class 20. All hardware is stainless steel. Basic component selection is per ANA 400.

INPUT PROTECTION

In that these supplies feature crowbar overvoltage protection, it is imperative that they be protected against excessive input current. Recommended over-current protection is shown in the above table for each of the 3 phases.

AC INPUT

The AC input of Model No. 7F28-34A is wired as a "delta" (3 wire) input. The AC input of all other supplies is wired as a "wye" (4 wire) input. The load represented by these supplies is balanced, however, so that utilizing a "delta" (3 wire) input is fully acceptable with no degradation of performance.

PROGRAMMING

Connecting the programming pin to the positive or negative output terminal will increase or decrease the output voltage by 5% respectively. This is useful at the system level for voltage tolerance testing, noise margin verification, etc.

7F28-34A	28.0	34.0	0.06%	0.06%	60%	800W	15A

(1) Will provide full output current over a ±5% output voltage adjustment range.
(2) Maximum deviation for a full line voltage change (−10% to +10%).
(3) Total deviation for a 5 to 100% load change.
(4) Typical efficiency at nominal line. Efficiency at high line is approximately 5% lower (e.g.: 45% in place of 50%).
(5) Maximum dissipation figure to be utilized for purposes of heat sink selection. See additional information below.

HEAT SINK SELECTION

The smaller units (B, C, D case sizes) are readily cooled utilizing extruded heat sinks and forced air. The larger (E and F) units may also be cooled in this manner but are commonly liquid cooled. Regardless of the cooling method utilized, the heat-sink thermal impedance calculations are identical.

$$\Theta_{c\text{-}m} = \frac{T_c - T_m}{P_d}$$

Where:
Θc-m = Thermal impedance required case-to-cooling medium.
Tm = Maximum temperature of cooling medium in °C.
Tc = Maximum temperature of baseplate (case) = 80°C.
Pd = Maximum dissipated watts (from above table).

In that heat sink thermal impedance information tends to be inconsistent, and dependent upon a large number of variables, it must be empirically confirmed in the system that the baseplate temperature does not exceed 80°C under worst case conditions (full rated power supply load, high line input voltage, maximum cooling medium temperature). Note: Regardless of the actual operating power dissipation, heat sinking must be provided for the power dissipation provided in the above table as this maximum dissipation is reached under short-circuit and overvoltage crowbar conditions.

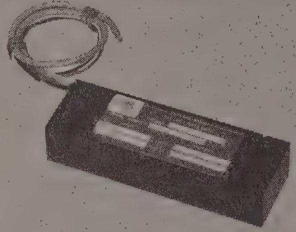
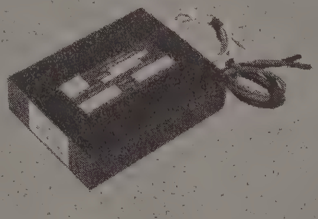
HE/NE LASER POWER SUPPLY



MODEL L23

Many shapes and sizes of this very compact supply are offered to fit a large variety of instrument packages. Numerous options are available, including an inhibit circuit to replace electromechanical relays for BRH compliance. Switching mode regulation provides exceptionally high efficiency while operating a plasma tube with a regulation of ± 1 mA. The high efficiency allows operation with a minimum of heat sink and a minimum of heating within an instrument, increasing the life of heat sensitive components.

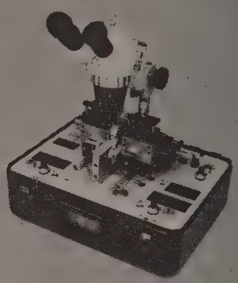
HE/NE LASER POWER SUPPLY



MODEL L92

Features of this product include isolation of the laser tube or leads from the AC line, operation from either 115 or 230VAC by switching one lead, switching mode current regulation for high efficiency, and power output of 5 to 18 W. The L92 is housed in a molded fiberglass case, and fully potted for maximum protection from dust and moisture. Size: 1.15 x 3.30 x 4.25" (29.2 x 83.8 x 108 mm).

The Model L45 same as Model L92 except case dimensions. Contact P.T.I. for further information.



PFS-300 SERIES OPTICAL FIBER SPLICER

Operating from internal batteries or from a variety of external power sources, the PFS-300 Series splicers are ideal universal instruments in the laboratory, out in the field during installations and repairs, or as part of a production line. The combination of ruggedness and rigidity that makes this splicer so versatile has many important ramifications, particularly in the field of single mode lightwave transmissions.

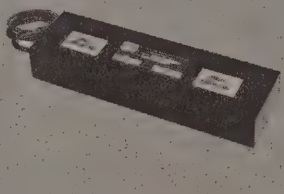
MODEL PFS-240 OPTICAL FIBER SPLICER

Featuring a modular stereo microscope and sturdy aluminum case, 'P.T.I.'s Model PFS-240 provides high level splicing performance, convenience, ease of operation, and ruggedness.

The stereo microscope will satisfy the most critical requirements for high-quality 3-D magnified images. With objectives 2X-4X as standard, rotation of a knurled ring selects either 40X or 80X. A lense attachment of 1.5X allows magnification of 60X to 120X.

Stereo zoom microscope, with magnification of 14X to 90X, provides large flat fields of view, crisply resolved. By rotating a knurled ring, magnifications are variable. A 1.5X lense attachment will allow magnification of 21X to 135X.

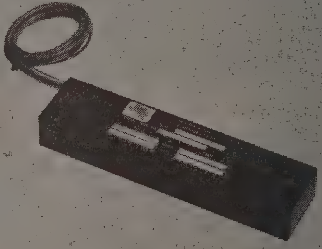
With the added features, our PFS-200 basic design is maintained. See inside page for specifications.



40 AND 75 W HeNe AND CO_2 LASER POWER SUPPLIES

Operating from 115 or 230VAC. All units are housed in black fiberglass cases and are fully potted for maximum protection from dust and moisture. Typical applications of the L87 is 20-25 MW HeNe while the L93 is 10-15 MW HeNe. Typical applications of the CO2 L89 is 75 W input and 40 W input for the L94. L87 and L89 sizes: 1.42 x 2.79 x 9.10" (36 x 69 x 231 mm). L93 and L94 sizes: 1.15 x 2.43 x 8.60" (29.2 x 61.7 x 219 mm).

HE/NE LASER POWER SUPPLY



MODELS L41, L43

This series allows your choice of AC input voltages at 50-400 Hz, which makes it particularly suitable for export. Features include isolation of the laser tube or lead from the AC line, switching mode current regulation, high efficiency, and exceptional compactness for a supply that delivers 4 to 20 W output. All models are housed in black fiberglass cases and are of a fully potted construction for maximum protection from dust and moisture. Size: .945 x 1.445 x 6.05" (24 x 36.7 x 154 mm).

ILM LASER DIODE PULSER

ILM SERIES

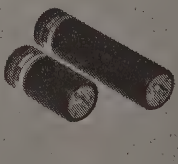
The ILM Series Laser Diode Pulser is designed to drive the ITT Ls 7711 or Laser Diode Labs LDT 350 Series Fiber Coupled laser arrays. An internal power supply allows operation from any available D.C. voltage between 10 and 28 volts. Pulser dimensions and mountings is compatible with close spaced multiple arrays such as the ITT Ls7729, Ls7717, Ls7730, and Laser Diode Labs LDT 391.

LASER DIODE SIMULATOR

CS100

This convenient, easy to use simulator is compact and self contained. It provides a pulsed 1.06 micron infrared signal source simulating a laser. Because of its portability, it is ideally suited to laboratory or field testing of laser systems or fiber optics. A double pulse option allows testing of laser range-finders. Output power is 20 mW at 20 ns and 1.06 microns. Input voltage can be 115 VAC, 230 VAC or 12 VDC.

LASER DIODE PULSER

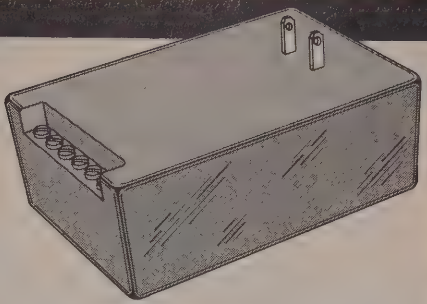


ILC SERIES

The ILC produces more average output power for driving laser diodes at 7 to 200 ns widths than avalanche or SCR pulsers. Models are available for pulse current of 1 through 100A. Fast rise and fall times, with internal clock for pulse rates of 100 through 10,000 PPS. Size: (for internal supply) 1" x 4.25" (25 mm x 108 mm) or 1.25" x 4.25" (32 mm x 108 mm); (with customer supplied external supply) 1" x 2.5" (25 mm x 64 mm) or 1.25" x 2.5" (32 mm x 64 mm).

Precision Components

Wall plug-in POWER SUPPLIES



Precision Components incorporates the latest power conversion technology into all regulated wall plug-in power supplies. Some of the key advantages in using Wall Power Supplies are:

- Product size can be reduced.
- System becomes more reliable because of less heat build-up in product.
- Accelerate product design. Most power supplies available from stock.
- Increase safety due to low input voltage into your product.
- Reduce UL and CSA approval time.

Important features of Precision Components regulated power supplies are:

- **Use of highly reliable power MOS/FET transistors**
- **One year warranty**
- **Designed to meet all UL and CSA requirements**
- **Overcurrent and short circuit protected**
- **Meet FCC Docket 20780 Class B**
- **Storage temperature −55°C. to +85°C.**
- **0°C. to 50°C.—operating temperature**
- **5V. overvoltage protection standard**
- **24 hour cycle burn-in at 55°C. standard on all units**

Dual Output

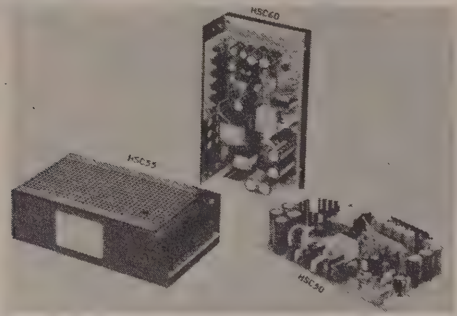
SWITCHING POWER SUPPLIES, 30 to 125 WATT OUTPUT



Qualidyne "QSC" Series switching power supplies are available in six standard ratings from 30 to 125 Watts output. Input is jumper selectable for nominal 115 or 230 Vac. The table below lists all standard models. Those shown with an asterisk are available from stock. All models feature overvoltage, surge current and short circuit foldback protection. Each unit is completely tested with a minimum 24 hour burn-in at full load and operating temperature. All units have built in EMI filters and are UL approved and meet all European and VDE requirements.

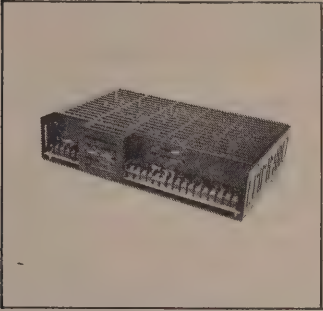
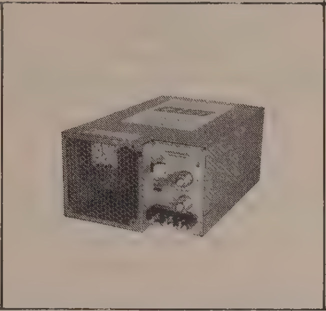
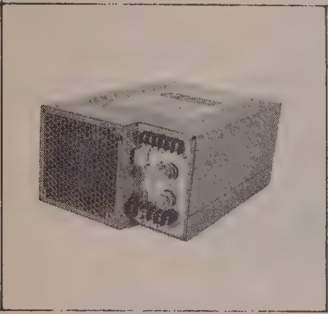
SWITCHING POWER SUPPLIES 300 WATTS TO 1800 WATTS



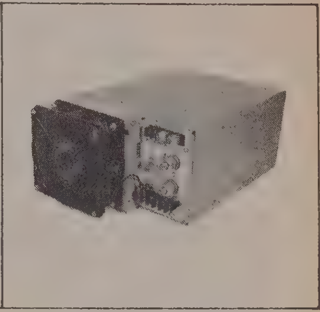
3519B-3-001



6010C-5G-001



8410B-3CFG-024



9311C-2F-002

The Qualidyne power supplies listed on this page are all highly efficient switching types for computer related equipment, from 300 to 1500 Watts with single or multiple (up to 5) outputs in many combinations. There are four basic styles and a variety of models within each style. The 3519 model is a low profile unit featuring five outputs which can be used in series or parallel.

The other models shown here have the same basic case dimensions. When a cooling fan is used, only 2″ are added to the case length. The tables illustrate the breadth of line available. There are 9 models in the 4010 line with voltages ranging from as low as 2 at 100 Amps to 48V at 10 Amps. In the tables the figures for the channels indicate the available range (5V/6A to 24V/6A).

Most models feature dual AC input (115/208). Some are designed for DC input and the higher power units are either 115 or 208 Vac input. All Qualidyne power supplies are UL listed and meet all other safety standards (CSA, VDE, IEC, etc.) Efficiency varies with load and cooling method.

The "X" in the model numbers indicates an option or voltage to be specified. The options are: A = Inhibit Active Hi; B = Inhibit Active Lo; C = Overvoltage crowbar; D = Enable Active Hi; E = Enable Active Lo; F = AC Power Fail; G = DC Power Good; H = 47-440 Hz; J = Current Monitor; M = Provision for system margin test.

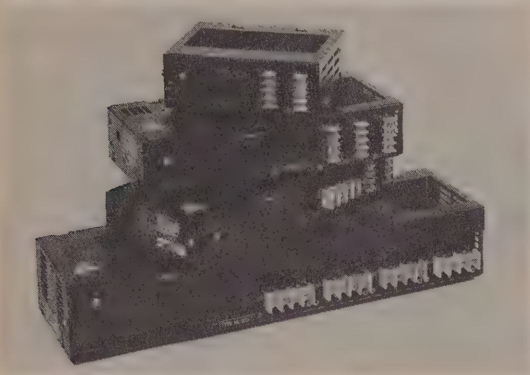
SWITCHING POWER SUPPLIES • ML SERIES



FEATURES

- High Reliability • Flexibility • No main channel load reqd. All outputs independent
- Operate to zero load
- Any number of configurations — up to six outputs
- AC and DC input
- Prototype service — stock to 2 weeks including custom designs • B.T. approval
- Designed for UL, CSA, VDE, BS

The Qualidyne ML Series provides a modular approach to power supply selection and allows the designer to choose from a wide variety of output modules to build the neederd power supply with either AC or DC input. Call for complete details.

S-PAC/UNREGULATED

Requiring only .413 square inches of boardspace, the SA/SP Series of 1 watt DC-DC converters provides the ideal solution in applications where local point-of-load voltage distribution is required and space is critical. Designed to operate from power bus levels of 5 or 12 VDC (±10%), the units provide a wide range of isolated output voltages, single and dual, at board level while also isolating the load from the source. This series finds applications in portable equipment and communications devices such as RS-232 interfaces.

S-PAC/REGULATED

The SPAC(TM) series of single output regulated DC-DC converters provides an economical and space effective solution in applications where local voltage conversion, regulation and isolation are required at point of load. Wherever 5 or 12 VDC power is available, these converters enable the designer to have other positive and negative regulated voltages in a form factor compatible with IC assembly techniques. The units are specifically designed for applications where low ripple and noise are required, as in circuits using OP-AMPS, A/D and D/A converters, RAMS, EPROMS and microprocessors. The SPAC regulated units can be mounted on the board at the point of load, thereby reducing decoupling and noise pickup problems associated with longer power runs.

2A-SERIES

The 2A-Series of 2 watt regulated DC-DC converters operates from an input of 5 VDC (±10%) and provides dual outputs of ±12 or ±15 VDC. The series operates with no derating over the full specified temperature range. The units are built with solid tantalum capacitors for enhanced reliability and are 100% burned-in under full load conditions and triple tested. They are designed for low noise analog applications such as A/D, D/A conversion and fiber optic modules.

V-PAC/UNREGULATED

The VA/VP series of 1 watt semi-regulated DC-DC converters operates from an input of 5 VDC or 12 VDC (±10%) and makes available at board level a wide range of isolated output voltages, either single or dual. The converters are encapsulated and operate over their full specified temperature range without derating or heatsinking. Solid tantalum capacitors are used in their manufacture for enhanced reliability. They are specifically designed for RS-232 line driver/receiver, OP-AMP, EPROM, EEPROM and negative voltage biasing applications.

RELPAC

5-WATT SWITCHING

RELPAC™ power sources utilize the latest DC-DC switch mode power conversion technology to provide regulated (.5%, line and load), low noise DC outputs of 5, 12 or 15 volts at typical efficiencies over 70%. Operating specifications remain constant over the full temperature range. The series is designed for battery-powered applications and incorporates remote shutdown circuitry that allows the converter to be put in a standby mode, drawing less than 5 mA input current. An optional external trim feature allows adjustment of the output voltage to tight tolerances and to non-standard voltage levels such as the 5.20 VDC required for ECL circuits. The RELPAC is available in either a plastic or copper (6-sided) compact package and in any one of 3 industry-standard pinout configurations.

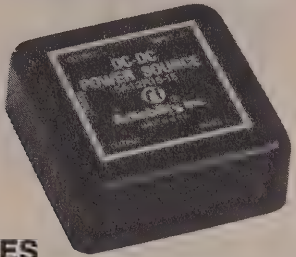
POWER SOURCES DIVISION



A-SERIES

The A-series of regulated DC-DC converters is designed for low noise analog circuitry such as high speed A/D and D/A with buffer memories. The series operates from inputs of 5, 12 or 24 VDC (±10%) with single 5 VDC, dual ±12 and ±15 VDC outputs. All A-series devices operate over their full temperature range with no derating. The series design incorporates enhanced reliability due to the use of tantalum capacitors and 100% burn-in and triple testing during the manufacturing process.

D-SERIES

Through the exclusive use of tantalum capacitors in its manufacture, the D-Series of DC-DC converters provides reliability figures above 60K-hours. Additionally, every device receives burn-in and triple testing prior to shipment. This series, operating from an input of 5, 12, or 24 VDC (±10%), supplies single 5, ±12, ±15 VDC outputs. Designed for low noise analog circuitry, these units find applications in D/A, A/D converters, operational and instrument amplifiers, and portable data acquisition equipment.

W-SERIES

The W-series is designed for the wider input-voltage range requirements of board level DC-power distribution. The series operates from nominal inputs of 5, 12 or 24 VDC (−10%/+25%) with single and dual output voltages. Outputs feature extremely low noise due to the exclusive use of tantalum capacitors and provide ideal power for battery backed-up systems using high speed A/D and D/A converters with buffer memory. All Reliability DC-DC converters are burned-in and triple tested for increased reliability.

ONE-YEAR WARRANTY

RIFA

power products **PKA**

DC/DC converters 25—40W

Single, Dual and Triple outputs

- **Switching frequency: 300kHz**
- **Short circuit proof**
- **MTBF at T_{amb} = 45°C: >200 years**
- **No extra components**
- **No extra cooling**
- **Parallelable**
- **PC-card or chassis mountable**
- **Extremely compact: 25W—0.25W/cm^3 (4.1W/in^3), 30W—0.3W/cm^3 (4.9W/in^3)**
- **Extremely light-weight: 100—160 gr. (3.53—5.64 ozs.)**
- **Input voltage ratings:**
  - **+24V (19—35V)**
  - **−48V (−39... −64V)**
- **Low RFI and noise**
- **Transient protected**
- **Input sense with shutdown command at undervoltage**
- **Output adjustable: ±10%**
- **Remote control**
- **Soft start**
- **Very high efficiency: 79—85%**
- **No derating of output power −45°C to +85°C**

The PKA series DC/DC converters are modular miniaturized standard components designed for economic Industrial/Professional applications in central and decentralized power supply systems. Their completeness and particular mechanical features of dimensions and weight make the PKA series suitable also for high power density PC-card applications. The very high MTBF-figure makes the converters useful for parallel operations in great numbers, while maintaining a good system MTBF-figure. 300kHz PWM-switching technology, and sophisticated mechanical design including thickfilm technology, custom designed IC:s and extremely minimized magnetics, give the RIFA converters unique electrical and mechanical features.

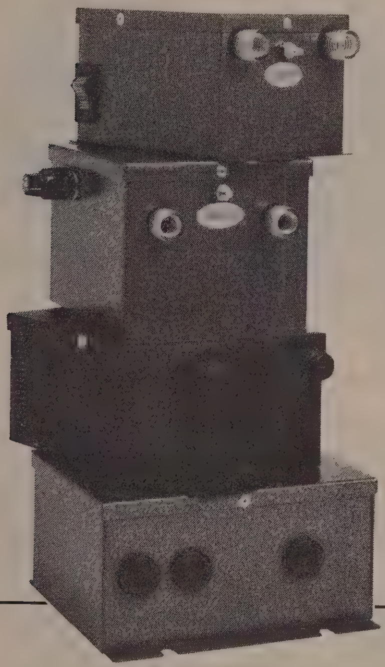
THE MOST RELIABLE POWER SUPPLIES FOR HIGH VOLTAGE DC POWER

- Delivery from stock
- Standard or custom design
- Regulated, short circuit and arc protected
- All units available — 120/220, 50/60 Hz
- Special input voltages available

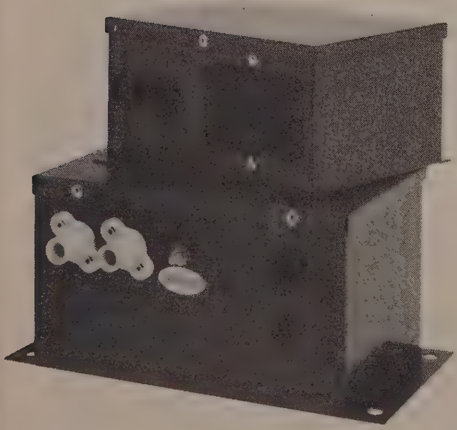
S&H manufactures a wide range of High Voltage Power Supplies, both in stock and custom designs. Our Application Engineers can work with your special requirements and match them to either a cataloged unit or they will be pleased to quote to your exact specifications.



SINGLE OUTPUT VOLTAGE

MODEL NUMBER	INPUT VOLTAGE	OUTPUT VOLTAGE	POWER OUTPUT
DC-1205	120V/60 Hz	5000 VDC	20 VA
DC-1206	120V/60 Hz	6000 VDC	20 VA
DC-1207	120V/60 Hz	7000 VDC	20 VA
DC-1208	120V/60 Hz	8000 VDC	20 VA
DC-1209	120V/60 Hz	9000 VDC	20 VA
DC-12010	120V/60 Hz	10,000 VDC	20 VA
DC-12012	120V/60 Hz	12,000 VDC	20 VA
DC-12014	120V/60 Hz	14,000 VDC	20 VA
DC-12016	120V/60 Hz	16,000 VDC	20 VA
DC-12018	120V/60 Hz	18,000 VDC	20 VA

Units are also available for 230 and/or 50 Hz. The output of above models are isolated. Either output terminal may be grounded for positive or negative applications.



DUAL OUTPUT VOLTAGE

MODEL NUMBER	PRIMARY INPUT	POLARITY	OUTPUT VOLTAGE
DC-1205/9	120V/60 Hz	Positive	9000/5000
DCN-1205/9	120V/60 Hz	Negative	9000/5000
DC-1205/10	120V/60 Hz	Positive	9500/5000
DCN-1205/10	120V/60 Hz	Negative	9500/5000
DC-1205/11	120V/60 Hz	Positive	10,500/5000
DCN-1205/11	120V/60 Hz	Negative	10,500/5000

Above units also available for 230V and/or 50 Hz.

All S&H power sources utilized epoxy molded ferroresonant transformers and are therefore line and load regulated.

Ideal for use in precipitators, microfiche copiers, plain paper copiers and many other electrostatic charge and discharge applications.

OEM Switching Power Supplies

Features
- Dual Range AC input
- UL recognized, CSA certified
- Compliance to FCC 20780/Class A and VDE 0871/A for conducted noise
- VDE 0806/IEC 380 safety standards (7M and 5K only)
- Two year warranty
- 24-hour burn-in
- 65% to 80% efficiency
- Output status LED indicator
- Overvoltage protection
- Overload protection
- Enable/inhibit function
- Reverse polarity protection
- Convection cooled

Specifications

The following is a brief summary of specifications. Comprehensive specifications for each model are included in the full product line catalog.
- Input 90-132/180-264 VAC, 47-63 Hz
- Input carry-over 16ms minimum
- Ripple and noise from 50mVp-p typical
- 0 to 40°C full rated load. Derate linearly to 50% load at 70°C
- Efficiency ranges from 65% to 80% dependent on model number
- Line regulation from 0.15%
- Load regulation from 0.15%
- Transient response from 500μs for a 50% to 100% load change with a maximum deviation of 4% of V_{out}.
- Turn-on time 100ms maximum
- Power fail option

Micro-Reg Low Power Supplies

Features

- Smallest open frame construction available
- Overvoltage protection
- Monolithic voltage regulation
- Single, dual and triple outputs
- Economical replacement for encapsulated supplies
- Two year warranty
- UL recognized
- Overcurrent protection

Specifications

The following is a brief summary of specifications. Comprehensive specifications for each model are included in the full product line catalog.

- Input 105-125 VAC, 47-440 Hz.
- Line regulation for 1C single output models 0.15% for a low-high line change. All others 0.5%.
- Load regulation for 1C single output models 0.15% for a 0 to 100% load change. All others 0.5%.
- Ripple 3mVp-p typical, 10mVp-p maximum on 1C single output models. 10mVp-p typical, 50mVp-p maximum on all others.
- 0° to 40°C full rated load. Derate linearly to 50% load at 70°C ambient temperature.

S-100 Bus Power Supplies

Features:

- Standard units provide 128W and 288W output power
- Dual range AC input
- Unregulated supplies for "on-board" regulators

Specifications

- Input 115/230 VAC ±10%, 47-440 Hz.
- Outputs below 20A are fused.

150 Watt Switcher

Features

- Single, triple and quad outputs
- Three board levels—PC board only, open frame and enclosed
- Construction Flexibility
- Remote Sensing
- Soft Start
- UL/CSA Recognized
- Overcurrent Protection
- Overvoltage Protection

Electrical Characteristics

Input Voltage: 120/240 VAC RMS
Input Voltage Range: 90-137 VAC
180-257 VAC
Input Frequency: 50-400 Hz.
Soft Start: 500 mSec. maximum to full output.
Maximum Input Current: 4. Amp @ 120 VAC
2.5 Amp @ 240 VAC
(External fuse)
Regulation: 0.25 - 0.5%; unit dependent
Hold-Up Time: 10 mSec @ 100 VAC input (full load)
Output Power: 150 Watts

Environmental Characteristics

Storage Temperature: −30 to +105 degrees C.
Operating Temperature: 0 to 40 degrees C.: full output.
40 to 85 degrees C.: derate linearly to 0 watts.

Electrical Specifications
(Single Output Series)

Initial Set Accuracy: ±1%
Adjustability: ±5%
Line Regulation: 0.25%
Load Regulation: 0.25%
Ripple (p-p): 50 mV. max.
Transient Response: 500 μSec - 25% to 100% load.
Maximum Overshoot: 2% - 50% to 100% load.
Overload Protection: 110% of load rating.

SPELLMAN High Voltage Electronics Corporation

HIGH VOLTAGE POWER SUPPLIES

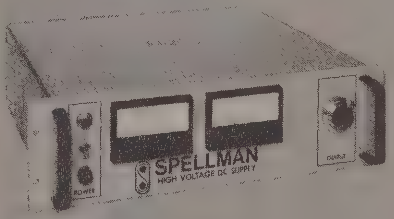
- Voltages as high as 400 KV
- Models from low to high power (0 to 100 KW)
- Rack and modular configurations
- Standard, custom and OEM designs
- Highly regulated and economy versions
- Designs for laboratory, production or military applications
- Protection against shorts, overload, and arcing
- Low ripple

TYPICAL APPLICATIONS:

- **HV devices** . . . CRT's, lasers, photomultipliers, X-ray tubes, capacitor chargers
- **HV instrumentation** . . . ionization chambers, electron beam accelerators, SEM's
- **Production processing** . . . X-ray lithography, ion implantation, electrostatics
- Medical x-ray imaging
- Nuclear magnetic resonance

SPELLMAN'S EXPERIENCE IN HV DESIGN MAKES THE DIFFERENCE

For over 42 years SPELLMAN has been a leader in high voltage technology as a **specialist** in supplying high voltage power sources for a wide variety of applications. The **RHP** models use SPELLMAN's proprietary new series resonant technology. This highly efficient design allows switching rates of over 20 KHz. At the same time it avoids spikes and RFI problems previously associated with switching and pulse width modulated supplies. The **RHR/UHR/RHSR** models utilize a solid state RF high voltage circuit that feeds to an RF oscillator circuit operating at 35-40 KHz.



STANDARD HV RACK POWER SUPPLIES

SUMMARY OF SPECIFICATIONS

INPUT: 105-125 VAC, 50-60 Hz (optional 100V or 220 VAC, 50-60 Hz); RHP: 208 VAC ±10%, 3φ, 50-60 Hz; (Others available on request).

OUTPUT: continuously adjustable current limited to 100% of rated load.

PROTECTION: overload, short circuit and arc.

FEATURES: contact factory for complete details on available options for each model and to receive a full line catalog.

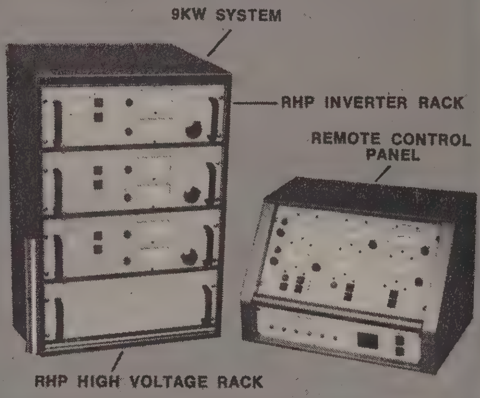
SPELLMAN High Voltage Electronics Corporation

Standard HV RACK power supplies

continued from previous page

Refer to the charts below to select appropriate models. If specifications do not meet exact requirements consult factory. Custom designs available upon request.



RACK MOUNTED POWER SUPPLY MODELS

RHP Series High wattage without large size (due to a uniquely efficient design technique), digital metering and IEEE bus available; can be paralled for up to 9 KW (15-100 KW also available).

RHR Series A general purpose unit for a variety of uses with a reasonable compromise between power, regulation, stability, ripple, size and price.

RHSR Series For demanding applications featuring exceptional regulation and stability with very low ripple; remote voltage and resistance programming and monitoring is standard.

UHR Series Most economical unit with satisfactory performance for many uses such as production test.

CRT 30/40 Designed specifically for testing CRT's; provides variable anode and focus voltages; remote voltage and resistance control with monitoring of both voltage and current.

HIGH VOLTAGE LC-20 SERIES LOW COST CRT SWITCHING SUPPLIES

STANDARD ENERGY
HIGH VOLTAGE POWER SUPPLY
Model LC 20
SER. NO.
INPUT
OUTPUT
TEMP. RANGE

The LC-20 Series are high-voltage switching power supplies which provide 20 KVdc for use with CRT Displays. Since they incorporate a high frequency step-up switching regulator their efficiency approaches 90%. This means lower input current and virtually no heat dissipation from the power supply. It runs cool to the touch.

Typical specifications include: Anode Voltage: 20 KVdc, Anode Current: 500*u*a, GI Voltage: –150v @ 10ma, Focus Voltage: +750v @ 1ma, Input Voltage: ±15 Vdc, Input Current: 600ma @ Full Output, Sync Frequency: 15.75 Khz typical.

In addition, all LC-20's may be synchronized to your sweep signal - this alleviates the problem of random noise on the display. They are powered through a PC edge connector for rapid installation. All LC-20's are encapsulated with a high quality RTV in a black anodized aluminum can. Mounting is easy with two 6-32 studs located in the back of the unit.

The high voltage output is equipped with an anode cap and 12" of corona resistant high voltage cable, UL approved. The output voltage of the LC-20 may be adjusted over at ±20% range via a front trimpot. Line and Load regulation is kept below 0.1% for crystal clear display resolution.

The LC-20's are truly state of the art for the 80's. They are guaranteed against defects in workmanship and materials for five years. Prices: 1-100: $135.00 Ea, 101-500: $115.00 Ea, 501-1000: $100.00 Ea.

High Efficiency, Switching Supply, Wide Line Range, Sync Operation, GI & Focus Outputs.

Standard Energy's SC Series are a line of compact high voltage DC to DC converters (size: 2.5″ x 1.5″ x 0.8″) which offer 5 watts of output power in only 2.8 cubic inches. Voltages available range from 100 to 3kvdc. The output is directly proportional to the input, starting as low as 2 volts and will not be destroyed by inputs as high as 18 vdc. Each SC supply has an internal bleeder on the output for safety. The output ripple of each supply is kept below 0.1% at full power.

The SC Series are very easy to use. The two output high voltage leads are floating and are fully isolated from the two input leads. This permits either plus or minus polarity output.

Output proportional to Input, 5 Watts, Five Models: SC1: 100v @ 50ma, SC5: 500v @ 10ma, SC15: 1500v @ 3.3ma, SC30: 3000v @ 1.6ma.

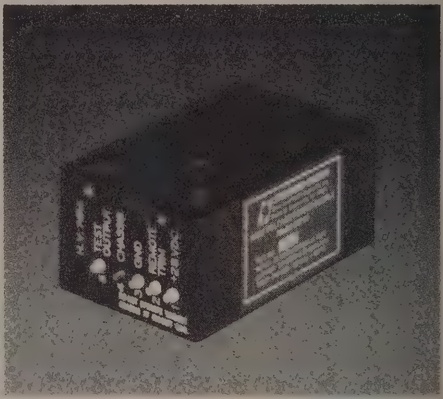
The SW Series precision switching high voltage power supplies are highly efficient DC to DC converters for applications requiring a regulated source of high voltage such as a 20kv CRT display. Since these models use state of art switching circuitry, as opposed to older linear design, the input current into the supply is greatly reduced. This has a profound effect on the reliability of the unit, and since the power dissipation is low, operation at ambient temperatures to 100°C are possible.

The output voltage is adjustable over a 5 to 1 range via an external control voltage or resistance to ground. The output may also be adjusted via a 10 turn potentiometer located in the unit. This varies the output over a 3 to 1 range.

All SW power supplies are fully encapsulated in RTV and shielded in a black anodized aluminum case. As the high voltage transformer is encapsulated in a low loss high temperature epoxy, this serves to raise the MTBF considerably.

All SW Series supplies are guaranteed against defects in workmanship and materials for 5 years and each unit is fully burned in and tested prior to shipment for 24 hrs. at 100°C at full load.

High Efficiency Switching Power Supply, Model SW20: 20kv, SW30: 30kv, Airborne CRT Supplies, Input Current: 500ma @ 10w, Military Specifications.



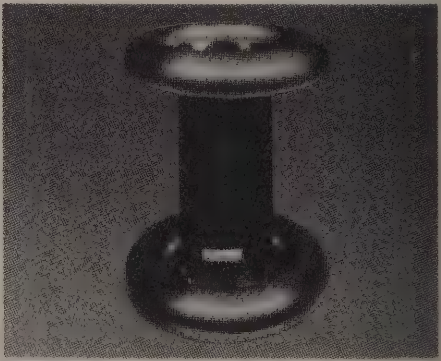
The Standard Energy SD-100 precision high voltage divider is an easy way of measuring voltages up to 100kv with complete safety.

The SD-100 is ruggedly constructed of a fire retardant material (not lucite) as a safety feature and will not crack if dropped. It contains multiple rare earth oxide resistors which provide extremely low temperature coefficients and high stability. This unit does not contain any oil which could leak out and damage other equipment.

Two anti corona torroids are used as the input and ground, and if needed, two or more SD-100 dividers may be stacked to measure voltages over 100kv. The output impedances of 1 Megohm and 100 kohm provide a 1000: 1 and 10,000: 1 division ratio respectively.

With a weight of less than 7 lbs. the SD-100 is very portable and easy to use.

100kv Resistive Divider, 0.1% Accuracy, Low TC: 15ppm/°C, High Stability.



The model SF Series power supplies provide up to 15 watts of high voltage power in a package of just 6.4 cubic inches. The SF Series units are extremely versatile since they allow the user to float the high voltage output up to 5kvdc above the input line. These power supplies are ideal for photomultiplier, CRT and other electro-optical applications.

The outputs available range from 100vdc to 10kvdc, all at 15 watts.

The output is adjustable over the specified voltage range by 3 methods. A 10 turn screwdriver adjust pot on the top surface of the unit sets the maximum output voltage. Remote control of this voltage is also possible with an external trim resistor between pins 2 and ground, or by an external voltage between pin 3 and ground.

A 2% load regulation is provided for half to full load variations. Output ripple is 1% max at full output power.

Each unit is fully encapsulated in RTV and packaged in an anodized aluminum case which provides electrostatic shielding. Calculated MTBF is 70,000 hours at 71°C.

Floating High Voltage Output, 15 Watts, 6 Models: SF3: 300v @ 50ma, SF6: 600v @ 25ma, SF12: 1250v @ 12ma, SF25: 2500v @ 6ma, SF50: 5000v @ 3ma, SF100: 10,000v @ 1.5ma.

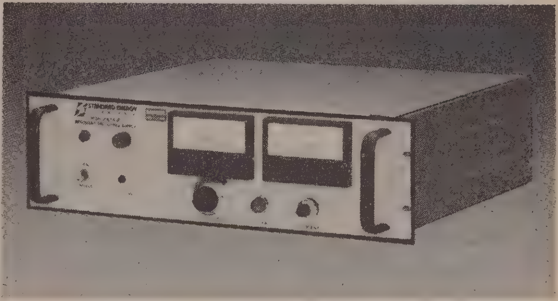
GREENVILLE, NEW YORK 12083 • (518) 966-4197 • TLX: 754180

The HVS series of power supplies are a new design of low cost off the line resonant switchers capable of delivering 250 watts for applications requiring a regulated source of high voltage. The HVS line is compact, reliable and unique. All switching is done at an inaudible rate (f › 25KH$_z$) so there are no unpleasant buzzing or whistling noises as in other resonant designs. This is a user safety feature. The HVS series operate with a fixed frequency mode.

Both the voltage and current can be adjusted by front panel 10 turn potentiometers, and in addition can also be remotely programmed by either an external resistance or voltage. As an extra feature all HVS supplies contain adjustable OVP and OCP circuitry. The HVS series will easily withstand the continuous vacuum arcing that occurs in ion beam work.

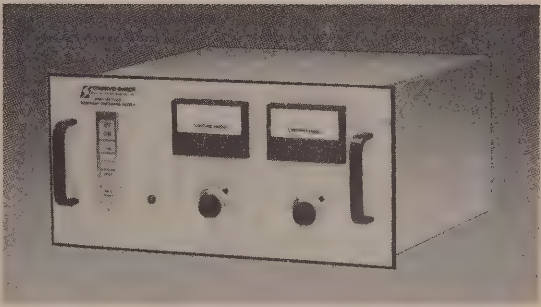
Resonant Switching Supply, Models HVS-5: 5Kv @ 50ma, HVS-10: 10Kv @ 25ma, HVS-25: 25Kv @ 10ma, HVS-50: 50Kv @ 5ma, 250 Watts, Low Cost.



Standard Energy's VHP series of very high power resonant switching supplies offer complete flexibility rarely found in any high voltage power source. To enable the user the option of selecting various output voltages, currents, and polarities, the entire supply is composed of two sections: the power drive section and the output section. The main advantage of the VHP series supplies is that the output section may be easily interchanged with one another to provide a negative output, or even a higher voltage output.

The VHP series provides regulation to 0.01%, transient response as fast as 1 ms, and output ripple down to 0.05%. Both output voltage and current are adjustable via front panel potentiometers with automatic crossover feature standard. Output monitors which may be used to drive a chart recorder or feed information to an A to D converter are standard. The power supply may also be programmed via an external voltage. Both overvoltage and overcurrent shutdown levels may be remotely controlled.

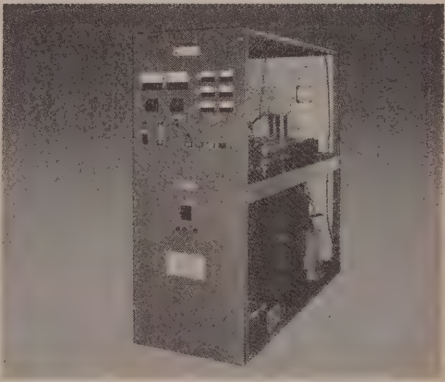
Very High Power Switching Supply, Outputs to 200KVdc @ 3000 Watts, Efficiency to 90%, Low Stored Energy.



Standard Energy SCR power supplies offer high power, high efficiency, and smallest size per watt....at low cost. They are rugged, dependable, and versatile. This design is capable of high regulation, and moderately low ripple.

Each SCR power supply can be remotely programmed over the entire voltage or current range by an external signal. Both the voltage and current are displayed on 3½" panel meters. In addition, all control circuitry is transient protected against output arcing. The SCR series can be used in all vacuum arcing equipment.

SCR Regulated Supply, Power up to 100kw, Low Cost/Watt, High Efficiency.



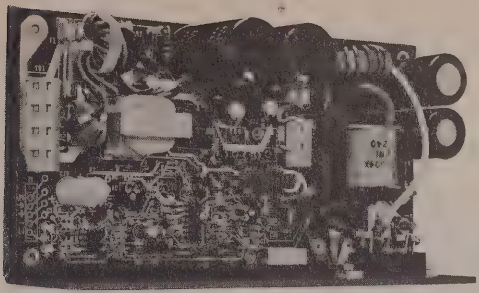
Standard Energy series tube power supplies offer high quality, dependability, and reasonable price for all R&D laboratory work. They are of proven design and versatile enough to suit any application.

In this design, a series pass tube regulates the output voltage and is capable of extremely fast transient response (100*us*) and low output ripple with low stored energy. In the event of an overcurrent condition, the series tube stops current flow within 100*us* thereby protecting any delicate output load.

Each ST power supply can be remotely controlled via a voltage program signal. Both voltage and current monitors are provided which give a signal proportional to the output being examined. In all ST supplies 3½" voltage and current meters are standard. Also a supply status indicator is provided on the front panel which indicates the output condition at all times.

Series Tube Supply, Power up to 10kw, Fast Response, Low Ripple.

SWITCHING REGULATORS



The SWS line of regulated Switching Power Supplies offer an advanced approach to Power Supply Technology. These supplies feature low component count, high efficiency, modular design, soft-start, low weight, and fast transient response.

The control circuitry offers the latest specialized I.C. technology. Integrated circuits enhance reliability with low component count.

FEATURES:

- **Hi-Reliability — Fewer Components**
- **Hi Efficiency — to 82%**
- **Hi-Power — 150 to 1,000 Watts**
- **Hi-Frequency Switching — 25 KHz**
- **Latest I.C. Design**
- **Microprocessor Compatible**
- **Burn-In Tested**
- **Slow Turn-On Capability**
- **OVP — Built-In**
- **Logic Inhibit — Remote Shutdown**
- **Remote Sense on Main Output**

Design characteristics include:

- Dropout immunity for up to 50 ms
- Soft-start circuitry limits in-rush current
- 82% efficiency is obtained by on-line switching circuitry, at greater than 25 KHz
- Input line filters in a shielded modular approach effectively control EMI
- Out-ripple is filtered through a LC filter incorporating low ESR capacitors while maintaining fast transient recovery time.

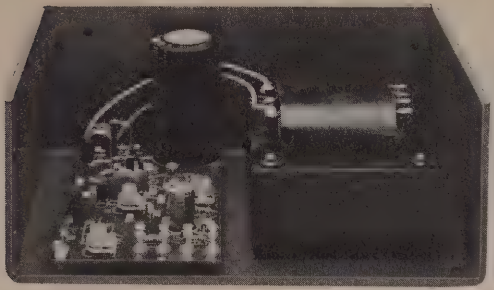
Worldwide Series / DC Power Supplies



Features:

- Accept AC inputs of 100, 120, 220, 230 & 240 volts.
- Designed to meet most important worldwide safety requirements of VDE, UL, CSA, IEC and ECMA.

SINGLE OUTPUT SUPPLIES

5 Volt Models

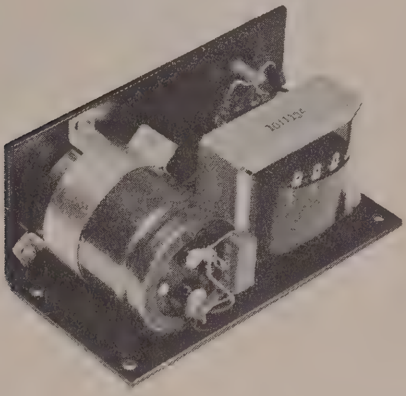
"Black Line" Unregulated DC Supplies

Reliable low cost supplies for powering solenoids, motors, relays, magnets, lamps, signal systems, and any circuitry (including transistorized) accepting unregulated DC.



The "Black Line" is the new low-cost alternative for many applications where regulation is not needed. . . "raw power" at significant savings by eliminating the "frills". . .yet maintaining top performance through the use of high quality components.

FEATURES

- Conservatively Rated
- U.L. Recognized
- Top-Quality Transformer
- Open-Frame Construction
- Floating Output
- Computer-Grade Capacitors
- Input Taps Provide for ±10% Output Voltage Adjustment to Compensate for Line and/or Load Variations!

GENERAL SPECIFICATIONS:

Universal Input Voltage: 115/230 Vac, 50/60 Hz with ±10% Primary Taps

Maximum Ripple: 3% rms

Temperature Range: 0-50°C (derate 2%/C° to 70°C)

Overcurrent Protection: Fuse

Programmable Power Supply Loads

OPERATION & CAPABILITIES

The Programmable Solid State Load (PS^{2}L) has the capability of dissipating up to 1000 Watts within a voltage range of approximately 2 VDC to 60 VDC and a maximum current of 110 Amps when derated per the power dissipation curve. If higher current level testing is desired, units can be hooked in parallel. It is equipped with two modes of operation: (1) constant current and (2) constant resistance, which can be used independent of each other or with one mode acting as a limit for the other.

Working in the constant current mode the PS^{2}L can be used to test DC power regulators, to act as a constant current discharge of batteries and capacitor banks, and if connected as shown, to make an adjustable constant current supply from a DC power source.

The constant resistance mode of the PS^{2}L can also be used to test DC power regulators and with a 0.03 ohm to 1K ohm adjustment range can virtually eliminate the need to stock different value power rheostats. The 2% reference meters on the front panel will, in most cases, eliminate the need of external meters being used.

Steady state testing of a power supply or a battery is only one of the capabilities of the PS^{2}L. Testing transient response of a power regulator to a dynamic load change is another. The PS^{2}L is capable of being programmed externally for either constant current or constant resistance with any number of waveforms. If a series regulator is under test and it is desired to see how the DC output voltage will react under actual dynamic loading conditions, the PS^{2}L can simulate the actual conditions merely by programming it with the desired waveform.

Features

- Designed to fulfill a wide range of DC test applications requiring constant current, constant resistance or both.
- In its constant resistance mode, the PS^{2}L offers a 0.03 ohm to 1K ohm adjustment range.
- In its constant current mode, the PS^{2}L can be used to test DC regulators and power supplies.
- Acts as a constant current discharge of batteries and capacitor banks.
- Can be used to convert a DC power source into a constant current supply.
- Virtually eliminates the need for different power rheostats otherwise normally required in testing.
- Available in 1000 watt model size.

PERFORMANCE CHARACTERISTICS

	PS^{2}L-1000
Operating Ambient	0°C.-55°C.
Input Voltage Requirements	115/230VAC ±10%
Input Frequency Range	47-63 Hz
Maximum Input Current	1 Amp
Input Fuse Rating	2 Amp Type MDL
Maximum Loading Power @ 25°C.	1000 Watts
Maximum Loading Voltage	60 VDC
Maximum Loading Current	110 ADC
Minimum Loading Voltage	2 VDC
Overvoltage Crowbar Point	70 VDC-78 VDC

	PS^{2}L-1000
Typical Constant Resistance Range	0.03 Ω -1000
Typical Program Input Impedance	50K
Programming Input Volt Requirement	1v/10 Amp load
Typical Current Monitor Output	±50MV/Amp load
Typical Square Wave Response Time	120 *u*sec for Δ 100 Amp step
Typical Regulation (constant current, constant resistance)	1%

Any Combination of Voltage & Currents Is Available As Long As The Maximum Wattage Rating Is Not Exceeded For Continuous Operation.

FEATURES

- Up to five outputs, three regulated and two semi-regulated
- Choice of voltage and current on all outputs up to maximum wattage total
- Voltage adjustable on all regulated outputs
- Brownout protection
- OVP Standard on primary output
- Overload protection
- Short circuit protection
- Reverse polarity protection
- Soft start
- Adjustable current limiting on regulated outputs
- Built to UL, CSA, and VDE safety standards.
- Built to VDE and FCC EMI standards.
- Convenient 2-surface mounting
- Convection cooled
- Advanced EMI filtering
- Isolated returns

SPECIFICATIONS

Input	90-132VAC/180-264VAC, 47-440Hz
Output	See Table
Line Regulation	0.2%, all outputs
Load Regulation	0.2%, main output ±0.5% aux outputs
Ripple & Noise	50mV P-P max, all outputs
Efficiency	75% Typical
Operating Temperature	0-50° C at full rated load. Derate to 50% of rated output at 70° C.
Temperature Coefficient	0.02% per °C
Overload Protection	All outputs are individually current limited and short circuit protected. Recovery is automatic when load is reduced.
Overvoltage Protection	OVP on main output is set between 6-6.5V. This protection is reset by recycling input power.
Holdover Storage	16mSEC minimum, 20mSEC typical
Remote Sense	Remote sense on main output compensates for up to 0.5V in the load cable.
Overshoot	No voltage spikes on turn-on, turn-off or power fail.
Transient Response	Recovery to within 1% of nominal output voltage within 500uSEC for a 25% load step.
Power Fail (Optional)	A TTL signal (low) appears within 5mSEC at full load to warn of input voltage drop below minimum operating level.
Remote Inhibit (Optional)	Power supply can be remotely programmed off by application of TTL signal (high).

SELECTION GUIDE

The chart at right was designed to help you select the standard EuroMate model which will meet the needs of your application. If you require specifications which differ from those listed, contact our factory. We can meet special requirements by modifying existing models or by designing a custom unit for your application.

MODEL	SIZE	POWER	OUTPUT VOLTAGE			
			STANDARD		OPTIONAL	
			Number of Voltages	Voltages	Number of Voltages	Voltage Range
VME 911	6U/24E	400 W	Three	+5, +12, −12 VDC	One to four	−36 to +36 VDC
VME 910	6U/28E	250 W	Three	+5, +12, −12 VDC	One to five	−36 to +36 VDC
EM 200	6U/24E	200 W	Six	+5, +5, +12, +12, −12, −12 VDC	One to six	−36 to +36 VDC
EM 75	3U/24E	75 W	Three	+5, +12, -12 VDC	One to three	+5 to +36 VDC

SPECIFICATIONS

The following specifications are applicable to all standard EuroMate models.

ELECTRICAL

Input voltage range: 90 to 130; 180 to 260 VAC. Jumper selected.
Input frequency: 47 to 63 Hz.
Input filtering: Meets FCC 20780, VDE 0871/6.78 Curve B, and VDE 0875 conducted and radiation specifications.
Efficiency: 70 to 85%
Voltage regulation: 5V outputs, 0.2%. Other outputs, 3%.
Current limit: Foldback on all outputs.
Output noise: 5V ports, 75 mV max.
12V ports, 100 mV max.
Other ports 1% of output.
Output voltage overshoot: Less than 5% for 50% load step from I_{max}.
Reverse voltage: Diode protected on all outputs.
Holdup time: 20 msec min at 90 VAC input.
Isolation: Input to chassis-
3750 VAC RMS—VME911
1500 VAC RMS—VME910, EM200, EM75
Input to output-
3750 VAC RMS—VME911
1500 VAC RMS—VME910, EM200, EM75
Output to chassis-
500 VAC RMS all models
Total input lines capacitance to chassis: 6500 pF max.

ENVIRONMENTAL

Operating temperature: 0 to 70°C ambient.
Storage temperature: −55 to 85°C.
Humidity: 0 to 95%, non-condensing.

MECHANICAL

Output connectors: DIN 41612 or user specified.
Package outline: Conforms to DIN 41494 and IEC 48 D, section 12.

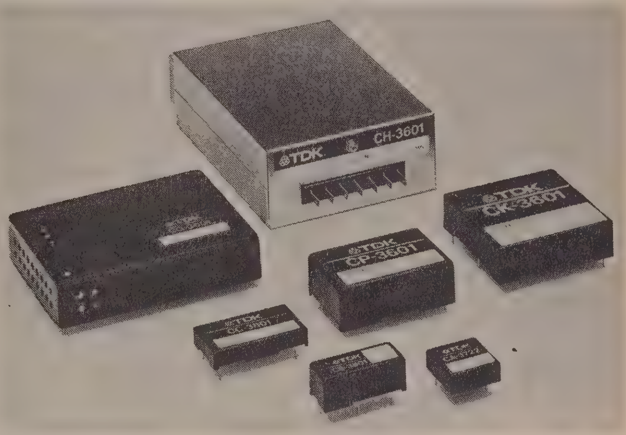
TDK

POWER CONVERTERS

DC TO DC CONVERTERS



TDK DC to DC converters simplify supplying power to various portions of complex electronic circuits. They provide a reliable source of "onboard" DC power dedicated to specific operations such as microprocessors and other VLSI integrated circuits.

FEATURES

1. TDK's expertise in ferrites and electronic circuitry combine to produce superior products.
2. Compact and lightweight.
3. High efficiency and precision.
4. High reliability.
5. For printed circuit boards (Except CH series).

APPLICATIONS

Computers and peripheral equipment, industrial robots, electronic measuring instruments, automotive electronic equipment and industrial controls.

Electrical specifications VS. Part No.

TECHNIPOWER® A Penril COMPANY

"MIL-QUAL" MODULAR POWER SUPPLIES

These Advanced Design, High Reliability, Modular Power Sources offer the systems engineer economical, proven alternatives to expensive custom built or lab types. Now, you can choose the exact source required — from an extensive selection, to meet the most demanding Mil-Spec and industrial needs. Our knowledgeable design and development group can also assist you with any product modifications or special variations to suit individual demands.

VC-80 Series
AC-DC Converters. Partially encapsulated, 2.8 to 125 VDC — to 450 Watts output. 110,000 hours MTBF @ 80°C base.

HF-80/HFC-80 Series
AC-DC, DC-DC stabilized. Partially encapsulated, 2.8 to 250 VDC, to 375 Watts. 70,000 hours MTBF @ 80°C base.

HIGH EFFICIENCY, HIGH DENSITY MODULAR SWITCHERS

Fully encapsulated, partially encapsulated or open frame, these switching power supplies are designed for high thermal application. With as low as 0.1% overall source/load effects, 0.1% PARD and 500 microsec recovery.

YC-95 Series
Ruggedized DC-DC Converters. Hermetically sealed, 2.8 to 125 VDC, to 450 Watts. 110,000 hours MTBF @ 95°C base.

CD-95/CDC-95 Series
Stabilized DC-DC Converters. Encapsulated. 2.8 to 250 VDC, to 275 Watts. 60,000 hours MTBF @ 95°C base.

CL/CLC Series
AC-DC, DC-DC, open frame stabilized converters. 3 to 32 VDC, to 256 Watts. 50,000 hours MTBF.

SCR-80 Series
Stabilized AC-DC phase control. High current. Partially encapsulated. 5 to 160 VDC, to 2000 Watts.

RA-80 Series
Special circuit AC-DC. Programmable from zero. Partially encapsulated. 0 to 160 VDC, to 1000 Watts.

PM-95 Series
Stabilized AC-DC modules. Fully encapsulated. 3 to 325 VDC, to 800 Watts. 80,000 hours MTBF, @ 95°C base.

"MIL-QUAL" LINEAR SUPPLIES

Ultra high reliability for military and industrial harsh environments. These fully encapsulated AC-DC supplies are designed for use in extreme MIL environments. Source/load effects are as low as 0.05% with 1mV rms PARD and 50 Microsec. recovery.

DPM-95, TDPM-95 Series
Stabilized, AC-DC, dual output, tracking and non-tracking. 12 to 15 VDC, to 150 Watts. 50,000 hours MTBF, @ 95°C base.

F-115, FD-115 Series
Stabilized, AC-DC modules, 3 to 325 VDC, to 500 Watts. 50,000 MTBF, @ 115°C base.

PL-80 Series
Lower cost, high density, stabilized AC-DC modules. 3 to 152 VDC, to 75 Watts, 120,000 hours MTBF, @ 80°C base.

LINEAR SUPPLIES

For industrial, military and commercial use. The partially encapsulated AC-DC stabilizers are designed for moderate environments. They have 0.05% load effect, 1mV rms PARD and generally have 50 microsecond recovery.

P-80 Series
All purpose, fully encapsulated, series stabilized AC-DC modules. 3 to 325 VDC, to 800 Watts. 100,000 hours MTBF, @ 80°C base.

MC-65 Series
Series stabilized, DC-DC modules. Up to 30% more current. 3 to 152 VDC, to 750 Watts, 1,000,000 hours MTBF, 65°C base.

DP-80, TDP-80 Series
Tracking and non-tracking, AC-DC, dual output. 6 to 150 VDC, to 10 Watts. 50,000 hours MTBF, @ 80°C base.

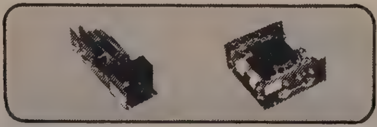
NP-80 Series
Non-stabilized, low cost. 3 to 1000 VDC, to 975 Watts. 250,000 hours MTBF, @ 80°C base.

SINE-WAVE INVERTERS

For military and industrial applications. Open frame and partially encapsulated with 70% efficiency, 5% rms max. source ripple and less than 100 rms recovery.

IN Series
24/28 DVC, 115/220 VAC, 5-/60 or 400 HZ. 50-100VA.

NAC/NACD Series
Stabilized DC-AC, 24/28 VDC, 115 VAC rms, 60/400 Hz output, to 500 VA.



LP/LPC Series
UL approved, open frame, AC-DC stabilized. 5-28 VDC, 224 Watts.

HIGH RELIABILITY, OPEN FRAME AC-DC POWER SOURCES

Practical, low cost, high performance, open frame AC/DC stabilized units. Wide variety of models. Multiple output variations available.

LPDT/LPDTC Series
Dual output tracking ±12 to ±15 VDC, to 30 Watts. For op-amp and other commercial use.

NLP/NLPC Series
Single output, 5 to 28 VDC, to 28 Watts. For logic, op-amp and signal use.

NLPD Series
Dual output, ±12 to ±15 VDC, to 22 Watts. For logic op-amp and other uses.

Multiple Outputs
Triple and quad output sources with enclosures available on order.

CUSTOM CAPABILITIES FOR MODULE RACK MOUNTS are also available from Technipower.

VARIAC BY TECHNIPOWER
See EEM Page 1A•2301 for availability of Variac® Autotransformers and Voltage Regulators produced by Technipower.

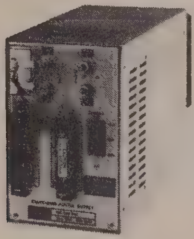
CUSTOM AND STANDARD SWITCHING POWER SUPPLIES

HIGH POWER
Commercial or Military

800W Single Output Uninterruptable Power Supply

TDI-184



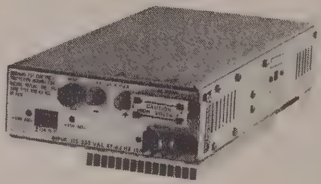
Input: 115/230VAC 50/60Hz and +12VDC battery
Output: 13.5VDC @ 55A
Regulation: ±1.0% line and load combined for a 20-100% load change

Features:
1) Battery charging circuit
2) Very low switching noise
3) OV and OL protection
4) Input RFI filter

Dimensions: 11.5″ x 8.0″ x 5.0″
Outputs Available: 24V, 48V, 56V

400W Slim Line MULTIPLE OUTPUT

TDI-194



Input: 115/230VAC 50/60 Hz
Output: +5VDC @ 65A
±15VDC @ 1.5A
Line Regulation: ±0.5%
Load Regulation: ±1.0% for 10-100% load change

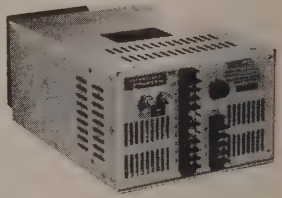
Features:
1) Designed to meet U.L. 544
2) Overvoltage protection
3) Overload protection
4) Remote sensing of +5V output
5) Input RFI filter

Dimensions: 13.5″ x 6.75″ x 3.0

Other output voltages may be provided upon request.

1500W High Density Single Output

TDI-207



Input: 110/220VAC 47-63Hz
Output: 100VDC @ 15A
Regulation: Within ±1.0% line and load combined
Ripple and Noise: 200mVpp max

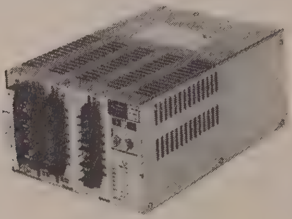
- Overvoltage and overload protection
- Remote sense
- High efficiency
- High reliability

Dimensions: 11.5″ x 8.0″ x 5.0″

Output voltages other than those shown may be provided.

500W Multiple Output

TDI-131



Input: 115/230VAC ±10% 50/60Hz
Outputs: + 6VDC @ 30A
− 6VDC @ 10A
+12VDC @ 5A
−12VDC @ 3A
±24VDC @ 3A

Load Regulation:
±0.5% for +6VDC output
±1.0% for all other outputs

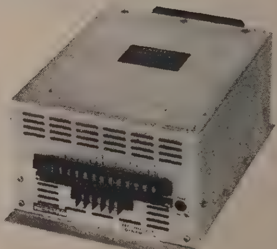
Line Regulation:
±0.5% for all outputs

Dimensions: 5¼″ x 8$\frac{7}{16}$″ x 12½″

Note: Other output voltages are available upon request.

500W Multiple Outlet

TDI-206



Input: 115/230VAC ±10% 50/60Hz
Outputs: + 5VDC @ 20A
+15VDC @ 2A
−15VDC @ 1A
+12VDC @ 3A
−12VDC @ 4A
+26VDC @ 4A unregulated

Load Regulation:
±0.5% on all outputs except +26V

Line Regulation:
±0.25% for all outputs except +26V

Dimensions: 5½″ x 8½″ x 12½″

Features:
1) Overload protection on all regulated outputs
2) O.V. protection on 5V output
3) Efficiency = 65% minimum
4) Operates to 60°C with no derating

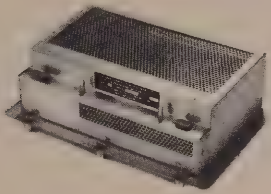
CUSTOM AND STANDARD SWITCHING POWER SUPPLIES

- Full Military for airborne, shipboard, and ground support applications
- Militarized designs for economy and high reliability

Military to Mil-E-5400

150W
Full-Mil, Multiple Output

TDI-183



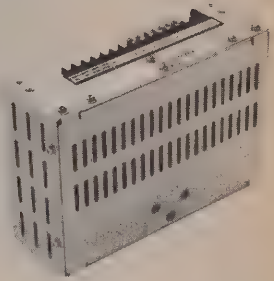
Input: 108-118VAC 50-425Hz

Outputs: + 15VDC @ 6.0A ±2%
− 15VDC @ 1.7A ±2%
± 10VDC @ 0.2A ±5%
+ 24VDC @ 1.1A ±3%
−5.3VDC @ 0.15A ±5%
+5.3VDC @ 2.2A ±5%

Dimensions: 12.15" x 7.875" x 3.38"
Wt.: 8.6 lbs.
Built in accordance with Mil-E-5400

150W
Full-Mil DC/DC Converter

TDI-189



Input: 28VDC nominal per Mil-Std-704C
Outputs: + 5VDC @ 14A
− 5VDC @ 0 .75A
±12VDC @ 1.5A

Line Regulation:
±0.5%, all outputs

Load Regulation:
±1.0% for +5V, ± 5.0% all others

Ripple and Noise: 100mVpp, all outputs

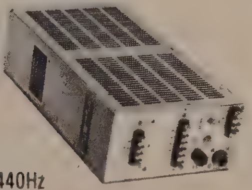
Dimensions: 3.0" x 6.0" x 8.75"
Wt.: 4 lbs.

Built in accordance with Mil-E-5400

Militarized Units

800W
Multiple Output, Enclosed

TDI-211



Input: 104-132VAC 47-440Hz

Outputs: + 5VDC @ 140A
±15VDC @ 4.0A

Regulation: ±1% line and load combined

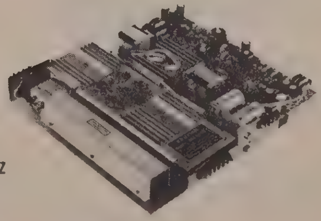
Ripple and Noise: ±1% peak-to-peak

Features:
- Militarized for high reliability
- Remote sensing of 5V output
- O.V. protection on all outputs
- Overload protection on all outputs

Dimensions: 14" x 7.5" x 4.0"

800W
Multiple Output, Open-Frame

TDI-210



Input: 104-132VAC 47-440Hz

Outputs: + 5VDC @ 140A
±15VDC @ 4.0A

Regulation: ±1% line and load combined

Ripple and Noise: ± 1% peak to peak

Dimensions: 15.0" x 13.5" x 2.0"

Features:
1) OV and OL protection on all outputs
2) Remote sensing of 5V output
3) Militarized for high reliability-operating temp to 70°C with no derating

CUSTOM AND STANDARD SWITCHING POWER SUPPLIES

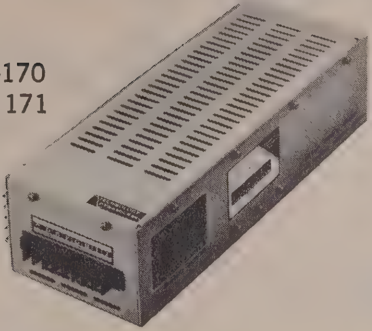
MEDIUM and LOW POWER

- Commercial or Military
- Designed to UL, CSA, VDE, FCC

150W
Multiple Output Switching Power Supply

TDI-170 and 171

TDI-170 and 171



Input: 85-132VAC 47-63Hz

Outputs:

TDI-170	TDI-171
+5V @ 8.5A	+5V @ 0.5A
+12V @ 4.0A	+15V @ 1.0A
−12V @ 1.5A	−15V @ 0.5A
−7.2V @ 6.0A	−27.5A @ 4.0A

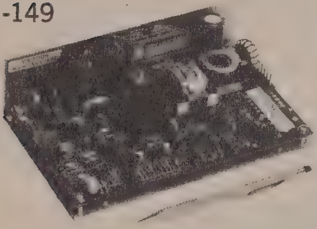
Ripple and Noise: Within 1% peak to peak

Dimensions: 13.5″ x 6.0″ x 3.5″

- Operating temperature 0°C-70°C
- OV and OL protection
- Optional conformal coating
- Militarized for high reliability
- Other output voltages available

100W
Open Frame

TDI-149



Input: 110/220VAC ±10% 50/60Hz

Outputs See table below

Load Regulation:
Main Output ±0.5%, 20%-full load
Auxiliary Outputs ±6.0% with main @ ½ load

Line Regulation: ±0.25% all outputs

Ripple and Noise: 50mVpp max.

Operating Temperature: 0°C-65°C

Derate: To 60% @ 75°C

Dimensions: 7½″ x 4⅝″ x 2$\frac{1}{16}$″

Weight: 1.5 lbs.

60W
Plug In PC Card

TDI-173

Input: 115/230VAC ±15% 47-63Hz
Control via slide switch

Outputs: +12VDC @ 5A
−12VDC @ 1.5A
(Total output power 60w max.)

Regulation: ±1% both outputs

Ripple and Noise: ±1% of output voltage

Efficiency: 70% typical

Hold Up Time: 16msec.

Notes:
1) On/off control via front switch
2) Plug into standard 22 pin finger connector
3) Output voltage adjustable ±3%
4) Soft start and inrush current control
5) Designed to work with no derating −30°C to +70°C

60W
Extended Range

TDI-168

Input: 70-138 VRMS or 140-276 VRMS
47-64Hz jumper selectable

Outputs: +5VDC @ 2.5A
+12VDC @ 2.0A

Load Regulation:
±1.0% from 20% to full load for output #1
±6.0% for output #2

Line Regulation:
±1.0% both outputs over full input range

Ripple & Noise: 50mVpp max on both outputs

Hold-Up Time:
40msec upon removal of nominal AC voltage (115v/230v)

Dimensions: 7.75″ x 4.25″ x 2.20″

Weight: 2.0 lbs.

OUTPUTS OPEN FRAME

Model #	Output #1 (Main)	Output #2	Output #3	Output #4
TDI-149	+5VDC @ 8A	+24VDC @ 1A	+12VDC @ 1A	−12VDC @ 1A
TDI-165	+5VDC @ 8A	+24VDC @ 2A*	+12VDC @ 0.5A*	−12VDC @ 0.5A*
TDI-186	+9VDC @ 2A	+5VDC @ 1A*	+12VDC @ 0.5A	−12VDC @ 0.5A
TDI-162	+5VDC @ 3A	+24VDC @ 4A Avg.†	+45VDC @ 7mA	−12VDC @ 20mA

* Output is linearly post regulated — load regulation = ±0.2%

SWITCHING REGULATORS

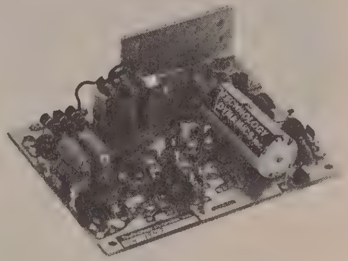
- 10-12 Week Delivery for Prototype
- Single or Multiple Outputs

30W and 50W

Single Output DC-DC Switching Regulators

Line Regulation: 0.005%/Volt max.
Load Regulation: 0.1%/Amp max.
Ripple: 60mVpp max.
Switching Frequency: > 30KHz
Operating Temperature: 0°C to 50°C
Derating: To 50% PWR @ 70°C
Recovery Time: Less than 400 micro sec.

- **High Efficiency — 70%**
- **High Reliability — 150,000 Hr. MTBF**
- **Compact Size — 4″ x 5″ x 1.3″**
- **Build your own multiple output supply**



STANDARD FEATURES
- **OVERLOAD PROTECTION**
- **OVERVOLTAGE PROTECTION**
- **INPUT RFI FILTER**

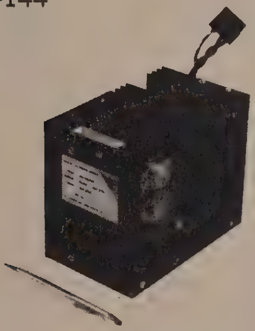
SR30P-*	30 Watts	Input: +9VDC to +30VDC	Output: +5VDC to +15VDC
SR50P-*	50 Watts	Input: +9VDC to +30VDC	Output: +5VDC to +15VDC

* Please Consult Factory for Model Numbers

Input voltage must exceed output voltage by 3V min.

300W
High Power Converters and Battery Chargers

TDI-144



Input: 105-160VDC (or 55-80VDC)
(AC input option available)

Output: 15VDC @ 20A

Line Regulation: ±1% max.

Load Regulation: ±1% from 15%-full load

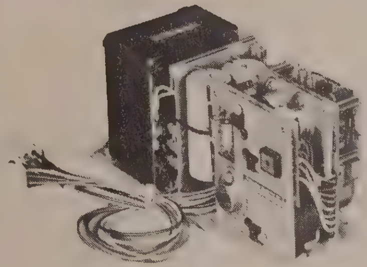
Ripple and Noise: Less than 1% pp

Dimensions: 4 13/16″ x 5¼″ x 6 9/16″

Note: Other output voltages available upon request.

100W
Multiple Output Dual Input UPS

TDI-123



Input: 21-32VDC and/or 115/230VAC

Outputs:
+ 8.4VDC @ 3.5A
+18.0VDC @ 2.0A
−18.0VDC @ 1.25A
− 6.0VDC @ 0.5A
+70.0VDC @ 10mA

Regulation: ±0.25% line and load

Ripple and Noise: Less than 50mVpp for all outputs

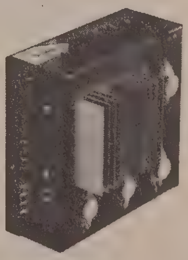
Operating Temp.: −10°C to +65°C

Dimensions: 3.3″ x 4.5″ x 8.5″

Note: With AC input, a DC output of +24V is delivered and may be used for battery charging.

250W
Medium Power Multi-Output DC-DC Converters

TDI-155



Input: 20-30VDC

Outputs: Single, Dual or Triple as required. Most voltage-current combinations available.
Maximum Power Output = 250 Watts

Line Regulation: ±0.2% over full input range

Load Regulation: 2.0% from ½ to full load

Ripple and Noise: 1.0% RMS

Weight: 3.5 lbs.

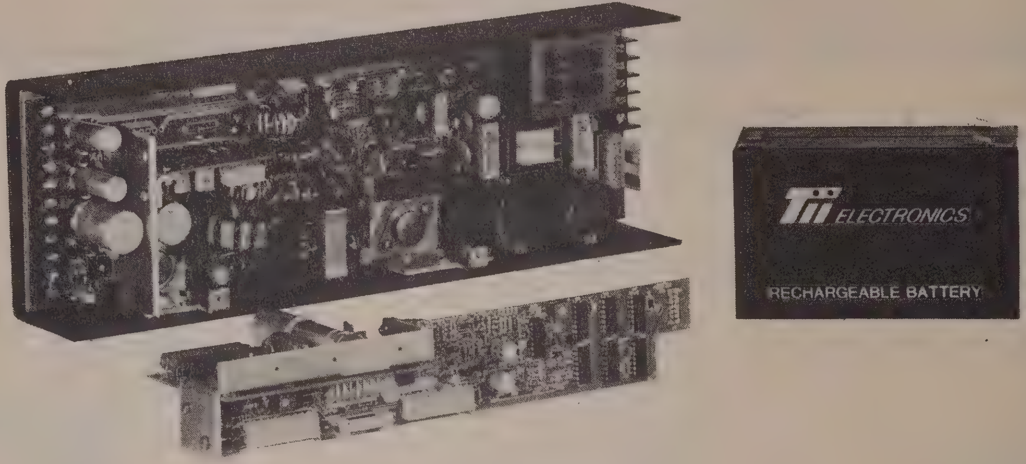
EHVQ™ SWITCHING POWER SUPPLIES WITH OPTIONAL BATTERY BACKUP



EHVQ™ 220, BATTERY BACK UP BOARD AND BATTERY PACK

POWER SUPPLIES DESIGNED AS INTELLIGENTLY AS YOUR COMPUTER

EHVQ POWER SUPPLY

- 115/230 VAC INPUT
- DESIGNED TO MEET FCC VDE UL CSA
- INDUSTRY STANDARD CASES
- FULL POWER AT 50°C
- OVERVOLTAGE PROTECTION ON MAIN OUTPUT
- REMOTE ON/OFF
- 1 YEAR WARRANTY
- AVAILABLE WITH OPTIONAL BATTERY BACKUP
- ALL OUTPUTS ISOLATED AND FULLY FLOATING
- OPTIONAL COVER
- BUILT IN LINE FILTER
- SOFT START

BATTERY BACKUP OPTION

- FIELD UPGRADEABLE (PLUG IN PC BOARD)
- TTL STATUS SIGNALS
- JUMPER SELECTIBLE SHUTDOWN MODES
- ON-BOARD, FLOAT-TYPE BATTERY CHARGER

Our EHVQ™ line of high-quality, compact switches offer new flexibility in the design of fault-tolerant systems. The optional battery backup now allows you to implement reliable DC power without the size/cost penalty associated with traditional battery backup systems. Battery backup is field upgradeable. It plugs into your system's EHVQ™ power supply as easily as adding more memory. The EHVQ™ line is designed to retain it's form factor when the battery backup is added.

The battery backup board contains the battery charger, soft transition logic, and all communications logic. TTL compatible status signals indicate AC low, battery low and battery charged conditions. During an AC power failure, automatic shutdown logic allows system shutdown to occur after a timeout, after the battery gets to a low state or controlled by the system, via the "Shutdown Inhibit" input. The unit automatically restarts after AC power is restored. A "Return from Power Fail" status signal can be used by the system to vector to the appropriate restart procedure.

Transition from AC power to battery power is done with novel "Soft Transition" logic (patent pending). This allows power sharing between the battery and AC line even under the most severe brownout conditions.

Call or write TII Electronics for more information. Our application engineers are ready to answer any questions you may have about optional battery backup. EHVQ Designer's Kits are available from stock. They contain everything you need to test the EHVQ with optional battery backup.

IEC 380 4mm/8mm CREEPAGE AND CLEARANCE DISTANCES
BUILT-IN RFI FILTER MEETS FCC PART 15 SUBPART J
VDE 0806 APPROVED COMPONENTS
OVER TEMPERATURE CUTOUT
AUTOMATIC RESETTING CURRENT LIMIT ON ALL OUTPUTS
VERI-DRIVE PLUS 60 kHz PULSE WIDTH CONTROL CIRCUIT
HEAVY DUTY LOW IMPEDANCE OUTPUT BUSS
HIGH CONDUCTION HEAT SINK FOR IMPROVED HEAT TRANSFER
+5 VOLT REMOTE SENSE

VERI-DRIVE PLUS

A field proven design which has accumulated hundreds of millions of trouble free field operating hours.

VERI-DRIVE PLUS is the enhanced version of Todd's proprietary VERI-DRIVE, the time tested switching power supply technology that has made Todd Products Corp. the fastest growing power supply company in the country. Using the powerful combination or VERI-DRIVE PLUS, state of the art components, and higher switching frequencies, the Todd Engineering team has produced a line of cost effective, high performance, reliable switchers second to none.

VERI-DRIVE PLUS improves switcher reliability:

- Prevents Inverter Transistor cross-conduction
- Eliminates Inverter Transistor Matching
- Reduces Transistor losses by faster switching time
- Reduces spiking due to core saturation effects

AND . . . if a failure does occur, VERI-DRIVE PLUS automatically prevents secondary component failure thus simplifying repair and analysis.

SINGLE OUTPUT SWITCHERS

Designed to Meet FCC/VDE RFI Specs

CONVECTION COOLED

FEATURES

☐ UL recognized
☐ Convection cooled
☐ Full ratings to 50°C
☐ Remote Sense
☐ Dual AC Input

NEW SINGLE OUTPUT SWITCHERS

HIGH POWER 625 WATT SWITCHER... UNDER** 60c PER WATT

FEATURES

- ☐ Small size — 5 x 8 x 10 inches
- ☐ Industry standard mounting
- ☐ Meets FCC RFI (Part 15 Subpart J)
- ☐ U/L recognized
- ☐ IEC 380 version available
- ☐ 50 KHz VERI-DRIVE PLUS design
- ☐ Optional AC power fail
- ☐ Optional remote margining

625 WATTS
Size: 5 x 8 x 10 inches

MODEL	VOLTAGE	CURRENT
SOX-2-125*	2V	125A
SOX-3-125*	3V	125A
SOX-5-125*	5V	125A
SOX-12-52*	12V	52A
SOX-24-36*	24V	36A
SOX-28-23*	28V	23A
SOX-48-13*	48V	13A

* Specify suffix A1 for 115 VAC operation or A2 for 230 VAC.

SPECIFICATIONS: ALL SINGLE OUTPUT SWITCHERS

Input: 115/230 VAC ±15%, 47 to 63 Hz. Single phase. All models strappable except models indicated.

Output Adjustment: ±10%.

Regulation: 1% line or load.

Ripple and Noise: Less than 10 mv RMS, 50 mv P-P.

Stability: 0.1% over 8 hr.

Temperature Coefficient: Less than 0.02%/°C.

Transient Response: 500 μsec following a 50% load change. Sox, 250 μsec.

Overshoot: No turn on or turn off overshoot.

Brown Out Protection: To 85/170 VAC.

Carryover Time: 25 msec. Sox, 16 msec.

Overload Protection: Automatic resetting current limiting.

Overvoltage Protection: Latching or automatic OVP depending on model.

Remote Sensing: Standard on all models.

Reverse Voltage Protection:

Power Factor: 0.75 typical.

Temperature Range: 0°C to 50°C. Derates to 71°C.

Soft Start: Minimizes input current surge on turn-on.

Efficiency: 75% typical.

Safety: U/L recognized (most models).

Options:
A. Latching OVP (1500 and 300 watt models only)
B. AC power fail signal
C. Remote margining (Sox Series only)

** OEM Quantities

SW AND SX SERIES

FAN COOLED

FEATURES

- ☐ Built in RFI Filter
- ☐ Power factor correction
- ☐ Fan cooled
- ☐ 50° ratings
- ☐ Fully protected

500 WATTS

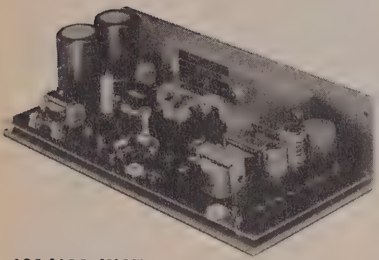
LOW COST O. E. M. MULTIPLE OUTPUT SWITCHERS

Designed to Meet FCC RFI (Part 15 Subpart J)



100/130 WATT

FEATURES

- ☐ UL recognized
- ☐ No 60 Hz magnetics
- ☐ Current limited on all outputs
- ☐ Dual AC input
- ☐ 75% typical efficiency
- ☐ Minimum component count
- ☐ Low output cross coupling
- ☐ Soft start

100 WATT 4 OUTPUT 2.5 x 5 x 9½″ PACKAGE

FEATURES

- ☐ High peak current disc drive output
- ☐ Tightly regulated ±12V output
- ☐ +5 remote sense
- ☐ Built in RFI filter

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
MOS-100-0512	+5A @ 15A	+12 @ 3.0A	−12 @ 2.0A	−5 @ 1A
MOS-100-2412	+5A @ 15A	+12 @ 1.5A	−12 @ 1.0A	+24 @ 4A pk
MOS-100-1212	+5A @ 15A	+12 @ 1.5A	−12 @ 1.0A	+12 @ 5A* pk

NOTE Peak currents are specified for disc drive applications. Maximum average current 2A. Shaded outputs are semi-regulated.

130 WATT 4 OUTPUT IEC 380/VDE 0806 2.5 x 5 x 9½″

FEATURES

- ☐ Meets International safety standards
- ☐ High peak current disc drive output
- ☐ Built in RFI filter
- ☐ +5V remote sense

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
MOV-100-1212	+5 @ 15A	+12 @ 1.5A	−12 @ 1.5A	+12 @ 5A pk
MOV-100-2412	+5 @ 15A	+12 @ 1.5A	−12 @ 1.5A	+24 @ 4A pk

NOTE Peak currents are specified for disc drive applications. Maximum average current 50% of pk. Shaded ouputs are semi-regulated.

150 WATT 4 OR 5 OUTPUT 2.5 x 5 x 10½″ PACKAGE

FEATURES

- ☐ High peak current disc drive output
- ☐ Remote sense on +5
- ☐ Tightly regulated ±12
- ☐ −5V bias supply

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4	OUTPUT #5
MOS-150-0512	+5 @ 20A	+12 @ 4.0A	−12 @ 3.0A	−5 @ 1A	
MOS-150-2412	+5 @ 20A	+12 @ 1.5A	−12 @ 1.0A	−5 @ 1A	+24 @ 6A pk
MOS-150-1212	+5 @ 20A	+12 @ 1.5A	−12 @ 1.0A	−5 @ 1A	+12 @ 6A pk

NOTE Peak currents are specified for disc drive applications. Maximum average current 3A. Shaded outputs are semi-regulated.

200 WATT 4 OR 5 OUTPUT 2.5 x 5 x 13″ PACKAGE

FEATURES

- ☐ Adjustable regulated high current ±12V output
- ☐ +5V remote sense
- ☐ High peak current disc drive output

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4	OUTPUT #5
MOX-200-0512	+5 @ 25A	+12 @ 4.0A	−12 @ 4.0A	−5 @ 1A	
MOX-200-0515	+5 @ 25A	+15 @ 4.0A	−15 @ 4.0A	−5 @ 1A	
MOX-200-2412	+5 @ 25A	+12 @ 4.0A	−12 @ 4.0A	−5 @ 1A	+24 @ 8A pk
MOX-200-1212	+5 @ 25A	+12 @ 4.0A	−12 @ 4.0A	−5 @ 1A	+12 @ 8A pk

NOTE Peak currents are specified for disc drive applications. Maximum average current 4A. Shaded outputs are semi-regulated.

SPECIFICATIONS

AC Input: 90-132 VAC/180-264 VAC selectable, 47-63 Hz.

Line and Load Regulaion: (20% to 100% load).
Semi-regulated Outputs: ±3%
All Other Outputs: ±1% or 2% depending on model.

Cross Regulation: (50% Load Change on Output #1).
All Shaded Outputs: ±3%.
All Other Outputs: ±1%.

Centering (Output #1 set to +5.00V, all outputs at 60% load): ±5%.

Min. Load Required: 20%.

Ripple and Noise: 0.2% RMS, 1% p-p or 100 mV, whichever greater.

Temperature Coefficient: 0.02%/°C.

Overshoot: No turn on or off overshoot.

Overload Protection: Current limit protection on all outputs.

Overvoltage Protection: Standard.

Brownout Protection: Holds full rated regulation to 85/170 VAC.

Hold Up Time: 16 ms.

Temperature Range: 0 to 50°C full ratings, derated 50% to 71°C.

Soft Start: Reduces turn-on current surge.

Safety: U/L recognized (most models).

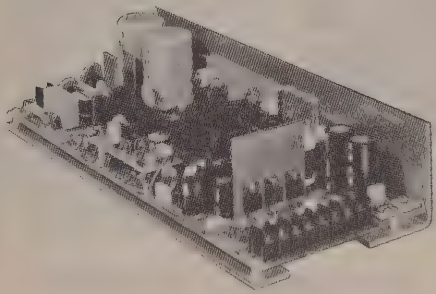
O. E. M. OPEN FRAME SWITCHERS

NEW 300 WATT 3 OR 4 OUTPUTS

MEETS INTERNATIONAL SAFETY STANDARDS IN RECORD 2.1 WATTS/CU IN POWER DENSITY



The MOR Series 60 kHz switcher is designed for application requiring IEC 380/VDE 0806 safety as well as U/L 478. The units also meet the RFI requirements of FCC Part 15 Subpart J. Size: 2.5 x 5 x 11½".

FEATURES

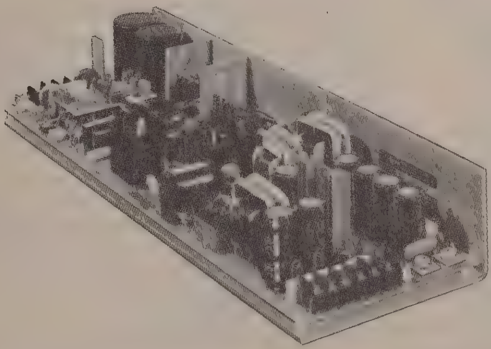
- ☐ IEC 380/VDE 0806 safety standards
- ☐ High current 45A, +5V output
- ☐ Remote Sense
- ☐ All regulated outputs
- ☐ Built in RFI filter

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4
MOR-411-0512	+5 @ 45A	+12 @ 1.5A	−12 @ 1.5A	5.2 @ 1.5A
MOR-411-1212	+5 @ 45A	+12 @ 1.5A	+12 @ 1.5A	12 @ 1.5A
MOR-411-2412	+5 @ 45A	+12 @ 1.5A	−12 @ 1.5A	24 @ 1.5A
MOR-311-0512	+5 @ 45A	+12 @ 2A		12 @ 2A

- All outputs are regulated.
- Units require 60 cfm of moving air to achieve full ratings.

NEW 400 WATT 4 or 5 OUTPUTS

THE SMALLEST 400W OPEN FRAME SWITCHER IN THE INDUSTRY



This new Todd Multi-output high power open frame switcher represents a breakthrough in open frame switcher technology. Switching at 50 kHz and using Todd's VERI-DRIVE PLUS it is the only power supply delivering 50 amps at +5 VDC, and with a power density of greater than 2.1 watts per cubic inch (2.5 inches by 5 inches by 15 inches).

FEATURES

- ☐ High Current (50 Amp), Low Noise Output
- ☐ Remote Sense on +5 VDC Output
- ☐ Regulated Auxiliary outputs for ECL, or CRT display
- ☐ Built-in Thermal Protection
- ☐ High Surge Current Disk or Printer Output
- ☐ All Outputs Current Limited
- ☐ Built-in RFI Filter
- ☐ Heavy Duty High Current Output Studs
- ☐ Overvoltage and Open Sense Lead Protection

MODEL	OUTPUT #1	OUTPUT #2	OUTPUT #3	OUTPUT #4	OUTPUT #5
MOX-400-0512	+5 @ 50A	+12 @ 10A	−12 @ 10A	−5 @ 5A	
MOX-400-2412	+5 @ 50A	+12 @ 10A	−12 @ 10A	−5 @ 5A	+24 @ 8A pk
MOX-400-1212	+5 @ 50A	+12 @ 10A	−12 @ 10A	−5 @ 5A	+12 @ 8A pk
MRX-400-1212	+5 @ 50A	+12 @ 10A	−12 @ 10A	+12 @ 1.5A	
MRX-400-2412	+5 @ 50A	+12 @ 10A	−12 @ 10A	+24 @ 1.5A	
MRX-400-0512	+5 @ 50A	+12 @ 10A	−12 @ 10A	−5.2 @ 3A	

Shaded outputs are semi-regulated.

NOTE Peak currents specified are momentary, for motor starting. Reduce to 5A for maximum average current. Units require 60 cfm moving air to achieve full ratings. Combined current on outputs #2 and #3 cannot exceed 15A.

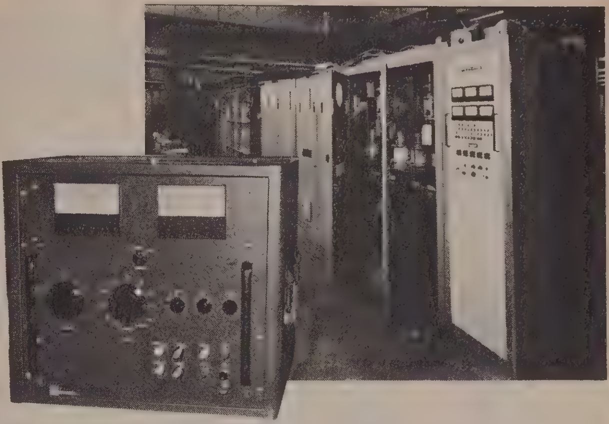
Precision Regulated High Voltage DC Power Supplies

Precisely regulated performance over wide adjustment range, low ripple, fast response and high stability enable the series "BRE" power supplies to be used in exacting work for X-Ray Spectroscopy, computerized tomography, electron microscopes, TWT's, ion bombardment experiments, particle separators.



☐ **FROM 1 KV THROUGH 500 KVDC**
These precisely regulated power supplies are available in voltage ratings from 1 KV through 500 KVDC at continuous duty output power up to 10 MW. Our regulation circuitry techniques realize performance specifications which are virtually independent of input line variations or no load-full load changes.

☐ **LOW RIPPLE...HIGH STABILITY**
Ripple in most cases is 0.01% rms and the output polarity is available as both fixed and reversible. Two voltage adjustment schemes are offered, namely digital dialable control for the most exacting applications and continuous coarse and vernier controls.

☐ **WIDE ADJUSTMENT RANGE**
In the digital dialable scheme, we allow for adjustment in increments of 10 KV, 1 KV, 100 volts, 10 volts, 1 volt and 0-1 volt vernier. Accuracy is within 1% of the dial readings. Regulation accuracy of ±0.25%; ±0.1%; ±0.05% and ±0.01% for line or load changes is available on most series "BRE" power supplies.

☐ **SCR PRIMARY REGULATION**
The use of SCR's for primary regulation, replacing motorised Auto-transformers, results in improved performance and significant volume and weight savings. Lower cost power supplies also result in volume applications. SCR primary regulators are applicable up to 1.5 MW primary power.

☐ **TWT/CFA POWER SUPPLY SYSTEMS**
Available with Cathode, Heater, Collector, Anode and Helix outputs. Each UVC Black Box system features:

- **CW or PULSED (grid, mod anode, cathode, etc.) OPERATION**
- **TURN ON/OFF SEQUENCE CONTROL TO INSURE SAFE AND PROPER PERFORMANCE**
- **FAST-ACTING CROWBAR PROTECTION**
- **REMOTE CONTROL FACILITY,** including IEEE 488 interface available as option

You can forget about power problems when you marry your TWT's to UVC Black Boxes.

BROCHURES: BRE 70-10 REGULATED
HIGH VOLTAGE DC POWER SUPPLIES

Adjustable High Voltage DC Power Supplies

VOLTAGE RANGES TO 2,000,000 VOLTS DC

☐ **CONSERVATIVELY RATED—HIGH RELIABILITY**
Every UVC power supply includes conservatively rated high voltage components designed and manufactured under the strict control of the specialized UVC technical staff to insure continuous duty, long term, trouble free operation.

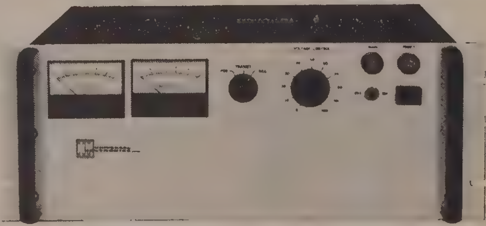
Each power supply offers a standard ripple specification of 5% maximum or better. Optional filters and attenuators are available for every UVC supply to reduce ripple to as low as .01% rms.

☐ **REVERSIBLE POLARITY**
Each power supply offers the flexibility of reversible output polarity performance.

☐ **FULLY SELF-PROTECTING**
Overvoltage and overcurrent protection features are available as both adjustable range and fixed value circuits. All access areas and doors are interlocked for personnel protection and all energy storage components and circuits are discharge protected for personnel protection.

☐ **"APPLICATIONS ORIENTED" CONTROLS OPTIONAL**
Rack mounted, floor and bench operable as well as portable design are among the packages available for UVC standard high voltage power supplies.

☐ **12-MONTHS WARRANTY**
A one year factory backed and field supported warranty policy accompanies each shipment.



Series "BA" adjustable power supplies and series "BP" power packs are available at voltage ratings from 1 KVDC through 2000 KVDC at output power ratings from 1 watt to 250 kilowatts continuous. The adjustable series includes applications oriented control features and package design. The power pack series has many applications in OEM systems and for general laboratory use.

Above current ratings proportional to output voltage when units are operated at less than rated output voltage. *NOTE: Contact Factory

Most of Venus' power supplies can be obtained "off-the-shelf" from a large stock of inventory. This allows the unique advantage of selecting a power supply proven through previous years of field testing in numerous applications. The benefits of selecting from inventory include immediate delivery, no non-recurring engineering and demonstrated quality at a reasonable price. A custom design service is also available where unique and exacting requirements are not compatible with existing standard products. Venus can supply custom designed units in both prototype and production quantities for both Military and Commercial applications. Please contact the Venus Engineering Sales Department for further details in formulating a cost effective design to suit your specific requirements.

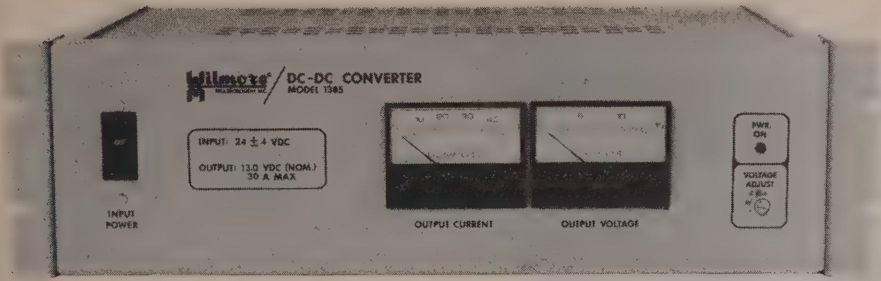
DC-to-DC Power Converters



Wilmore®
ELECTRONICS CO., INC.

SERIES 1385

SERIES 1385 RACK-MOUNTED DC-to-DC POWER CONVERTERS

- **80% - 90% EFFICIENCIES**
- **INPUT/OUTPUT ISOLATION**
- **LOW OUTPUT RIPPLE**
- **-30°C TO 65°C OPERATING RANGE, CONVECTION COOLED**

The Series 1385 converters provide an isolated, regulated, adjustable dc output from station batteries or other widely fluctuating dc sources to reliably power telecommunications equipment, supervisory control systems, and other sensitive electronic loads. Although capable of providing up to 420 watts of continuous output power, these converters typically require only 5 watts of no-load input power and exhibit correspondingly high light-load efficiencies, making them uniquely suited for applications in which periods of "standby" or light-load service are encountered.

Front-Panel Controls and Indicators

A combination circuit breaker and ON/OFF switch is provided for the input power. A light-emitting diode indicates "DC Output Present." A voltmeter and ammeter display the DC output, and a screwdriver-slotted potentiometer shaft with locking nut is provided to adjust the output voltage level.

Size and Weight

All converters measure 5¼" high by 17" wide by 12" deep and are designed for 19" rack mounting. All units weigh less than 18 pounds.

Standard Options

Series 1385 converters are available with several standard options, including paralleling diodes for redundant applications, under- and over-voltage alarm contact closure, and remote sensing of output voltage. In addition, many other nonstandard input/output voltage combinations are available. Contact our sales department for details.

Model Number	Input Voltage Range (Vdc)	Settable Output Voltage Range (Vdc)	Output Current (Adc)

OTHER RACK-MOUNTED DC-to-DC CONVERTERS

In addition to the Series 1385, Wilmore manufactures many other standard and custom, single- and multiple-output rack-mounted DC-to-DC converters, some of which are briefly described below. Each series is isolated, regulated, and highly efficient, and each is designed and manufactured in accordance with Wilmore's traditional emphasis on conservative electrical ratings and long product life.

The **Series 1240** converters are single-output units with standard output voltages of 24, 28, 30, 48 and 125 Vdc and standard input voltages of 48, 125 and 250 Vdc. These rugged converters are available at both 300-watt and 600-watt power levels. They are extensively used to power equipment within public utilities. Request bulletin 4011 for more information.

The **Series 1265** converters provide an adjustable 13 Vdc output at 30 amperes maximum load current, with standard input voltages of 24 Vdc and 48 Vdc. These converters weigh less than 15 pounds and feature an extremely wide ambient operating temperature range of -30°C to 71°C with convection cooling and no derating of output power. The Series 1265 is widely used in the communications industry to power sensitive radio transceivers and auxiliary base station equipment. Request bulletin 5061 for more information.

The **Series 1295** converters are similar to the Series 1265 except that the rated output power is 150 watts and additional output voltages of 24, 28, 36, 48 and 125 Vdc are available. Request bulletin 6061 for more information.

The **Series 1366** converters are modular, rack-mounted dual- or triple-output dc-to-dc converters. The independent outputs have a maximum output power of approximately 100 watts each and can be assembled in essentially any combination of the following standard outputs: 5 Vdc at 20 amperes, 12 Vdc at 6 amperes, and 15 Vdc at 6 amperes. Standard input voltages are 48 Vdc and 125 Vdc. Request bulletin 3051 for more information.

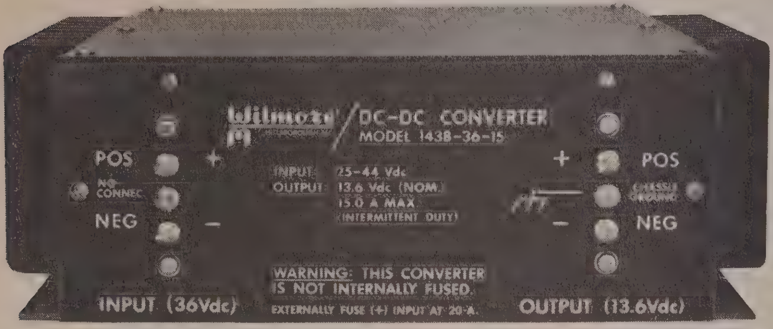
Railroad and Mobile-Radio DC-to-DC Converters



SERIES 1438

Wilmore®
ELECTRONICS CO., INC.

RELIABLE 13 VDC OR 26 VDC FROM VIRTUALLY ANY VEHICLE

- HIGHLY EFFICIENT OPERATION
- -30°C TO 60°C OPERATING RANGE
- ELECTRICALLY/MECHANICALLY RUGGED FOR MOBILE APPLICATIONS

These dc-to-dc converters are designed to power standard mobile communications equipment from vehicular electrical systems with output voltages other than 13-Vdc negative ground. Typical applications include 24, 36, 48, and 72-V lift trucks, positive-ground trucks, 24-V heavy duty construction vehicles, and 36-V and 72-V diesel and electric rail vehicles.

Series 1416 24-volt to 13-volt Converters
With output current ratings of 15, 25 and 35 amperes, the three models within this series provide a regulated 13.5 Vdc from 24-volt vehicular battery systems. Designed to meet military shock and vibration specifications, the Series 1416 converters are lightweight, highly efficient, and extremely rugged.

Series 1360 Mobile-Radio Converters
These rugged unregulated converters include Models 1360 and 1380 (13-Vdc polarity converters), Models 1365 and 1395 (24-Vdc to 13-Vdc converters) and Models 1424 and 1442 (12-Vdc to 24-Vdc converters). They are small, lightweight, and quiet, with typical efficiencies exceeding 85%.

Series 1340 Regulated/Isolated Converters
The Series 1340 can be used with 12, 24, 36, and 48-Vdc vehicular battery systems to provide voltage regulation and electrical isolation for 13-Vdc and 24-Vdc mobile communications equipment.

Model 1411 Wide Input Range Converter
Designed to power mobile-radio equipment on lift trucks, the Model 1411 has an input voltage range of 20 to 56 Vdc. This extremely wide input range, along with other features including electrical isolation and output voltage regulation, allows the user to specify one model for an entire fleet of lift trucks despite the presence of more than one vehicular battery voltage.

Series 1438 Railroad/LRV Converters
Communications equipment on diesel and electric rail vehicles is subject to an extremely harsh electrical and mechanical environment. The Series 1438 converters are designed to handle the constant mechanical stresses and will operate through input transients of up to 3000 Vdc in amplitude and 90 watt-seconds of energy content. Electrically isolated and well regulated, these converters are available with input voltages of 36 and 72 Vdc, with maximum output load currents of 5, 10 and 15 amperes.

RAILROAD/LRV DC-TO-DC CONVERTERS

Model Number	Input Voltage Range (Vdc)	Nominal Output Voltage (Vdc)	Output Current[2] (Adc)	Dimensions (h" x w" x d")	Weight (Pounds)	Input-Transient Withstand Capability	
						Voltage	Energy
1438-36-5	25-44	13.6	0-5	3.7 x 9.0 x 11.8	5.0	3000 Vdc	90 Joules
1438-72-5	58-86						
1438-36-10	25-44		0-10	3.7 x 11.4 x 11.8	5.5		
1438-72-10	58-86						
1438-36-15	25-44		0-15		7.0		
1438-72-15	58-86						

---

1. Models 1380, 1360, 1395, 1365, 1442, and 1424 provide output voltages directly proportional to input voltage. All other models provide regulated output voltages.
2. All maximum current ratings assume an intermittent demand on a 20% duty cycle except for Models 1340, 1411, and 1438. Models 1340 and 1411 are continuous current ratings, and Model 1438 ratings assume a 25% duty cycle per AAR specifications.
3. These are typical minimum efficiencies from one-half to full load.

ELECTRONICS CO., INC.

SERIES 1254

ENERGY DELIVERY RATES UP TO 1200 JOULES/SECOND

- **AC- AND DC-INPUT MODELS**
- **± 0.25% OUTPUT VOLTAGE REPEATABILITY**
- **MIL-SPEC UNITS AND CUSTOM PACKAGING AVAILABLE**

Series 1254 capacitor-charging converters utilize a unique constant-power charging technique that allows them to charge any size capacitor at any pulse repetition rate within their energy-delivery-rate capacity. In addition to this series, Wilmore manufactures smaller, lighter and higher efficiency units on a custom-designed basis for industrial, military, and aerospace applications.

Model Number	Input Voltage	Energy Delivery Rate (Joules/sec*)	Maximum Output Voltage (Vdc)	Efficiency (Typical)	Dimensions (h"xw"xd")	Approximate Weight (Pounds)
1254-28-150	20 Vdc-32 Vdc (28 Vdc nominal)	150	User Specified - up to + 2500 Vdc (some units are available with negative output voltages) *Note: Energy delivery rates are maximum rates specified at the maximum output voltage. At one-half maximum voltage, the energy delivery rate will be reduced to approximately 70-75% of its maximum.	75%	5¼ x 19 x 17	12
1254-28-300		300			5¼ x 19 x 17	14
1254-28-450		450			5¼ x 19 x 21	20
1254-28-600		600			5¼ x 19 x 21	23

1254-120/208-1200		1200			5¼ x 19 x 21	35

Custom-designed/OEM Power Supplies

FULLY INTEGRATED ELECTRICAL, MECHANICAL, AND THERMAL DESIGNS

- **INDUSTRIAL, MILITARY, AND AEROSPACE**
- **FAST TURNAROUND ON PROTOTYPES**
- **QUANTITY PRODUCTION CAPABILITY**
- **AC-to-AC, AC-to-DC, DC-to-AC, DC-to-DC DESIGNS**

Because user's needs tend to be highly individualized, a substantial portion of Wilmore's production involves custom-designed power conversion equipment rather than standard products. Our engineering charges for custom units are modest, and our urnaround times are exceedingly short. OEM's and system designers can cut costs without compromising quality with a custom power converter that is integrated in numerous ways to the overall electrical, mechanical, and thermal planning of a product.

Wilmore's involvements in designing and manufacturing custom power supplies in production quantities include a myriad of products, each with its own set of special electrical, mechanical, and thermal concerns. The following example categories are cited to illustrate the considerable range of Wilmore's custom engineering and production capabilities.

Sub-Modular and Encapsulated Supplies for PC-Board Mounting.
Wilmore is currently manufacturing ac-input and dc-input power supplies with single and multiple outputs that are designed to be mounted directly to printed circuit boards by plug-in sockets or direct soldering. These power supplies feature compact size and very wide operating temperature ranges with no output-power derating.

PC-Card Multiple-Output Switching Power Supplies
Designed to provide multiple dc outputs in a compact mounting configuration, these units operate from dc or ac power sources to power microprocessor-based equipment in utility-station environments. They can deliver up to 40 watts of power in a single pc-card, edge-connector configuration.

High-Efficiency DC-to-DC Converters
Wilmore specializes in the custom design of truly state-of-the-art dc-to-dc converters for military, aerospace, or particularly demanding industrial applications. We manufacture single- and multiple-output units in the power range from milliwatts to a kilowatt, with emphasis on reliability, efficiency, and cost-effectiveness.

Open-Frame and Enclosed Switching Power Supplies
Many power supply manufacturers have recently jumped on the "switcher" bandwagon, but Wilmore has been designing and manufacturing switching power supplies for more than 15 years. Virtually every power supply that we have designed and manufactured is a transistor-switching power supply. If you have some challenging requirements regarding efficiency, size, weight, reliability, or other performance criteria, our engineers would like to hear from you.

Xentek

Power Supplies

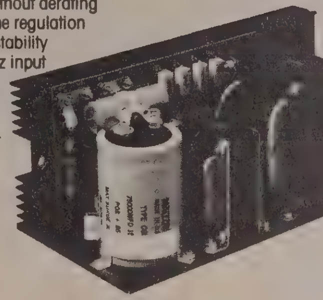
The heart of your system

Standard features for all Xentek supplies on this page: computer grade components ■ cermet adjustment pots ■ varnish impregnated transformers with 180°C magnet wire ■ 15-turn voltage adjustment pots ■ metal sealed or ceramic ICs with 168 hour burn-in ■ foldback current limiting ■ short circuit and reverse voltage protection ■ black anodized all aluminum chassis ■ 100% inspection

XE Series — Premium grade single output

- Nine models from 15-375W
- 0-55°C operation without derating
- ± 0.1% load and line regulation
- ± 0.1% ripple and stability
- 115/230V 50/60 Hz input
- large aluminum heat sinks on XE30 and larger
- shielded transformer and remote sensing standard

Options: built-in, adjustable OVP; high performance (0.01% regulation, ripple and stability); multiple or wide range inputs.



Output Current (amps at nominal voltage)

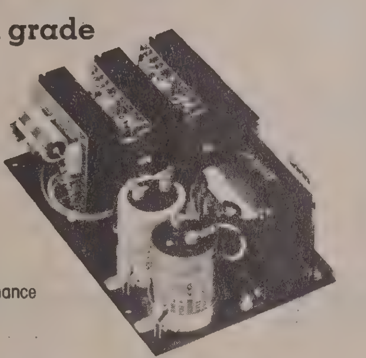
OVP option $8 (1-9) on most outputs under 90W.

XM Series — Premium grade multiple output

- Dual, triple and quadruple outputs to 180W
- 16 standard models listed here, plus:
- Thousands of tailored combinations — send for complete catalog
- 0-55°C operation without derating (0-40°C on XM20, XM25)
- ± 0.1% regulation, ripple, stability
- 115/230V inputs, shielded transformer, remote sensing all standard

Options: built-in adjustable OVP; high performance output; multiple or wide range inputs; dual tracking on XM15 or XM20.



Standard Models

Model	Output #1	Output #2	Output #3	L × W × H (in.)			Price (1-9)

4XM180S	5V, 25A*	±12V, 2.4A each, #4: 5V, 3A		12.00	8.50	4.88	272

*Includes OVP standard

Note: Select 12V (-12) or 15V (-15) operation on models marked -12/15.

XP Series — Ideal choice for OEM, systems. Single outputs to 90W.

- Any output voltage from 2-32Vdc (2-250V on XP20, XP30)
- ± 0.1% load and line regulation
- ± 0.1% ripple and stability
- 0-40°C operation, derate 2%/°C to 71°C
- 115V 50/60Hz input

Options: Adjustable OVP; XPX, XS versions with 115/230V input; remote sensing; multiple and wide range inputs; shielded transformer

Switching Power Supplies

XENTEK has the solution to your switching supply requirements. If you need 70 to 400 watts output power with 1 to 5 outputs, send us your requirements today. We will respond with a cost effective reliable, 100 KHz FET, forward converter design.

Custom Power Supplies and Tailored Combinations

Xentek has specialized in building power supplies exactly to customer needs. We supply many manufacturers of floppy disks and other computer peripherals as well as mainframes and systems.

Whether your need is for a built-from-scratch special or one of the tens of thousands of tailored combinations based on these standard products, give us a call today. You'll be pleasantly surprised at the results.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

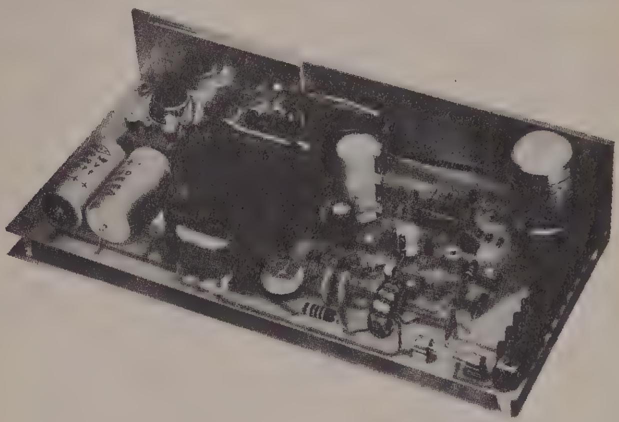
OFF LINE SWITCHING POWER SUPPLIES

FEATURES

- Dual Range AC Input
- 65-80% Efficiency
- Overload Protection
- Convection Cooled
- 20 kHz Switching Frequency
- LG msec Holdup Time
- Brown-out Rated
- All Outputs Fully Regulated
- Designed to Meet UL, CSA and VDE Requirements



SPECIFICATIONS

- Input: 90-132/180-264 VAC 47-63 Hz
- Holdup Time: 16 msec min.
- Ripple and Noise: 2% pk-pk max.
  40 mV RMS max.
- Temperature Range: 0 to 70°C
- Regulation: 1%
- Current Limiting: 110-125% of Rated Current
- EMI Filtering

SINGLE OUTPUT

Model	SO 100	SO 175	SO 300
DC Volts/Watts	100W	175W	300W

asi PROGRAMMABLE AC POWER SOURCES

- **Designed for Critical ATE Applications**
- **Microprocessor Controlled**
- **High Efficiency Autotransformer Design**

Astrosystems new series of programmable AC supplies provide precision AC power programmable in amplitude and phase. Featuring built-in microprocessor control,these completely solid state power sources are capable of driving high power loads. A unique switching autotransformer design eliminates the need for high power drive amplifiers resulting in low power dissipation and reduced size and weight.

Programming is via an IEEE 488 GPIB bus in CIIL language. Designed for critical Air Force MATE program applications, these power sources feature high reliability and meet all applicable MIL specs.

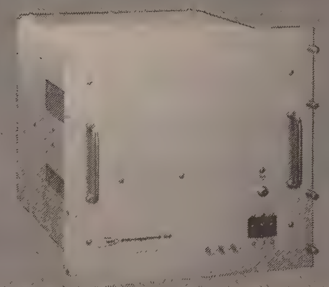
Features

- High power programmable AC outputs
- Programmable in phase and amplitude
- MATE compatible IEEE-488 bus
- Uses CIIL language programming
- All solid state low power dissipation design
- 1Ø , 2Ø or 3Ø outputs
- Automatic overload protection
- Uses internal or external frequency source
- Electrical isolation of input and output
- Modular design for ease in maintenance
- Built-in Test (BIT) capability
- Meet all applicable MIL specs

MATE Compatible
IEEE-488 BUS

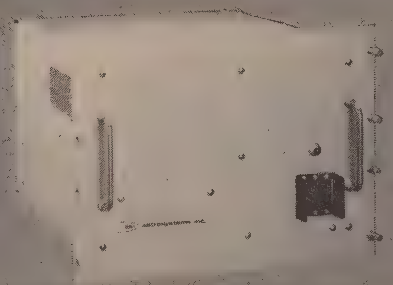
Each phase of the output is individually controlled in phase and amplitude via a GPIB bus. Programming is accomplished using the latest version of CIIL language. Overall control is exercised with a built-in Test Module Adapter (TMA) incorporating an 8088 processor. The processor also controls extensive Built-in Test (BIT) capabilities.

A5500-T Two Phase AC Power Supply



Output Power—Two independent AC power outputs; 4.5 amps each
Output Voltage—Programmable in 0.5 volt steps from 0 to 115 volts
Output Phase—Programmable in 1.5 degree steps from 0 to 360 degrees
Programming—MATE compatible IEEE 488 bus using CIIL language

A2100-T Three Phase Power Supply



Output Voltage—100-130 volts RMS per phase in 2 volt steps
Output Power—6.5 KVA maximum
Protection—Complete protection for short circuits. Voltage limiting to 110% of programmed value and current limiting to 110% of maximum power rating.
Programming—MATE compatible IEEE 488 bus using CIIL lanugage.

Custom/Standard Supplies

The power supplies described below are typical of those designed and produced by Astrosystems. Modular design and plug-in circuitry facilitate special designs. Our engineering department will customize these units to your exact requirements. Send us your specs or call the toll free number below.

FREQUENCY CONVERTERS
50-60-400 Hz

Input Voltage: 115V AC, ±10%, single-phase for units 1000VA and below. 208V AC, ±10%, three-phase for units above 1000VA. 220V AC, ±10%, 50Hz is a no charge option. Other inputs available on a custom basis.

Input Frequency: 47 to 65Hz. 380 to 420Hz input is a no charge option.

Output Voltage: Adjustable 100 to 130 volts. Voltage adjust is internal for fixed frequency models, on the front panel for adjustable frequency models. (Other ranges available, consult factory.)

Voltage Regulation: Less than ±2% for combined no load to full load change and rated input voltage change.

Load Power Factor: 0.7 lead to 0.7 lag. Continuous zero lead to zero lag at full rated output without damage.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency. (Less than 1% on custom basis.)

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

Meters: Output voltmeter ammeter, and frequency meter offered as options.

Output Frequency: Rated output frequency for each model is shown on chart. For adjustable frequency models, adjustment is on the front panel. Internal frequency adjust is a no charge option.

Frequency Stability: Oscillator included in the unit base price. Fixed frequency oscillators are crystal controlled with a stability of ±0.05%. Adjustable oscillators are RC controlled and have a stability of ±0.25%.

Efficiency: Between 70 to 80 percent (typical 75%). At least 70% from 40% of full load to full load.

Peak Output Current: 150% of full rated current is available for three-cycles. Unit is set to current limit at 120% after three cycles.

Model 463-4-200 6KVA

STATIC INVERTERS
DC TO 50-60-400 Hz

- 85% Efficiency
- Low Cost
- Light Weight
- Proven Reliability

Input Voltage: 100 to 140V DC. Other input voltage ranges, 28V DC, 48V DC, 60V DC and 200V DC Sunverter.

Output Voltage: Set for 117V. Internal adjustment from 110V to 120V. 220V AC for 50Hz models.

Voltage Regulation: Less than 2% for single phase units, less than 5% for three phase units, for combined load and input voltage changes.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency. (Less than 1% on custom basis.)

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

UNINTERRUPTIBLE POWER SUPPLIES

Single Phase and Three Phase
50, 60, and 400 HZ

- **Uninterruptible AC Power**
- **Quiet Operation — No Ferroresonant Devices**
- **Dual Mode Operation**
- **High Efficiency For Low Heat Generation**
- **Electro-Mechanical System Bypass**
- **"Bumpless Transfer" From Utility to Battery Operation**
- **Protection From Line Transients**
- **Electrically Isolated Integral Battery Charges**

Input Voltage: 115V AC ±10% single phase for single phase units. 208V AC ±10% three phase for three phase units. 220V AC for 50 Hz units. Other inputs available on a custom basis. Consult factory.

Input Frequency: 48 to 52Hz, 57 to 63Hz, or 380 to 420Hz depending on output.

Input and Output Terminations: Rear panel terminal blocks for 50Hz and 60-Hz models. MS3102A circular connectors on 400Hz models.

Output Voltage: Internally adjustable. Any standard power line voltage available. Three phase units are supplied in either wye or delta configurations.

Voltage Regulation: ±2% for single phase equipment and ±5% for three phase units.

Peak Output Current: 150% of full rated current is available for three cycles. Unit is set to current limit at 110% after three cycles.

Frequency Stability: Oscillator included in the unit base price. Fixed frequency oscillators are crystal controlled with a stability of +0.05%. Adjustable oscillators are RC controlled and have a stability of +0.25% (See option for phase-lock.)

Load Power Factor: 0.7 lead to 0.7 lag. Continuous zero lead to zero lag at full rated load without damage.

Output Waveshape: Sinewave, less than 4% THD, 3% max any single frequency. (Less than 1% on custom basis.)

Duty Cycle: Continuous duty at full rated output.

Efficiency: Between 75 to 80 percent (typical 80%). At least 75% from 40% of load to full load.

Battery Charger: Operates in a constant current mode until the battery achieves float voltage, then automatic transfer to a constant voltage mode. The output is well filtered to minimize battery heating.

Float Voltage: The float voltage set point is adjustable.

Ambient Temperature Range: Operating 0 to 40°C. Nonoperating −20 to +85°C.

Construction: Unit 3 KVA or less are standard 19" rack mount. Larger units are cabinet models.

Method of Operation: The load operates from the UPS System. Should a power failure occur, the inverter will continue to operate from the battery bank. There is no transfer time since the load normally is connected to the inverter. An electromagnetic by-pass line to the utility power is provided should the UPS have a problem.

Transfer Time: Standard electro mechanical by-pass transfer time is two cycles nominal.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

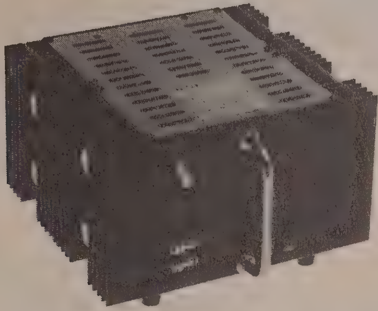
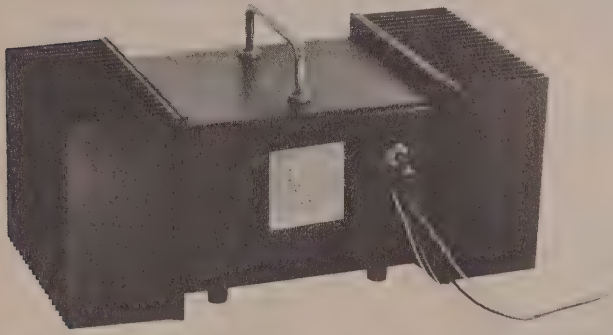
INDUSTRIAL POWER SUPPLIES

Sine Wave Inverters

MODELS
KN-PN
LN-TN



Standard Models: KN, PN, LN, TN
Cases K2, F2, J2



Salt Spray Models: KS, PS, LS, TS
Case G-2

Severe environment models are fully enclosed in an anodized aluminum case. Specifically designed to provide trouble-free operation in a salt spray environment such as marine navigation, offshore platforms as well as corrosive industrial applications. Flying leads are provided to simplify installation.

11 to 54 VDC Input
30 to 320 VA Output

- A wide range of standard models.
- 50 Hz or 60 Hz output.
- Surge current capabilities up to 3 times rated output power.
- Exceptional reliability. Typical MTBF: 90,586 hours for model LN8
- High efficiency provided by sine wave. Conserves power.
- Saves motors by reducing overheating.
- Low distortion. 2% typical.
- Salt spray package.
- Compact. Lightweight.
- Switchable 115 VAC 60 Hz/230 VAC 50 Hz.
- Wide temperature range: −20°C to +55°C ambient operation.
- 2-year warranty.

INDUSTRIAL POWER SUPPLIES

Sine Wave Inverters

MODELS
KN-PN
LN-TN

SPECIFICATIONS

INPUT VOLTAGE RANGE:
KN, KS: 11 to 15 VDC
PN, PS: 22 to 30 VDC
LN, LS: 29 to 38 VDC
TN. TS: 42 to 54 VDC

OUTPUT VOLTAGE: 115 or 220 VAC ±2% at full load and nominal input voltage.

OUTPUT FREQUENCY: 50 Hz or 60 Hz.

LINE REGULATION: 3% for specified input voltage range with load constant.

LOAD REGULATION: 3% for load change of half load to full load with line constant; 6% for change of no load to full load.

WAVE FORM: Sine wave with 2% typical, 5% maximum distortion.

POWER FACTOR: Fully rated output VA, from unity to 0.7 power factor lagging or leading.

EFFICIENCY: At full load with nominal input voltage
40% minimum on KN, KS
50% minimum on PN, PS
58% minimum on LN, LS
60% minimum on TN, TS

OPERATING TEMPERATURE RANGE: (KN, PN, LN and TN): 4°F to +131°F (−20°C to +55°C) ambient air temperature. Humidity 0 to 90% (non condensing) at 25°C.

OPERATING TEMPERATURE RANGE: (KS, PS, LS and TS): 4°F to +131°F (−20°C to +55°C) ambient air temperature. G2 case is submersible (10 feet, 2 minutes).

INPUT TRANSIENT PROTECTION: 45 VDC for 0.1 second transient deviation and recovery (for change of 50%) of rated (load).

ALTITUDE: 10,000 feet above sea level (KN, PN, LN, TN) 50,000 feet above sea level (KS, PS, LS, TS).

PROTECTIVE FEATURES

OVERLOAD PROTECTION: Magnetic type circuit breaker. Reverse polarity protection.

HIGH RELIABILITY

Model LN8T-115-60: MTBF 90,586 hours at 25°C ambient, ground benign environment per MIL-HDBK-217C. Model TN8T-115-60: MTBF 74,733 hours at 50° ambient.

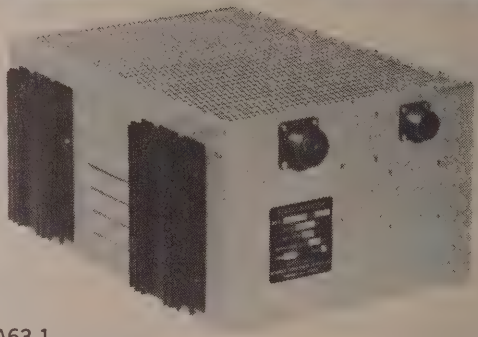
ACDCo Power WHERE you need it!

Inverters-Uninterruptible Power Systems -Battery Chargers-Frequency Changers-Power Supplies

ACDCo Power Equipment is designed to meet high reliability and performance standards providing maximum life with minimum maintenance to protect all system circuits that require dependable, high quality power.



A63-1
1 KVA INVERTER

HARDWARE

Inverters, Power — DC to AC Output: Fixed-base, portable, mobile and marine.

ACDCo INVERTERS are used in one of the **roughest** of Marine Environments on the **U.S. Coast Guard's - Rescue Life Boats** to power their Navigation and Communication equipment.

Uninterruptible AC Power Systems: 36 VA to 5 KVA.

Frequency Converters — AC to AC: 50/60 Hz, 60/50 Hz, 50/400 Hz and 60/400 Hz.

Power Supplies: Constant current and constant voltage current regulated and modular.

Battery Chargers — Special Purpose, custom made.

TYPICAL SPECIFICATIONS

Input: ±15% from nominal.

Output: Sine wave, 120 Volts RMS, 60 Hz.

Voltage Regulation: 2% over full input and load range.

Frequency Regulation: 1% over full input and load range.

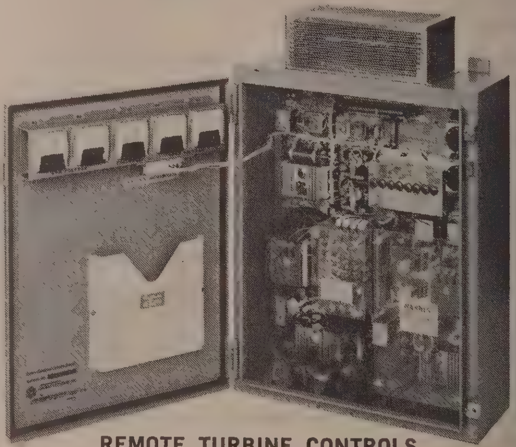
Power Factor: .9 Lead to .8 Lag.

Efficiency: Over 80% at nominal input.

Distortion: Less than 5%.

Overload: Within specifications for ONE MINUTE at 140% load.

Overload Protection: No damage from short to open circuit, reversal of input, or input voltage to 140% nominal.



REMOTE TURBINE CONTROLS FOR THE ALASKAN PIPELINE

DESIGN FEATURES

Ruggedized construction, no moving parts, completely solid state, easy servicing — sides fold down, plug-in transistors and I/C's on Printed Circuit Boards, all P/C boards plug-in removable.

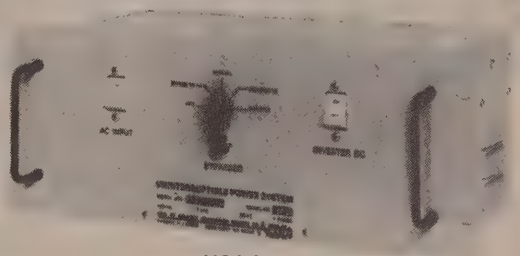
ACDCo

ACDCo Power WHEN you need it!

Protect Against Costly Power Interruptions

ACDCo Uninterruptible Power Systems protect critical circuits for computer peripherals, process controls, telephone switch boards, high risk medical or experimental procedures and all systems requiring dependable emergency power when normal AC is lost.



U34-1

Typical UPS Model U34-1 is used to power a critical liquid hydrogen temperature control system at a major government research nuclear reactor.

UNINTERRUPTIBLE POWER SYSTEMS

Your margin of safety to insure continuous high quality power even in the event of any utility line or generator power fluctuation or failure. ACDCo's UPS systems are designed to provide full output capacity even under "brownout" conditions where voltage reductions as severe as 15% are encountered. The reserve (battery back-up) for power outages is not diminished by extended operation in brownout conditions.

The use of power transistors rather than SCR's in the inverter greatly reduces the susceptibility to transients which can be present on power lines due to faults, switchovers, lightning and other factors. These transients usually cause the problems that the UPS was intended to protect. If the inverter can malfunction as a result of the transient, then the expected protection is absent when it is most needed.

DESIGN FEATURES

- **Ruggedized construction**
- **Easy servicing**
- **Plug-in Transistors and I/C's**
- **Removable P/C Boards**
- **Optimized design to provide maximum value for the procurement dollar**

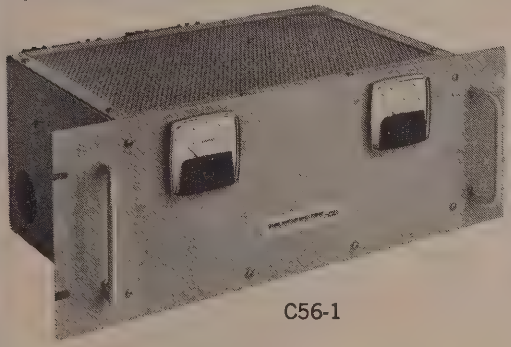
Three phase models also available from 100VA to 1500VA.
Typical specifications relate to those of static inverters.



C56-1

AC TO AC FREQUENCY CONVERTERS

Available in eight power sizes from 36VA to 5000VA plus three phase up to 15 KVA. Power frequencies changed from: 50 to 60 Hz, 60 to 50 Hz, 50 to 400 Hz, and 60 to 400 Hz.

Options available for laboratory applications include metering, front panel controls, etc.

SPECIAL POWER SYSTEMS BULLETIN

Ask for our power systems outline discussion in which ACDCo answers many outstanding questions of systems configuration.

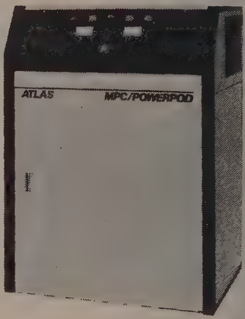
ROTARY UPS POWER CONDITIONERS FREQUENCY CHANGERS



Accoustically enclosed unit for computer room use.
To 75 KVA.

ATLAS USES AN ALL-COPPER POWER PATH EXCLUSIVELY—FOR TWICE THE RELIABILITY OF SEMICONDUCTOR-BASED SYSTEMS.

As nationwide specialists in rotary power conditioning, Atlas consistently sets market standards in technology. We provide reliability and power quality no other segment of the industry can match.

THE ABSOLUTE SERIES: Our premium system. It gives an absolutely continuous flow of clean power even during a total blackout. Can be purchased with or without batteries and DC drive. Buy only what you can afford today, upgrade later in the field. Has the perfect frequency control of synchronous drive, line isolation of rotaries, ruggedness of an all-copper power path, and reliability and subtlety of solid state controls. Each feature is used in its most durable mode: the solid state electronics are in the controls, where they're protected from heavy currents; copper, which handles potentially catastrophic power flows easily, makes up the power path. Options are available to fill all needs. Systems up to 75 KVA can be supplied in acoustical cabinets for computer room use. Sizes range from 10 to 200 KVA.

THE RELIANCE SERIES: Has the same construction, performance and options as the Absolute Series, but cannot be upgraded to handle long duration power failures. Extreme durability of both systems results from our thorough reliability engineering. Sizes range from 10 to 750 KVA.

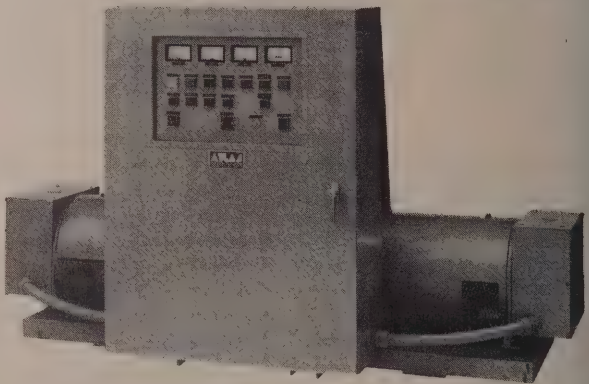
THE VALUE SERIES: Priced for economy budgets, this "no frills" induction-driven machine gives high reliability and the same input-to-output isolation and voltage regulation of our other systems. It lacks, however, their very tight frequency control and options. It has Atlas' rugged all copper power path and 5 to 8 year bearings. Sizes range from 10 to 750 KVA.

THE FREQUENCY CHANGING SERIES: Various models convert 50 to 60 Hz or the reverse. Also available: 60 or 50 to 400 Hz. Designed with the same durable construction and electronic controls as our best machines, this one can be converted to computer power conditioning after frequency changing requirements have passed. Sizes range from 10 to 750 KVA.

WARRANTY: We guarantee all parts on our equipment for twelve months, and we replace them without charge for labor or parts. Extended warranties are also available (see the option list).

RENTALS: The Atlas rental fleet is the nation's largest. We can provide you interim power conditioning and frequency changing equipment at affordable prices. For demands to 160 KVA.

SERVICE: Atlas' reputation for responsive service is strong and we work to keep it that way. We accept service requests 24 hours a day, and maintain a full parts inventory to minimize your down-time. A preventive maintenance program is available as an option.



Open unit for power room use.
To 750 KVA.

POWER CONVERSION FROM

AVIONIC INSTRUMENTS INC.

"THE INVERTER PEOPLE"

DC to AC STATIC INVERTERS

Avionic Instruments Inc. (AI^2) specializes in the design and manufacture of DC to AC Static Inverters for applications which demand the highest levels of reliability and performance. Design ingenuity and the use of solid-state elements are the basic ingredients that qualify Avionic Instruments Inverters to these high standards. Our complete family of sinewave inverters was developed to provide you with a wide selection of VA ratings, from 50 VA to 7.5 KVA, single and three phase, to serve fully your specific system requirements.

The features of our sophisticated, new design DC to AC Inverters are unique in contrast to older, classically designed inverters. **AI^2's new advanced technology Lightweight Hi-Performance Static Inverter series** feature a **patented high frequency power processing technique** that has virtually eliminated the inherent limitations traditionally associated with classical power conversion designs.

LIGHTWEIGHT HI-PERFORMANCE

This breakthrough in design and performance allows us to provide ultra lightweight 400 cycle equipment, ultra lightweight 60 and 50 cycle inverters and frequency converters. Our 250-350 VA, 400 Hz, 60 Hz and 50 Hz designs weigh less than 5 pounds and provide a **115 VAC pure sinewave with less than .5% total harmonic distortion, better than 1% voltage and frequency regulation.** All of our single and multi-phase inverter and frequency converter designs reflect this superb advanced state-of-the-art performance which minimizes weight while achieving optimal performance, **spike free absolutely predictable voltage** to all powered electronic and electrical systems.

One feature not as obvious as the drastic reduction in size and weight relates to our 200 microsecond load response time, which is 10 times faster than static inverters employing conventional power conversion techniques. This feature enables our inverters to maintain superb voltage output stability even if the loads are dynamically unstable, and non-sinusoidal.

CUSTOM MAGNETICS

Avionic Instruments Inc. (AI^2) also specializes in the manufacture of custom-built transformers and inductors designed to customer specifications for non-standard requirements in a range from 10 VA to 10 KVA, single and three phase, high and low voltage and current, 25 Hz to 25 KHz.

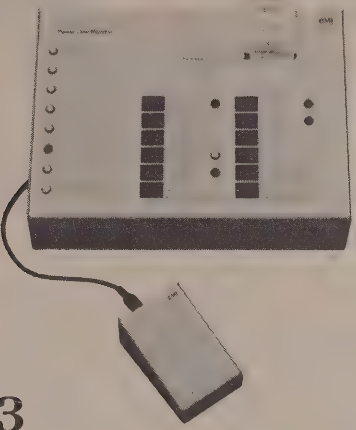
Power Line Monitoring from BMI



GS-3

- Easy installation—just plug it in.
- LED display of line voltage and set-ups
- Records magnitude, time and date of disturbances
- Simultaneous monitoring of single-phase AC, DC, and temperature

Description

The BMI Model GS-3 monitors single-phase 120/240 VAC ground outlets, as well as ambient temperature and DC voltage. It records disturbances which can affect proper operation of computers and other sensitive electronic equipment. Users can easily adjust measurement thresholds with a small screwdriver.

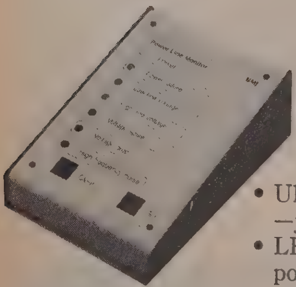
The monitor is equipped with alarm LED's, thermal printer, and an audible alarm. Temperature and DC probes are also included. Rechargeable Ni-Cad batteries keep the internal clock, calendar, and memories alive during storage or power failures.

Specifications

AC — Monitors 120 or 240 VAC nominal, 50 or 60 Hz
— Records power failure, low line voltage, high line voltage, voltage spike, voltage drop, high frequency noise, high and low line frequency.

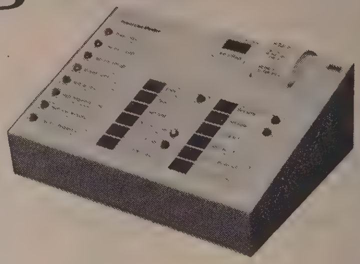
DC — Monitors DC voltage, up to ± 25 VDC
— Records low DC, high DC, DC spikes

Temperature — Monitors ambient temperature, 60°–123°F (15°–53°C)
— Records High and Low temperature events



GS-1

- Ultra-simple to use and install—just plug it in
- LED alarms alert user to possible bad power situations
- Monitors 120 VAC at 60 Hz. Other voltage/frequency combinations on special order
- Useful for selecting locations for further monitoring with GS-3 or GS-2X



GS-2X

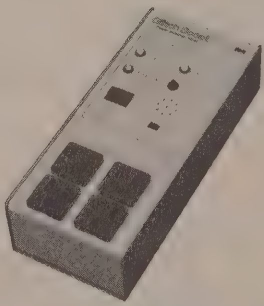
- Easy installation—just plug it in.
- LED display of line voltage, time, date
- Thermal printer records time of occurrence of each disturbance

Description

The BMI Model GS-2X monitors 120/240 VAC single phase, 50/60 Hz, grounded outlets. It records voltage variations which can affect proper operation of computers and other sensitive electronic equipment. The monitor is equipped with alarm LED's, thermal printer, and an audible alarm. Rechargeable Ni-Cad batteries keep the internal clock and calendar alive during storage or power failures.

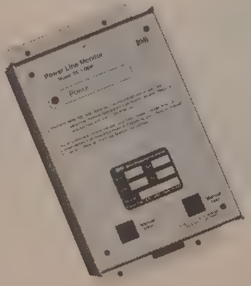
Specifications

— Monitors 120 or 240 VAC nominal, 50 or 60 Hz
— Records power failure, low line voltage, high line voltage, voltage spike, voltage drop, high frequency noise, high and low line frequency.



GS-10

- Eliminates spikes and high-frequency noise
- Combination MOV and Gas discharge tube for spikes
- 3-stage LC filter for high-frequency noise
- Annunciates common voltage disturbances with LED and audible alarm
- Provides conditioned AC power at four coefficient outlets



GS-1 OEM

- Intended for installation within a computer or other system
- Interfaces directly computer-based system via TTL outputs

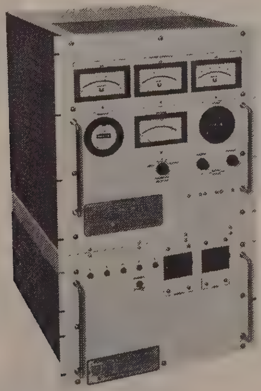
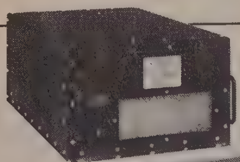
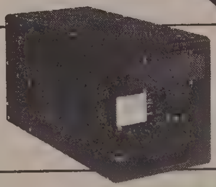
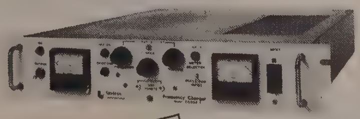
25 Years of Experience.

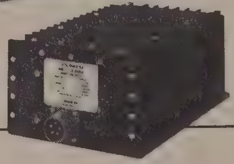
Beginning in 1960, Unitron, Incorporated has concentrated on the design and development of solid state static power conversion equipment. As a result, Unitron is able to produce equipment of high reliability and superior performance within practical economic limits. This single point concentration has resulted in Unitron's becoming the supplier of the largest variety of products to both the defense aerospace and industrial markets. With the world-wide desire to conserve natural resources Unitron has expanded its product line to include 400 Hz converters that operate from 50 Hz or 60 Hz sources. This expansion includes a series of new ultra-lightweight high efficiency units. We invite your inquiries.











NOW AVAILABLE!
New ultra-lightweight highly efficient units. Selectable output voltage and frequency. Parallelable for high power applications.

UNITRON IS THE LEADING MFG. OF 400 TO 60 Hz FREQUENCY CONVERTERS, WITH **EXPERIENCE EXCEEDING 18,000,000 HOURS OF FIELD OPERATION** IN AIRBORNE ■ SHIPBOARD ■ TRANSPORTABLE SHELTERS & GROUND POWER ENVIRONMENTS.

FEATURES:

- ■ MIL SPECIFICATIONS (Standard power)
- ■ FEDERAL & NATIONAL STOCK LISTINGS
- ■ LIGHT WEIGHT
- ■ LOW DISTORTION
- ■ PRECISE FREQUENCY
- ■ FULLY PROTECTED
- ■ SINE WAVE OUTPUT
- ■ HIGH EFFICIENCY
- ■ LOW AUDIO NOISE
- ■ SELF-COOLED
- ■ LONG MAINTENANCE FREE OPERATION
- ■ 6000 + NOW IN AIRBORNE OPERATION
- ■ HIGH RELIABILITY
- ■ LOW COST

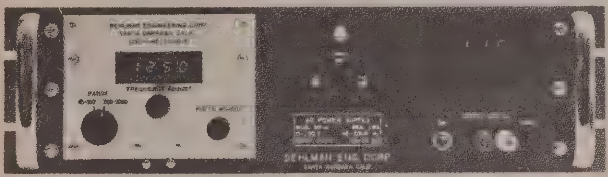
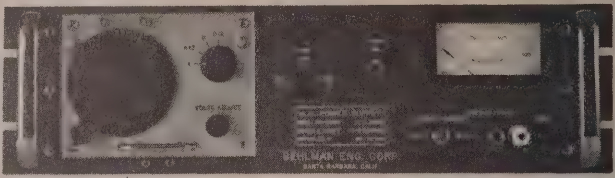
A.C. POWER SOURCES

A.C. POWER SUPPLY PROBLEM SOLVERS. Behlman Engineering has a well deserved reputation for being the industry's A.C. power supply problem solver. The first problem many customers encounter is the comparison of power ratings. Be aware that there are six major and very important considerations when comparing A.C. power supply ratings. They are: 1) The output power or voltampere (VA) rating, 2) The output current rating, 3) The effect on the supply of loads having high inrush or high peak recurrent currents, 4) How the ratings are affected by low input line voltages, 5) How the ratings are affected by low power factor loads, 6) Is the supply fully isolated, both input and output, for reasons of safety and flexibility? For FREE fact sheets on power supply rating comparisons, contact Behlman Engineering. Consider (805) 684-8311 your problem solving HOT LINE.



Digital Readouts



Analog Readouts

BEHLMAN 10/500 SERIES

- **Single, two and three phase outputs**
- **Tight regulation vs. line and load changes**
- **Up to 150% of rated output with high power factor loads**
- **Up to 18000. VA per phase**
- **Low output distortion**
- **Instantaneous overload protection, automatic recovery**
- **Smaller, lighter, more reliable**
- **Fixed or variable output frequencies, 45 Hz–10 kHz**
- **Full rated output into loads of any power factor**
- **Complete transformer-coupled isolation, input and output**

DESCRIPTION

The Behlman 10/500 series of A.C. Power Supplies are efficient linear power amplifiers driven by plug-in oscillators. Fixed and variable frequency oscillators, with frequency accuracies to 0.001% and 0.1% respectively, are available in a wide variety of standard models.

For single-phase power output, a power amplifier is driven by a single-phase oscillator. Two separate power amplifiers driven by a two-phase oscillator, and three separate power amplifiers driven by a three-phase oscillator, are used to provide two and three phase power outputs. Units are available with the capability of providing a choice of single or multi-phase output by means of a front panel mode selector switch.

Both input and output are transformer coupled providing complete isolation. The output can be left floating or one side can be grounded. Complete overload, short circuit and fault protection is provided by a combination of an instantaneous, automatic-recovery electronic protector plus a fast acting main circuit breaker.

In comparison to other power supplies the Behlman 10/500 Series are capable of providing continuous FULL-RATED volt ampere output even under worst case conditions: zero power factor loads either leading or lagging, 10% low line, and output voltage at 77% of maximum. Continuous operation at 150% of rating is possible with unity factor loads, nominal input voltage, and maximum output voltage.

PROGRAMMABLE. The entire 10/500 Series are available with optional programmable plug-in oscillators. These units may be programmed for output voltage level and frequency. All of the generally accepted methods of programming can be used with these units. This includes resistance and voltage programming as well as digital programming and either binary or BCD format from computers, micro-processors, keyboards, punched tape or key punched cards. Please contact the factory for further information.

SPECIFICATIONS 10/500 SERIES

Input Voltage: 115/230 VAC±10% single phase on models up through 1500 VA output. Three phase inputs available.

120/208 or 230 VAC±10% three phase on models over 1500 VA output.

Input Frequency: 48-72 Hz. (400 Hz available.)

Efficiency: 50-65%, depending on operating conditions.

Various input voltage, frequency and power options are available, many at no extra charge.

Output Voltage: 0-130 for single phase and 0-130 line to neutral for 2 or 3 phase units. Other ranges or combinations of ranges available.

Load Regulation: ±0.5% no load to full load. Adjustable through zero for specific loads.

Line Regulation: ±0.1% for ±10% line change.

Power Factor: Full rated VA into any power factor load down to zero, lead or lag.

Distortion: 0.5% max. harmonic distortion at frequency extremes. Less at mid-band. (Unity power factor load.)

Overload and Fault Protection: Instantaneous, automatic recovery short circuit and overload protection. Fast acting main circuit breaker for fault protection.

Metering: Output voltmeter. Digital readout optional.

External Input: Via optional plug-in. 9.2 volts RMS. 15K ohms input impedance. (Replaces plug-in oscillator)

Operating Temperature: 0° to 55° Celsius (32° to 131°F.).

Front Panel Color: Dark grey, white engraved lettering.

Options: Many options are available such as input power, output voltage, frequency, etc. Please consult the factory.

10/500 SERIES AC POWER SOURCES

MAIN FRAME AMPLIFIERS

TO ORDER: Use model number corresponding to output power level and number of phases required. Add letter corresponding to desired frequency range. All units are in rack mounting enclosure. Cabinet enclosed versions of any of these units are available.

Order plug-in oscillators as listed below. For digital LED voltage readout in place of the analog voltmeter, add $105.00 to the prices listed below and designate with D at the end of the model number. (Example, 3-10-CD).

OUTPUT POWER		MAXIMUM AMPERES (Per Phase 0-130V)	MODEL NUMBER	OUTPUT FREQUENCY RANGE (Hz)				WEIGHT (lbs.) A MODELS	DIMENSIONS

1—Size for "A" and "B" Models. The height is 35″ for "C" and "D" Models.
2—Available only as a complete cabinet enclosed unit. Price does not include cabinet which will vary depending upon type and cabinet manufacturer desired.

SERIES OSC PLUG-IN OSCILLATORS

The OSC series oscillators are designed to plug into the front panel of all Behlman Engineering Corporation AC Power Supplies. They are available in a wide variety of fixed and variable frequency outputs. Single, two and three phase models provide suitable drive signals for multi-phase supplies. These oscillators readily synchronize with external signals. In addition to the standard units shown below virtually any combination of fixed or variable frequencies to any practical degree of accuracy can be provided. Many special features, including provisions for external sync or drive, can be supplied.

FIXED FREQUENCY	MODEL	FREQUENCY ACCURACY					
		1%	0.5%	0.25%	0.1%	0.01%	0.001%
		E	F	G	H	J	K
SINGLE PHASE	OSC-1-XXX*—	$145	$175	$195	$225	$380	$515
TWO PHASE	OSC-2-XXX*—	200	230	250	280	435	570
THREE PHASE Y	OSC-3-XXX*—	235	265	285	315	450	585
*Insert desired frequency in place of XXX. Add code letter for desired frequency accuracy to model number.							
VARIABLE FREQUENCY	MODEL	1%	0.5%	0.25%	0.1%		
SINGLE PHASE	OSC-1-380/420—	$325	$370	$410	$485	"For digital LED frequency readout in place of the circular dial, add $150.00 to the variable frequency model prices and designate with OSCD in place of OSC in the model number."	
	OSC-1-350/450—	350	395	430			
	OSC-1-300/500—	375	410	450

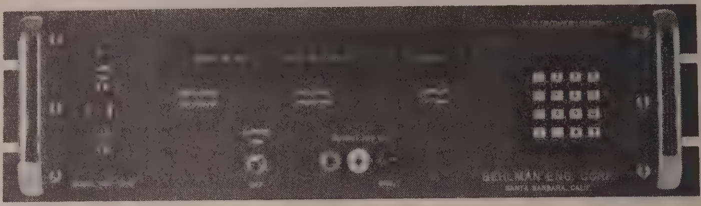
KB SERIES AC POWER SOURCES

PROGRAMMABLE AND INTELLIGENT



- Manual or computer controlled
- Reduces ATE system complexity
- Built-in measurement system
- Single command incrementing or decrementing of output voltage and frequency
- Microcomputer based crystal referenced, synthesized sinewave
- Cuts development time
- Reduces support equipment
- Variety of host interface options—IEEE 488, RS 232, and others
- Virtually no EMI/RFI emissions generated
- Standard programming languages—CIIL, AIE, Ada, and others
- Increases test reliability
- Versatile and efficient
- Self-test capability and diagnostic reports
- Front panel, alphanumeric display and keyboard
- Complete input/output electrical isolation

DESCRIPTION

The combination of a high quality AC power source, a precision measurement system, and a system performance monitor makes the Behlman KB Series a total AC power test tool. No other single AC test instrument available can equal this capability. Whether required for repetitive production testing, general laboratory support, or Automatic Test Equipment (ATE) applications, the KB Series AC power sources provide a single, cost effective, performance oriented solution to AC power testing.

Designed for high-reliability in both stand-alone and computer-controlled applications, the KB Series is programmable and reduces the necessity of costly support equipment and test hardware. Each KB Series model features a microcomputer control and measurement system that provides independent verification of operating output voltages, frequencies, currents, and phase relationships—not programmed values. On command the measurements are reported on a front panel, forty character, alpha numeric, fluorescent display and/or a variety of optional host interfaces such as IEEE 488, RS 232, and others. Watchdog functions are carried out by self-diagnostic circuits that make reports via the display and/or host interface.

Programming of the KB Series is accomplished by the front panel keyboard or a host computer and allows for incrementing and decrementing of the output values with user definable resolution. Military progamming requirements, such as the United States Air Force's Modular Automatic Test Equipment (MATE), are met by the KB Series. This allows for full use of the Control Interface Intermediate Language (CIIL) without supplementary hardware or software.

KB Series power configurations range from 100 VA to 54 KVA with less than 1% total harmonic distortion in single and multi-phase models. Frequency configurations range from 45 to 10,000 Hz with .001% accuracy. As with all Behlman products, the KB Series generates extremely low EMI and RFI emissions.

Among the specialized requirements Behlman Engineering can meet are unique designs which incorporate Field Effect Transistors (FET). These models are designated KB"F" Series and are for applications requiring the extended performance and high reliability of power FET Amplifier designs. Consult the factory for further information on the Behlman KBF Series.

FREE SOURCE OF A.C. POWER CONSULTATION. Behlman Engineering has the resources and versatility which enable us to solve the most difficult A.C. power problem. Notes: Height for "C" and "D" models is 35". *Available only as a complete cabinet—price not included.

SPECIFICATIONS*

INPUT

Voltage: 115/230 VAC ±10% single phase on models up through 1500 VA output. Three phase inputs available.
120/208 or 230 VAC ±10% three phase on models over 1500 VA output and up through 18000 output.
460 VAC ±10% three phase on models over 18000 VA output.

Frequency: 48-72Hz (400Hz available).
Various input voltage, frequency and power options are available, many at no extra charge.

Efficiency: 50-65% depending on operating conditions.

OUTPUT

Voltage: Single phase: 0-270 with auto range change at 135 volts. Two or three phase: 0-135 line to neutral. (0-270 with auto range change at 135 volts is optional.)

Frequency: 45-10,000Hz; See Selection Guide for frequency range of specific models.

Frequency Accuracy: ±0.001%

Load Regulation: ±0.2%, no load to full load.

Line Regulation: ±0.1% for ±10% line change.

Distortion: Less than 1% total harmonic distortion.

Rated Power Output: Obtainable from 100-135 volts and 200-270 volts, down to 10% low line.

Maximum Rated Power: Up to 150% of nominal rating available depending on operating conditions.

Power Factor: 100% VA rating available into any power factor load (utility to zero, leading or lagging).

Overload Protection: Electronic overload and short circuit protection with automatic, instantaneous recovery when overload is removed.

Over Voltage Protection (OVP): Continuously tracking within 5% of operating value.

Fault Protection: Fast-acting, main circuit breaker.

Output Sensing: Individual remote sensing for each phase.

OPTIONAL HOST INTERFACES

IEEE-488 (GPIB), 1978
RS-232C
Parallel Binary
Parallel BCD
0-10 VDC
A front panel LOCAL/REMOTE key lock is included with the host interface.

GENERAL

Operating Temperature: 0° to 55° Celsius (32° to 131° F.)

Front Panel: Dark grey, with white engraved lettering

*All specifications are based on unity power factor loads and may be changed without notice.

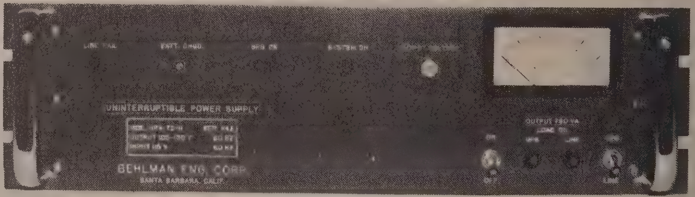
UNINTERRUPTIBLE POWER SYSTEMS

6KVA, SINGLE PHASE, UPS

VERY LOW EMI/RFI UPS

- High input/output isolation
- High noise reduction
- Low EMI/RFI
- Low output distortion
- Load power factor independence
- Outstanding MTBF
- Tight output regulation
- Small size and weight



750VA, SINGLE PHASE, UPS

DESCRIPTION

BEHLMAN Uninterruptible Power Systems provide a source of high quality AC power to critical electrical loads regardless of the input AC power line condition. UPS configurations range from 100 VA to 7.5 KVA in single-phase models and 3 KVA to 20 KVA in three-phase models.

A BEHLMAN UPS protects the load from all types of power line disturbances and from complete loss of line power. When normal AC line power is available, the UPS isolates the load from line anomalies such as voltage variations, frequency variations, and transient noise. If a complete failure of the line occurs or line anomalies exceed tolerable limits, the load is automatically switched to a battery supply allowing the UPS to maintain an uninterrupted output of high quality AC power.

These UPS systems are unique in that they are linear transistorized power amplifiers which inherently do not generate EMI or RFI either conducted or radiated and have lower distortion (under ±1.0%), and tighter line and load regulation (under ±1.0%).

All Behlman UPS models include a battery charger, solid state bypass switch, appropriate indicating lights and power line failue alarm provisions. The output frequency of the UPS is phase locked to the input power line frequency under conditions of normal operation. In the event the A.C. power line fails, the UPS continues to furnish the load with A.C. power by operating from the battery bank. The output frequency of the UPS is then determined by the highly stable internal oscillator.

Battery banks can be furnished for relay rack mounting or to the customer's specific requirements. Battery interconnect cables are provided with all standard UPS configurations.

PROBLEM SOLVER HOT LINE (805) 684-8311. Do you have a special A.C. power problem? Behlman Engineering's consultants can solve it. A variety of options provide solutions to many special requirements. We listen and learn with a desire to provide straight forward answers and solutions.

UPS MODEL INFORMATION

1. To develop a complete model number, use the model number of this table (example UPS-10-) followed by the dash number for the Input/Output combination desired. Example: UPS-10-11 is a 100 VA unit with single phase, 115 VAC, 60 Hz input and output.
2. All models listed are rack mount type.
3. Battery packs listed are only suggestions for 15 minutes back-up using Gel-Cel batteries except where noted. Contact the factory for complete battery selection guide or for selection assistance.

MODEL[1]	TOTAL POWER OUTPUT	CURRENT OUTPUT PER PHASE (AMPERES)	WEIGHT (lbs)	DIMENSIONS[2] (In) (Not Including External Batteries)	RECOMMENDED BATTERY PACK[3] (Gel Cell)

GENERAL SPECIFICATIONS

INPUT

Voltage: See Selection Guide

Voltage Range: ±10%

Frequency: See Selection Guide

Frequency Range: ± 3 Hz

Power Factor (worst case): 0.8 lagging

OUTPUT

Voltage: See Selection Guide

Voltage Regulation: ±1% line and load

Voltage Adjustment: ±10% (i.e. 105-130 volts on 115 volt model)

Frequency: See Selection Guide

Frequency Accuracy (Freerunning): ±0.1% (0.01% and 0.001% available)

Frequency Stability (Freerunning); ±0.01% (short term), ±0.1% (long term)

Line Synchronization: Capture range ±3 Hz at a 1 Hz per second slew rate

Waveform: Sinewave

Distortion: 1% maximum total harmonic distortion

Load Power Factor Range: Unity to zero, leading or lagging

Overload Rating: 125% for 10 minutes, 150% for 30 seconds, 200% for 1 second

MISCELLANEOUS

Controls: System "On-Off" circuit breaker, Output Voltage Adjustment, Manual Bypass Switch "UPS-Line," Output to load "On-Off"

Indicators: Line Failure, Battery Charged, UPS OK, System On, Load On UPS, Load On Line

Contact Closure Outputs: Line Failure, UPS Output Off, Low Battery; Single Pole, Normally Open

Meter: Output Voltage

Static Transfer Switch: 4ms transfer to bypass line for inverter failure or overload, automatic re-transfer to inverter after removal of overload

Manual Bypass Switch: Front Panel Control for transfer of load to bypass line during UPS maintenance or checkout

Battery Chargers: Designed for rapid recharge. Rate and current depend on battery selection

Operating Temperature: 0°C to 40°C (32° to 104° F.)

Operating Humidity: 0 to 95% relative humidity; noncondensing

MTBF: 20,000 hours maximum 100,000 hours for AC output failure including static transfer switch

MTTR: 30 minutes

AC POWER SOURCES

There are 90 standard models of manual or programmable AC Power Sources available from California Instruments that provide regulated voltage or current, and fixed or variable frequency. The unique building block design may be configured into multi-unit one, two, or three phase AC Power Systems.

AC Voltage Sources range in size from 100 VA to 36KVA, one, two, or three phase.

Line Regulation: ± 0.025% of full output for a ± 10% line change

Load Regulation: ± 1% over the unit's frequency range up to 5KHz

Amplitude Stability: ± 0.25% for 24 hours of constant line, load and temperature

AC Input Line:
Models 101T through 1501TC: 115V, 208V, 220V, 230V or 240-V-1Ø; 50 or 60Hz Models 1503TC through 3001TC: 208VL-L, 220VL-L, 230VL-L, 416VL-L, 440VL-L, 380V 4-wire-3Ø; 50, 60 Hz

AC CURRENT SOURCES

Average sensing AC Current Sources provide high accuracy regulated current for the laboratory and production testing. Thirty-seven models ranging from 60VA to 1800VA with maximum load current from 1.0 ampere to 200.0 amperes are available. The compliance voltages range from zero volts to 100.0 volts.

MODEL	MAXIMUM LOAD CURRENT (AMPERES)							
	1.0	2.0	5.0	10.0	20.0	50.0	100.0	200.0
10	80	40	15	8	4	1.5		
25		100	40	20	10	4	2	
50			75	40	20	8	4	2
75			100	50	25	10	5	

Maximum Compliance Voltage at Full Rated Load Current

NOTE: SHADED AREA limited to 2.0KHz maximum frequency.

To determine appropriate model number, use the table below following these steps:

1. Select maximum current required from blue row.
2. Select compliance voltage required from column below selected current.
3. Determine the model number by following the selected compliance voltage row to the left model column and add the selected current value as the dash number.

Example: Required current 5.0 Amps
Required Compliance Voltage 15 Volts
Model Number 10-5

OSCILLATORS

A family of over sixty different oscillators provide the true sine wave signal which drives the AC Power Source. They provide a fixed or variable output frequency and are either manually adjustable, or can be programmed with analog signals, or via the IEEE-488 (1978) BUS.

PROGRAMMABLE OSCILLATORS

The 835T rack mount and 847 Series Plug-in Oscillators provide the interface between an IEEE-488 Instrument Controller or Digital Computer and an AC Power Source. These units give the ability to program and control the frequency, amplitude, and with the 835T, the phase of the AC Power Source.

FIXED and VARIABLE OSCILLATORS

800 Series Oscillators are continuously variable frequency models, and the 815T Series provide only a single fixed frequency output. The 850T Series is digitally synthesized crystal controlled oscillator with either decade dialling or fixed frequency.

OSCILLATOR SELECTION GUIDE

Frequency Range	Frequency Accuracy	1∅	Price	2∅	Price	3∅	Price	3∅D	Price
Fixed

AC LINE CORRECTORS

Precision AC Line Correctors provide pure sine wave power for critical applications. They deliver super regulated 0.025% line and load, low distortion, transient free AC power.

DELUXE EQUIPMENT CABINETS

Modular all steel cabinets for housing three phase power systems feature rugged industrial construction and instrument quality finish and details. Non-tilt bases and heavy duty casters make them easily transportable and heavy duty rack slides provide for ease of service and maintenance.

Clary Uninterruptible Power Systems: 750 VA to 30 kVA

Broad Range of Products. Clary offers ten models of UPS ranging in capacity from 750 VA to 30kVA. They are typically found in commercial or industrial computer systems environments and are designed for applications such as data processing, data transmission, data collection and process or equipment control.

Built-in Reliability. Clary brings to the UPS market over forty years experience in design and manufacture of high technology products. Careful manufacturing, thorough inspection and extensive production testing under full load conditions ensures the high reliability and performance of Clary UPS.

The resulting pure, constant output sine wave of both our single and three phase units enhances the reliability of our customer's sensitive electronics equipment as well.

Quiet Convenient Operation. Clary UPS are designed with the user in mind. Many UPS on the market emit a constant, annoying hum which can be intolerable to personnel in the office, computer room, or laboratory. Clary has incorporated transistor technology and noise suppression techniques to produce one of the quietest systems on the market. As a result, a Clary UPS can be placed in a working environment without causing distraction or annoyance.

Clary has incorporated features that make the units simple and convenient to operate. For example, an operator can quickly monitor system status by observing the display panel. Visual and audible alarms are built-in to signal out of tolerance conditions.

Fast Delivery. When an installation has had power problems or is acquiring sensitive electronic equipment, the manager wants protection as soon as possible. However, deliveries in months are common in the industry. Clary is staffed to respond quickly to users' needs and can typically deliver in less than a month.

Reputation of Excellence. Backed by over 40 years industrial and military experience with high technology products, we recognize that no two companies have the same needs. Thus, the Clary UPS product line offers built-in flexibility to meet specific user requirements.

Clary's reputation for custom high quality design has contributed to its success in marketing Uninterruptible Power Systems across a broad range of industries. Installations are found in geophysical exploration trailers and ships, hotel reservation systems, bank automatic teller equipment, hospital systems, printing systems, communication networks, industrial process control systems and on-line data processing systems.

Call for free consultation. Whether you're a data processing manager, a representative of a company that packages computer-related systems, a plant manager or with an engineering firm involved in major facility design, call us for assistance in evaluating your power protection requirements. Contact us at corporate headquarters to request a free catalogue.

C—Available on special order.

- Plug-In Oscillators
- Low Harmonic Distortion
- Outputs 0-65, 0-130, 260V available
- Minimum Package Sizes 500 VA in 7" high standard rack space
- Response time 50 microseconds
- Frequency stability .25% to .001%

Specifications

OUTPUT CONFIGURATION: Single phase two wire isolated. Three phase four wire. WYE with taps for Delta loads.

OUTPUT VOLTAGE: Single phase units, model NAS 500 standard; (-1) 0-130V with full power @ 105-130V. Optional; (-2) 0-65/0-130/0-260V with full power @ 55-65V/105-130V/210-260V respectively. Includes automatic range voltmeter, current meter and range indicator lights. All other models 0-130/0-260V with full power 105-130V/210-260V. All Three Phase units — 105-130V/185-225V line to line WYE or Delta loads.

PROTECTION: Current overload

LOAD POWER FACTOR: .7 lead or lag.

HARMONIC DISTORTION: Less than .5%, 45-10 KHz @ full load. Less than 1% with plug-in oscillator. Less than 2% for 3ϕ units.

REGULATION: ±.25% with ±10% input line variation ±1.0% NF-FL.

OUTPUT PHASE SEPARATION: 120 ±1° for fixed frequency models as well as 350-450 Hz models. 120 ±2° for 45-70 and 300-2,000 Hz models. 120 ±3° for 45-6,000 Hz models.

NOISE LEVEL: 70 db below rated output.

OPERATING TEMPERATURE: −20°C to +40°C.

TEMPERATURE STABILITY: Voltage .05% per degree C typical. Frequency .05% per degree C typical.

METERS: Models 500 VA and up include panel mounted output voltmeters.

CONTROLS: Output voltage and frequency controls mounted on plug-in oscillator panels where required.

CONSTRUCTION: Standard 19" rack mount with full dust covers. Bench adapters (-C) or chassis slides (-S) available at extra cost. Add suffix to Model Number. Rear or side supports required.

FINISH: Front panels finished in ivory paint with black marking. Chassis surfaces are protected by irridite.

MODIFICATIONS AVAILABLE ON SPECIAL ORDER

Single Phase and Two Phase Output

Standard 3 phase power supplies may be used to provide a 2 phase output at ⅔ of rated power. An internal selector switch internally provides either 90 degrees or 120 degrees phase separation for 2 or 3 phases respectively.

Three 1 phase units may be operated as a 2 phase or 3 phase system.

Ordering Information

To specify give model number and option code number as shown below. For example: 500VA single phase 45-66 Hz. Model ST500-01

Frequency	Code	Mode
45-66 Hz	-01	variable
320-460 Hz	-02	variable
50 Hz	-50	fixed
60 Hz	-60	fixed
400 Hz	-41	fixed

- High Efficiency 75% Typical
- Rack Mount Construction
- Versatility — may be used as a Frequency Converter or Precision AC Power Source
- Output Voltage Range: 105-130V/210-260V
- Output Frequency Range: 45-460 Hz at Full Rated Output
- Modular Power Transistor Assemblies

Specifications

OUTPUT CONFIGURATION: Single phase — two wire isolated. Three phase — four wire WYE with floating neutral and taps for delta load.

INPUT CONFIGURATION: 115/230 ±10% 1φ 47-63 Hz all models thru 1KVA, others 208/230 ±10% 3φ 47-63 Hz. Special voltages available at slight extra cost.

OUTPUT VOLTAGE: Single phase, 105-130V/210-260V @ full power. Three phase, 105-130V/185-225V line to line, or line to neutral @ full power. Preset 117V 1φ line-neutral.

VOLTAGE ADJUSTMENT: Single phase units, internally adjustable. Optional, front panel mounted (add -P) to model number. Three phase units, standard front panel mounted.

PHASE DISPLACEMENTS: Three phase units ±3° with balanced load.

LOAD POWER FACTOR: .8 lead or .7 lag at rated output.

EFFICIENCY: 75% typical.

FREQUENCY STABILITY: .25% standard, options to .001%.

RESPONSE TIME: Less than 200 milliseconds at 60 Hz and 100 milliseconds at 400 Hz.

HARMONIC DISTORTION: 3% maximum at full load; 4% at N.L.

AMBIENT TEMPERATURE: −20°C to +50°C.

TEMPERATURE STABILITY: Voltage .03% per degree C typical. Frequency .05% per degree C typical.

CONTROLS AND METERS: All models 500VA and up include panel voltmeter and ammeter. Variable frequency models have front panel mounted frequency control dial.

VOLTAGE REGULATION: ±1% with ±10% line, ±1% NL-FL.

PROTECTION: Input line circuit breaker. Current limit on output. Output circuit breaker available at extra cost.

TERMINATIONS: Output on front and rear. Input on rear mounted barrier strip.

CONSTRUCTION: Standard 19" rack mount with full dust covers. Bench adaptors (-C) or chassis slides (-S) available at extra cost. Add suffix to Model Number. Rear or side supports required.

FINISH: Front panels finished in ivory paint with black marking. Chassis surfaces are protected by irridite.

SYNAMP® power inverters DC to 50-60-400 Hz solid state transistorized bench or rack mounted

POWER ON
DC POWER INVERTER
MODEL DRS1004-FS

MRS series - 50-60 Hz

Output: 115 Volts rms, Single Phase

Input: Standard, 22-30 Volts D.C. also available 41-55V, replace (-24) with (-48) in model no.

Voltage & Frequency Regulated

DRS series - 400 Hz

Output: 115 Volts rms, Single Phase

Input: Standard, 22-30 Volts D.C., also available 41-55V, replace (-24) with (-48) in model no.

Voltage & Frequency Regulated

Specifications

INPUT CONFIGURATION: Two wire, isolated.

OUTPUT CONFIGURATION: Single phase, two wire isolated.

OUTPUT VOLTAGE: MRS & DRS Models are preset at 115 volts rms.

DUTY CYCLE: Continuous duty at full output.

HARMONIC DISTORTION: Less than 3%.

LOAD POWER FACTOR: 0.8 lead or 0.7 lag to unity at rated output .

FREQUENCY STABILITY: 0.25% standard, options to 000.1%. Units in which the frequency may be synchronized with an external source available on special order.

VOLTAGE REGULATION: MRS & DRS Series: Line and load ±2%.

EFFICIENCY: Typically 70% for 500 VA units.

AMBIENT TEMPERATURE: Operating: −20°C to +50°C. Storage: −40°C to +85°C.

TEMPERATURE COEFFICIENT: Frequency: Typically 0.03 Hz/degree C, Voltage: Typically 0.04 V/degree C.

PROTECTIVE CIRCUITS: All models have input fuses. Input fuse will blow on application of input polarity reversal. Output is current limited with automatic reset on removal of short.

PANEL METERS: Voltmeters and ammeter are available at extra charge. Add (-VA) to Model No.

COOLING: Convection cooled up to 200 VA.

TERMINATIONS: Output on front and rear. Input on rear covered mounted barrier strip.

CONSTRUCTION: Bench model with brackets provided for standard 19″ rack mount.

FINISH: Front panels finished in white with black marking. Chassis surfaces are protected by irridite.

10KVA UPS UNIT
Shown with two front doors open

UPS

Uninterruptible Power Systems

Solid state, battery powered AC • 500 VA to 25 KVA single phase • 3000 VA to 75 KVA three phase • sine wave output • long emergency run time • continuous run • high lightning immunity

These are floor and/or wall mounted, forced cooled UPS units mounted in heavy gauge sheet metal cabinets with front opening key locked doors. The cabinets contain ventilation louvers and knockouts for interwiring with BX, Romex or conduit. The internal construction of each cabinet consists of battery charger, DC to AC inverter and batteries. Above 1.5KVA a separate battery cabinet or open rack is required which is optional. 1.5KVA and below has charger, inverter and batteries all self contained within the cabinet.

ELECTRICAL SPECIFICATIONS

Input voltage: 120V or 240VAC, 2 or 3 wire (specify as required, other voltage available on request).

Input freq.: 60HZ ± 1HZ (50HZ available on request).

Steady state output voltage: 120 or 240VAC ± 5%, for changes in AC load current and battery voltage changes during power failure.

Output freq.: 60HZ (50HZ available on request). Synchronized with AC input, or ± .05HZ.

Output Wave: Sine wave, 5% distortion into resistive load.

Power factor load range: .75 Lag to .9 lead.

Short circuit on input lines: Remote wall breaker and/or fuse protection for protection of the UPS unit itself.

Short circuit and overload protection of output: Electronic and Magnetic.

Time to Transfer to Inverter after a Utility Power Failure: None, as the inverter runs continuously.

Overload capability during emergency: 130% for 5 minutes after utility power failure.

Emergency run time standard: 1½ hours with fully charged batteries, (longer or shorter times available on request).

Front panel controls group: Battery DC voltmeter. Output AC voltmeter. Utility power OK indicator. Inverter bi-passed indicator. System Test Switch. Hi-charge indicator. Battery trickle charge ammeter.

Ambient operating temperature limits: 32°F to 120°F (temperatures above 80°F will shorten battery life considerably).

Battery charger: Automatic boost charge (equalize) is applied with a solid state timer approximately every 3 months. Trickle charge applied constantly.

Battery: Long life lead vented station battery with oversized water reserves and porous rubber separators, and optional hydrometer, thermometer supplied with each unit order. Two visible state of charge indicator discs are built into each battery.

Battery protection: Automatic low battery voltage disconnect protects batteries from sulfation after a prolonged power failure.

Automatic bypass switch: Upon an inverter failure the AC utility automatically transfers to the load with a mechanical switch. (fast solid state 3 to 6MS-switching available on special request).

SERIES 200 POWER TRANSFORMERS

GENERAL

Controlled Power has established an enviable reputation by offering the highest quality products. The quality is reflected in the design, material, workmanship and ultimately in the performance of the products.

Series 200 includes: Single phase, double wound, **Power Transformers**; 600V, 2 KVA-1000 KVA.
Three phase, double wound, **Power Transformers**; 600V, 3 KVA-1000 KVA.
Single phase **Auto Transformers**; 600V, 3 KVA-50 KVA.
Three phase **Auto Transformers**; 600V, 3 KVA-1000 KVA.
Three phase **Controlled Power Testing Transformer** with combined standard auto winding and a multitapped auxiliary winding; 600V, 5 KVA-50 KVA.
Single phase, double wound **Power Transformers**; 5000V, 10 KVA-333 KVA.
Three phase, double wound **Power Transformers**; 5000V, 10 KVA-750 KVA.
All of these transformers are 60 Hertz and utilize Class H insulation. 50 Hertz units available.
Complete specifications available from factory. Ask for Bulletin 200-80A.

The quality features listed below exemplify the quality found in Controlled Power Systems:

- Heavy gauge sheet steel or aluminum enclosures.
- Enclosure is phosphated (sheet steel) and finished with a baked on enamel.
- Drip-proof construction with baffled openings for ventilation.
- Enclosure, core, shield and coil assembly are visibly grounded.
- Floor or wall mounting for industrial units through 50 KVA without accessory brackets (industrial enclosures).
- Commercial units attractively styled and color co-ordinated for computer room application or office placement are available.
- Dry Nitrogen Annealed electric steel cores retain the high magnetic properties after shearing and forming operations through the Controlled Power Annealing Process.
- Higher efficiency and power factor results from stress relieving the steel and restoring the electrical grade silicon steel magnetic characteristics.
- Quiet operation on all systems.

ENCLOSURES

Phosphatized sheet metal cabinets are completely rust proof and corrosion resistant. Baked on enamel ensures long life.
Formed and flanged from extra heavy gauge steel or aluminum.
Removable or hinged panels for excellent accessability.
Thermally designed vented openings offer optimum cooling for long life.
Solid top covering shields units from foreign matter and liquids entry.
Commercial enclosure suitable for computer room or office environment available.
Prominent non-corrosive diagrammatic data nameplate attached.

TRANSFORMER TAPS

Taps are added to the high voltage or low voltage windings of transformers to compensate for changing voltage conditions at the input transformer. They are rated at a fixed percentage of the nominal input. The correct way to check for the best tap to be used is to ascertain the present incoming voltage and also check the output voltage of the secondary with the load connected to see if it is within one or two percent of the desired output voltage. Frequently voltage is correct when first installed but when other loads are added, voltage to or from the transformer drops. This will require a change of taps to compensate for this drop.

ELECTRICAL AND MECHANICAL ASSEMBLY

Extra strong and flexible core and coil support materials used for bracing result in high mechanical strength to withstand surges.
Terminal connections marked and easily accessible through removable panels.
10 KV BIL certifications for 600 Volt Class, High BIL ratings available.

CORE AND COIL CONSTRUCTION

Computer assisted design for optimum results. Windings are in tight, even layers keeping core losses and noise to a minimum.
Silicon grain-oriented low magnetostriction steel is precisely cut, interleaved, formed, rigidly clamped and firmly bonded.
Completed steel cores retain the high magnetic properties after shearing and blanking operations through the Controlled Power Dry Nitrogen Annealing Process. Higher efficiency and power factor results from stress relieving the steel and restoring the electrical grade silicon steel magnetic characteristics.
Coil insulating blocks create tunnel cooling effect increasing safety factor against overloads and excessive temperature rise.
Low losses through use of optimum conductor to core loss ratios.
Electrical silicon steel offers high efficiency, long life and complete reliability.
Temperature and noise levels equal to or below NEMA, CSA, U.L., and ASA standards.
Insulators are selected for best thermal properties and high dielectric strength.

SHIELDING

Single shielded transformers are available in most of the sizes listed below.

CALL OR WRITE FACTORY FOR COMPLETE DETAILED BROCHURE OF OUR POWER TRANSFORMERS

SOUND LEVELS

Controlled Power's quiet performance transformers start with quality steel. By using an electrical grade steel having a high rating of withstanding magnetostriction vibrations caused by magnetic force fields and proper varnish impregnation, quiet operation is insured.
Further minimization of any transmitted pulsation is reduced by rigid mechanical bracing. By utilizing grades of insulation that allow forming tighter, smaller coils with closer air gaps the sound level is lowered.

SERIES 500 POWER LINE REGULATOR

GENERAL

The Series 500 Power Line Regulator is a light weight, efficient, distortion free method of regulating line voltage. It utilizes a tapped auto-transformer with either triacs or inverse-parallel silicon controlled rectifiers to automatically change taps and regulate the output voltage. It is an excellent low cost method of correcting for high or low line voltage conditions automatically. An auto-transformer does not isolate the incoming from outgoing lines, and does not eliminate noise or transients.

APPLICATIONS

The Series 500 utilizes an auto-transformer. Hence, it does not isolate the incoming and outgoing lines. This unit should be applied where brownouts or surges are the main power line problem. It does not protect agaist noise, transients, or distortions.

FEATURES AND BENEFITS

Lower Cost: The Series 500 Power Line Regulator is one of the lowest cost methods of regulating line voltage. This is especially true in the larger KVA sizes.

Efficient: Because the Series 500 is an auto-transformer regulator with a limited regulating range, it is one of the most efficient means of regulating line voltage. Efficiency in the order of 98% and higher can be expected.

Fast Response: The Series 500 Line Voltage Regulator will respond to line voltage changes within one cycle of the operating frequency.

Low Distortion: The Series 500 Line Voltage Regulator will add less than 1.0% distortion to the incoming waveform.

Wide Input Frequency Range: The Series 500 operates over a wide input frequency range (+5%, −5%) which enables it to supply constant voltage to the load even with a fluctuating input frequency.

SPECIFICATIONS

Line Voltage Regulation: The output of the Series 500 is held constant ±5% of the nominal with input voltage variation of +10%, −20%. (±3% available)

Input Voltage Range: Input voltage may vary from +10% to −20% from nominal and still maintain regulation specifications.

Efficiency: Efficiency in the order of 98% or better can be expected.

Operating Temperature: The normal operating temperature range is 0°C to 40°C.

Output Distortion: Adds less than 1.0% total harmonic distortion to the input waveform.

Response Time: 1 cycle maximum.

Load Regulation: Less than ±2% from no load to full load.

SERIES 600 MAX-E-ISOLATION TRANSFORMER

CONTROLLED POWER COMPANY
TROY, MICHIGAN

GENERAL

The Series 600 Max-E-Isolation Transformers are used to protect sensitive equipment from power line noise and transients. There are common disturbances on the line caused by lighting, motor starting-stopping, utility network switching, and general electrical noise which will adversely affect sensitive electronic equipment. The Series 600 Max-E-Isolation Transformer utilizes a unique method of shielding which provides low capacitive coupling between input and output circuits. The Series 600 does not have the capability of regulating long duration changes of input voltage.

FEATURES AND BENEFITS

Lowest Cost: The Series 600 Max-E-Isolation Transformer is one of the lowest cost methods of protecting sensitive electronic equipment from line noise and transients.

Efficient: The Series 600 Max-E-Isolation Transformer is a highly efficient means of isolating the line and attenuating noise and transients. Efficiencies of better than 95% can be expected.

Multiple Shielding: A unique method of shielding and isolation of the primary and secondary is responsible for the excellent attenuation of both Common Mode Noise and Transverse Noise.

Common-Mode Noise Attenuation: The Series 600 Max-E-Isolation Transformer has a Common Mode Noise Attenuation of 140 db.

Transverse-Mode Noise Attenuation: 3 db down at 600 Hertz, 40 db per decade to well below 50 db with resistive loads.

SPECIFICATIONS

Line Voltage Regulation: No regulating means incorporated. Output voltage will vary with input voltage.

Load Regulation: ±2% No load to full load.

Efficiency: 95% minimum.

Operating Temperature: 0°C to 40°C.

Distortion: 0.1% total harmonic distortion.

Operating Frequency: 47-53 Hertz for 50 Hertz Models. 57-63 Hertz for 60 Hertz Models.

All transformers above are 60 Hertz and utilize Class H Insulation. 50 Hertz models available on request.

(1) Commercial Enclosures have plugs noted with 8 ft. cord and circuit breaker input. Inputs are hard wired. Other inputs and outputs available on request.

* Other KVA sizes, input and output voltages are available on request.

(2) Commercial Enclosures have receptacles noted. When applicable they are circuit breaker protected. Outputs are hard wired.

(3) Shipping weights are approximate. Actual weights may be higher due to packing and crating.

- Open type systems are available for OEM utilization.

SERIES 700 POWER LINE CONDITIONER

GENERAL

The Series 700 Power Line Regulator and Conditioner combine the characteristics of the Series 500 and Series 600. The Series 700 will regulate the input voltage in the event of line voltage brownouts or surges in addition to having Max-E-Isolation capability to protect the load from line voltage noise and transients. The unit should be applied where line voltage sags, surges, noise or transients are a problem.

APPLICATIONS

The Series 700 Power Line Conditioner should be applied where isolation, regulation, noise and transients are the predominant power line problem. The units does not correct for power line outages or distortion.

FEATURES AND BENEFITS

Wide Input Range: The input voltage range of the Series 700 Power Line Conditioner is +10%, −20%. With input voltage covering this range, the output voltage is held to a very narrow band.
Narrow Output Regulation Band: The output is held to within ±5%. (±3% available)
Multiple Shielding: A unique method of multiple shielding and isolation of the primary and secondary is responsible for the excellent attenuation of both Common-Mode Noise and Transverse-Mode Noise.

Excellent Response Time: The Series 700 Power Line Conditioner has a response time of 1 cycle or less to input voltage change beyond the threshold voltage band.
High Efficiency. Overall efficiency of 95% or better can be expected.
Low Output Impedance: Output impedance ranging from 2% to 5% (depending on size of unit.)
Common-Mode Noise Attenuation: The Series 700 Power Line Conditioner has a Common-Mode Noise Attenuation of 140 db.
Transverse-Mode Noise Attenuation: The Transverse-Mode Noise Attenuation of the Series 700 is 3 db down at 600 Hertz; 40 db down per decade to well below 50 db with resistive load.
Low-Audible Noise Level: All Series 700 Power Line Conditioners are vacuum impregnated with a special epoxy resin to deliver the lowest possible sound level.

SPECIFICATIONS

Input Voltage Range: +10%, −20% of Nominal Input.

Line Voltage Regulation: The output of the Series 700 is held constant ±5% of nominal with input voltage variation of +10%, −20%, (±3% Regulation available)
Load Regulation: Less than ±2% from no load to full load.

Response Time: Typically 1 cycle for 100% correction.

Impedance: 2% to 5% depending on size of unit.

Efficiency: 95% minimum.

Operating Temperature: 0°C to 40°C.

Operating Frequency: 47-53 Hertz (50 Hertz Models). 57-63 Hertz (60 Hertz Models).

Transverse-Mode Noise Attenuation: 3 db down at 600 Hertz: 40 db per decade to well below 50 db with resistive load.

Common-Mode Noise Attenuation: 140 db.

Output Distortion: No spikes; adds less than 1.0% total harmonic distortion.

Audible Noise: 40 db to 50 db depending on size.

Overvoltage Protection: Automatically turns off if output exceeds +10% of nominal. (On units with company provided circuit breaker input and where shut off option is selected).

SERIES 800 POWER PURIFICATION SYSTEMS

FEATURES AND BENEFITS

Regulation Bandwidth: One of the major benefits of a Power Purification System is its ability to regulate the output voltage to within −3%, +3% with an input variation of −20% to +10% and even wider depending on the load of the system.

Regulation and Isolation: The Power Purification System combines the common mode noise rejection capabilities of a multi-shielded transformer with a voltage regulating capability. In addition to rejecting common mode noise it virtually eliminates transverse noise and distortion coming in on the power line. The unique capability of the Power Purifier to eliminate almost any power malady is what makes it an essential addition to power sensitive electronic equipment.

Unique "Ride Through" Capability: The output of the Power Purifier does not go to zero with the loss of input power for a ¼ cycle (4 msec), a ½ cycle (8 msec) or even for a complete cycle (16.6 msec. — depending on load). The voltage from the Power Purifier is generated essentially by a circuit operating as a powerful oscillator with energy stored in the unit. For this reason, the output is much more immune to the input than other regulating systems.

Voltage Transformation: The Series 800 Power Purification System, in addition to conditioning, regulating, and purifying power, can also be used to step voltage up or down.

Transformation of Square Wave to Sine Wave: The output of the Series 800 Power Purification System is a near perfect sine wave even when the supply voltage is a square wave. A battery supplied power, chopped into a square wave, is converted into an excellent sine wave by the Power Purifier.

Rugged Static Magnetic Circuit: The Power Purifier is a ruggedly constructed static magnetic device which will deliver many years of reliable operation because it is virtually impossible to abuse electrically. It is circuit breaker protected against internal shorts, and cannot be damaged by electrical shorts in the load.

Voltage Recovery: The output voltage returns to 95% of nominal level within 2 cycles and to 100% within 3 cycles when going from no load to full load or visa-versa. Recovery from partial load changes is correct in a shorter period of time.

SPECIFICATIONS

Line Regulation: The output voltage will maintain itself constant to within ±3% with input voltage variations of +10% to −20%.

Load Regulation: The output voltage will maintain itself to within ±0.5% with output loads variations of 0 to 100%.

Frequency Variations: A 1% change in line frequency from the nominal design frequency changes output voltage approximately 1.5% in the same direction as the frequency change.

Efficiency: Full load efficiency is in the order of 90% for standard input and output voltage levels.

Operating Temperature: Power Purifiers are designed to operate within specifications in an ambient temperature range from −20°C to +50°C.

Effect of Load Power Factor: The regulation specifications stated above is for unity power factor. Regulation will improve with a leading power factor and become wide with a lagging power factor.

Distortion: On Harmonically Neutralized Systems harmonic content is 3% or less.

(1) Commercial enclosures have plugs noted with 8 ft. cord and circuit breaker or fused input. Industrial and Panel Mount enclosures do not have plug, or circuit breaker or fused input. Inputs are hard wired. Dual input voltages of 240/480 available (input range 190-260 x 380-520). Other Inputs and Outputs available on request.

(2) Commercial enclosures have receptacles noted. When applicable, they are circuit breaker protected. Industrial and Panel Mount enclosures do not have receptacles. Outputs are hard wired.

(3) Panel Mount enclosures up to 3 KVA can be wall mounted.

(4) For Commercial Cabinet model number consult factory.

(5) For Industrial or Panel Mount Cabinet model number consult factory.

+ When ordering specify basic model number plus either the Commercial Cabinet model number or the Industrial Cabinet model number.

* Other KVA sizes, input and output voltages are available on request.

° Open type and uncompensated power purification systems are available for OEM utilization.

(1) All units have a hard wired input.

(2) Commercial enclosures have no receptacles. Industrial enclosures do not have receptacles. Outputs are hard wired.

(3) Industrial enclosures are not circuit breaker protected.

(4) For Commercial or Industrial Cabinet model number consult factory.

+ When ordering specify basic model number plus either the commercial cabinet model number or the industrial model number.

NOTE: With unbalanced loads, there is a phase shift with a Series 800 Power Purification System that can result in poor voltage regulation. If unbalanced loading is expected, use a Series 700 or Series 900 regulator.

+ Open Type and Uncompensated Type of Power Purification Systems are available for OEM utilization.

SERIES 900 ELECTRONIC LINE VOLTAGE REGULATORS

GENERAL

The Series 900 Electronic Line Voltage Regulator delivers the most accurate regulated line voltage available to industry.

The Series 900 when used with a Series 600 Max-E-Isolation Transformer will allow sensitive electronic equipment to operate with poorly regulated and noisy power lines.

Series 900 Electronic Line Voltage Regulators provide solutions to electrical power — or disturbance problems. They are available in single phase models, 60 Hertz with output power ratings from 25 KVA to 150 KVA. The three phase models are 60 Hertz with output ratings from 1.5 KVA to 500 KVA.

All units are hard wired to terminals at both input and output and all units utilize Class H insulation. Complete specifications are available from the factory. Ask for Bulletin 900-80A.

FEATURES AND BENEFITS

Adjustable Output: The output voltage is adjustable over a range of ±10% from nominal with an internal potentiometer.

Remote Sensing: The voltage to be regulated can be sensed at the load to automatically compensate for line and wire losses to the load.

Excellent Load Regulation: Output voltage is regulated to within ±0.5%.

Wide Input Voltage Range: The output is regulated to within ±1% with input voltage excursion of +10% to −20% from nominal on small sizes and ±10% on larger sizes.

Filtered Output: The output of the Series 900 is filtered to free the waveform of noise and excessive harmonic content.

No Moving Parts: The Series 900 is electronically and magnetically regulated. There are no moving parts and virtually no preventative maintenance required.

Fast Response: Response starts immediately and is complete in 5 cycles (under worst case conditions).

Enclosures: Available in either industrial, commercial (computer type).

Wide Range Of Types Available: The Series 900 Electronic Line Voltage Regulator is available in single phase and three phase configurations and in 50 Hertz or 60 Hertz models. In addition a wide range of KVA sizes are available.

SPECIFICATIONS

Input Voltage: See sizing charts on subsequent pages.

Output Voltage: See sizing charts on subsequent pages.

Regulation: ±1% for any combination of line variation, load variation, thermal drift, and warm-up.

Remote Sensing: Remote sensing available to compensate for series drop to the load.

Frequency Range: 57 to 63 Hertz on 60 Hertz Models. 48 to 52 Hertz on 50 Hertz Models.

Output Voltage Adjustment Range: +10%, −10% Adjustable with internally located potentiometer.

Response Time: Starts immediately and complete within 5 cycles under worst case conditions.

Efficiency: 95% Typical.

Power Factor: Approximately 95% at full load.

Harmonic Content: See sizing chart.

All regulators listed above are 60 Hertz and utilize Class H insulation. 50 Hertz units are available on request.

(1) All units are hard wired to terminals at both the input and output.

(2) The input voltage range is based on the output voltage setting. The output voltage is adjustable ±10% of the rated nominal output by means of an internal potentiometer.

(3) Shipping weights are approximate. Actual weights may be higher due to packing, crating or design.

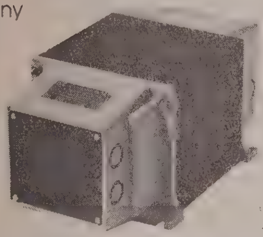
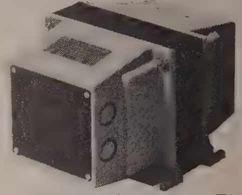
HIGH ISOLATION TRANSFORMERS

8225 Mercury Court, San Diego, California 92111,
Phone (619) 565-1155, TWX: 910-335-1246 Telex: 6834028

A HIT is a power transformer that provides an extremely low effective interwinding capacitance (0.005 to 0.0005 pF) between primary and secondary windings. It is triple shielded—a barrier or Faraday shield separates the box shielded primary and secondary windings.





A HIT will isolate sensitive equipment from noisy power lines, or it will isolate noise-producing equipment that shares the same power lines. While virtually eliminating common-mode noise problems, the HIT provides excellent attenuation of HF transverse-mode noise. Elgar's transformer operates on either a 50Hz to 60Hz power line at various nominal voltages, and can be used as a step-up or step-down transformer.

GENERAL SPECIFICATIONS

Input/Output Voltages: All HITs (except U.L. Listed and receptacle-type units) feature dual primary and secondary windings and are designed to operate with voltages that vary ±15% of nominal (see tables below for standard voltages).

Operating Frequency: 47 to 63Hz

Regulation: 3% No-load to Full Load Resistive

Dielectric Strength:

1.0 to 7.5KVA Single Phase, 2500VAC;

3.0 to 22.5KVA Three Phase, 2500VAC;

10.0 to 20KVA Single Phase, 4000VAC;

30.0 to 60.0KVA Three Phase, 4000VAC.

Full Rated Operating Temperature Range: 0-55°C designed for Class B (80°C) temperature rise, using a Class H (180°C) "UL Recognized" insulation system.

Overload: 200% of full rated current for 30 minutes.

U.L. Listed Units Available**

Efficiency: Greater than 97% at rated load.

Common Mode Noise Attenuation: .005pF-126dB; .001pF-140dB; .0005pF-146dB

DC Isolation: 10,000 megohms minimum; primary-to-secondary, and either primary or secondary to ground.

Receptacle Type Units, 1KVA & 2.4KVA only ("R" suffix): All are wired for 120VAC single phase service.

STANDARD ELGAR SINGLE PHASE HITs

*The complete model number includes the effective interwinding capacitance. Thus, for a 1KVA with 140dB (.001pF) common mode noise attenuation, specify a Model HIT-1.0-.001.

THREE PHASE SYSTEMS

The user has the choice of ordering three each of the standard single-phase HITs and connecting them in the desired three-phase configuration, or ordering an Elgar three-phase system which also utilizes three single-phase HITs. In the latter case, the user only concerns himself with input/output wiring. To attain maximum noise immunity in a three-phase system, it is desirable to operate from a DELTA source and have a WYE connected secondary with balanced loads on each phase. This minimizes current flow in the neutral line. As with the single-phase units, the effective interwinding capacitance becomes part of the model number; thus a HIT-45.0-.001T is a three-phase unit providing 140dB of common-mode noise attenuation.

STANDARD ELGAR THREE PHASE HITs

Model No.	Rating (KVA)	Input Voltage (specify WYE or DELTA when ordering)		Output Voltage (VAC)	Dimensions (inches/mm)			Weight (lbs./kg.)

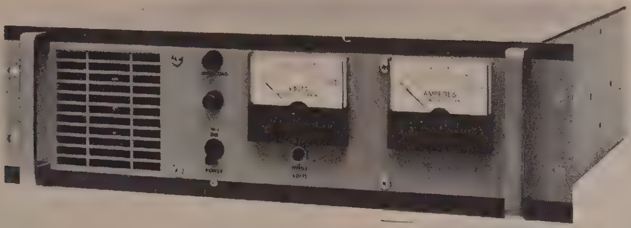
ULTRA PRECISION AC LINE CONDITIONERS

8225 Mercury Court, San Diego, California 92111,
Phone (619) 565-1155, TWX: 910-335-1246 Telex: 6834028



Elgar's Ultra Precision AC Line Conditioners provide precise, clean AC power to critical loads by eliminating high-speed AC line and load transients and distortion as well as providing precise regulation. These versatile instruments have response times 5,000 times faster than the fastest conventional AC line regulators and line isolation of 70 to 100 dB, far superior to mere isolation transformers. All Elgar AC line conditioners are designed for continuous operation and are contained in rack-mount enclosures. Front panel controls include meters to monitor input and output voltages and output load current, an overload indicator and an input circuit breaker.

Users of voltage-sensitive equipment need isolation from high-speed AC line transients. These transients can cause erratic operation, component failures, and a reduction in equipment life. In sensitive instrumentation and data processing equipment, high-speed line transients often are the cause of erroneous information.

Elgar AC Line Conditioners are the best, most reliable solution to these problems.

GENERAL SPECIFICATIONS

INPUT / OUTPUT ISOLATION: 100 dB (60 Hz)

OUTPUT DISTORTION: 0.2% max for up to 10% input harmonic distortion

LINE REGULATION: ±0.025% for ±10% input AC line variation

LOAD REGULATION: ±0.025% for no load/full load full current into unity to zero lagging or leading load.

REDUCES 500V 10μ SEC TRANSIENTS BY 1000:1

SUPPLIES PEAK CURRENTS 3.5 TIMES RMS RATING

TEMPERATURE COEFFICIENT: 0.005% per °C

PEAK AMPLITUDE STABILITY: ±0.01% (cycle to cycle)

AMPLITUDE DRIFT: ±0.05% 24 hrs constant line, load and temperature

IMPULSE SETTLING TIME: less than 20μsec

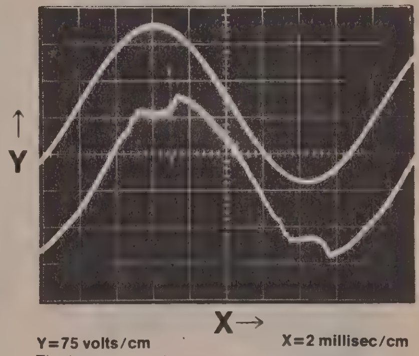
AMBIENT TEMPERATURE: 0 to +55°C operating, −20 to +85°C storage

OVERLOAD INDICATION: Front panel lamp lights when rated output current is exceeded

OVERLOAD PROTECTION: Continuous overload actuates front panel circuit breaker

METERING: Reads: input voltage, output voltage, & output current

COOLING: Forced Air



The lower trace shows a very distorted input AC line waveform with a 75 volt peak spike riding on it. The upper trace shows the output of the Elgar AC Line Conditioner which is perfectly clean and shows no trace of the AC input anomalies.

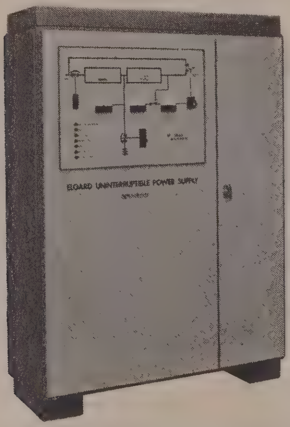
REGULATING LINE CONDITIONER (RLC)

8225 Mercury Court, San Diego, California 92111,
Phone (619) 565-1155, TWX: 910-335-1246 Telex: 6834028

Elgar's new RLC provides a low cost alternative for furnishing critical loads with clean regulated power. For input voltage variations of +12.5%/−20.8%, the output voltage is 120VAC ±5%. The unit can be connected to a 120V, 208V or 240V, 2-wire single phase source and provide the specified 120V output.

The unit provides a minimum of 140dB of common mode noise attenuation, up to 55dB normal mode noise attenuation, less than one cycle response time, and isolation as well as voltage regulation for critical loads. Available in 1.0, 1.5, and 3.0 KVA models.

UPS / INVERTERS

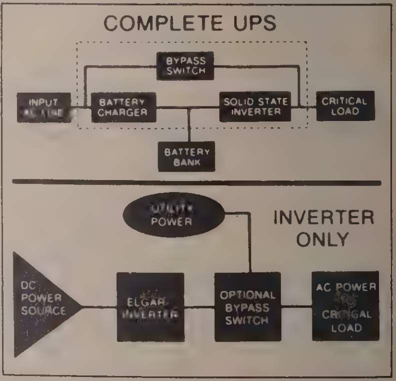


Elgar's, all solid-state Uninterruptible Power Systems (UPS), combine a battery charger, battery bank, solid-state inverter and bypass switch to provide clean, continuous power to critical loads. The battery charger converts AC line power to DC. Normally, this DC power simultaneously float-charges the battery bank and powers the inverter. Upon loss of input AC, the inverter continues to furnish the critical load with uninterruptible AC power by drawing its energy from the battery bank. Since the battery bank is always connected to the inverter as well as to the battery charger, there is no switchover time. AC output frequency from the Uninterruptible Power Source is phase-locked to the input AC or bypass input AC, under normal conditions. When there is no input AC or bypass input AC, the output frequency is automatically determined by the stable internal oscillator.

In the unlikely event of a component failure within the Uninterruptible Power Source, the bypass switch will be activated and the critical load will automatically transfer to the input AC line or bypass input AC. Elgar single-phase UPS rated 5.0, 6.5 and 10.0KVA come equipped with an electromechanical contactor which performs the reverse transfer with a 50- to 150-millisecond interruption. An optional solid-state bypass switch (SBS) that can make the transfer with less than 1ms interruption is available for all single-phase UPS and Inverter models, and is standard in all Elgar UPS rated 15KVA and above.

Elgar Inverters are designed to accept DC input power (derived from a nominally 125 or 130VDC rectifier system or from a battery bank with a final discharge voltage of 105VDC) and convert it to tightly regulated, single-phase AC power.

Elgar UPS are designed for a useful life of 15 to 20 years. Mathematical analysis and operating history indicate the anticipated mean-time between failures (MTBF) will be about 20,000 hours, depending upon the model and features selected. With appropriate interface of the bypass switch (electromechanical or static) with the load, so that bypass action does not cause a transient greater than the load can tolerate, an MTBF in excess of 100,000 hours for the output load bus can be demonstrated.



NEW "B" SERIES UPS

Elgar's new "B" series of UPS now provides lighter weight, reduced size, higher efficiency and better dynamic characteristics at a lower price. The improved performance characteristics of the "B" series units stems from a change in UPS inverter technology. Elgar's proven quasi type inverter designs have been replaced in the "B" series units with pulse width modulation (PWM) inverter technology. The technology was gained through Elgar's experience in providing (PWM) inverters and UPS to the nuclear power generation industry.

The "B" series units now incorporate standard operational and alarm features which were formerly offered only as options. The automatic forward transfer of static switches feature is a standard on all units thereby allowing the UPS to start loads that demand abnormally high in-rush currents.

Available in sizes from 1KVA single phase to 50KVA three phase.

(1) Based upon full inverter output load at 0.8 p.f.
(2) Input taps provided on 50Hz units for nominally 220 or 240.
(3) Breaks into two sections (Charger & Inverter) for shipment.
(4) Many optional input and output voltages are available at additional cost.

OPTIONAL FEATURES INCLUDE:

Additional Annunciation, Float Equalize Switch and/or Timer, Maintenance Bypass Switch, Narrow Frequency Sync Window, Slow Slew Circuit, and Remote Status Panels. Consult factory for details.

FREQUENCY CONVERSION WITH AN ELGAR UPS

An Elgar AC Power Source is suitable for more frequency conversion requirements. For 10KVA and above (where neither variable frequency nor voltage is required), a UPS may be ordered for 60Hz input to 50Hz output or vice versa.

ELGAR

An Onan/McGraw-Edison Company

AC POWER SOURCES

AC POWER SOURCE
MODEL 121
ELGAR
FREQ MULTIPLIER
SERIES 400V

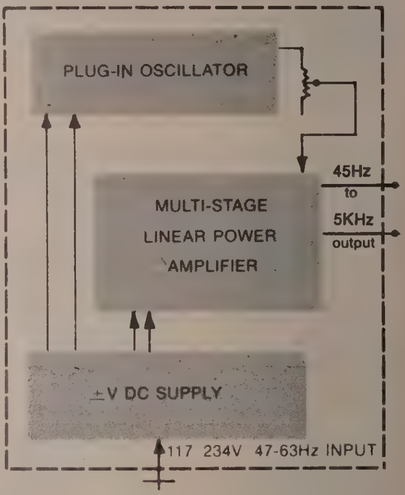
Elgar has long been the industry leader in producing solid-state Frequency Converters (AC Power Sources) for a variety of applications. These include laboratories, receiving inspection, production testing, computer-controlled automatic test systems, and facilities which require variable voltage, fixed or variable frequencies independent of power line and load variations.

Think of an Elgar AC power source as a high-power linear amplifier driven by a precision oscillator. Actually, the basic power amplifier consists of a ±DC supply and a multi-stage amplifier with a multiple-tap power output transformer. Output frequency is established by a plug-in oscillator.

Although frequently classed as instruments, Elgar power sources are actually power systems. They can deliver a variety of voltages and frequencies at the output, and the phase angles of the oscillators can be controlled, enabling the user to interconnect the output of two or more power sources into 2-phase and either Delta or Wye, 3-phase configurations.

Because of the relative ease of control of the output frequency, amplitude and phase angle, Elgar power sources can be externally programmed by a computer or other digital commands via an Elgar Digital/Analog Programmer Oscillator. This enables avionics and other system designers to automatically "exercise" their end products under simulated power conditions.

Since the many possible output variations are achieved either by a plug-in device or by external interconnection, Elgar power sources can serve many needs without fear of obsolescence.



GENERAL SPECIFICATIONS

Input: 115 or 230VAC, 47-63Hz single-phase, standard for all models through 1500VA; 230/400V or 120/208V 3-phase for 1751B, 3001, 1753B.
Output Voltage Ranges: 0-32, 0-130, 0-260
Output Frequency Range: 45-5,000 Hz
Load Power Factor: ±0.7 at full VA
Output Harmonic Distortion: 0.6% THD worst case
Line Regulation:
±0.25% at full load vs. ±10% change of input line voltage.
Load Regulation:
±1% from no load to full load over full frequency range and ±10% input range. Adjustable to better than 0.1% for specific load conditions. Fixed frequency systems always less than ±0.25%.
Response Time: Less than 50 μsec.

COMPACT "C" SERIES MODELS

Elgar's "C" series provides lighter weight, reduced size and higher efficiency than the standard line. While available only with a single range output (0-125V) due to the transformerless approach employed, an optional auto-transformer is available to provide 250V output ranges. Frequency range 15Hz to 10KHz without auto-transformer.

OSCILLATOR MODEL 403-V

VARIABLE FREQUENCY OSCILLATOR

FREQUENCY GENERATION TECHNIQUES

The output frequency of the power source is determined by the plug-in oscillator which develops the low distortion sine wave to the power amplifier. A variety of interchangeable versions are available, including 45Hz to 10KHz, narrow range variable or fixed frequencies with accuracies to 0.0001%.

Depending on the accuracy of frequency control desired, either of two methods of frequency generation is utilized. One method employs a modified phase shift oscillator.

This technique is used in both the variable and fixed frequency plug-ins since it requires only a change of resistance to produce a change in frequency. External sync capability is a standard option to this group of oscillators and the external sync signal can be sine or square wave, fundamental or odd order harmonics. The other method uses a crystal for precision fixed frequency. By utilizing these two methods of frequency generation, Elgar offers over 50 standard plug-in oscillators and programmable oscillators as well.

PLUG-IN OSCILLATOR MODULES AVAILABLE FOR USE WITH ALL ELGAR AC POWER SOURCES

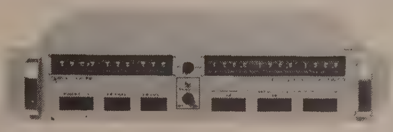
	400SP2-60	60Hz	2	±0.001%	90° ± 1°	3PPM/0°
	400SP3-400	400Hz	3	±0.001%	120° ± 1°	3PPM/0°

DIGITAL/ANALOG PROGRAMMERS



DAP SERIES

PIP SERIES

PROGRAMMABLE OSCILLATORS

Digital/Analog Programmers (DAPs) and Plug-In-Programmable oscillators (PIPs) which provide the interface between a computer and any Elgar AC Power Source System are available to enable programming of every function controllable in an AC Source including frequency, voltage amplitude, and phase angle in multi-phase systems. Special purpose programmable oscillators such as Elgar's TG-704A are also available to simulate transients and line distortion as well.

Available with BCD inputs or per the IEEE standard interface bus, Elgar's DAPs enable the use of Elgar AC Power Sources with the most advanced Automatic Test Equipment.

DISPLEX LC Line Conditioners

OUTPUT VOLTAGE
POWER
OUTPUT CURRENT
120V. OUT
LINE CONDITIONER MODEL
DISPLEX, INC.

Voltage Regulation

Unit maintains an output voltage of 105-125 volts for an input voltage range of 88 to 130 volts ac. For input voltages above and below the specified ranges, the output voltage will rise above 125 Vac or fall below 105 Vac in proportion to the input changes. The output wave shape will not distort until the input voltages falls below 65 Vac (78 Vac output voltage). Optional adjustable under/overvoltage trip circuit will shut off unit at preset output voltage between 78 and 105 Vac and 125 and 135 Vac.

Power Output:	1 kVA, 2 kVA and 3 kVA models.
Regulation Response Time:	Typically less than 1 cycle for 100% correction.
Efficiency:	Better than 96% at full load and half load.
Load Power Factor:	Unit operates over any power factor.
Overload Rating: (Circuit Breaker Curve)	10x Rated Current ≅ 10 ms 3x Rated Current ≅ 1 sec. 1.5x Rated Current 10 sec. Other overload profiles available.
Output Distortion:	No spikes. Adds no harmonic distortion to sine wave over input range 65-130 Vac.
Operating Temperature:	0° to 50°C
Output Impedance:	2% of rated load impedance at 50 or 60 Hz.
Operating Frequency:	47-53 Hz (50 Hz models), 57-63 Hz (60 Hz models).
Under & Overvoltage Trip (Optional):	Power is shut off when output voltage drops below pre-set level in the 78-105 Vac range or above 125-135 Vac range.
Overload & Short Circuit Protection:	Magnetic circuit breaker trips when output current exceeds safe limits for the line conditioner. Unit can safely operate into a short circuit.
Filter Response:	RFI noise between frequencies of 150 to 2500 kHz is attenuated between 30 and 50 dB. **Note: For optimum noise immunity, load must have a solid ground connection.**
Surge Arrestor (Optional):	A disposable transient voltage suppression network absorbs up to 70 joules of surge energy keeping voltages between high and ground and neutral to ground within safe limits. An indicator will signal when surge arrester requires replacement due to surge fatigue.

The Displex series of LC Line Conditioners supply clean regulated power to computers and other digital control and data processing equipment by conditioning power in three critical ways.

REGULATES VOLTAGE

The LC unit maintains rated output voltage level even during periods of BROWN-OUTS and other low voltage conditions. Furnishes 105-125 Vac clean output for an input range of 88 to 130 Vac.

FILTERS POWER LINE

The LC unit provides clean power to the computer by filtering RFI (Radio Frequency Interference) on the power line.

SURGE ARRESTING

The LC unit levels voltage spikes on the power line caused by lightning and/or heavy equipment operating on the same power line.

LC FEATURES

- Replaces a dedicated line. Combination regulator, filter, surge arrestor and power distribution center.
- Silent operation. Rugged, light weight.
- Short-circuit proof.
- Provides up to 10 times rated current for starting surges.
- Maintains clean sine wave output even under severe brown-out conditions.
- Handles loads of wide power factor.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

HELIONETICS, INC.

AC Power Sources · Frequency Changers
Power Conditioners

These solid-state systems provide precisely controlled AC power at any of the popular power/load configurations with standard models ranging from 12-72 kVA.

85-90% Efficiency with PWM Technology: Helionetics, a leader in Pulse Width Modulation technology, offers the highest efficiency available in AC power systems. Total system efficiency of 85-90% is typical.

Reliability Insured Thru Conservative Design and Fail-Safe Features: Conservative design and careful derating of all components insure reliability. Self-healing circuits and redundant features allow failure of a device or module without disturbing or derating the entire system. Included are:

Self-Clearing Input Rectifiers: If a diode is shorted it clears itself. Operation can continue with several diodes missing.

Self-Clearing Output Transistors: If output device should fail it clears itself from the circuit allowing continued operation.

Redundant Cooling Fans: If fan fails, its pair will supply adequate cooling for full load operation. (4 pairs supplied).

Module Disconnect: Auto-disconnect also exists at the module level allowing operation to continue derated by one module's capacity.

Convenient and easy servicing: Modular solid-state design minimizes MTTR. Self-healing circuitry allows serving when convenient at regularly scheduled times.

See pages 3•1864, 3•1865 for a complete listing of available models

MODULAR CONSTRUTION

- EASILY UPGRADED
- MINIMUM MTTR
- LOW COST REDUNDANCY
- SELF-DIAGNOSTICS

A Control Panel Module: Provides oscillator signals, metering, adjustment controls and switches. Available in fixed or variable modes for one or three phase models, (see page **3**•1867 for details).

B Logic Module: Converts oscillator signals to digital drive signals with feedback control and status monitoring.

C Power Amplifier Module: Converts pulse-width-modulated logic signals to precision, high power sinewave output with 94% module efficiency. These 4.0 kW modules can be chained together to meet virtually any standard power/load requirement.
Other system elements include:

D Cooling Fans: Multiple fans efficiency, redundancy and reliability.

E Input & Output Transformers: Construction to MIL-T-27 insures long life.

HELIONETICS, INC.

AC Power Sources · Frequency Changers Power Conditioners

PERFORMANCE SPECIFICATIONS

The following performance specifications are typical of all Helionetics AC Power Sources and unless otherwise specified assume worst case combination of line, load and temperature. For three phase units the performance listed is per phase. See pages **3•**1864, **3•**1865 for complete listing of available standard models.

Line Regulation: ±1% max for ±15% line change. Up to ±30% line range is available as an option.

Load Regulation: ±1% max for 100% load change.

Response Time: Less than 1 millisecond.

Output Voltage: Single phase, zero to 130 VAC; Three phase WYE or Delta, zero to 225 VAC line-to-line. An auto-transformer is used for other output ranges.

Output Overload Capability: 120% of rating indefinitely; 150% of rating for 10 seconds.

Power Factor: Zero to unity PF, inductive or capacitive at 100% rated current. Unit unconditionally stable in any load P.F.

Input Current Distortion: 10% max assured by 12-phase input rectification and filter.

Output Distortion: 3% max THD for non-linear loads; 1.5% typical for linear loads.

Efficiency: 85-90%.

Load Imbalance: Zero to 100%. Each phase is totally independent.

Ride Through: Sustains rated output voltage at full power with a 16 millisecond line interruption.

Output Protection: Full overload and short circuit protection.

Self-Healing Circuits: The Power Amplifier Module circuitry automatically disconnects defective output transistors, allowing the unit to continue operation with only a small reduction in capacity. Diagnostic lights locate the defective device for serving when convenient.

INPUT POWER

The input transformer has multiple taps to allow for a wide variety of inputs. The listed input types have to move the nominal operating point ±5%.

INPUT POWER					Recommended Input Service Frame Size		
Type	Description				6 MF	12 MF	18 MF
A	120/208 Vac ±15%	47 to 63 Hz	3 phase WYE		100 Amps	200 Amps	300 Amps
B	240 Vac ±15%	47 to 63 Hz	3 phase Delta		90 Amps	180 Amps	270 Amps
C	220/380 Vac ±15%	47 to 63 Hz	3 phase WYE		60 Amps	120 Amps	180 Amps
D	460 Vac ±15%	47 to 63 Hz	3 phase Delta		50 Amps	100 Amps	150 Amps

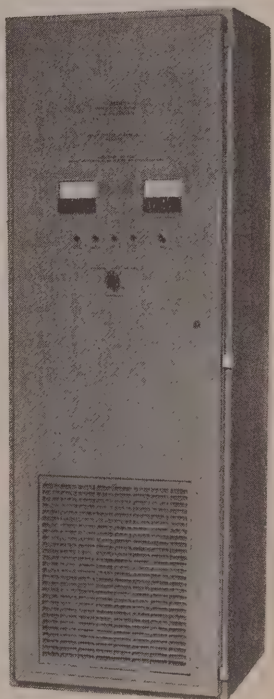
WEIGHT: 52 lbs.

10 kVA, Single Phase Frequency Changer



MODEL 61258: High efficiency switching-type modular design power conditioner and frequency changer with single phase output. Other models in this series are available in single- or three-phase configurations up to 24 kVA for shipboard and other applications.

INPUT

Voltage: 115/200 VAC; 3-Phase
Tolerance: ±10% Steady State
Transient: ±30% for 5 sec.
Frequency: 47-63 Hz

OUTPUT

Voltage: 115 VAC; ±5%; Single-Phase
Frequency: 60 Hz, ±0.1 Hz (50 Hz and 400 Hz Available)
Distortion: 3% Max THD
Power: 10 kVA
Power Factor: .8 Leading or Lagging

OVERLOAD CAPABILITY: 250% for 3 Cycles; 120% Continuous

EFFICIENCY: 85% Min. at Full Load

TEMP RANGE:

Operating −20°C to +45°C
Non-Operating: −45°C to +55°C

HUMIDITY: 0 to 95%

COOLING: Integral Forced Air

SIZE: 24″W x 24″D x 60″H

WEIGHT: 700 lbs.

Our Complete Line of Commercial Frequency Changers/Power Conditioners Featured on Pages 3·1862-3·1867

GROUND

HELIONETICS, INC.

Protected Environment Frequency Changer/Power Conditioner; 18 kVA

For protected, or quasi-military environments, such as closed vans, trailers or other mobile installations, Helionetics offers a wealth of proven field reliability with several series of designs. Virtually any standard operating voltage and frequency can be configured with ease using Helionetics modular construction.

Every series of power conditioners uses pulse width modulation circuitry developed and patented by our technical personnel. Full load efficiency of 92% is typically achieved.

MODEL 61322

INPUT
Voltage: 120/208 VAC; 3-Phase
Tolerance +10%, −15%
Transient: ±25% for 2 Sec.
Frequency: 47-63 Hz

OUTPUT
Voltage: 120/208 VAC; 3-Phase
Frequency: 60 Hz, ±0.1%
Distortion: 5% THD
Voltage Regulation: 0.5%
Power: 18 kVA
Power Factor: .8 Leading or Lagging; 14.5 kW

EFFICIENCY: 85% at Nominal Input and Full Output Power

OVERLOAD CAPABILITY: 150% for 3 Cycles, 120% Continuous

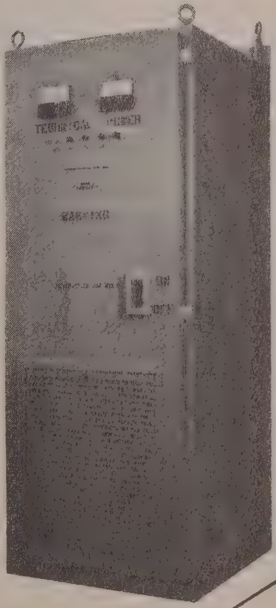
TEMP RANGE: 0°C to 50°C

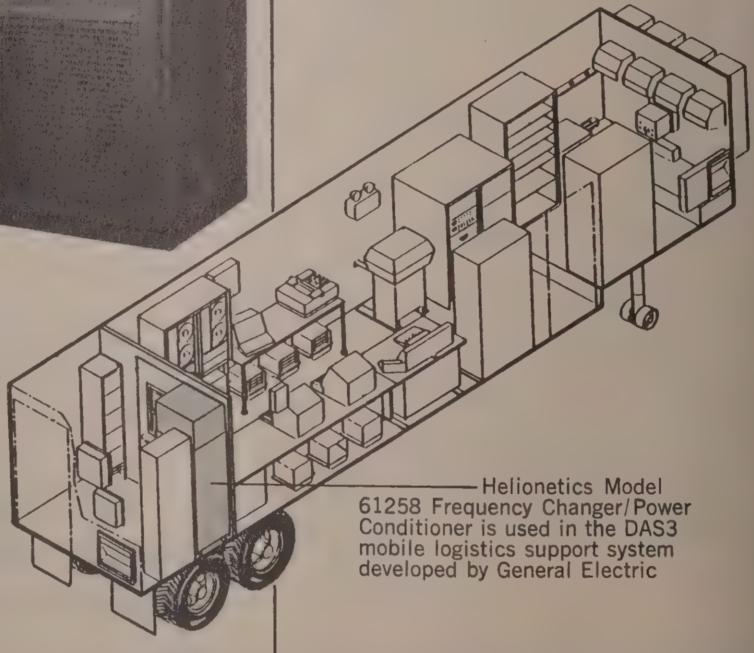
HUMIDITY: 10%-90% Non-Condensing

COOLING: Fan Cooled

SIZE: 24"W x 24"D x 60"H

WEIGHT: 700 lbs.





Helionetics Model 61258 Frequency Changer/Power Conditioner is used in the DAS3 mobile logistics support system developed by General Electric

HELIONETICS modular systems have an established record of field reliability on thousands of modules already in operation. Standard Power Amplifier and Logic Modules provide redundancy, field upgradability and easy servicing. Fault isolation, together with automatic self-healing circuitry, aids scheduled maintenance and insures reliable operation.

POWER MODULE FEATURES:

- 2 kW AND 2.5 kW MODULES AVAILABLE
- 94% MODULE EFFICIENCY (FULL LOAD)
- PULSE WIDTH MODULATION (CLASS D) TECHNOLOGY
- MODULE REDUNDANCY INSURES RELIABLE OPERATION
- CONSERVATIVE DESIGN AND SELF HEALING CIRCUITRY
- FAULT ISOLATION INDICATOR ON 2.5 kW MODULE

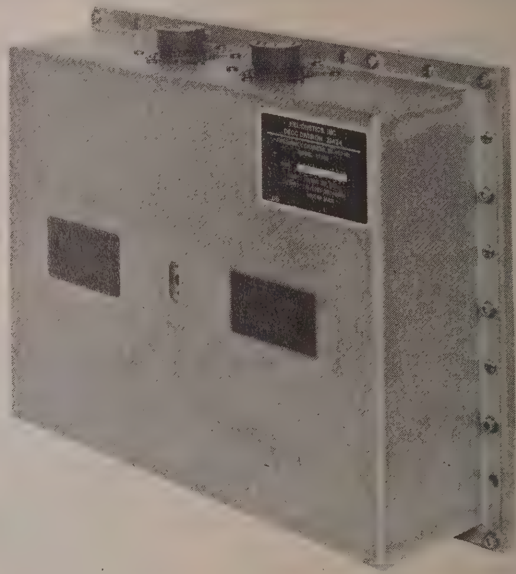
SHIPBOARD

HELIONETICS, INC.

1.6 kVA, 3-Phase Frequency Changer; 400 Hz Output



MODEL 61340: Fully Militarized 60-400 Hz Frequency Changer for submarine and naval shipboard applications. Special design techniques provide a high density conduction-cooled package which minimizes acoustical noise.

INPUT
- Voltage: 115 VAC, 3-Phase Delta
- Tolerance: ±10% Steady State
- Transient: ±25%
- Frequency: 60 Hz ±4 Hz

OUTPUT
- Voltage: 115/200 VAC. 3-Phase 4-Wire WYE
- Frequency: 400 Hz
- Distortion: 5% Max THD; 3% Max Single Harmonic
- Voltage Regulation: 5% Max Line & Load
- Power: 1.6 kVA
- Power Factor: 0.8 Lag to 0.9 Lead

EFFICIENCY: 75% Min at Nominal Input & Output & Max Load

TEMP RANGE
- Operating: Heat Sink 0°C to +60°C Ambient; Tracking Heat Sink within ±20°C
- Non-operating: −55°C to +71°C

HUMIDITY: MIL-STD-810C, Method 507.1, Procedure 4; 50°C Max

COOLING: Liquid Cooled Through Base Mounting Plate

SIZE: 12.6″W x 4.87″H x 15.8″D

WEIGHT: 60 lbs.

SHOCK: 150 G, 11 Milliseconds, Total 12 Shocks All Axes

SHIPBOARD

HELIONETICS, INC.

640 Watt Computer Power Supply; Multi-Output

MODEL 61282: Fully militarized 3-output power supply for shipboard weather, navigation and other computer applications.

- REMOTE SENSING ALL OUTPUTS
- PARALLEL OPERATION ON +5 VDC OUTPUT
- POWER SEQUENCING: +5 VDC; ON FIRST, OFF LAST
- OVERVOLTAGE CROWBARS ON ALL OUTPUTS
- DATA SAVE — ALL TTL COMPATIBLE

INPUT
Voltage: 120 VAC ± 13%; Single Phase
Frequency: 47-63 Hz
OUTPUT 1: +5 VDC at 80 Amps
OUTPUT 2: +15 VDC at 15 Amps
OUTPUT 3: −5 VDC at 2.5 Amps
ALL OUTPUTS
Power: 640 Watts Total
Regulation: ±0.5% Line and Load
Ripple: 50 Millivolts Peak to Peak
Adjust Range: ±5%
HUMIDITY: 0 to 90% Relative
COOLING: Integral Forced Air
SIZE: 19.0"W x 7.0"H x 19.0"D (20.5"D w/handle)
WEIGHT: 44 lbs.
SHOCK: 30 G, 30 Milliseconds, ½ Sine
VIBRATION: MIL-STD-167, Type 1
TEMPERATURE: Operating: 0°C to 55°C
Non-operating: −62°C to +75°C

50-100 kHz Wide Band Class-B Amplifier

POWER ON
OVER TEMP
OVER CURRENT
RESET
1 KW LINEAR AMPLIFIER

MODEL 61055: Extremely low distortion, very wide bandwidth, and an ability to operate into highly reactive loads provides application to both sonar and VLF/ELF communications. Up to four 61055's can be ganged to cover the ranges 50-300 Hz, 300-2000 Hz, 2-20 kHz and 20-100 kHz.

INPUT: 110 VDC ±5 VDC, 15 Amps
OUTPUT: 1.5 kVA (0.7 to 1.0 PF) 0-67 Vrms
FREQUENCY RESPONSE: 50 Hz to 100 kHz
DISTORTION: 0.3% Max THD
INPUT SIGNAL RANGE: 0-1.0 Volt RMS
DUTY FACTOR: Continuous
TEMP RANGE: 0°C to 50°C
COOLING: Integral Forced Air
SIZE: 8.25"W x 8.25"H x 20"D
WEIGHT: 40 lbs.

MODEL 61056: POWER SUPPLY FOR ABOVE
Simultaneously furnishes power to two 61055 amplifiers. 3-phase matched supply is also available.

INPUT: 115 VAC ±10%; 1-Phase; 60 Hz ±5%
OUTPUT: 110 ±1 VDC; 20 Amps; 2200 Watts
MTBF: 2100 Hours at Max Temp (MIL-HDBK-217)
MTTR: 1 Hour Max (MIL-HDBK-472)

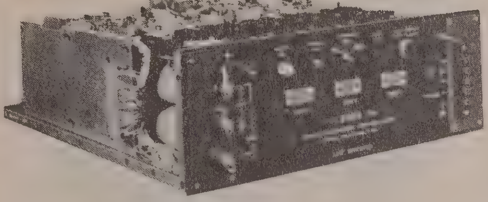
AIRBORNE

HELIONETICS, INC.

3 kW Modular Inverter



MODEL 61179: This fully militarized 3 kW inverter features modular construction allowing enhanced maintainability. Multiple outputs are switch selectable.

INPUT: 36-70 VDC

OUTPUTS
Voltage (Switch Selectable)
- 120 VAC; 1-Phase
- 240 VAC; 1-Phase
- 120/280 VAC; 3-Phase

Frequency: 50, 60 or 400 Hz (Switch Selectable)
Distortion: 3%
Regulation: 3%
Power: 3.0 kW

EFFICIENCY: Exceeds 90%

SIZE: 18″W x 5″H x 24″D

WEIGHT: 25 lbs.

TEMP RANGE: 0°C to +55°C

Air or Ground Battery Charger Power Supply

MODEL 61276: Designed for either aircraft or ground use charging lead-acid or lead-calcium batteries.

INPUT
Voltage: 115/230 VAC; 1-Phase or 3-Phase
Transient: MIL-STD-704
Frequency: 50/60 Hz or 400 Hz

OUTPUT: 35 Amps or 36 Amps at 28 VDC. End points can be adjusted at factory and slope moved vertically as a function of ambient temperature.

EFFICIENCY: 85% at Full Load

TEMP. RANGE: −40°C to +70°C

HUMIDITY: 100% w/condensation

SHOCK: MIL-STD-810C

EMI: MIL-STD-461

SIZE: 5″W x 6″H x 16″D or 8.3″W x 5″H x 20″D

WEIGHT: 16 lbs. or 35 lbs.

ALTITUDE: 50,000 ft.

SPECIALISTS IN POWER CONVERSION EQUIPMENT

NOBRUSH® FREQUENCY GEORATOR™ CORPORATION

PERMANENT MAGNET GENERATOR DESIGN

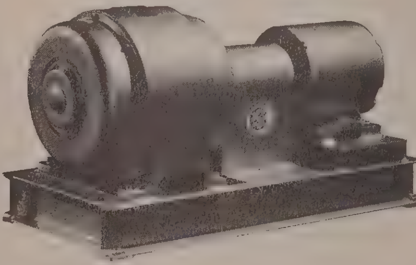
"NoBrush" Motor Generators and Frequency Converters are efficient, compact, dependable, quiet running units for powering all types of electronic systems and electrical equipment. The heart of each "NoBrush" power system is a "NoBrush" permanent magnet generator which features a cast aluminum rotor designed to give superior voltage stability. • A typical "NoBrush" generator is mounted with a high quality induction or synduction motor within a single aluminum alloy shell. • Oversize lubricated for life ball bearings, coupled with the absence of brushes, commutators or slip rings, insure long-term maintenance-free operation. • Georator brushless permanent magnet generators are noted for their compact construction, ruggedness, ability to withstand short circuits, and excellent wave form. • All Georator power systems whether utilized for frequency conversion or basic power requirements, provide true "line isolation and stabilization" for protecting sensitive electronic systems from momentary power interruptions, switching transients, brown outs, or voltage spikes.

60 TO 60 Hz LINE ISOLATOR SERIES 30 UNIT SHELL

This small isolator stabilizer Motor-Generator offers full line isolation for small power requirements up to 1 KVA. Permanent magnet field generator coupled with the high inertia of the rotating system assures maximum electrical isolation between line and load. The rugged unit shell construction gives long, maintenance-free operation.

Model No.	KVA Rating	Phase In/Out	Output Voltage	Input Voltage	Dimensions H"/L"/Weight
30-194	0.5	3/1	115/230	230/460	14.8"/16.1"/120 lbs.
30-198	0.5	1/1	115/230	115/230	14.8"/16.1"/120 lbs.
30-195	1.0	3/3	120/208	230/460	14.8"/16.1"/130 lbs.
30-199	1.0	1/3	120/208	115/230	14.8"/16.1"/130 lbs.

These 60 to 60 Hz brushless generators, including those in the next column are designed to accept long term input variation of up to ±15% from nominal with no change in output. Inertia stabilization allows these units to absorb input line transients of as much as 30% for as long as 500 milliseconds with less than 1% change in output.



60 TO 60 Hz ISOLATOR STABILIZER SERIES 37 IN LINE

Larger Motor Generators in ratings up to 125 KVA are also available to provide full line isolation and distortion free power to protect electronic equipment from power line excursions and momentary power loss.

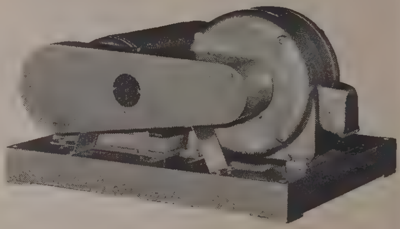
PERMANENT MAGNET FEATURES:

- ☐ *Line Isolation and Stabilization*
- ☐ *Stable Output Voltage*
- ☐ *High Overload Capacity*
- ☐ *Withstands Short Circuits*
- ☐ *Extremely Low R. F. Noise*
- ☐ *Minimum Maintenance*
- ☐ *Lightweight*
- ☐ *Low Audible Noise*
- ☐ *Cool Operation*
- ☐ *Operates in Adverse Environments*



50 TO 60 Hz and 60 TO 50 Hz FREQUENCY CONVERTERS

These ruggedly built, belt driven, motor-generator sets are mounted on a sturdy steel frame base. Units in the 0.5 to 5 KVA power range are designed around the highly efficient NoBrush Permanent Magnet Generator. Units in the 6.25 to 125 KVA power range have brushless rotating rectifier type generators with voltage regulators, to provide ±1% output voltage regulation, and voltage adjustment of ±10%. These motor-generators provide frequency conversion, basic power, and superior line isolation and stabilization for exported and imported electrical and electronic equipment. Other voltages available upon request.

☐ Other Generator Outputs Available: 120, 180, 280, 360, and 840 Hz
☐ Other Standard and Non-Standard Voltages.
☐ Exact 400 Hz Output.
☐ DC Outputs at Low or High Voltage.

60 to 400 Hz FREQUENCY CONVERTER SERIES 33 VERTICAL

High quality induction motor is close coupled to a "NOBRUSH" generator providing a very compact high power to weight and size ratio. Available variations include: 50 Hz input; multiple standard and non-standard AC output voltages; Dual AC and DC outputs; and militarized construction.

MODEL NO.	KVA RATING	PHASE IN/OUT	OUTPUT VOLTAGES FULL LOAD	DIMENSIONS DIAMETER"/H"/Lbs.

EXACT 400 Hz FREQUENCY CONVERTERS SYNCHRONOUS DRIVEN SERIES 35 IN LINE

60 Hz to exact 400 Hz frequency conversion. Low rotational speed (1200 RPM) provides long life and minimum audible noise (65db). High/low AC and DC outputs available.

MODEL NO.	KVA RATING	PHASE IN/OUT	OUTPUT VOLTAGE FULL LOAD	OUTPUT FREQUENCY EXACT	DIMENSIONS H"/L"/WEIGHT
35-001	2.5	3/1	115	400 Hz	16.5/26/470 Lbs.

LIGHTWEIGHT 400 Hz ENGINE-GENERATORS

Lightweight 400 Hz permanent magnet engine-generators are available with 1Ø, or 3Ø, or DC, or dual AC/DC outputs. Applications include: geophysical, navigation, and communication systems; also fish conservation.

MODEL NO.	KVA RATING	DC/PHASE OUT	OUTPUT VOLTAGE	WEIGHT
31-001	0.5	1Ø AC	115/230	43
31-002	0.5	DC/1Ø AC	115/230	44

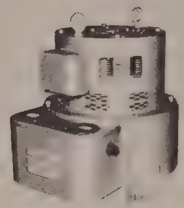
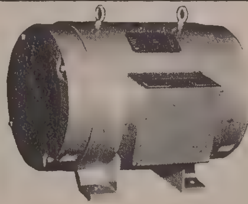
31-014	0.5	DC	250/500	44



VOLTAGE REGULATED 60 TO 400 Hz FREQUENCY CONVERTERS

This new, Series 39, Regulated, Vertical Frequency Converter combines the "No-Brush" permanent magnet generator together with control windings and simplified sensing electronics, to provide both the traditional "Brushless" rugged design and a closely regulated 400 Hz power system. Voltage regulation is ± 1.5% no load to full load, 0.8 to 1.0 power factor, with a voltage adjustment feature of ± 5%.

MODEL NO.	KVA RATING	VOLTAGE OUTPUT	VOLTAGE REGULATION	PHASE IN/OUT
39-001	5	120/208	±1.5%	3/3
39-002	5	115/230	±1.5%	3/1
39-004	6.5	120/208	±1.5%	3/3



60 TO 180 Hz, 360 Hz, 840 Hz FREQUENCY CONVERTERS FOR HIGH FREQUENCY TOOLS, MOTORS, AND LIGHTING

These frequency converters are available for powering high frequency metal-working tools, wood-working tools, motors, and lighting systems. The highly dependable, minimum maintenance, PERMANENT MAGNET BRUSHLESS DESIGNS are available in many ratings up to: 5 KVA for 180 Hz applications; 10 KVA for 360 Hz applications; and 30 KVA for 840 Hz applications.

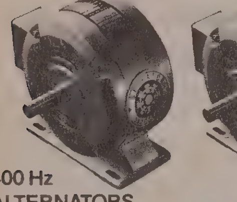
GEORATOR™ CORPORATION PERMANENT MAGNET ALTERNATORS

FEATURES:

☐ High Efficiency
☐ Excellent Wave Form
☐ Stable Output Voltage
☐ Short Circuit Immunity
☐ High Overload Capacity
☐ Essentially "0" RF Noise
☐ Brushless
☐ Compact Design
☐ Cool Operation



400 Hz ALTERNATORS PERMANENT MAGNET

The original, revolutionary, "NoBrush" generator. Permanent magnets yield stability, reproducibility, ruggedness and virtually zero R.F. noise. Available in large variety of ratings, frequencies and voltages. Supplementary windings with rectifiers available for D.C. output.

400 Hz ALTERNATORS

Model No.	KVA Rating	Phase Out	Speed RPM	Dimensions H"/L"/Weight

36-152	25.0	3	1714	25.3"/17"/730 lbs.

☐ Alternator Frequencies Available Include: 50, 60, 120, 180, 240, 300, 360, 420, 840 and 1000 Hz.

☐ Units are Available with:
- Standard and Non-Standard AC Voltages.
- Multiple DC Outputs/Low Voltage taps.
- Special Housings for Flange Mountings.
- Double Shafts.
- Militarized Construction.

60 Hz ALTERNATORS 50 Hz ALTERNATORS PERMANENT MAGNET

These industrial type generators provide output voltage stability within ±1% for constant load and constant driving speed (from cold to hot and ambient temperatures of −20° F to 130° F).

MODEL NO.	KVA RATING	PHASE OUT	OUTPUT VOLTAGE NOMINAL	FREQUENCY Hz	SPEED RPM	DIMENSIONS H"L"/WEIGHT

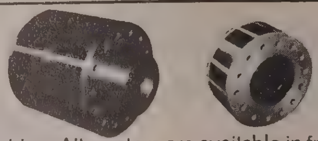
36-154	10.0	3	120	60	3600	18/25/753 lbs.

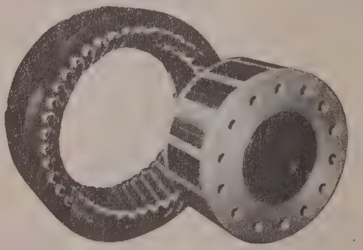
☐ Units are available with 50 Hz output.



APPLICATIONS:

Permanent Magnet Brushless Alternators are available in frequencies up to 1,000 Hz and in power ratings from 150 VA to 25 KVA. Wherever a rugged, continuous duty, industrial type, long life generator is required for:

- Special industrial applications 120 Hz, 180 Hz, 360 Hz.
- High frequency power up to 1,000 Hz.
- Low frequency power 60 Hz, 50 Hz or lower.
- Variable frequency....
- Electrical power source in hazardous locations.
- Military 400 Hz electronic equipment.
- Source of multiple AC outputs for rectification to DC power.
- Power static exciter—voltage regulators of large engine generators.
- Pilot excitation and field flashing of large generators.
- Tachometer feedback for large rotating apparatus.
- Lighting Systems.
- Electric brake excitation.
- Power for process control equipment in hazardous environments.
- Special vehicular applications.
- As computer peripheral rotating power supply providing basic power, line isolation, ride through, and multiple outputs.



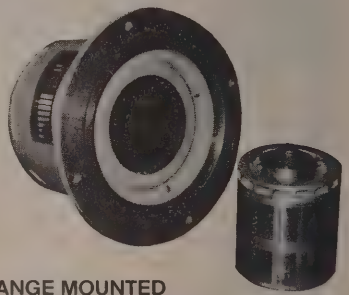
ROTORS AND STATORS

Separate permanent magnet rotors and stators are available for a wide range of OEM applications engineered to fit customer shaft or shaft extensions. From speeds as low as 720 RPM to 12,000 RPM in selected ratings. In power ratings from 50 VA to 25 KVA.

TOTALLY ENCLOSED AND EXPLOSION PROOF

Totally enclosed and explosion proof designs are available in selected ratings. Some typical units are:

MODEL NO.	KVA RATING	PHASE OUT	VOLTAGE OUT	FREQUENCY/ RPM	DESCRIPTION
36-168	1.5	1	120	60 Hz/1800	Totally enclosed.
36-173	1.5	1	115/230	60 Hz/1800	Explosion Proof.



FLANGE MOUNTED ROTORS AND STATORS

Cast aluminum alloy housings to fit on customer stub shaft.

SPECIAL PM DESIGNS

Examples of special 2 bearing units of unique industrial application-

MODEL NO.	RATING	PHASE OUT	VOLTAGE OUT	DESCRIPTION
36-094	165 watts	DC	5, 12, 24, 48 VDC	Multiple DC outputs for computer peripheral.
36-169	2.5 KVA	1Ø	240 VAC	1000 Hz, 4286 RPM Unique Industrial Application.
36-167	3.0 KVA	3Ø	115/200 VAC	200 Hz, 3000 RPM Vehicular application.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

PESCHEL AUTOMATIC VOLTAGE REGULATOR™

- 99% EFFICIENT
- NO WAVEFORM DISTORTION
- VERY LOW INTERNAL IMPEDANCE
- NO PHASE SHIFT
- NO EFFECT ON POWER FACTOR
- UP TO 20 VOLTS PER SECOND CORRECTION RATE
- TEMPERATURE RANGE -10°C to +50°C
- OUTPUT ACCURACY ±1% ADJUSTABLE TO ±5%
- VOLTMETER WITH EXPANDED SCALE
- DRY TYPE, CONVECTION COOLED

The Peschel Automatic Voltage Regulator is a 50/60 Hz., wye connected, dry-type, convection cooled, ac line voltage regulator. It is designed to maintain line voltage to within ±1% of nominal, with an input voltage variation of +9/-14% or ±20%, due to line and/or load changes. The PAVR introduces no harmful waveform distortion, has a very low internal impedance, causes no phase shift, is insensitive to load power factor, has no effect on system power factor, and is approx. 99% efficient.

The PAVR is neither an impedance changing nor a ferroresonant device and uses no SCRs. It is an electromechanical device using electro-magnetic transformer action to regulate. Its high efficiency and reliability make it the best solution to today's voltage problems.

500VA TO 150KVA LINE CONDITIONED POWER SYSTEMS

Also see our catalog pages under TRANSFORMERS and DC POWER SOURCES.

UPS SERIES — UNINTERRUPTIBLE POWER SYSTEMS

The ultimate in line conditioning equipment. The Hitran UPS Series provides low distortion, sinusoidal, computer grade, voltage regulated power under all line conditions. The UPS Series is designed to eliminate more than 99% of common power line problems — power outages, line interruptions, brownouts and short term transients. It protects the load against line disturbances resulting from switching in the transmission system, clearing of line faults, starting of motor loads and even lightning strikes. The associated battery bank is sized to provide continuous power during line interruptions for the period required for an orderly shutdown of computer or process control systems.

Standard Features

- Online System Design - No switchover time in the event of power interruption.
- Easy Maintenance - Subassemblies are modular for rapid trouble shooting or replacement.
- High Efficiency - Total system efficiency ranges from 72% to 80% depending on KVA size. Inverter efficiency - 80% to 89%.
- Auto Electro-mechanical Bypass Switch with Manual Override - Standard on all models.
- Static Bypass Switch (SBS) - Operates automatically within ¼ cycle. Equipped with Automatic Retransfer and Manual Override. Optional on 1KVA & 2.5 KVA single phase models.
- Double Isolation - Doubly isolated from input line via input isolation transformer and output ferroresonant transformer.
- Battery Protection - Automatic current limit circuit in the battery charger for built-in protection. Low battery shutdown disconnects battery from load after extended AC line failure.
- Operating Temperature - 0 to 50°C.

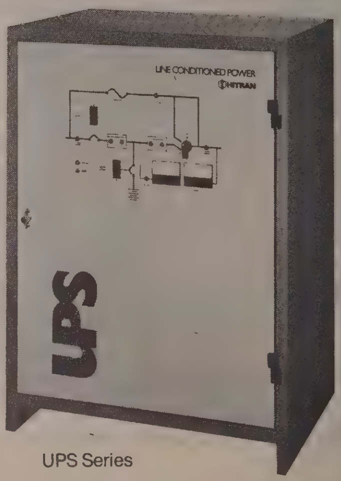
Electrical Specifications

Input

- Input Voltage Range - ±10% of nominal
- Input Frequency range - ±5% of nominal
- Power Factor - 0.8 lagging, nominal.

Output

- Output Harmonic Distortion - Less than 5% total harmonic distortion and less than 3% of any single harmonic.
- Output Voltage Regulation - Dynamic: ±10% with recovery to ±3% in 50ms as a result of step load changes or AC line failure. Static: ±3% for the combined effects of line, load and temperature.
- Output Frequency Stability - ±0.25%
- Output Frequency Regulation - ±1.0% when not in synchronization with input frequency. (Units are automatically synchronized to input frequency when within range of nominal ±1Hz.)
- Output Power - Provides full output KVA for load power factors from 0.8 lagging to unity. (HITRAN's UPS will operate with such highly reactive loads as Ultra Isolation Transformers.)
- Overload Capacity - 125% for 20 minutes. 140% for 10 minutes. (The Bypass Feature automatically transfers to bypass line if an overload causes an inverter output reduction.)



UPS Series

Battery Packs

- Battery Types - The UPS is compatible with any type of battery of proper voltage and capacity. Hitran offers a complete selection of Lead-Calcium, wet and gel-cell battery packs specifically designed for UPS applications. Other battery types available.
- Reserve Time - Standard packs available with reserve time from 10 to 120 minutes. Longer times available.

HITRAN

Division of AGEX

Key source for reliable magnetic components, power supplies and control systems for over 40 years.

500VA TO 150KVA LINE CONDITIONED POWER SYSTEMS

Also see our catalog pages under TRANSFORMERS and DC POWER SOURCES.

SFR SERIES — SINUSOIDAL FERRORESONANT REGULATOR

The SFR provides low distortion, sinusoidal, computer grade power. It provides a high degree of electrical noise rejection as well as output voltage regulation. Designed to eliminate power line problems caused by brownouts, short term transients and electrical noise, the SFR protects against switching disturbances, clearing of line faults, starting of motor loads and lightning strikes.

Standard Features

- Computer grade sinusoidal output - less than 5% harmonic distortion.
- Electrical noise rejection - Common Mode: greater than 120dB, 1 KHz to 1MHz. - Transverse Mode: greater than 60dB, 10KHz to 1MHz.
- Wide input voltage range - +10%, −20% of nominal input
- Tightly regulated output - ±1% of nominal output voltage.
- Input to Output Coupling Capacitance - Less than 0.005pF.
- Operating Temperature - 0-50°C.

Electrical Specifications

Input

- Nominal Standard Voltages - 1φ: 120, 208, 240, 480 (+10, −20%) 3φ: 208Δ, 240Δ, 480Δ (+10, −20%)
- Frequency - 60Hz or 50Hz ±2Hz.

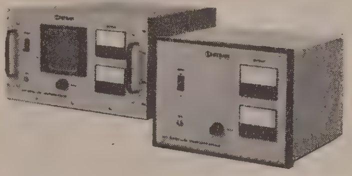
Output

- 1φ - 120/240-277V ±1%
- 3φ - 208Y/120V ±1%
- 3φ - 480Y/277V ±1%
- Frequency - Same as Input.
- Regulation - Static: ±1%; Dynamic: ±4% with recovery to ±1% in 50ms.
- Load PF - 0.8 lagging
- Overload Recovery - Automatic within 50ms.
- Ride Through - Continuous power during line outages lasting as long as 25ms (1.5 cycles).
- Protection - Self current limiting
- Efficiency - Greater than 90%

Complete Line Conditioner Systems

The SFR Series is also available as a Complete Line Conditioner System. It includes all the standard features listed plus the following accessories:

- *Output Ammeter and Voltmeter*
- *Input Circuit Breaker*
- *Input Power "ON" Indicating Light*
- *Output Fusing and Receptacles*
- *Input Receptacles or Line Cord*
- *19-inch Rack Mount or Free-Standing Desk Top Assembly*



SFR Series - Rack Mount and Desk Top Complete Systems.

UIS SERIES — ULTRA ISOLATION SYSTEM

The UIS effectively eliminates common-mode and transverse-mode power line noise in transformer applications for computers, programmable controllers and sensitive instruments.

Standard Features

- High degree of electrical noise rejection,- Common-mode: greater than 140dB, 1KHz to 1Mhz; Transverse-mode: greater than 60db, 10KHz to 1MHz.
- Input to output capacitance coupling - 0.001pF
- DC insulation resistance - 10,000MΩ
- Dielectric strength - 4000Vac min.
- Operating Temperature - 0-50°C
- Efficiency - 97% min. at full load.
- Line Cord & Output Receptacles - Standard on 120V single phase models up through 2.4KVA.

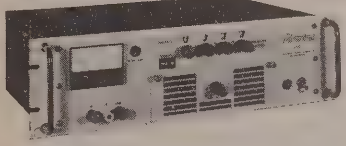
Powertron SOLID STATE AC POWER SUPPLIES

The Powertron AC Power Supplies provide stable, low distortion, AC power at frequencies within the audio frequency spectrum. These highly reliable and versatile power sources find wide application in calibration and test stations, motor drives, gyro wheel supplies, laboratory use, military component testing, and operating foreign equipment. These supplies may be used whenever it is necessary to provide AC power at a frequency not available from the power lines.

The various supplies feature all solid state construction, wide operating frequency range, low distortion, and a wide variety of output voltages and impedances. The units are designed to be used in modular form so that a single unit can provide single phase output, and two or three units may be used to provide two phase or three phase outputs respectively.



AMPLIFIER SPECIFICATIONS

(Series 250S, Illustrated)

Output Circuit:
Single phase, isolated (Ground terminal is provided for optional grounding of output.)

Output Power:
250 VA

Load Power Factor:
.7 Lead through .7 Lag for full power output. Useable to .2 at reduced power.

Output Voltage Range:
0-130 V RMS (An output connector provided at the rear of the unit may readily be reconnected to provide optimum power output at other voltages. Ranges available are 0-260 V, 0-190 V, 0-130 V, 0-90 V, 0-75 V, 0-67 V, 0-60 V, 0-38 V, 0-30 V, and 0-17 V.

Output Frequency Range:
45 Hz to 10,000 Hz for full power out. 20 Hz to 20,000 Hz at reduced power.

Output Distortion:
0.1% mid band

Load Regulation:
Factory set to ±0.5% mid band (A control is provided for zero regulation adjustment over most of frequency range.)

Line Regulation:
±0.1% for ±5% line change.

Transient Response:
50 Microseconds.

Hum Level:
80 db approx. below rated output voltage.

Thermal Overload Protection:
Output transistors protected by thermal cut-out circuit.

Short Circuit Protection:
Output may be shorted indefinitely without damage to unit.

External Amplifier Input:
An input connector is provided at the rear of the unit when it is desired to drive the amplifier from an external source. Model XA-1 plug-in Module is required for this mode of operation.

External Sync. Input:
An input connector is provided at the rear when it is desired to synchronize the plug in oscillator with an external frequency source.

Convenience Outlets:
Two convenience outlets controlled by the power switch are provided at the rear of the unit. These permit single control operation of one or two additional amplifiers when 2ø or 3ø outputs are required. When not used for this purpose, the outlets may also be used to turn on auxiliary equipment which is mounted in the same test console.

Meter:
A voltmeter with range of 0-150 V RMS is provided to monitor the output voltage.

Input Power:
115 V or 230 V, 50-60 Hz (400 Hz input available).

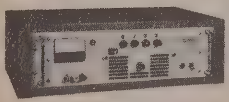
Ambient Temperature Range:
0° C to 55° C.

Dimensions:
5¼ x 19″ Rack Panel x 14″ Deep.

Weight:
75 Lbs. Approx.

The ordering designations listed below are for convenience of specifying the components required for various power supply configurations. To select an appropriate unit for your requirements first determine which category, 1-phase, 2-phase, or 3-phase, is most suitable to your intended load. Then use the ordering designation adjacent to the required output power within that category. For the complete ordering designation replace the asterisk with the ordering code letters of the plug-in-oscillator listed.

10 Power Supplies (For use with Single Phase Loads)



Model 500S-1-K

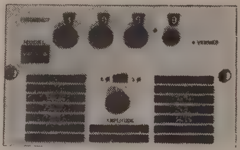
4500S-3-*	4.5KVA		
6000S-3-*	6KVA		
9000S-3-*	9KVA		
12000S-3-*	12KVA	130, 150, 260, 280, 300, 600	



PLUG-IN OSCILLATORS

Single phase (1ϕ) and polyphase (Pϕ) oscillators are available for both fixed frequency and variable frequency output. Polyphase oscillators include a switch on the front panel which provides either two-phase or three-phase output. Thus, the Pϕ oscillators are used in conjunction with two or three Powertron amplifiers to provide 2ϕ or 3ϕ power. With the exception of the Code S and Code SS Models, the output frequency of the variable frequency oscillators is determined by the setting of BCD rotary switches, the frequency being read directly on the switch dials. These oscillators are provided with Sync. capability which permits locking-in their output frequency with an external source of the same nominal frequency. The Code S and Code SS oscillators have their frequency determined by the continuous rotation of a multiturn potentiometer panel control. The output frequency for these oscillators is indicated on a precision digital LED readout.

CODE		FREQUENCY	ACCURACY
Single Phase	Poly Phase		
A	AA	400 Hz	0.1%
B	BB	60 Hz	0.1%
C	CC	Specify	0.1%
E	EE	Specify	0.001%
F	FF	Specify (2 Freq.)	0.1%
K	KK	10 Hz - 10 KHz	1.0%
L	LL	10 Hz - 100 Hz	1.0%
M	MM	100 Hz - 1 KHz	1.0%
N	NN	350 Hz - 450 Hz	0.25%
P	PP	300 Hz - 500 Hz	0.25%
Q	QQ	1 KHz - 10 KHz	1.0%
LM	LL MM	10 Hz - 1 KHz	1.0%
MQ	MM QQ	100 Hz - 10 KHz	1.0%
S	SS	10 Hz - 10 KHz	0.1%

A wide variety of special purpose plug-in oscillators is also available for use with the Powertron amplifiers.

Powertron SOLID STATE AC POWER SUPPLIES

MODEL 5700 BCD, IEEE BUS PROGRAMMER

The AC Power Programmer 5700 is used in conjunction with the various AC power amplifiers to provide precisely controlled frequency, amplitude, and phase angle displacement. The programmer includes the capability for 3 modes of control, by front panel BCD thumbwheel switches, by remote BCD signals, or by remote IEEE-488 GPIB. The modular construction of the programmer allows the user to purchase only the modules required for the application, and to expand the system as required. Thus, a single-phase application would require only a frequency module, and an amplitude module, a two-phase application requires a frequency module, two amplitude modules, and a phase shift module, and a three-phase system requires the full compliment of frequency module, three amplitude modules, and two phase shift modules. Remote programming is also optional and expandable in that separate modular plug-ins are available for remote BCD, or IEEE Bus operation.

The digital techniques employed in the frequency and phase modules of the programmer insure precise control of these functions. The amplitude modules provide servo loop control of the respective output amplifiers insuring precise amplitude stability and control. Local or remote programming for each function is selected by a front panel switch. Remote programming status is displayed on LED indicators of the respective control modules.

SPECIFICATIONS:

FREQUENCY CONTROL MODULE — The frequency control module provides 3 programmable ranges with provisions for locking out any range. Frequency accuracy is ±.005% as determined by internal crystal reference oscillator.

Ranges:	40.00 Hz to 99.99 Hz in .01 Hz steps 40.0 Hz to 999.9 Hz in .1 Hz steps 40 Hz to 9999 Hz in 1 Hz steps
Distortion:	Less than 1%

AMPLITUDE CONTROL MODULE — The amplitude control module provides 2 ranges with provision for range programming when used with appropriately modified amplifiers. Independent or simultaneous programming capability is provided for polyphase applications.

Ranges:	0—130 volts RMS or 0—260 volts RMS
Resolution:	0.1 volt steps
Load Regulation:	±.01%
Line Regulation:	±.01%

PHASE SHIFT CONTROL MODULE — The phase shift control module provides precise digital phase control over the frequency range of the equipment. Overall phase displacement accuracy will depend upon the amplifier and amplifier load symmetry.

Range:	0 to 399 degrees
Resolution:	1 degree steps
Accuracy:	±0.1 degrees

BCD INTERFACE MODULE — The BCD interface module is interchangeable with the IEEE BUS Module and is readily installed by simply plugging in at the rear of the equipment. Appropriate interface connectors are included on the modules. The input is TTL compatible.

IEEE BUS INTERFACE MODULE — The IEEE Bus Module is interchangeable with the BCD interface module and is readily installed by simply plugging in at the rear of the equipment. The GPIB interface connector is included in the module. The module is microprocessor controlled with programming codes residing in PROM. This arrangement allows for modifications to meet special user requirements. Automatic diagnostics are provided to indicate incorrect character prefix, incorrect place, incorrect digit, incorrect function, and too low frequency. Error lights, and audible alarm indicate fault.

PLUG IN MODULES

MODEL XA

The Model XA module plugs into the various Powertron solid state series amplifiers in the same space normally provided for the plug-in oscillator. The circuit board in the XA module completes the external input circuit for the amplifier and provides a limited adjustment range for vernier control of the amplitude. This plug-in is used for each subsidiary amplifier (those not including the plug-in oscillator), when 2ϕ or 3ϕ amplifier combinations are specified, or when amplifiers are coupled together for higher single phase output power. It is also used when the amplifier is used with the Model 5700 Programmer.

MODEL XA-1

The XA-1 module is similar to the XA module described above except that it provides amplitude adjustment from zero to full output. This module is used primarily when it is desired to drive an amplifier with an external signal source or when individual amplitude control is desired for the subsidiary amplifier of a 2ϕ or 3ϕ system.

INTERCONNECTING CABLE SETS

The cables specified below are for the purpose of interconnecting two or more Powertron solid-state series amplifiers for the various output configurations. Each set consists of an input cable assembly and an output cable assembly. The cables and connectors are factory wired to provide any of the standard output voltages for the various combinations of units. Output connector may readily be rewired by the user to provide any of the available full power output voltages. An appropriate cable set is normally supplied with the specified equipment at no additional charge. Additional cables may be purchased as required.

PART#	APPLICATION
CA1	Plug set only for Models 80S, 250S, 350S, or 500S
CA3	Interconnects 3 Model 80S, 250S, 350S or 500S for 3ϕ wye-delta output
CA5	Interconnects 2 Model 80S, 250S, 350S, or 500S for 1ϕ output
CA11	Plug set only for Model 1000S, 1500S, 2000S, or 3000S
CA12	Interconnects 2 Model 1000S, 1500S, 2000S, or 3000S for 1ϕ output
CA23	Interconnects 2 Model 80S, 250S, 350S, or 500S for 2ϕ or 3ϕ open delta output
CA31	Interconnects 3 Model 1000S, 1500S, 2000S or 3000S for 3ϕ wye-delta output
CA36	Interconnects 6 Model 2000S for 3ϕ wye-delta output
CA232	Interconnects 2 Model 1000S, 1500S, 2000S, or 3000S for 2ϕ or 3ϕ open delta output
CA234	Interconnects 4 Model 2000S for 2ϕ, or 3ϕ open delta output

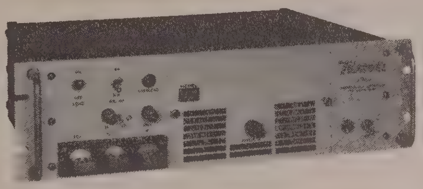
Powertron SOLID STATE AC POWER SUPPLIES

CONSTANT CURRENT AC SUPPLIES



In addition to constant voltage amplifiers a full line of constant current amplifiers is available. The inherent ability of these amplifiers to maintain a preset current through a load whose impedance may vary makes them ideally suited to the testing of ammeters, wattmeters, relays, circuit breakers, current transformers, and other current sensitive devices. These amplifiers may be driven by the plug-in oscillators. All amplifiers are protected for open load circuit conditions.

SPECIFICATIONS

Output Frequency	Determined by plug-in oscillator
Current Regulation	±1% for loads ranging from short circuit to maximum rate load impedance for the respective amplifier.
Output Distortion	Less than 1%

The chart to the right lists the current ranges, compliance voltages, and impedance ranges for the various units available.

Constant current amplifiers may be used with similar outputs in parallel when it is desired to increase the current capacity. Constant current supplies may also be used for 3ϕ wye connected load applications. As the standard output transformers may not always provide the optimum current range and compliance voltage, special output transformers may be supplied to meet user requirements.

Model	Current Range Amps	Max. Compliance Voltage	Impedance Range Ohms

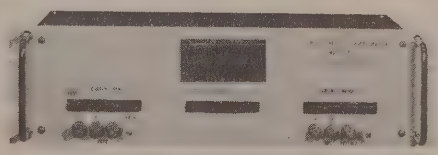
POLYPHASE WATTMETER MODEL 600



FEATURES

- 1ϕ, 2ϕ, and 3ϕ power measurements
- DIRECT DIGITAL READOUT
- HIGH SENSITIVITY — NEGLIGIBLE INSTRUMENT LOSS
- WIDE FREQUENCY RANGE
- AUTOMATIC OVERLOAD PROTECTION
- ANALOG output — BCD output (optional)

The Model 600 is A TRUE THREE—WATTMETER instrument capable of measuring 3 independent loads simultaneously. As such, its operation is not limited to balanced 3ϕ loads, and may be used readily with wye or delta type loads. Front panel switches select the appropriate load or loads to be measured. Applications include laboratory and production testing of synchros, servo motors, 3ϕ motors, and other 1ϕ 2ϕ, and 3ϕ devices.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

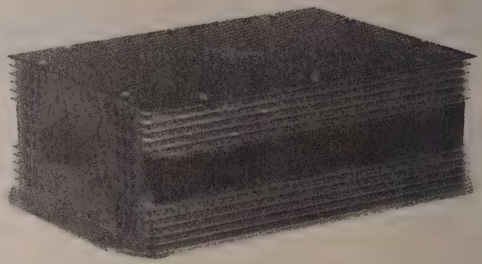
60 Hz/50 Hz STATIC INVERTER



These inverters are particularly applicable as a source of 60 Hz power for the operation of Projectors, Tape Recorders, TV systems, Typewriters, on Aircraft that have a 28 Volt DC electrical system. For applications requiring greater power the inverters can be paralleled for higher output.

The inverters available in various voltages, frequency and power are listed in the table below.

GENERAL SPECIFICATIONS

Input Voltage:	1. 28 VDC ±2 Volts, 14 VDC for SPS-316 2. Withstands 88 Volt Transient for 1 Millisecond
Power Factor:	.8 to 1.0
Amplitude Distortion:	Less than 7%
Wave Form:	Sine Wave except SPS-1308
Phase:	Single
Short-Circuit:	Withstand for 1 minute or longer
Temperature:	−65°F to +160°F (−55°C to +70°C)
Altitude:	45,000 ft.

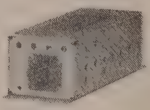
MODEL	OUTPUT VOLTAGE	OUTPUT POWER VA	FREQ. Hz	INPUT VOLTS	INPUT AMPS	WEIGHT LBS. (KG)	SIZE INCHES W x L x H
SPS-206	115 VAC	200	60±1	28 VDC	10.5 DC	14.5 (6.6 Kg)	7¾ x 12 x 4
SPS-306	115 VAC	300	60±1	28 VDC	15.8 DC	18.0 (8.2 Kg)	7¾ x 12 x 4
SPS306B	115 VAC	375	60±1	28 VDC	18.5 DC	18.0 (8.2 Kg)	7¾ x 12 x 4
SPS-305	115 VAC	270	50±1	28 VDC	15.8 DC	18.0 (8.2 Kg)	7¾ x 12 x 4
SPS-3052	230 VAC	270	50±1	28 VDC	15.8 DC	18.0 (8.2 Kg)	7¾ x 12 x 4
SPS-316	115 VAC	300	60±1	14 VDC	32.0 DC	18.0 (8.2 Kg)	7¾ x 12 x 4
SPS-1307	115 VAC	1000	60±1	28 VDC	53.0 DC	24.5 (11.12 Kg)	7¾ x 13¼ x 4
SPS-1308	115 VAC	1000	60±1	115, 3 ph, 400		12 (5.5 Kg)	7¾ x 13¼ x 4

DC TO DC POWER CONVERTER

The KGS ELECTRONICS Model LT-SERIES are pulse width-modulated DC to DC converters that provide regulated power.

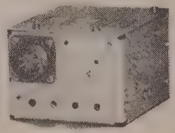
These converters transform an unregulated 28 VDC to a regulated and adjustable DC output via a remote control potentiometer.

The Model LT-SERIES are used to control the light intensity of incandescent bulbs in aircraft instrument lighting when voltage control is required.



LT-50

LT-52A



LT-55

LT-352

MODEL LT-SERIES SPECIFICATIONS

Input Voltage:	28 VDC nom., 20 to 40 VDC.
Output Voltage:	Adjustable with external rheostat or potentiometer.
Regulation:	2% for line, 2% load and 2% temperature.
Output Ripple:	50 mVp-p max.
Altitude:	55,000 ft.
Protection: (Overvoltage)	Output voltage is limited to approximately 125% of rating even though remote control rheostat opens or shorts, or internal failure occurs.
Temperature:	−55°C to +71°C (sufficient cooling required @ +71°C ambient).
Protection: (Overload)	Input and output current pulse when overload exceeds approximately 125% of rating.

MODEL	OUTPUT VOLT DC	OUTPUT AMPS	OUTPUT WATTS	OUTPUT RIPPLE RM*	INPUT CURR. @ 28 VDC	EFFICIENCY % TYPICAL	SIZE (INCHES) W x L x H	WT. (LBS.)

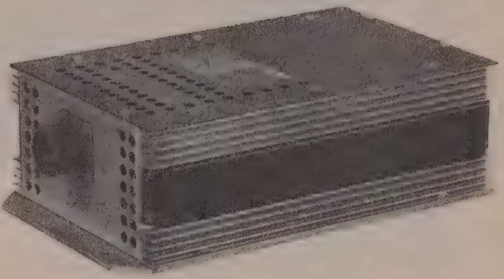
TSO'D 400 Hz STATIC INVERTER

The KGS ELECTRONICS's static inverter utilizes solid state circuitry to convert 28 VDC to 115 VAC, 400 Hz sine wave power. Design features include sine to sine or square to sine wave power conversion permitting lightweight and reliable operation.



GENERAL SPECIFICATIONS

Input Voltage:	20 to 32 VDC
Output Voltage:	115 VAC and/or 26 VAC
Phase/Waveform:	Single/Sine Wave
Frequency:	400 Hz ±1%
Ampl. Distortion:	Less than 7% (3% Typ.)
Power Factor:	.8 to −.95
Input Overvoltage:	Operate up to 37 VDC input while supplying full rated VA output power. Output voltage under this condition is 115 VAC +5%, −7%
Input Transient Protection:	Withstands transients of 88 volts lasting 1 millisecond on the 28 VDC input line
Overload & Short-Circuit Protection:	Withstands without damage or degradation load exceeding 150% of rated output to an output dead short. Inverter delivers rated output on removal of above condition.
Altitude:	45,000 ft.
Temperature:	−64°F to +160°F (−55°C to +71°C)
Humidity:	Tested to greater than 95% for 10 days, temperature was cycled between 75°F to 160°F.
Environmental:	Meets RTCA Paper DO-160 Env. Cat. D2BR---

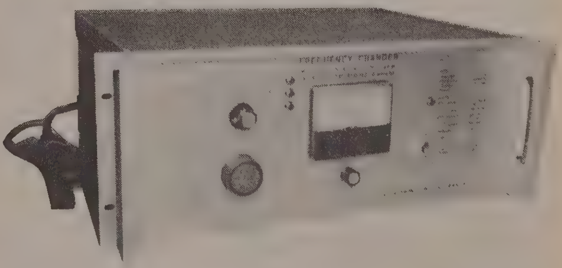
FREQUENCY CHANGER
MODEL SPC-6-( ) SERIES
50 to 60 Hz to 400 Hz

KGS ELECTRONICS' solid state frequency changer converts 115 VAC 50 to 60 Hz to 115 VAC 400 Hz sine wave power. These frequency changers are suitable for use on test benches or labs to check radars, compasses, gyros, synchros, fuel flow gauges, etc. SPC-6-750 is single phase output. SPC-6-1000-3ϕ is three (3) phase output. Output is monitored via analog meter and is adjustable from 105 to 126 VAC line to neutral. Amplitude distortion is typically 1½%.



MODEL	INPUT	OUTPUT / OUTPUT VA	OUTPUT FREQUENCY	SIZE IN. W x D x H	WT. (LBS.)

Systems are available with solid state (one-quarter cycle) transfer switches or electro-mechanical switches.

Many options are available.

Nova TAURUS™ systems are backed by nationwide service.

For more information call or write for catalog.

1φ Sine Wave INVERTERS 3φ
50 Hz. 60 Hz. 400 Hz.
OVER 50 MODELS

Nova solid state INVERTERS are designed for commercial applications requiring high quality, durable equipment for continuous operation at 100% of rating. INVERTERS are available from 125VA to 50KVA.

Nova INVERTERS are available with a wide range of input voltages from 12VDC - 750VDC.

All common output voltages are available at 50 Hz., 60 Hz., or 400 Hz.

Nova INVERTERS are currently in use in communications (telephone, TV and microwave), automotive testing, utilities, the petroleum industry, aircraft, the steel industry and in rapid transit.

Call us or our local representative for catalog information.

1φ FREQUENCY CHANGERS 3φ
50 Hz. 60 Hz. 400 Hz.
OVER 50 MODELS

Nova solid state FREQUENCY CHANGERS are designed for continuous operation at rated power. They are available from 125VA to 50KVA.

They operate from any input frequency between 48-440 Hz. and produce a regulated sine wave with a stability of ±0.5% (±0.05% optional).

All common input voltages (input and output, single and three phase) are available.

These devices are used in computer systems testing, aircraft, the petroleum industry and in communications.

Call us or your local representative for catalog information.

Quality Solid-State Linear AC POWER

PACIFIC
POWER SOURCE CORP.

300KVA to 250VA

AC POWER CONVERSION

Pacific's power conversion equipment is specifically recommended as an AC power converter for generation of 50, 60, and 400 Hz power. The converted power is extremely pure, very highly regulated and virtually immune to load induced cross-talk. Typical applications are generation of U.S. and Non-U.S. power forms for facilities power. This equipment is designed for long term unattended use. It is highly reliable and easy to maintain through module exchange by relatively untrained personnel.

LINE CONDITIONER/NOISE ELIMINATOR/UPS

Pacific's AC Power Sources are also used as line conditioners due to their excellent noise rejection properties. While most line conditioners can only reject a small amount of line disturbances, you can expect to eliminate virtually all line disturbances effecting the most sensitive loads. These systems provide clean, highly regulated power, free of load induced transients because they are designed to respond to any step load change in 50 microseconds, usually less.

Adding an UPS support cabinet to the AC power source ensures that your most critical load will be immune to all power line disturbances, including complete loss of line for extended periods.

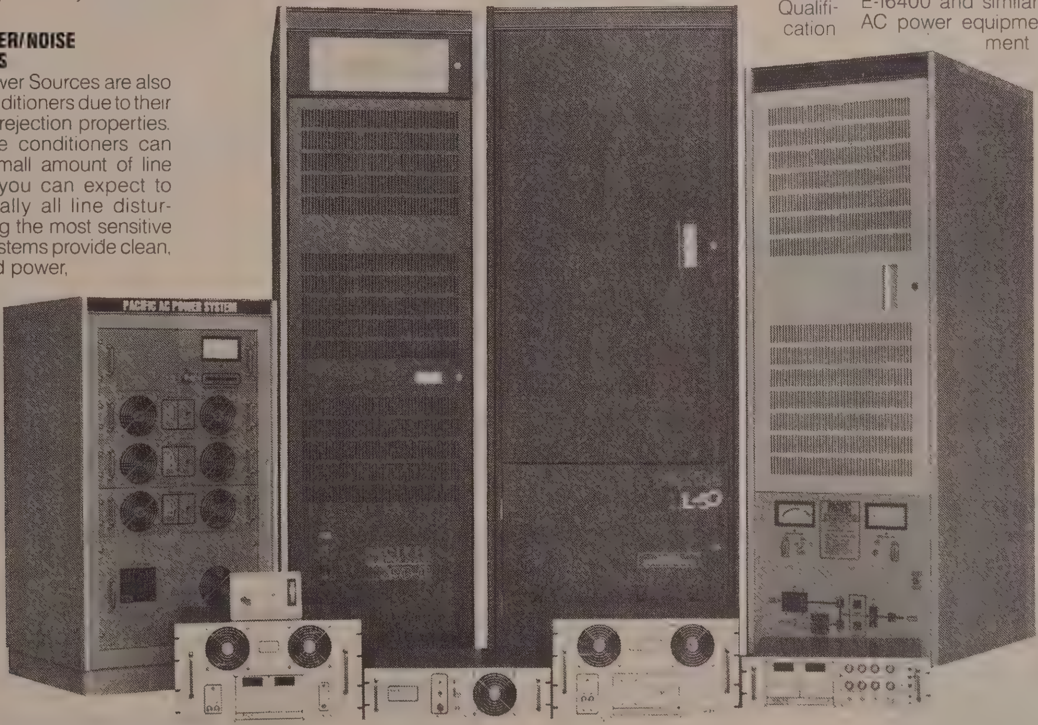
TEST POWER/PRODUCTION BURN-IN

Applications requiring multi-functional AC power at both fixed and variable frequency are ideal for this family of power equipment. Pacific's equipment is designed for use as a broad band linear AC power source; applications requiring highly reliable operation over virtually all power frequencies (and even below 47 Hz and above 500 Hz) are standard on most of Pacific's equipment.

Production testing and burn-in of equipment for shipment abroad is a common application for AC power systems from Pacific. Qualification testing of electronic equipment demands an AC power source with quality and reliability. Quality Solid-State Linear AC Power is standard with *all* Pacific AC power equipment.

PROGRAM POWER & TRANSIENT SIMULATION

When used in conjunction with the MODEL 8037 Transient Generator, Pacific's systems serve as an excellent device for simulation of envelop power transients in accordance with MIL-STD-704, MIL-STD-1399 or MIL-E-16400 and similar standards for AC power equipment. The equipment is usable with any external wave - form generator to produce power with simulated harmonic distortion.



GENERAL PERFORMANCE SPECIFICATIONS

- Power Forms: Virtually all input and output AC power forms are available on most systems.
- Load Power Factor: No load power factor restrictions, leading or lagging.
- Regulation: Line (0.1% max. for 10% change), Load (0.25% at the sense point).
- Load Transient Response: 50 μs max. (Typ. 30μs).
- Output Distortion: 0.75% THD (Typ. 0.5%)
- Output Isolation: Fully isolated from input and frame ground.
- Output Protection: Integral electronic current limiting with auto-recovery.
- 1Ø/3Ø Operation: Some models are user selectable by key locking switch
- Failure Isolation System: Failed devices are auto-disconnected without output voltage waveform disturbances.
- System Efficiency: 85% Large Systems. 60%-71% Small Systems
- Parallelable: Systems are parallelable and serve as building blocks for high power level systems; most are user parallelable by your electrical personnel

G-SERIES
Multi-Function AC Power Sources 6-90 KVA

Model 390-G Model 360-G Model 330-G

APPLICATIONS

- AC Frequency Changer
- Facility Power
- Program Power & Transient Simulation
- Line Conditioner / Noise Eliminator / UPS
- Variable Frequency Test Source

CONTROL CHARACTERISTICS:
"H" Type Systems — Fixed frequency 1ø or 3ø switch selectable operation. Output frequency — specified by the user within the range of 47-1000 Hz. Accuracy ±0.1% ±0.5 Hz. Stability ±0.1%

"C" Type Systems — Variable frequency 1ø or 3ø switch convertible operation. 1 continuous variable range of 47-500 Hz. dial accuracy ±1% stability 0.25%. 3 pushbutton selection preset frequencies of 50, 60, 400 Hz. Accuracy ±0.1% ±0.5 Hz. Stability ±0.1%. NOTE: Pushbutton switches are equipped with a lockout feature to prevent accidental changes. External input — one per phase, fully isolated. Allows system to operate as 3 independent amplifiers (3 phase mode).

Standard Models are complete systems ready for use, including cabinets, oscillators, input circuit breakers and output contactors

→SECONDARY OUTPUT TRANSFORMER: Indicate **"T"** for 0-250 (L-N) or leave blank for 0-125V (L-N).

→CONTROL CHARACTERISTICS: Indicate either **"H"** or **"C"**

UG-SERIES UPS OPERATION: Each cabinet has provisions for UPS operation. Only adapters, external batteries and battery charger are required. Ask for form **"U"** input.

FEATURES

- **Parallelable** by user for up to 90 KVA output
- **Easy Installation** locate anywhere, just connect input service
- **Fast Response** 50 μs to full step load changes
- **No Load P.F. Restrictions** output will drive any P.F. leading or lagging full power to ±0.7 P.F. loads
- **High Peak Current** up to 300%
- **Fail Safe Circuits** patented auto-disconnect & current limiting with auto-recovery
- **Use & Service Training** by factory specialists
- **Field Proven** linear technology in wide spread use for over 10 years
- **1ø / 3ø Switch Selectable Output** by user and key lockable
- **Tamper Proof Doors** with front filtered air intake
- **Front Access** for convenient maintenance & module exchange

Ordering Information for G-Series & UG-Series

1. Select the basic model from the chart above. Consider your your control needs (**"H"** models for precision fixed frequency operation — **"C"** models for variable frequency; and both allow selectable 1ø - 3ø control). If **"H"** model is chosen, specify ouytput frequency.

2. Specify input service to the unit, e.g. Volts line to neutral for 3ø WYE, Volts line to line for 3ø DELTA, and frequency.

3. If secondary output is desired, add Suffix **"T"** to model number, and specify secondary output voltage form.

34.5"D
WEIGHT: 900 lbs.

130-UG SERIES

Complete Single Cabinet Self Contained UPS 2-6 KVA

The 130-UG series is a self contained single cabinet UPS for low power (2-6 KVA) single phase applications. These units are especially designed for the most sensitive computer and EDP loads. Output frequency is fixed at user specified value 50-400 Hz.

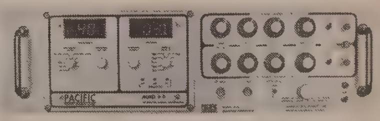
Transient Generator Model 8037

A most useful extension to any PACIFIC AC power source is the Model 8037 transient signal generator. The Model 8037 variable frequency, transient generator is capable of simultaneously simulating both AC line voltage and frequency transient excursions. These excursions are capable of simulating the various transient envelopes of MIL-STD-1399, MIL-E-16400 and MIL-STD-704A.

FEATURES

- Precision digital sine wave formation, single or three phase
- Separate time base controls for voltage and frequency excursions
- Plus or minus transients capability
- 20Hz to 2KHz frequency range - full range manual adjustments of transient magnitude, rise time, duration, fall time, and execution
- Precision monitor output for external charting of transients
- Analog programmable frequency and/or voltage excursions



MODEL 8037
DIMENSIONS: 5¼" H x 19" W x 17"D
Rack Mountable

L-Series

Solid State AC Power Systems 25-250 KVA

PACIFIC'S "L" SERIES equipment is the latest generation of solid state AC power converters. It is superior to motor-generator sets, and other types of solid state units because of its great versatility, economy and reliability. The basic "L" series unit is the 3240-L.

As a frequency changer the user is assured that the output is always precisely regulated in frequency, voltage and waveform purity, regardless of variations in input power or load currents.

As a line transient eliminator, the "L" Series equipment is much superior to isolation transformers, since it not only eliminates common mode noise, but line spikes of as much as 100% of line voltage of several millisecond duration.

Multiple cabinets can be paralleled for higher capacity. Standard units can be combined up to 5 cabinets for 250 KVA capacity. Higher capacity systems can be assembled, if desired, by the use of special drivers and junction equipment.

MODEL 3240-L
50KVA AC Power Source
DIMENSIONS: 78"H x 27"W x 30"D
WEIGHT: 1600

Case Size A — 5¼''H x 19''W x 19''D
Case Size B — 10½''H x 19''W x 19''D

The "K" series family — covers the power range 250 to 4500 VA single and three phase, in light-weight one-man-portable units. A variety of plug-in signal generators are available for adaptation to either laboratory variable, or fixed parameter OEM application.

FEATURES:
- Lightweight one-man-portable systems
- 1ø or 3ø capability
- Precision AC Power
- Direct coupled output

APPLICATIONS:
- Variable frequency test source
- O.E.M.
- Motor control
- Local AC source

OSCILLATOR SELECTION for K-SERIES and E-SERIES

The K and E-Series Systems are available with a variety of interchangeable oscillator plug-ins as listed below:

PACIFIC
POWER SOURCE CORP.

"D" SUFFIX DIGITAL OSCILLATORS

The "D" module is recommended for all variable 3 phase applications, and single phase applications requiring a high degree of control versatility.

The digital signal generator forms both single and three phase vectors from a common high frequency clock. It produces sinusoidal waveforms of exceptional purity and stability over a wide range of frequencies.

Frequency Control: Two continuously variable ranges 20-200 and 200-2000 Hz. plus three precision fixed frequencies at 50, 60, 400.

NOTE: Units with internal autoformer; Model numbers with suffix D will have the low frequency range restricted to 45 Hz and the high frequency range restricted to 500 Hz.

Amplitude Control: Continuously variable O to V max. Three phase units include balance controls for each phase with a range of ±10%.

Phase Separation Accuracy: — 1% max. (3 ø units only)

Signal Distortion: 0.25% max.

The "D" signal generators include two 3½ digit 0.6" LED readouts. The first monitors frequency continuously, the other is switch selectable to read volts of any phase. Special frequency control ranges and digital control interface can be supplied to users special requirements.

Amplitude Stability: 0.01% per °C
Frequency Stability: 0.01% per °C
Freq. Meter Accuracy: 1% ±1 digit
Freq. Meter Resolution: 0.1 Hz on 20-200 range
1.0 Hz on 200-2000 range

Voltmeter Function: Nine position function switch permits user to monitor volts any phase to neutral, and volts phase to phase.

Voltmeter Accuracy: 1% ±1 digit

"V" SUFFIX VARIABLE OSCILLATOR

The "V" module consists of a FET stabilized, dual range variable, linear oscillator. Its two frequency ranges are centered around the popular power frequencies, continuously variable by multiturn control and calibrated frequency dial. The module includes a panel voltmeter which monitors output voltage.

This module is recommended for single or three phase power sources where only narrow range frequency control is required.

Frequency Control: Two continuously variable ranges, 45 to 75 Hz and 300 to 500 Hz. (1ø only); 47-500 Hz on 3ø models.

Dial Accuracy: 1%.

Frequency Stability: 0.01 per °C.

Amplitude Control: 0 to V max. by panel control.

Voltmeter Accuracy: 3%.

Distortion: 0.25% max.

External Input: Allows the power source to be used as an amplifier only Gain = 100. BW = 20-2000 Hz full scale. 5-20,000 Hz small signal input impedence 600 ohms. (1ø model only).

"F" SUFFIX FIXED OSCILLATORS

The "F" suffix module provides a single fixed frequency, specified by the user. High stability frequency determining components are used, as well as a FET stabilized amplitude control loop. This module is recommended for fixed parameter, low cost OEM, and all unattended use applications requiring high long term stability.

Panel voltmeter (3% accuracy) is included in both single and 3 phase version.

Frequency Control: Fixed as specified by user, within the range 20-2000 Hz

Amplitude Control: O to V max. by panel control with lockout.

Frequency Stability: 0.01% per °C.

Amplitude Statility: 0.003% per °C.

Distortion: 0.25% max.

Phase Angle Accuracy: 1° (3ø units only)

Balance Controls: ±5% control range, adjustable through front panel (3ø units only).

"E" SUFFIX INTERNAL FIXED FREQUENCY OSCILLATOR

The "E" suffix module provides an economical single fixed frequency specified by the user. Only amplitude control is provided.

Frequency Control: As specified by user within the range 47-500Hz.

Amplitude Control: O to V max. by panel control with locknut.

Frequency Stability: 0.1% long term.

Accuracy: 0.25%

"X" SUFFIX AMPLIFIER ADAPTER

The "X" suffix adapter allows any power source to be used as a wideband linear amplifier. Input signal is applied through a front panel BNC connector to a small signal audio transformer. Input is isolated from chassis and amplifier output.

Gain = 25

Bandwidth = 20-2000 Hz full power
5 Hz - 20,000 Hz Small Signal

Input Impedence = 50 ohms

AC Voltage Regulators

Complete protection against voltage sags and surges

Three-Phase Model
24 kVA and 30 kVA

Features

- 98% efficiency
- Lightweight and compact
- Cool and quiet
- Fast response
- Low output impedance
- Low distortion
- Attractive design

Powermark AC Voltage Regulators are the smallest, lightest, most efficient, most distortion-free voltage regulators commercially available. Powermark AC Voltage Regulators completely eliminate those computer problems associated with high and low voltage conditions, such as extensive downtime, memory loss, and expensive, time-consuming reprogramming.

Benefits

- *Fast Response:* Powermark AC Voltage Regulators monitor line voltage and respond to fluctuations in less than one cycle of operating frequency.
- *Low Distortion:* Powermark Regulators provide less than 0.1% total waveform distortion. (Other line regulators produce input waveform distortion and distort output waveform up to 5%. This distortion can significantly degrade equipment performance.)
- *Input Power Factor:* Powermark Regulators reflect the power factor of the load almost exactly. This eliminates the need for expensive power factor correction equipment which is sometimes required with other types of regulators.
- *Wide Input Frequency Range:* Powermark AC Voltage Regulators operate over a wide range of input frequencies (47-63 Hz). This enables them to provide constant, steady voltage to sensitive equipment even when input frequencies are outside the tolerances of other types of regulators.
- *Compact:* Powermark AC Voltage Regulators are one-half the size and weight of other regulators.
- *Inrush current tolerance:* can handle the inrush currents associated with motor/drive startup.

Specifications

Line Voltage Regulation:
±7% maximum for Series 77000
±5% maximum for Series 75000
±3.3% maximum for Series 73000

Efficiency:
98% minimum

Output Distortion:
No spikes; adds less than 0.1% total harmonic distortion

Response Time:
1 cycle maximum

Output Impedance:
Less than 2% full-load impedance

Operating Frequency:
47-63 Hz, sine wave

Load Regulation:
Less than 1% from no load to full load

Operating Temperature:
0°C to 50°C

Temperature Coefficient:
0.05%/°C maximum

SERIES 77000 AC VOLTAGE REGULATORS are intended for use in applications where power lines are subject to severe low voltage (brownout) conditions. Output voltage is regulated to within ±7% of nominal.

Single-Phase Models

Model Number	Power Rating	Output Voltage	Input Voltage	Approx. Weight lb/kg
77101	1 kVA	117 VAC	85-125 VAC	25/11
77101-30	1 kVA	117 VAC	85-125 VAC	25/11

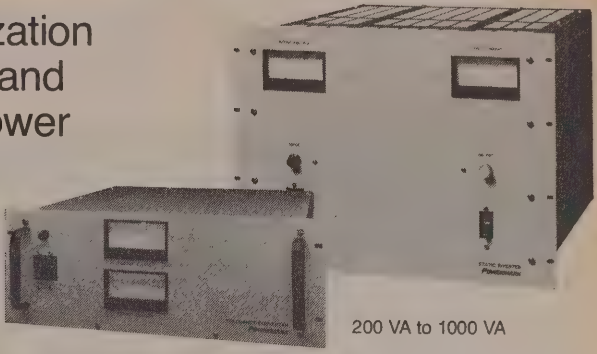
Inverters and Converters

For voltage regulation, frequency stabilization and frequency conversion of AC power; and for efficient, reliable conversion of DC power into sinusoidal AC power.



200 VA to 1000 VA

Inverters

Powermark Series Z Inverters (200 VA to 2 kVA) provide reliable conversion of DC power into highly regulated sinusoidal AC power. They feature ferroresonant transformer simplicity, high reliability, excellent isolation, current limiting capability and very good waveform shaping.

Series X Inverters (2 kVA to 10 kVA) use *pulse-width modulation* technology and harmonic-suppressing transformer filters to provide excellent output regulation.

Frequency Converters

Powermark Series Z Frequency Converters (200 VA to 2 kVA) are used to change available frequency to regulated outputs of 50 Hz, 60 Hz or 400 Hz. They offer the same operational advantages as the Series Z Inverters.

Series X Frequency Converters (2 kVA to 10 kVA) are used to convert available frequency to regulated output voltages of 50 Hz or 60 Hz. These converters offer the same operating features as the Series X Inverters.

Specifications

Input Protection:
High and low voltage reverse polarity protection.

Static Regulation:
Line regulation ±1% maximum for line variations between low line and high line at half load.
Load regulation ±2% maximum for load variations between no load and full load at nominal line.

Frequency Stability:
Series Z, ±0.5% of fixed frequency (±0.01% optional); Series X, ±0.5% of fixed frequency (±0.05% optional).

Output Protection:
Overload and short-circuit protection.

Total Harmonic Distortion:
Less than 5% at full load and nominal line.

Operating Temperature:
Series Z, −10°C to +55°C;
Series X, 0°C to +55°C

External Phase and Frequency Synchronization:
Optional for Series X.

Recovery Time:
50 milliseconds for 20% load change for Series X; 100 milliseconds for 50% load change for Series Z.

Input Frequency Ranges:
Series Z, 45 to 65 Hz
Series X, 48 to 420 Hz

Inverters

Power Rating	Product Series	Input Voltage	Output Frequency	Output Voltage	Size Code	Approx. Weight lb/kg

Static Transfer Switches

Static Transfer Switches are designed to give Powermark Series X or any similar inverters automatic reverse transfer capability, thereby providing an inexpensive source of uninterruptible power. When used in combination with these types of inverters, a transfer switch automatically connects the critical load to an alternate power source whenever the primary source falls below a preselected level. Static Transfer Switches are compact, easy to install and are available in power ratings from 2.5 kVA to 10 kVA.

Specifications

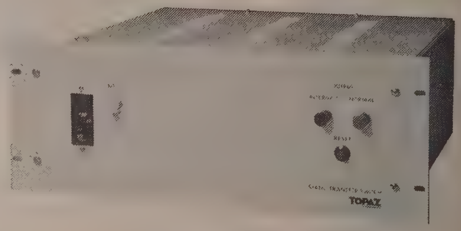
Frequency Range:
47-63 Hz

Cooling:
Natural convection

Mounting:
Standard 19-inch relay rack

Forward Transfer Time:
Manual, 25 milliseconds typical

Reverse Transfer Time:
Typically 4 milliseconds or less



5 kVA Static Transfer Switch
Model 3168

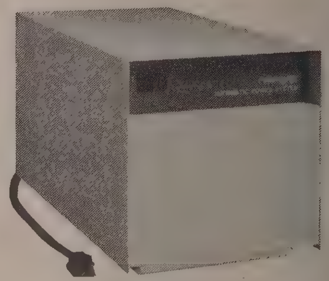
10 kVA	**	230 VAC	210-230 VAC	50A	Internal to Series X Inverter	

**Consult factory for system model number.

NOTE: Static Transfer Switch is for use with any single-phase inverter equipped with external frequency synchronization and phase synchronization.

Automatic Power Systems

300 VA of square wave AC power in the event of primary power failure



300 VA

Model Numbers 85000-1 and 85000-2 include maintenance-free batteries

Features

- UL Listed Models
- Rugged Construction
- Compact Size
- High Efficiency
- Simple Installation
- Long Life and High Reliability
- Short-Circuit and Overload Protection
- Reverse Polarity Protection

Powermark square wave Automatic Power Systems protect critical equipment against losses of primary AC power. They are ideal for equipment that can withstand a short power interruption during transfer from the primary power source to the UPS inverter output. Typical transfer time is 4 milliseconds for Series 85000 models and 15 milliseconds for Model 9234.

AC POWER LINE CONDITIONING EQUIPMENT

RTE technology brings you AC Power Line Conditioning products that keep your computer or other critical equipment running smoothly throughout a wide variety of power line disturbances. Our products will always keep you in power because we keep our design simple. We use the minimum number of conservatively rated parts. The results of this simple logic are MTBFs from 50,000 hours to over 100,000 hours, depending on the product you select to solve your specific power problem.

Uninterruptible Power Systems

Single and Three Phase, 500VA to 50KVA, 50 and 60Hz

RTE UPS provide complete protection against blackouts, brownouts, spikes, surges and sags, in short, any disturbance in your power line. From our tiny, silent 500VA MICRO-UPS to our 50KVA Model 6000 with Digital Information System, we have the right UPS for your specific needs. All standard 60Hz models are available with stock to 3-week delivery; 50Hz models are stock to 6 weeks.

Super Isolation Transformers

Single and Three Phase, 250VA to 15KVA, 50/60Hz

RTE's Super Isolation Transformers (SIT) provide a low-cost solution to the most common power line problem, noise. Surveys of power quality indicate up to 88% of the disturbances are noise. RTE's SITs eliminate common-mode noise and greatly reduce transverse-mode noise. All standard models are in stock, and come with a 5-Year warranty.

AC Line Conditioners

Single and Three Phase, 150VA to 60KVA, 50 and 60Hz

RTE's AC Line Conditioners eliminate power line noise and regulate AC line voltage to within the tight limits modern computers require. In fact, they solve all power line problems except outages (only an UPS will handle those). RTE has a complete selection of AC Line Conditioners using either of two technologies: rugged, reliable Ferroresonant, or compact, silent Electronic. All popular sizes are available with stock to 2-week delivery.

Need to know more about AC Power Problems and the alternate technologies available to solve them? Send for RTE's **AC Power Handbook.** Written in layman's language, copies are available at our cost of $4.00 each.

Note: This book is yours FREE if our representative delivers it to you personally.

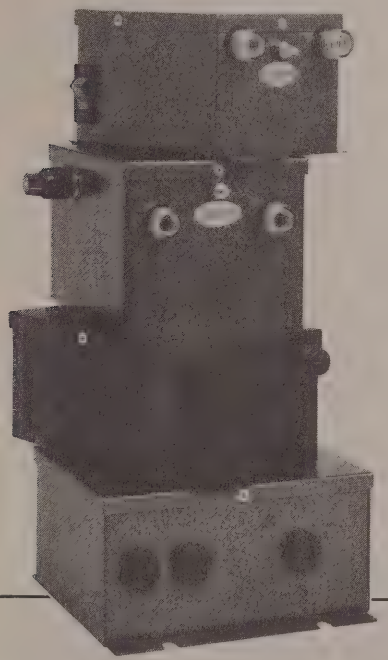
THE MOST RELIABLE POWER SUPPLIES FOR HIGH VOLTAGE DC POWER

- Delivery from stock
- Standard or custom design
- Regulated, short circuit and arc protected
- All units available — 120/220, 50/60 Hz
- Special input voltages available

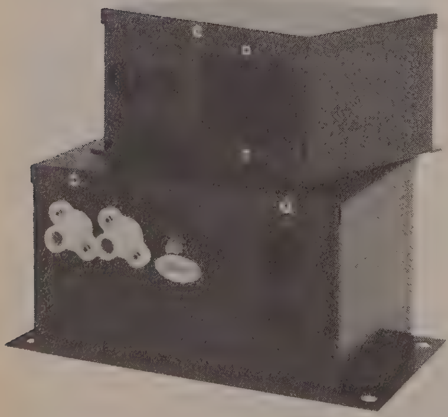
S&H manufactures a wide range of High Voltage Power Supplies, both in stock and custom designs. Our Application Engineers can work with your special requirements and match them to either a cataloged unit or they will be pleased to quote to your exact specifications.



SINGLE OUTPUT VOLTAGE

MODEL NUMBER	INPUT VOLTAGE	OUTPUT VOLTAGE	POWER OUTPUT
DC-1205	120V/60 Hz	5000 VDC	20 VA
DC-1206	120V/60 Hz	6000 VDC	20 VA
DC-1207	120V/60 Hz	7000 VDC	20 VA
DC-1208	120V/60 Hz	8000 VDC	20 VA
DC-1209	120V/60 Hz	9000 VDC	20 VA
DC-12010	120V/60 Hz	10,000 VDC	20 VA
DC-12012	120V/60 Hz	12,000 VDC	20 VA
DC-12014	120V/60 Hz	14,000 VDC	20 VA
DC-12016	120V/60 Hz	16,000 VDC	20 VA
DC-12018	120V/60 Hz	18,000 VDC	20 VA

Units are also available for 230 and/or 50 Hz. The output of above models are isolated. Either output terminal may be grounded for positive or negative applications.



DUAL OUTPUT VOLTAGE

MODEL NUMBER	PRIMARY INPUT	POLARITY	OUTPUT VOLTAGE
DC-1205/9	120V/60 Hz	Positive	9000/5000
DCN-1205/9	120V/60 Hz	Negative	9000/5000
DC-1205/10	120V/60 Hz	Positive	9500/5000
DCN-1205/10	120V/60 Hz	Negative	9500/5000
DC-1205/11	120V/60 Hz	Positive	10,500/5000
DCN-1205/11	120V/60 Hz	Negative	10,500/5000

Above units also available for 230V and/or 50 Hz.

All S&H power sources utilized epoxy molded ferroresonant transformers and are therefore line and load regulated.

Ideal for use in precipitators, microfiche copiers, plain paper copiers and many other electrostatic charge and discharge applications.

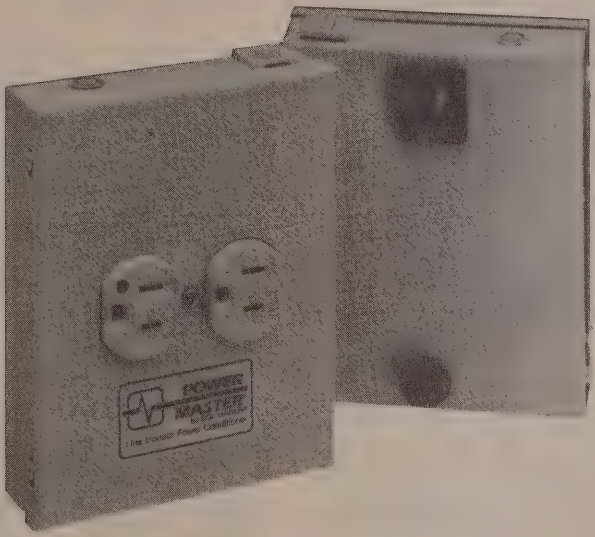
AVOID EQUIPMENT FAILURE!



UL

NEW FROM SGL WABER®

The electricity that powers your sensitive electronic testing equipment is "polluted." Filled with voltage spikes and noise interference that can cause premature circuit failure and incorrect readings.

Protect your data and equipment. Purify your power with a new POWER MASTER™ Line Monitor Power Conditioner. Ready to use — just plug in. Free 28 page catalog featuring 15 models.

†Consists of three enclosures. Size shown is for each individual enclosure. Weight listed is approximate total. Detailed wiring and mounting dimensions are shown on Form DD-1180.

Wye/Wye is shown, however, Delta/Wye units are also available. For details, contact the factory.

50 Hz CLTs are available for all sizes shown.

Shape Magnetronics, Inc. Line Tamer™ ferroresonant transformers condition power to solve 99% of power problems encountered by computers and other sensitive equipment. The ferroresonant design provides instant response to line or load changes, protects against both transverse mode and common mode noise, and requires no step-up or step-down transformers.

Computer Line Tamer™ Specifications

VA RATINGS: 70 – 250 KVA
UL LISTING: all sizes to 7.5 KVA
REGULATION: ±3% for input range of +10%, –20% of nominal voltage
NOISE REJECTION: common mode better than 120 db
– transverse mode better than 60 db
VOLTAGE SPIKE: attenuation of 250:1
HARMONICS: 140 VA – 7.5 KVA is approximately 3%.
10 KVA and up is approximately 5%.

CUSTOM MAGNETICS

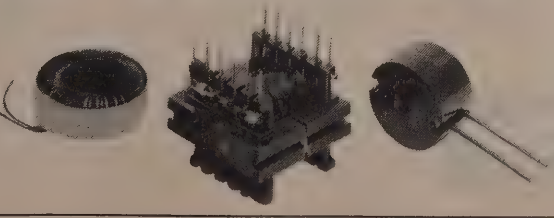
Shape Magnetronics, with facilities in Chicago and Phoenix, also offers complete custom design and manufacturing capabilities for specialty transformers and magnetic-electronic devices.
Prototypes can be delivered within one to three weeks.

Special CVT Transformers

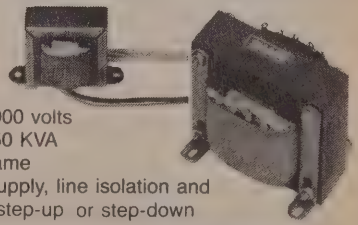
Capacity:	15 VA to 250 KVA
Input Range:	Up to ±20%
Line Regulation:	±1%
Frequency:	50, 60 or 50/60 Hz
Applications:	DC power supplies, relays, solenoids, heaters, filaments and other loads that are insensitive to harmonics

Ferrite Transformers

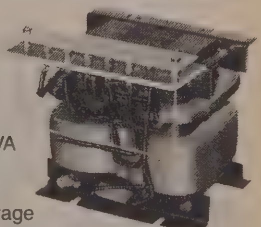
Applications:	High frequency switching power supplies



Power Transformers



Input and output voltage ranges:	Up to 6000 volts
Capacity:	Up to 250 KVA
Construction:	Open frame
Applications:	Power supply, line isolation and voltage step-up or step-down



Mercury-Vapor Ballasts

Capacity:	200 watts to 25 KVA
Input Range:	±10%
Output Voltages:	Up to 6000 volts
Line Regulation:	±2% of lamp wattage
Frequency:	50, 60 or 50/60 Hz
Application:	Power supply and starting circuit for mercury arc lamps

SHAPE
MAGNETRONICS, INC.

901 DUPAGE AVENUE • LOMBARD, IL 60148 • 312 620-8394 • TWX 910-991-2352

Sola Mini UPS

True UPS:

The Mini UPS is always between the AC line and the critical load.

Inverter Design:

Multiple pulse width modulation with switching transistors.

Complete Brownout and Noise Protection:

The rectifier charger powers the inverter at all times; line noise and transients are isolated from the load. The AC line never directly powers the load.

Regulated Output:

The Mini UPS output voltage is regulated to ±3% when operating from the AC line as well as when operating from the internal battery.

Sine Wave Output:

The output waveshape is a sine wave with less than 3% of any single harmonic and less than 5% total harmonic distortion (THD).

Overload Capability:

The Mini UPS is designed to handle load starting surges and fault clearing by providing 125% overload for 30 seconds, 150% overload for one second and 200% into a short circuit with two automatic restrikes before shutdown.

Maintenance Free Battery:

A long life, maintenance free, sealed lead acid battery is built into the unit to provide uninterrupted inverter operation (without a switching relay) when the AC line fails.

SOLA
MINI UPS

Battery Backup:

If the Mini UPS is operated at less than full load the battery backup time will be extended. If operated at full laod and additional backup time is needed, add on battery packs are available. See Table 4.

Battery Protection:

Automatic shut-off circuitry disconnects the battery during prolonged power outages to prevent battery damage. Upon return of the AC input, the battery is automatically recharged (without operator action) to 95% of capacity in less than 10 times the discharge time.

Controls and Indicators

The front panel on/off switch controls the inverter but does not affect charger operation to insure that the battery is always fully charged. The inverter "on" lamp, "charger on" lamp and "line present" lamp provide quick visual status indications.

Compact Design:

The compact design, input line cord and output receptacle permit simplified installation without the need of rewiring or remodeling. Whether installed with the initial equipment or added later, installation is as simple as plugging in a radio.

Deluxe Models:

The deluxe models (Table 2) incorporate automatic inverter restart and a battery supplying power alarm circuit. The automatic inverter restart allows the inverter to restart once AC input power is restored after a shutdown due to a discharged battery. The battery supplying power alarm provides an isolated set of relay contacts to indicate that the inverter is being powered by the battery as in the case of an AC line failure.

High Inrush Models:

The high inrush models (Table 3) are available for applications requiring large inrush currents. These models will supply up to 6 times rated current for very short durations, as when powering a capacitive input load, such as a power supply.

(1) This unit is equipped with an internal battery charger, which offers a shorter recharging time.

(2) Total reserve operating time (including the Mini UPS internal battery) at full load output. Operation at less than full load will greatly extend the reserve time.

Mechanical Specifications:

Input Line Cord:	For 120 VAC Models, 6 ft. with NEMA 5-15 P plug type For 220 & 240 VAC models, 6 ft. with NEMA 6-15 P plug type
Output Receptacle:	For 120VAC models, NEMA 5-15R duplex receptacle For 220 & 240VAC models, NEMA 6-15 R duplex receptacle
Controls & Indicators:	On-Off Switch Amber "Inverter On" Lamp Amber "Charger On" Lamp Amber "Line Present" Lamp Input Fuse Inverter Enable Switch (Screwdriver operated)
Dimensions: (inches)	10.5 H x 12.0 W x 19.0 D

Environmental Specifications

Operating Temperature:	0°C to 40°C
Operating Humidity:	0% to 95% (without condensation)
Operating Altitude:	0 to 5000 ft. (above 5000 ft. consult factory)
Storage Temperature:	0° to 65°C

Sola Standby Power Source

The Sola S.P.S. is an economical standby power source, designed to protect personal, micro, and mini-computers from AC line disturbances and failures. It provides clean, regulated AC power to your critical load when the commercial AC line fails or drops 15% below nominal. The unit contains a sealed, maintenance-free battery that will operate the inverter until the AC returns, or until you complete your computer activity. When the AC is present, it supplies filtered power to the load and maintains the battery in a charged condition.

Electrical Specifications

Input

- 120 VAC, +10%, −15%, 60Hz ±10%
- 220/240 VAC +10%, −15%, 50Hz ±10%

Output

- 120 VAC, ±3%, 60Hz ±1%
- 220/240 VAC ±3%, 50Hz ±1%
- Sine wave, less than 5% T.H.D.
- 130% overload for 3 seconds
- Current limited inverter for short circuit protection
- Line to inverter transfer, 4 to 10 milliseconds at −15% of nominal voltage
- inverter to line retransfer, 2 to 4 milliseconds at −10% of nominal voltage
- Noise attenuation at 10kHz and above, 40 db minimum at 100kHz

Mechanical Specification

- 0°C to 40°C operating temperature
- 0% to 95%, without condensation, operating humidity
- 0 to 8000 ft. operating altitude
- 6 foot power cord with NEMA 5-15P plug for 60Hz, European or British standard for 50Hz
- NEMA 5-15R duplex receptacle for 60Hz, European or British standard for 50Hz
- 15″ high, 7″ wide, 18.5″ deep cabinet
- Maintenance-free, sealed, lead acid battery
- Alarm relay, dry Form C contacts through a ¼″ phone jack

A UNIT OF GENERAL SIGNAL GS

SOLA

1717 BUSSE ROAD, ELK GROVE VILLAGE, IL 60007
Phone: 312/439-2800 Telex 28-0538

The Sola SPS Offers The Ultimate In Standby Power Protection, With All Of These Features:

- Noise and transient protection when the AC line is present.
- Fast response, ¼ to ½ cycle, when the AC line fails.
- Inverter overcurrent protection, even into a short circuit.
- Simplified installation and operation, just plug it in and turn it on.
- Compact, lightweight design, with hands off operation, including maintenance free battery.
- Relay contact and audible alarm for user annunciation of AC line failure.
- UL listed.

Model Table

Model	Output Power (VA)	Input/Output Voltage (VAC)	Input/Output Frequency (Hz)		Typical Reserve Time (Minutes)		Net Weight (Lbs.)
				½ Load	¾ Load	Full Load	
SPS-400 A	400	120	60	30	20	12	65
SPS-400 B *	400	220/240[1]	50	30	20	12	67
SPS-400 C **	400	220/240[1]	50	30	20	12	67
SPS-800 A	800	120	60	30	20	12	87
SPS-800 B *	800	220/240[1]	50	30	20	12	89
SPS-800 C **	800	220/240[1]	50	30	20	12	89

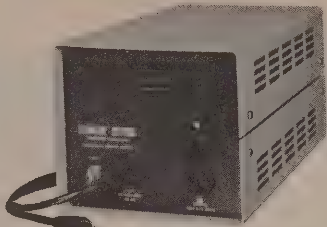
*Equipped with British type plug and outlet. **Equipped with European type plug and outlet.

[1] 50Hz unit shipped set for 240 VAC. Instructions included for 220 VAC operation.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

STABILINE® AUTOMATIC VOLTAGE CONTROLS

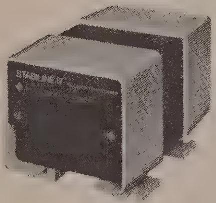


STABILINE® Computer Regulators

Maintain properly conditioned voltage to computers and other voltage critical equipment. Simple cord and plug connection to voltage source; two grounded receptacles for connecting equipment. Provide output of 120 volts rms ±3%, 60 Hz over an input range of 95 to 130 volts rms. Also provide 60dB minimum common-mode noise rejection to help prevent computer errors, loss of information and other noise related problems.

STABILINE® Transient Voltage Suppressors

Suppress momentary voltage spikes on power lines to prevent damage to sensitive equipment. Used to protect medical equipment, computers, word processors, electronic instrumentation, microprocessor based equipment, communications equipment, industrial controls and similar apparatus. Benefits include virtually instantaneous response time, transient reduction of 40dB (100 to 1) per frequency decade above 5kHz, efficiency of 99% at full resistive load and regulation less than 1%. Will attenuate in the same manner regardless of where on the sine wave or in which direction the transient is applied and do not rely on an absolute magnitude before attenuation occurs. Available in 120 and 240 volt models in ratings from 15 to 60 amperes maximum load current.

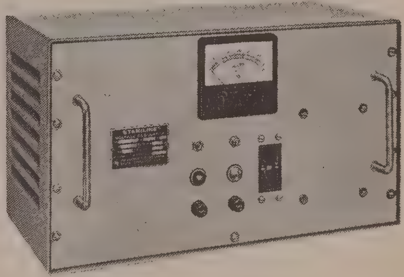


SVR Series STABILINE® Automatic Voltage Regulators

Highly efficient, extremely fast solid-state automatic voltage regulators. Very light in weight when compared with many units of similar kVA ratings. Features include virtually zero waveform distortion, very low internal impedance, negligible phase shift, insensitivity to load power factor and virtually no effect on system power factor. Efficiency is 95 percent at 60 hertz. Models in the SVR Series are available from 0.75 to 4kVA.

STABILINE® Transient Suppressors/Voltage Regulators

In addition to correcting for high or low voltage from power sources, units attenuate transverse-mode (line-to-line) noise and transients. Transient voltage attenuation of 40dB from 5 to 50 kHz. Provide the all-around protection needed by computers, business machines, word processors, microprocessor-based equipment and other voltage sensing devices to reduce or eliminate disruptions, data errors, loss of information and equipment failure. Types SVRS88101C and SVRS88102C are also available with cord/plug sets.



STABILINE® Isolation Transformers

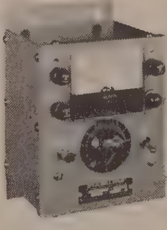
Multi-shielded, ultra-isolation transformers exhibiting low capacitance between primary and secondary windings. Ideal for isolating sensitive equipment and attenuating common mode noise voltage generated by power consuming sources. Common mode noise attenuation is 126dB. Available in four models from 0.5kVA to 5kVA.

Electro Mechanical STABILINE® Automatic Voltage Regulators

Utilize solid-state control circuits, motor-driven POWERSTAT Variable Transformers and buck-boost transformers to regulate line voltage. Widely used in industrial applications or where constant output voltage is required with zero waveform distortion. EMT Series types are offered with ratings from 2.3 to 118kVA; EMS Series in ratings from 25 to 300kVA. The speed of response of EMT and EMS Series units is slower than for some types of automatic voltage regulators, but is sufficiently fast for the majority of applications.

Instantaneous Electronic STABILINE® Automatic Voltage Regulators

Highly accurate, fast-correcting units featuring solid-state circuitry. No vacuum tubes, motors, blowers or relays are used. Benefits include very high accuracy, fast response, low distortion, high efficiency (up to 95 percent) and wide operating frequency range. Models are available in ratings from 0.5 to 15kVA.



STABILINE® Full Range Regulator Controllers

Designed for use with any motor-driven POWERSTAT® Variable Transformer to provide full range regulation of a-c voltage, a-c current or d-c voltage. Output voltage will remain within a 2-volt band when used with 120 volt units and a 4-volt band when used with 240 volt models. Output current can be maintained within ±1% of maximum current setting with user supplied current transformer and Superior Electric transformer T6340. Type FR501BDC and user supplied d-c power will provide regulated d-c voltage.

Uninterruptible Power Supply

Powerstar™—Lighter, Cooler UPS Units

The Powerstar uninterruptible power supply from Triad ensures continuous power supply for computers, word processors and a wide range of microprocessor-based controls and equipment. And in the event of power failure or lowered voltage, the Powerstar uninterruptible power supply can save you time and money…with battery back-up time to prevent loss of entries or memory…so your operator can re-enter the job on file.

For unsurpassed quality in an uninterruptible power supply, compare the Powerstar models with any other!

Powerstar
TRIAD-UTRAD

60 Hertz

Catalog Number	VA Rating	Approx. Unit Wt. (lbs.)
KU-411	250 VA	145
KU-611	500 VA	155
KU-811	750 VA	160
KU-1011	1000 VA	170

Rack-Mounted Units
1500 VA and 2500 VA rack-mounted Powerstar uninterruptible power supplies are available.

General Specifications

Input frequency—60 or 50 Hz ±3 Hz.

Input Voltage—120 or 220 VAC (95—130 or 180—260) 1 Ø.

Input Protection—Line fuse, EMI filtering and rectifier current limiting.

Output Voltage—120 or 220 VAC, 1 Ø at nominal frequency and resistive load.

Line and Load Regulation—±3% battery operation, ±1% normal operation.

Output Frequency—60 or 50 Hz ±0.5% battery operation.

Output Waveshape—Sinewave, total harmonic distortion 3% at full load max.

Output Overload Capability—150% inverter shutdown, starts restrikes.

Output Protection—Automatic shutdown after three restrikes, inverter shut off and reset provision—alarm.

Operating Temperature—0—40°C.

Type of Operation—Continuous (no interruption).

Bypass Static Switch—maximum 4 milliseconds reverse transfer time.

Power Factor Load—0.8 leading to 0.8 lagging.

Input Linecord—For 120 VAC models, 6 ft. with NEMA 5-15 plug type.

Output Receptacle—For 120 VAC models, NEMA 5-15R duplex receptacle.

Lamp Designations—"Line On," "Inverter On," "Inverter Failure," "Battery On."

Battery Back-Up Time—

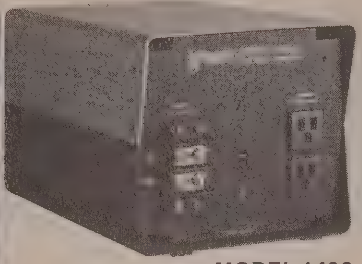
250 VA	45 min.
500 VA	30 min.
750 VA	15 min.
1000 VA	7 min.

Battery Back-Up—If the UPS is operated at less than full load, the battery back-up time will be extended. If operated at full load and additional back-up time is needed, add-on battery packs are available.

Dimensions—$20^1/_4$" deep, 15" wide, $11^1/_8$" high.

DC-to-AC Inverters

MODEL 1404



MODEL 1402

Wilmore®
ELECTRONICS CO., INC.

45 TO 1000 WATTS OF AC POWER FROM DC POWER SOURCES

- HIGHLY EFFICIENT
- FREQUENCY STABLE
- CONSERVATIVELY RATED
- MECHANICALLY RUGGED

Wilmore manufactures solid-state transistor-switching dc-to-ac inverters to power ac loads of up to 1000 volt-amperes from a dc power source. These inverters are characterized by conservative electrical and thermal design, and a great deal of attention has been paid to mechanical layout and structural integrity to ensure trouble-free operation in harsh electrical and mechanical environments. Users can choose between inverters with three different ac-output-voltage waveshapes to more closely match the inverter to the user's load requirements.

Many loads can be adequately powered with a square-wave output. Most small motors, lighting loads, heating and other resistive loads, and some electronic equipment are compatible with this waveshape. Inverters which provide a square-wave output are generally simpler in design and more efficient in operation than those which provide a more refined waveshape. Our Model 1124A and Model 1172 are square-wave inverters featuring high efficiencies and a clean output waveshape. In addition, the Model 1172 is a modular inverter, and two can be easily paralleled in the field using an optional paralleling cable set. The Model 1172 also provides a 2:1 output power surge capability for powering loads with high inrush current.

Some electronic instruments, small computers, chart recorders, and audio and video tape recording equipment require a more refined waveshape than a square-wave. Our Model 1057 and Series 1400 inverters provide a three-level-step waveshape having peak and rms voltages that approximate those of a pure sine wave while maintaining operating efficiencies comparable to square-wave inverters. This waveshape is intended to ensure compatibility with sensitive electronic equipment for which sine-wave power would normally be specified. The Model 1057 inverters provide a regulated output voltage, and the Series 1400 inverters feature a 2:1 output power surge capability. For rare instances where true sine-wave power is required, our Model 1081 provides a closely regulated, low-distortion sinusoidal output with excellent frequency stability.

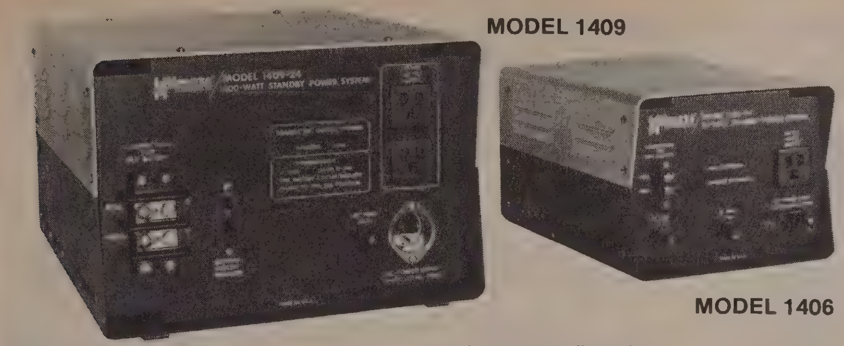
Uninterruptible Power Systems

MODEL 1409



MODEL 1406

Wilmore® ELECTRONICS CO., INC.

RELIABLE PROTECTION AGAINST AC POWER FAILURE

- POWER RATINGS TO 1000 WATTS
- HIGHLY EFFICIENT FOR LONGER BACKUP TIMES
- FREQUENCY-STABLE INVERTER
- 2:1 POWER SURGE CAPABILITY

Serious problems may result when commercial ac power is unexpectedly interrupted to sensitive loads such as point-of-sale terminals, PABX and communications equipment, small computers, or security systems. Wilmore's point-of-use uninterruptible power systems protect these critical loads from severe brownouts and loss of commercial power.

There are two general approaches to the design of an uninterruptible power system (UPS). One method processes commercial power through a battery charger, batteries, and a dc-to-ac inverter, always powering the user's equipment from the UPS's internal inverter. The other method is to power the user's equipment from the inverter only upon failure of commercial power. The first method is inherently more expensive initially and is more costly to operate; it requires both the battery charger and inverter to be sized to the user's full power requirement and all of the output power must undergo ac-to-dc rectification followed by dc-to-ac inversion. Wilmore UPS's use the second method, making them less expensive to purchase and allowing very low operating costs with much higher system efficiencies. Each UPS on this page (except the four Model 1252-SQ types) incorporates an inverter which provides Wilmore's unique three-level-step approximation to a sine wave for powering virtually any load within its output-power rating. In addition, each UPS (except the Model 1252-ST and Model 1406 types) provides a 2:1 output power surge capability for powering loads with high inrush current.

See Our Pages in Section 4000
. DC-to-DC CONVERTERS
PULSED LASER POWER SUPPLIES

Automatic Transfer

Interruption of commercial power causes Wilmore Uninterruptible Power Systems to switch to internal operation in a few milliseconds. The Series 1252 UPS transfers in approximately 25 milliseconds and the Series 1400 UPS switches in approximately 15 milliseconds. Upon restoration of normal ac power, the UPS switches back to supplying the load directly from the commercial line and the internal battery charger begins to recharge the battery.

Batteries

Standby power for the system is provided by external batteries which are maintained at full charge by the built-in battery charger. Backup time is determined by the rating of the battery bank employed by the customer. Units are available for either 12- or 24- Vdc batteries. Batteries are not supplied with Wilmore's UPS units.

Battery Charger

The battery charger, supplied as an integral part of each Wilmore UPS, is a precision current-limited charger which float charges the battery at a pre-established level whenever commercial AC power is present and the charging current demand by the battery does not exceed the current-limit level. The float-charge voltage is factory adjusted to 13.65 Vdc for 12-volt batteries and 27.3 Vdc for 24-volt batteries. The maximum charging current level for each model is given in the table below.

Protection

All models are protected against output overloads and against accidental reversal of the dc input-voltage polarity. An under-voltage sensing circuit helps protect the batteries from possible damage resulting from excessive discharging.

Availability

All models are normally shipped from stock in the 115-Vac 60-Hz versions. Allow two weeks delivery for 230-Vac 50-Hz models. Contact our sales department for information about other standard features and custom-designed units.

DESIGN AND OPERATIONAL FEATURES

INPUT—Wide selection of AC 60 Hz voltages.

OUTPUT—60 Hz voltage of essentially utility grade regulated over full load and battery voltage range.

VOLTAGE REGULATION—±10% 10-100% load .8 to 1.0 Power Factor.

FREQUENCY REGULATION—1%.

COMPUTER LOGIC CONTROL—Programmed at the factory, the computer logic cards control the battery charger, monitor line voltage and battery voltage, control inverter and regulate the system in normal and emergency mode.

SURGE CURRENT LIMITING—Limits current drawn by charger during recharge period to maximum safe value.

OVERLOAD PROTECTION—Internal circuitry and specially selected thermal and magnetic tripping devices protect the charger, inverter and batteries from overloads and short circuits.

RESTORATION DELAY—Maintains inverter "on" for approximately 8 seconds after normal power is restored. Insures stable voltage to load. Reduces surge on line power circuits during unstable interval when utility is attempting to come on line and start heavy equipment.

SHORT CIRCUIT PROTECTION—Circuitry allows inverter to start full incandescent loads with attendant high starting current, without hesitation. Automatically protects the inverter against load shorts or overloads.

CONSERVATIVE RATING—All Standby Solid State Generators are conservatively rated to allow for minor errors in load calculation or connection.

PERMANENT INVERTER CONNECTION—The inverter is permanently connected to the battery. It is energized at all times to insure maximum reliability and minimum start-up time.

DATACON
EVERYTHING YOU NEED FOR WIRE WRAPPING SERVICE.

- ☐ You provide the panel and wiring information, and dataCon can do everything else. If you prefer, dataCon can even furnish the panel of your choice.
- ☐ Schematic to machine-wired panel in one week.
- ☐ Prototype or production capacity.
- ☐ Automatic and semi-automatic wrapping.
- ☐ Wide-ranging assembly capabilities.
- ☐ Computerized testing for wired panels and PCB's.
- ☐ Round-the-clock operations for on-time deliveries.

Wire wrapping is our only business. And we've become so good at it we're the largest contract wire wrapping company in the world. We've shown many of the biggest companies in electronics that we can do their wire wrapping better and at less cost than their own departments. Let us show you.

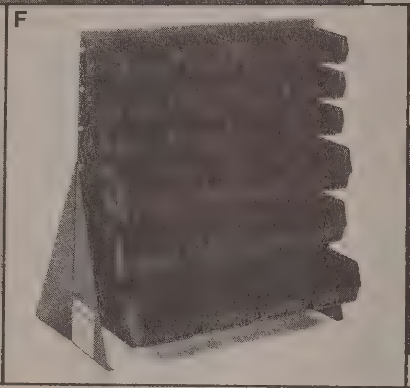
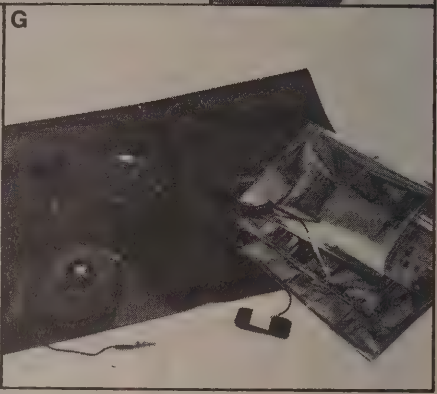
E
911 Heated Ionized Air Blower
3M





Rule #1 Handle all static-sensitive components at a static-safeguarded work area.

A. Safeguard Work Station Kit provides the materials needed to create a static-safe work area. The kit adapts easily to most production operations, including fabrication, assembly, storage, kitting and testing areas. Kit includes:

1. **Conductive Floor Mat** with ground cord, available in 5 colors.
2. **Conductive Table Pad,** available in 5 colors.
3. **Conductive Charge-Guard® Wrist Strap.**
4. **Conductive Ground Cord** that connects table top to floor mat and completes grounding system.
5. **3M Model 911 Ionized Air Blower.**

B. Charge-Guard® Wrist Strap dissipates static charge found on personnel – before static damages sensitive devices. The wrist strap features a new band made of stainless steel fibers woven with an elastic nylon. The result is a highly conductive, corrosion-resistant elastic band that gently and comfortably conforms to the wrist for reliable contact to ground. Comes with a one megohm resistor.

To order, please specify wrist strap model number and size.

Model	Description	Wrist Size
2066	5′ coil cord	Small, up to 6½″ circ. (camel) Large, over 6½″ circ. (navy blue)
2067	4′ straight cord	Small, up to 6½″ circ. (camel) Large, over 6½″ circ. (navy blue)
2071	10′ coil cord	Small, up to 6½″ circ. (camel) Large, over 6½″ circ. (navy blue)

C. 8200 Series Table and Floor Runners drain static charge from personnel and ground conductive objects. Available in 40 ft. rolls and 5 colors.

Model 8230 Series Table Runner includes 2′ x 40′ runner, two 15′ ground cords, two female snap fasteners and ten swivel connectors to terminate wrist straps. Model 8220 Series Floor Runner includes 4′ x 40′ runner, two female snap fasteners and two 15 ft. ground cords. **New Charge-Guard® Static Protective Hard Laminate.** Now available in 3 colors. For workstation table surfaces.

D. VELOSTAT® Non-corrosive, Conductive Foam provides physical and static protection for sensitive components. Keeps leads at equal potential when inserted in the foam and shunted. Improved formula eliminates corrosive chlorides and sulfides even under elevated temperatures and humidities over a long period.

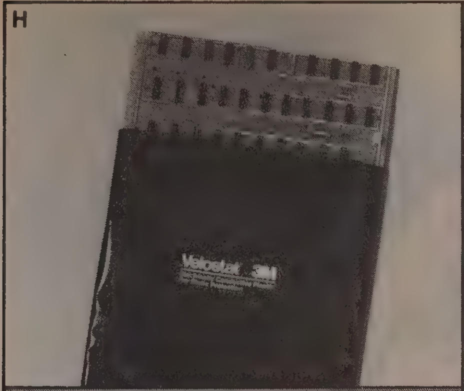
Type 2900 low density and 2910 high density; thickness: ⅛″, ¼″, ⅜″, ½″, ¾″, 1″. Sold in 24″ x 36″ sheets. ⅛″ and ¼″ available in 2 ft. x 50 ft. rolls.

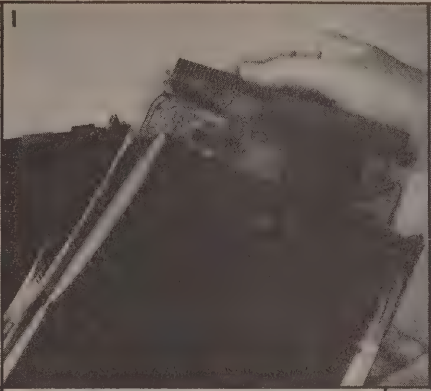
E. Model 911 Heated Ionized Air Blower creates a highly efficient, but low velocity supply of ionized air to evenly blanket a 2′ x 4′ work surface. The ionized air neutralizes static charge on non-conductors such as tape, polyester clothing and polystyrene cups. The Model 911 is purchased, but its static neutralizer element, Model 220, is leased annually.

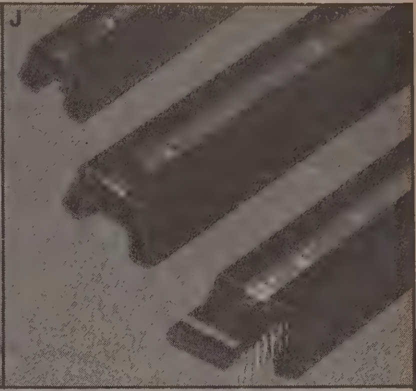
F. VELOSTAT® Conductive Parts Bins and Assembly Stands create an organized, grounded system for assembly. The bins are designed with a hopper front for easy access and identification. They are held by a convenient bench-top rack. The bins are made of conductive plastic, they will never rust or corrode. You can customize the arrangement of parts bins on the assembly stand to meet the needs of each assembly station.

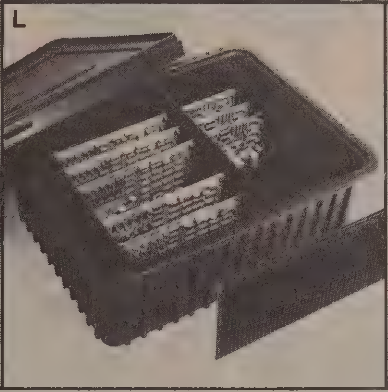
Model	Description	Size
4018	STAND	17⅝″ x 18″
4451	BIN	3″ x 3½″ x 1½″
4452	BIN	4″ x 3½″ x 2½″
4453	BIN	6″ x 3⅜″ x 2½″
4454	BIN	9″ x 4⅜″ x 4⅜″
4455	BIN	8″ x 8¾″ x 6⅜″
4456	BIN	11⅞″ x 6⅝″ x 6⅜″
4457	BIN	11⅞″ x 14¾″ x 6⅜″

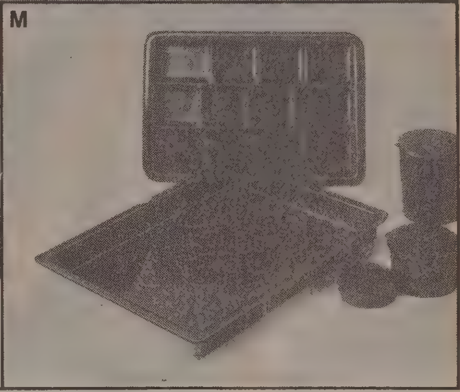
G. VELOSTAT® Conductive 8012 Portable Field Service Kit protects equipment from static damage during field repair. Included is 10 mil. film working surface, ground cord and Charge-Guard Wrist Strap.











Rule#2 Transport all static-sensitive components in static-shielding containers or packages.

H. VELOSTAT® Opaque Electrically Conductive Bags, made of VELOSTAT Conductive Film, provide shielding from static by safely enveloping sensitive devices and boards in a humidity-independent Faraday cage. The bags' effectiveness is unaffected by humidity, age and many chemicals. Available in many sizes. Also manufactured to your specifications. All VELOSTAT Bags are heat-sealable.

I. 3M Transparent Static-Shielding Bags with identification printed on them, feature high-strength metallic-coated polyester film creating an electrostatic shield. The polyester is laminated to a heat-sealable, anti-static polyethylene inner layer that prevents static charge generation inside the bag. Custom manufactured sizes available. Standard sizes (in inches) for 3M Transparent Static-Shielding Bags and VELOSTAT Electrically Conductive Bags above.

Transparent Static-Shielding Bag Sizes		
3″ x 5″	8″ x 10″	15″ x 18″
4″ x 4″	8″ x 12″	18″ x 18″*
4″ x 6″	10″ x 12″	4″ x 24″*
5″ x 8″	10″ x 14″	10″ x 24″*
5″ x 10″	11″ x 15″	4″ x 26″*
6″ x 8″	12″ x 16″	10″ x 26″*
6″ x 10″	12″ x 18″	4″ x 30″*
8″ x 8″	14″ x 18″	10″ x 30″*

*Special order for VELOSTAT

J. Static-Shielding Coextruded Shipping Tubes provide protection from internal and external static fields. Standard sizes for 300 mil. 400 mil and 600 mil. dual in-line packages. Lengths up to 25 inches. Custom sizes and configurations on request. Tubes feature viewing windows and pinholes..Specify pins or plugs with order.

K. Custom Containers and Packages are created to fit your product requirements. Provide physical and static protection. All custom specifications are accepted on a quotation basis. Our capabilities include: design engineering, injection-molding, vacuum-forming, die-cutting, corrogated fabrication, film lamination and film converting.

L. VELOSTAT® Adjustable Electrically Conductive Tote Boxes combine conductivity with rigidity. These totes are injection-molded for strength with a hard formula of VELOSTAT Electrically Conductive material.

Unlike ordinary plastic, VELOSTAT totes are truly conductive and shield static-sensitive parts from static charges that could blow or degrade them.

Adjustable dividers allow you to customize tote boxes to hold several differently sized P.C. boards.

Adjustable dividers complement models 4432, 4435 and 4438. Slip-in dividers and covers are available for all models.

Tote Box Dimensions (Inside)	
4415	9 3/16″ x 6 9/16″ x 4½″
4423	14⅞″ x 9¼″ x 3″
4425	14⅞″ x 9¼″ x 4½″
4428	14⅞″ x 9¼″ x 7½″
4432	20⅜″ x 15⅛″ x 11½″
4435	20⅜″ x 15⅛″ x 4½″
4438	20⅜″ x 15⅛″ x 7½″

M. VELOSTAT® Trays and Containers, made of VELOSTAT Electrically Conductive Plastic, are ideal for static-safe storage, kitting and shipping. Models 4010-20 and 4061 are available in a variety of shapes and sizes.

Why MEA® Is Preferred...

MEA

MECHANIZED ELECTRONIC ASSEMBLY

COMPLETE SERVICE

Automated PC Board Assembly & Test

Fast
- ■ 120,000 sq. ft. floor space
- ■ over 2.5 million assemblies/yr.

Accurate
- ■ 10,000 sq. ft. test dept.
- ■ incoming test, in-line test, board test, systems test available

Economical
- ■ save on component purchasing thru our volume buying power
- ■ lower cost-per-completed board thru our mechanized assembly technique

High-volume or low-volume, get action today from MEA

Call for a quote, or arrange for a visit to our plants in Binghamton, NY and *Crystal Lake, IL*

Universal

The San-Del instrument cleaning systems by M.P. ODELL CO.

Model 16 Cleaner

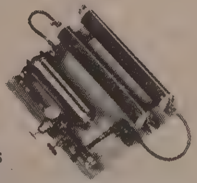
Reduce service and calibration time by keeping instruments clean. Instruments cleaned in Model 16 are easier to calibrate and retain their calibration accuracies longer. The cleaning solution, SAN-DEL No. 2 Technical Cleaner Concentrate is diluted with water and easily applied using our unique cleaning gun. This spray effectively cleans components and wiring, reaching the inaccessible areas. After spraying with the solution the equipment is then spray rinsed with water and excess moisture is removed with an air gun. Thorough drying in a low temperature oven, such as the SAN-DEL Model 46 or Model 58 is recommended.

SPECIFICATIONS

Overall Dimensions	47″H., 32¼″W., 32¼″D.
Material	Welded Steel
Finish	Light Grey Enamel
Net Weight	245 lbs.
Shipping Weight	305 lbs.
Power	115V, single phase, 60 Hz, 360 Watts
Air Source	50 to 200 psi Approx. 6 cfm at 50 psi required
Water	Intake water and drain required
Exhaust	Outside venting recommended, 4″ × 5″ duct flange provided

Specifications subject to change without notice.

Model WF-X-12 Water Conditioner

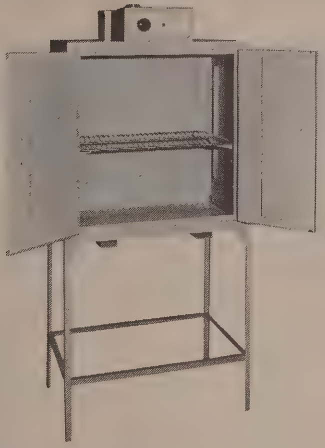


For use in areas with excessive mineral content in the water supply, San-Del conditioners use convenient replaceable deionizing cartridges to remove normal minerals. A prefilter removes suspended particles down to the 20 micron size.

All necessary hose and hardware are provided for easy mounting on the side of San-Del cleaning units.

WF-X-12 WATER CONDITIONER SPECIFICATIONS

Shipping Weight	50 lbs.
Width	18½″
Length	31½″
Depth	6½″



Model 46 Oven

The circulation of warm air up to 150°F around the equipment speeds drying and maintains a low temperature gradient throughout the oven. The power input is limited to prevent the oven from reaching an excessive temperature condition that could damage expensive electronic equipment. There are no working contactors or thermostatic elements to malfunction or otherwise cause an overtemperature condition. All controls and the blower-heater assembly are top mounted to prevent localized excessive temperatures.

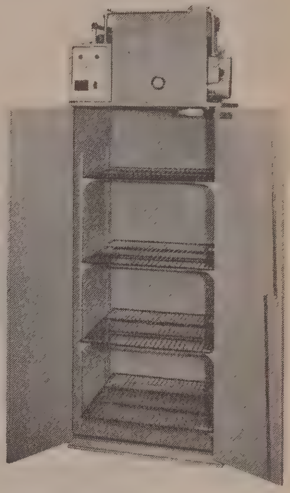
SPECIFICATIONS

Overall Dimensions	45½″H., 34″W., 22″D.
Useable Space	13.5 cubic feet
Material	Cold Rolled Steel Welded Construction
Finish	Baked Light Grey Enamel
Shelves	Heavy duty, one with each oven Additional shelves available
Power Requirements	120V, 1 ph, 50 to 60 Hz 1480 Watts, Max.
Blower	3000 rpm, direct drive, 120V, shaded pole
Temperature	Continuously adjustable from Selector Warm to High Settings establishing nominal oven temperatures from 120° to 150°F. at an ambient room temperature of 72°F.
Heater Protection	Shuts off all power if blower fails to operate.
Net Weight	183 lbs.
Shipping Weight	232 lbs.

San-Del No. 2 Technical Cleaner

- For use with San-Del Model 16 Cleaning Unit
- Formulated for cleaning electronic equipment
- Rapidly removes dirt, dust, oily residue and other leakage causing contaminates
- Safe for materials used in electronic and electrical equipment
- Safe for operating personnel — Non-toxic — No flash point — Biodegradable
- Deoxidizes and brightens switch and wiper contacts
- Economical concentrate form — intended for use with ordinary tap water. To be diluted 5 parts water to 1 part concentrate

San-Del No. 2 is available in cartons of 4 single gallon plastic containers and 55 gallon drums.



Model 58 Oven

The Model 58 Oven offers the same features as the Model 46 with the added advantage of a very large capacity. Equipment is quickly and thoroughly dried by the circulation of a large volume of warm air up to 150°F through and around the instruments.

SPECIFICATIONS

Overall Dimensions	93½″H., 32″W., 32″D.
Usable Space	70″H., 30″W., 28″D.
Construction	Double wall—1″ fiberglass insulation
Material	Cold Rolled Steel
Finish	Light Grey Enamel
Shelves	Heavy duty. Two with each oven. Additional shelves available.
Net Weight	580 lbs. approx.
Shipping Weight	725 lbs. approx.

ELECTRICAL SPECIFICATIONS

Power requirements: 230V, 60 Hz single phase

Maximum input power: 3200 watts

Main blower: 1150 cfm; 1140 rpm, direct drive, capacitor start, 230V motor, rubber mounted.

Purge air blower: 3000 rpm, direct drive, shaded pole, 230V motor.

Input power connection: Terminal block provided in control box.

Input power switching: Hydraulic-magnetic, 3 pole circuit breaker.

Over-temperature switch: 150°F factory set. Adjustable in the field for higher or lower maximum oven temperatures. Trips circuit breaker and cuts all power to oven if set over-temperature is reached.

Air flow switch: Trips circuit breaker and shuts off all power to the oven in the event of main blower failure, thus protecting heater bank from burn-out.

Temperature range selector: Six position switch. Establishes proper drying temperatures (120°F to 145°F) under ambient room temperature conditions of 60 to 100°F.

Temperature indicator: Inert gas-filled bulb type.

Door switch: Trips circuit breaker and shuts off all power to oven when door is opened.

S H ...THE MOST RELIABLE POWER SUPPLIES FOR

STATIC NEUTRALIZERS

ION GENERATORS

S & H units meet UL & CSA standards. Models are available with Line and Load regulation, many meet FCC 80-148/27114 Docket #20780.

These are the workhorses and the most often duplicated models in the S & H product line. Ranging from 3 to 8 KV, they power ionizing bars and grids used to combat static electricity. The most common size of these compact units is only 4½″ long, 2⅞″ deep, and 3½″ wide. All are current limited to 5 milliamperes maximum for all combinations of input and output voltages.

The following models are available for primary voltages from 120 Volts to 550 Volts, 50/60 Hz, and outputs from 4000 Volts to 8000 Volts.

MODEL NUMBER	INPUT VOLTAGE	OUTPUT VOLTAGE
M-1205	120V	5000V
M-1208	120V	8000V
M-2305	230V	5000V
M-2308	230V	8000V
R-1205X	120V	5000V*
R-1207XL	120V	7000V*
T-1204	120V	4000V**
T-1207	120V	7000V**

* Units are both Line and Load Voltage Regulated and will meet FCC Specifications as covered in Docket #20780.
** Line and Load Regulated.

S & H Industries Inc., a leader in miniature hi-voltage AC supplies now manufactures a line of hi-voltage low current DC power supplies. These supplies range up to 25 kilovolts and currents to 10MA. Ideal for use in ION generators, precipitators or duplicating machine applications.

S & H offers complete engineering design and application assistance for your specific requirements. Contact S & H today for more detailed information as well as a copy of our latest catalog featuring the entire S & H product line.

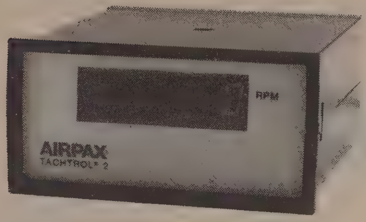
Tachometers and Magnetic Pickups



Tachtrol® 2 – Speed/Rate Monitor

A single input digital instrument, this speed/rate monitor offers fast-response, high-precision monitoring. Measured values are displayed in engineering/units: RPM, FPM, frequency or other values. Rugged, easy to set up, yet costs less than competitive models.

Features:

- Single-channel precision speed or rate monitoring.
- Period mode measuring system.
- Five-digit auto-ranging .56" LED display; full or partial auto-ranging with leading zero suppression. Updates twice per second.
- Active or passive sensor input; accepts any pulse output device, magnetic digital pickup.
- Meets MIL-810C shock and vibration.

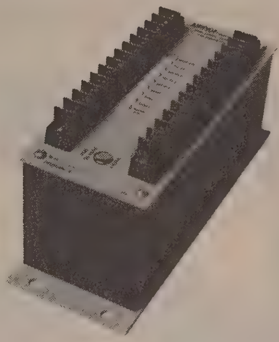
1700
RPM
AIRPAX

Tachtrol® 3 – Dual Input Digital Tachometer

Single or dual channel instrument, this computing tachometer measures input frequencies and displays the resulting quantities in RPM, FPM, % Draw and other rates. A unique method of setting conversion factors and instrument functions allows easy configuring or altering at any time.

Features:

- Measures speed or frequency (2 Hz to 30,000 Hz).
- Active or passive pickup inputs.
- Auto ranging LED or LCD displays.
- Meets MIL-810C shock and vibration.



Series 300 – Analog Tachometer

A precision control tachometer to accurately monitor shaft RPM, flow rates, and other industrial applications. With up to 4 relay setpoints, it can be used for start-up, overspeed shutdown, or other process controls. Many setpoint options are available for special uses.

Features:

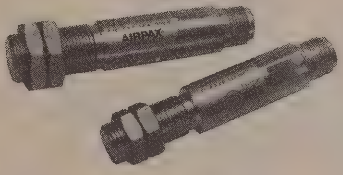
- Accept signals (sine wave, pulse, etc.) from many sensor types.
- Filtered 0-1mAdc meter output, proportional to input frequency, is standard.
- Signal input limiting to 150V is available.
- DPDT relay contact configuration is an option.
- 4-20mAdc industrial output, proportional to input frequency is optional.

1-0001 and 1-0005 – Passive Magnetic Pickups

Convert mechanical motion to AC voltage. The frequency of the AC signal is exactly proportional to the speed or RPM.

Features:

- No moving parts.
- Wide temperature range.
- Stainless steel housing.
- 1-0005 is UL listed.



4-0070 and 4-0036 – Active Magnetic Pickups/Zero Velocity

Either pickup can be used to sense the speed of any rotating machinery, including motors, generators, turbines, compressors, conveyors – wherever speed or RPMs need to be monitored.

Features:

- Low cost.
- 12V ± 2Vdc power supply.
- −25°C to +70°C operating temperature range.
- 4-0036 is UL listed.
- DC to 10K Hz frequency.

8-0006 – Low-Cost Magnetic Speed Pickup

Stainless steel housing and one-piece construction, this pickup has interior section coated with epoxy resin to resist both oil and moisture.

Features:

- Wide operating and storage temperature range: −67°F to +225°F.
- 190-volt minimum output (P-P).
- Mates with MS3106A-10SL-4S.

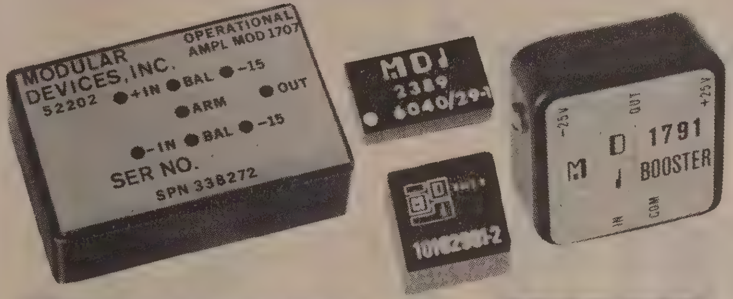
DEVICES, INC.

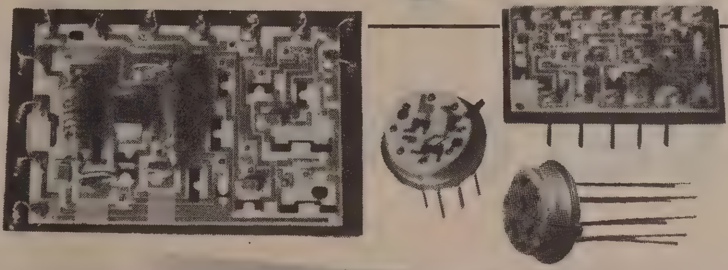
SERVO AMPLIFIERS AND CONTROLS

- 37 Standard AC servo amplifiers; power levels to 40 watts, 60 and 400 Hz. Custom units to 1 KVA.
- AC Servo Accessories: Booster, AGC, Quadrature and Summing Amplifiers Modulators and Demodulators.
- DC and PWM Servo Amplifiers to 1 KVA



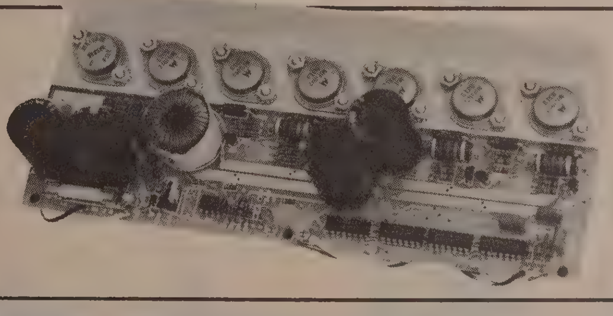
DC OPERATIONAL AND INSTRUMENTATION AMPLIFIERS

- 48 Standard Operational Amplifier Modules: High Voltage, Wide Band, High Slew Rate, Fast Recovery, Low Offset Voltage/Current, etc.
- Ultra Low Noise Audio Operational Amplifiers.
- Replacement Modules for discontinued encapsulated units.



THICK FILM MICROCIRCUITS

- Audio, Power and DC Operational Amplifier Hybrids.
- Power Hybrids: Power Control, DC/DC Converters, PWM Modulators.
- Quick Reaction Custom Hybrid Capability.



MOTOR DRIVES AND CONTROLS

- PWM Servo Drives for DC Motors up to 1 KVA
- Drives and Commutation Electronics for Brushless DC Motors up to 5 KVA
- Thyristor Motor Drives up to 3 HP, Uni and Bi-directional.
- Construction to Mil-E-5400, Mil-E-16400 and related requirements.

Modular Devices, Inc. occupies a modern 15,000 sq. ft. facility, located approximately 50 miles east of New York City.

The company operates under a comprehensive Mil-I-45208 quality system. Our manufacturing capability includes a complete thick film hybrid microcircuit operation, temperature/vibration and environmental test facilities. Modular's extensive in-house capabilities allow us to offer a quick reaction capability for Mil-E-5400, Mil-E-16400 and related requirements.

MINIGLOSSARY SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

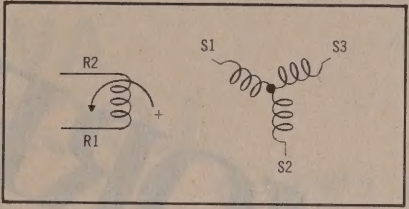
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

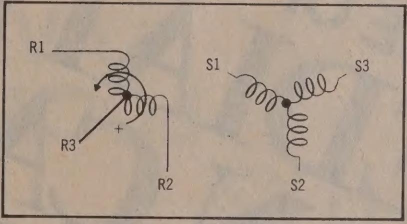
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

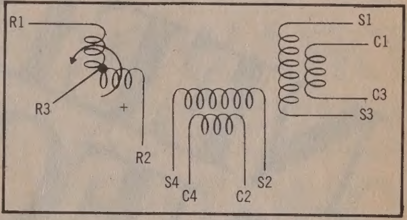
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.
